TRAGIC ELECTROCUTION INCIDENT STRIKES TSWAING MUNICIPALITY

SANNIESHOF - A tragic incident occurred recently in Sannieshof, within the Tswaing Local Municipality, where two employees were electrocuted while attempting to repair a transformer. The workers, who were not fully equipped with the necessary personal protective equipment (PPE), were exposed to a dangerous situation. One of the employees has been admitted to a private hospital, while the other, an EPWP worker, sustained injuries. The incident has raised serious concerns

about the municipality's safety protocols and the importance of ensuring that all workers are provided with proper protection when handling hazardous tasks. In light of the incident, there have been calls for the municipality to take full responsibility for the workers' safety and to implement stricter safety procedures to prevent such accidents in the future. The community and concerned parties are urging the municipality to prioritize the well-being of its employees and avoid further incidents like this one.
