## PA-04 (EC): NOTICE AND INVITATION TO TENDER

THE DEPARTMENT OF PUBLIC WORKS AND INFRASTRUCTURE INVITES TENDERS FOR:

<b>Project title:</b>	<b>EAST LONDON &amp; MDANTSANE: BOILERS: MAINTENANCE AND REPAIRS OF BOILERS FOR A PERIOD OF 36 MONTHS</b>		
<b>Bid no:</b>	<b>PET 28/2023</b>	<b>Procurement Plan Reference no:</b>	<b>1705</b>
<b>Advertising date:</b>	<b>Friday, 10 November 2023</b>	<b>Closing date:</b>	<b>Tuesday, 05 December 2023</b>
<b>Closing time:</b>	<b>11:00</b>	<b>Validity period:</b>	<b>84 calendar days</b>

### 1. REQUIRED CIDB GRADING

It is estimated that tenderers should have a CIDB contractor grading designation of **5 ME** or **5 ME\*** or higher.

\* Delete "or select tender value range select class of construction works" where only one class of construction works is applicable

It is estimated that potentially emerging enterprises should have a CIDB contractor grading designation of **select tender value range select class of construction works PE** or **select tender value range select class of construction works PE\*** or higher.

\* Delete "or select tender value range select class of construction works PE" where only one class of construction works is applicable

### 2. FUNCTIONALITY CRITERIA APPLICABLE

2.1 The Bid will be evaluated on Functionality and the following Functionality evaluation criteria will apply and failure to meet minimum functionality score will result in the tenderer being disqualified. From further evaluation:

<b>Functionality criteria<sup>1</sup>:</b>		<b>Weighting factor:</b>
1.	RELEVANT CONSTRUCTION WORKS EXPERIENCE ON PREVIOUS COMPLETED MAINTENANCE OR REPAIR OR NEW INSTALLATION CONTRACTS OF A SIMILAR NATURE, SCOPE AND/OR COMPLEXITY	30
2.	REFERENCES FROM PROJECT MANAGEMENT/ CLIENTS/ CONSULTANTS FOR PROJECTS OF SIMILAR NATURE, SCOPE AND/OR COMPLEXITY	20
3.	FINANCIAL CAPACITY	20
4.	COMPETENCY OF KEY PERSON(S), PROFESSIONAL AND TECHNICAL PERSONNEL	30
5.		
<b>TOTAL</b>		<b>100</b>

(Weights for functionality must add up to 100. Weightings will be multiplied by the scores allocated during the evaluation process to arrive at the total functionality points)

<b>Minimum functionality score to qualify for further evaluation:</b>	<b>50</b>
---	-----------

(Total minimum qualifying score for functionality is 50 Percent, any deviation below or above the 50 Percent, provide motivation below)

1. If a bid fails to achieve the minimum qualifying score for functionality of Fifty percent (50%), it will automatically be regarded as non-compliant, and shall be not considered any further in the evaluation process.
2. In addition to the above, bidders' score the minimum points for each Criteria, (i.e. Criteria No 1, Criteria No 2, Criteria No 3 and Criteria No 4.) If a bidder fails to score the minimum points for each criteria, the bidder's offer will be regarded as non-compliant. The bidder will not be scored further for functionality as this minimum points is also part of the substantive criteria.

<sup>1</sup>The points allocated to each functionality criterion should not be generic but should be determined separately for each tender on a case by case basis.

### 3. EVALUATION METHOD FOR RESPONSIVE BIDS

3.1. The following Evaluation Method for responsive bids will be applicable:

<input type="checkbox"/> Method 1 (Financial offer)	<input checked="" type="checkbox"/> Method 2 (Financial and Preference offer)
---	---

3.2. The 80/20 Preference points scoring system will be applicable for this bid

### 4. RESPONSIVENESS CRITERIA

4.1 Indicate **SUBSTANTIVE RESPONSIVENESS** criteria applicable for this tender. Failure to comply with the criteria stated hereunder **shall** result in the tender offer being disqualified from further consideration:

