February 13, 2023. As with traditional leaders, the delegation was also flanked by the municipal leadership at the district and local levels. The purpose of the site visit was to check on progress and to initiate a process of ensuring that work continues until the project is complete. The Centre is set to be a multipurpose space of national significance and "the gateway into Baviaanskloof," assisting with the promotion of Kouga as a tourist destination. The visit also served as a platform through which the political leadership would interact with the communities.
