

DE LILLE TESTS POSITIVE, SELF ISOLATES

Public Works and Infrastructure Minister Patricia de Lille says she has tested positive for Covid-19.

This as many provinces in South Africa declared a third wave of infections. De Lille made the announcement in a tweet yesterday morning.

“Good Morning. I have tested positive for Covid-19. I took the test on Friday after showing some symptoms.

“As per Covid-19 regulations, I immediately self-quarantined. I have also informed those who have come in contact with me to do the same.”

She further cautioned South Africans to ensure they follow Covid-19 protocols.

“As we enter the third wave of the pandemic, I call on South Africans not to let their guard down. Keep wearing your mask correctly covering your nose and mouth. Wash and sanitise your hands regularly. Together we can beat this virus.” — News24.