1.	<input checked="" type="checkbox"/>	Only those tenderers who satisfy the eligibility criteria stated in the Tender Data may submit tenders.
2.	<input checked="" type="checkbox"/>	Tender offer must be properly received on the tender closing date and time specified on the invitation, completed either electronically (if issued in electronic format), or by writing legibly in non-erasable ink. (All as per Standard Conditions of Tender).
3.	<input checked="" type="checkbox"/>	Use of correction fluid is prohibited. Corrections to be crossed out and initialled.
4.	<input checked="" type="checkbox"/>	Submission of a signed bid offer as per the DPW-07 (EC).
5.	<input type="checkbox"/>	Submission of DPW-09 (EC): Particulars of Tenderer's Projects.
6.	<input checked="" type="checkbox"/>	Bidders must comply with DPW-21 (EC): Record of Addenda to tender documents, if any.
7.	<input checked="" type="checkbox"/>	The tenderer shall submit his fully priced Bills of Quantities / Lump Sum Document (complete document inclusive of all parts) together with his tender. All items in the Bill of Quantities must be priced. No items in the bill of quantities must be left unpriced (no blanks).
8.	<input checked="" type="checkbox"/>	There will be a compulsory site briefing meeting and all potential bidders must attend.
9.	<input checked="" type="checkbox"/>	Any addendums or erratums to the bid will be published in the original advertising media, at least 10 working days before the bid closing date. Bids will be evaluated in accordance with the published addendums or erratums.
10.	<input type="checkbox"/>	The tenderer shall submit his fully priced and completed sectional summary- and final summary pages with the tender.
11.	<input checked="" type="checkbox"/>	Bidders will be evaluated as per the Special Conditions of Bid (SCB-01) as amended and approved prior to the tender advert date.
12.	<input checked="" type="checkbox"/>	Bidders must be a) Registered (Active) in the designated contractor grading on CIDB at the closing date of the bid <b>or</b> b) alternatively, bidders who are not registered on CIDB, or whose status is inactive or expired must submit with their bids, at the closing date, a written confirmation from the CIDB that they have already applied for a renewal or for an upgrade of their CIDB status and they will be capable of being registered on CIDB within 21 working days after the closing date of the bid.
13.	<input checked="" type="checkbox"/>	a) Bidders must submit with the bid: i. At least one (1) x testimonial/ reference letter to <b>proof experience</b> of a completed boiler work or steam reticulation work related project with a project value of not less than R1 500 000.00 . The project (s) must have been in the last 8 years. ii. At least one (1) testimonial/ reference letter from a consultants and / or clients to <b>proof satisfactory performance</b> in completed Boiler work or Steam reticulation work related projects with a value of not less than R1 500 000.00. The project (s) must have been in the last 8 years. Please note: The bidder is also allowed to submit a single testimonial (s)/ reference letter(s) which covers both the requirements of a) and b). b) Bidders must submit a valid Bank rating letter or certificate from their Banking Institution stating at least a bank code/ rating of A or B or C or D. The Bank rating letter or certificate must not be older than 3 months.

14.	<input checked="" type="checkbox"/>	<p>The minimum key staff required for this bid is:</p> <p>a) At least two (2) x Mechanical technicians comprising of:</p> <p style="padding-left: 20px;">i. One (1) x Millwright or One (1) x Fitter. A bidder is allowed to offer two (2) x Millwrights or two (2) by Fitters or one (1) x Millwright and one (1) x Fitter and</p> <p style="padding-left: 20px;">ii. Proof of qualifications (which is the fitter or Millwright's Trade Test Certificate) must be submitted with the bid</p> <p>b) At least two (2) x boiler operators. Proof of the qualifications of the boiler operators' qualifications (which is a Boiler Operator Certificate from a Boiler Manufacturer) must be submitted with the bid.</p> <p>c) At least one (1) x Electrician. Proof of the electrician's wireman's license must be submitted with the bid.</p>
-----	-------------------------------------	--

#### ADMINISTRATIVE CRITERIA

#### 4.2 Indicate administrative requirements applicable for this tender. Tenderers may be required to submit the below documents where applicable.

The Employer reserves the right to request further information regarding the undermentioned criteria. Failing to submit further clarification and/or documentation within seven (7) calendar days from request or as specifically indicated, will disqualify the tender offer from further consideration.

1.	<input checked="" type="checkbox"/>	Any correction to be initialled by the person authorised to sign the tender documentation as per PA 15.1 or PA 15.2 resolution of board/s of directors / or PA15.3 Special Resolution of Consortia or JV's.
2.	<input checked="" type="checkbox"/>	Submission of applicable (PA-15.1, PA-15.2, PA-15.3): Resolution by the legal entity, or consortium / joint venture, authorising a dedicated person(s) to sign documents on behalf of the firm / consortium / joint venture.
3.	<input checked="" type="checkbox"/>	Submission of (PA-11): Bidder's disclosure
4.	<input checked="" type="checkbox"/>	Submission of proof of Registration on National Treasury's Central Supplier Database (CSD). Insert the Supplier Registration Number on the form of offer, including proposed sub-contractors if any.
5.	<input checked="" type="checkbox"/>	All parts of tender documents submitted must be fully completed in ink and signed where required.
6.	<input checked="" type="checkbox"/>	Upon request, submission of fingerprints obtainable from local SAPS including any other additional documentation and information required for vetting purposes.
7.	<input type="checkbox"/>	Upon request, submission of a fully completed security clearance application form with supporting documentation and information as required. The security clearance form will be provided by the Employer for projects requiring a security clearance.
8.	<input checked="" type="checkbox"/>	Submission of (PA 40): Declaration of Designated Groups for Preferential Procurement
9.	<input checked="" type="checkbox"/>	Bidders will be evaluated as per the Special Conditions of Bid (SCB-01) as amended and approved prior to the tender advert date
10.	<input checked="" type="checkbox"/>	Submission of DPW-09 (EC): Particulars of Tenderer's Projects: Bidders may use 'own form' – the details of all the tenderer's current and previous projects must however be the same as the details of the DPW-09 (EC) form. Bidders are required to sign and date the DPW-09 / 'own form' and cross-reference the documents if 'own form' is used.
11.	<input checked="" type="checkbox"/>	Submission of DPW-21 (EC): Record of addenda to tender documents: Bidder maybe requested to confirm receipt and or compliance with the "Record of Addenda" if the record of Addenda" was not submitted with the bid at the closing date.
12.	<input checked="" type="checkbox"/>	Upon request, a bidder will be given twenty one (21) working days to correct its CIDB compliance status, if the bidder's CIDB contractor grading status becomes non-compliant after the bid closing date.
13.	<input checked="" type="checkbox"/>	If a bidder submitted with the bid a written confirmation from the CIDB that they have already applied for a renewal or for an upgrade on their CIDB status, such a contractor will be deemed to be capable of being so registered in that particular grading and will be evaluated as such within the 21 workings days period after the closing date.
14.	<input checked="" type="checkbox"/>	Upon request the Department may require the bidder to balance the rates in the Bill of Quantities (BOQ) provided that all items in the BOQ was fully priced.
15.	<input checked="" type="checkbox"/>	PA 10 : FM General Conditions of Tender
16.	<input type="checkbox"/>	

