3. BACKGROUND OVERVIEW

- 3.1.** PMTE is established under the Ministry of the Department of Public Works and Infrastructure through the Public Finance Management Act (PFMA) and the Government Immovable Asset Management Act (GIAMA) to be a property management and/or trading entity and landlord, responsible for the safe, efficient and economic functioning of State Assets, which it manages, controls and administers on behalf of the State.
- 3.2.** The Property Management Trading Entity, within the Department of Public Works and Infrastructure ensures the effective management of the state's immovable assets to contribute towards economic, social development and transformation of the built environment.
- 3.3.** The PMTE has been created and established as government component within DPWI in terms of Section 7A Public Service Act of 1994 as amended by Cabinet in March 2006 to support DPWI in efficient management of State Immovable Assets at National level. The objectives of PMTE in terms of unutilised state owned immovable assets are as follows:
- To repurpose and reposition the PMTE as a viable and efficient vehicle to deliver a comprehensive value creation through the state immovable asset portfolio;
 - To attract direct private sector investment, projected over R10 billion in the current term of administration within the State Property Portfolio;
 - To unlock value creation and reposition the PMTE as an implementing agent of choice and repute through the introduction and application of new operational model utilised to unlock portfolio value;
 - To develop models which will include a comprehensive life cycle maintenance solution as part of the development proposals to ensure sustainability of the asset condition and performance of state facilities; and

- To provide new model that seeks a long term sustainable portfolio ranging from 15 – 30 years for office accommodation and 45 – 99 years for residential properties;
- The current economic downturn that the country finds itself in, which has seen declining government revenue coupled with spending cuts, consequently, requires a different mind shift and approach from all sectors of society to get the country on its developmental trajectory to address the socio – economic challenges. Approximately 25% (7 803) land parcels and 3% (291) of the improvements are stand – alone and unutilised leading to an expenditure outflow on operating and holding costs.
