

Umdoni News

We will heighten our efforts of delivering basic services

Since the first light of democracy, Umdoni Municipality made significant change towards extending basic services to previously disadvantaged communities of Umdoni and opened the gateway to work together towards the creation of jobs, and sustained local economic development to ensure an improved well-being of our community.

While we tick off some successes in our developmental agenda, we still cannot stay at the comfort of these accomplishments as voices of the communities are still echoing. As a caring sphere of government, we will heed to these voices and ensure a better life for all our communities.

Our key focus is to accelerate service delivery of in the previously disadvantaged communities which include housing, electricity, roads and community facilities amongst other community development programmes. Over and above this, we strive to eradicate poverty and one of the direct responses to this challenge is our ongoing Expanded Public Works Programme which is tailored to absorb many of our communities into sustainable jobs.

As Umdoni and government as a whole, we are determined to overcome whatever challenges we encounter in pursuit of the noble course of ensuring a better life for all. We will continue the journey of improving the lives of our communities through enhancing our efforts of delivering basic services.

We also reiterate our firm commitment to the core imperatives of the Freedom Charter and proudly declare our readiness to accelerate the radical transformation of our economy and ensure that Umdoni Municipality does indeed become the JEWEL of the South Coast by the year 2030.
