Municipality employs Expanded Public Workers

Mahikeng Local Municipality has recruited seventy (70) EPWP participants from 35 different wards for a duration of one year to enhance the delivery targets of the EPWP project. The participants have been assigned to various municipal service delivery departments based on the sectors identified by the Departments of Public Works and Roads. The Expanded Public Works Programme (EPWP) is a government initiative designed to alleviate poverty and reduce unemployment by providing temporary work opportunities, primarily for unskilled and vulnerable individuals. This programme also emphasises skills development and the creation of public assets and services.