**4.3 Indicate administrative requirements applicable for specific goals, Tenderers will not be required to submit the below document if not provided in the original tender proposals, Failure to comply with the criteria stated hereunder shall result in the tenderer not allocated points for specific goals.**

1	<input checked="" type="checkbox"/>	Submission of (PA-16): Preference Points Claim Form in terms of the Preferential Procurement Regulations 2022
2	<input checked="" type="checkbox"/>	A trust, consortium or joint venture (including unincorporated consortia and joint ventures) must submit a consolidated B-BBEE Certificate issued by a SANAS accredited service provider

**5. METHOD TO BE USED TO CALCULATE POINTS FOR SPECIFIC GOALS**

**5.1 For procurement transaction with rand value greater than R1 Million and up to R50 Million (Inclusive of all applicable taxes) the specific goals listed below are applicable.**

Serial No	Specific Goals	Preference Points allocated out of 20	Documentation to be submitted by bidders to validate their claim for points
1.	An EME or QSE or any entity which is at least 51% owned by black people	10	<ul style="list-style-type: none"> <li>SANAS Accredited BBEE Certificate or sworn affidavit where applicable.</li> </ul>
2.	Located in Eastern Cape for work to be done or services to be rendered in the Eastern Cape area	2	<ul style="list-style-type: none"> <li>Official Municipal Rates Statement which is in the name of the bidder.</li> <li>Or</li> <li>Any Account or statement which is in the name of the Bidder.</li> <li>Or</li> <li>Permission To Occupy from local chief in case of rural areas (PTO) which is in the name of the bidder.</li> <li>Or</li> <li>Lease Agreement which is in the name of the bidder.</li> </ul>
3.	An EME or QSE or any entity which is at least 51% owned by black women	4	<ul style="list-style-type: none"> <li>SANAS Accredited BBEE Certificate or sworn affidavit where applicable.</li> </ul>
4.	An EME or QSE or any entity which is at least 51% owned by black people with disability	2	<ul style="list-style-type: none"> <li>SANAS Accredited BBEE Certificate or sworn affidavit where applicable. and</li> <li>Medical Certificate indicating that the disability is permanent</li> <li>or</li> <li>South African Social Security Agency (SASSA) registration indicating that the disability is permanent</li> <li>Or</li> <li>National Council for Persons with Physical Disability in South Africa registration (NCPDPSA)</li> </ul>
5.	An EME or QSE or any entity which is at least 51% owned by black youth	2	<ul style="list-style-type: none"> <li>ID Copy and SANAS Accredited BBEE Certificate or sworn affidavit where applicable.</li> </ul>

**6. ELIGIBILITY IN RESPECT OF RISK TO THE EMPLOYER:**

**6.1 Standard risk management assessment criteria in respect of tenders received for routine projects in the engineering and construction works environments:**

Tender offers will be evaluated by an Evaluation Committee based on the technical and commercial risk criteria listed hereunder. Each criterion carries the same weight / importance and will be evaluated individually based on reports presented to the Bid Evaluation Committee by the Professional Team

appointed on the project. A tender offer will be declared non-responsive and removed from any further evaluation if any one criterion is found to present an unacceptable risk to the Employer.

In order for the evaluation reports to be prepared by the Professional Team, the Tenderer is obliged to provide comprehensive information on form DPW-09 (EC). Failure to complete the said form will cause the tender to be declared non-responsive and removed from any further consideration. The Employer reserves the right to request additional information over and above that which is provided by the Tenderer on said form. The information must be provided by the Tenderer within the stipulated time as determined by the Bid Evaluation Committee, failing which the tender offer will *mutatis mutandis* be declared non-responsive.

## 6.2 Technical risks:

### **Criterion 1: Experience on comparable projects during the past 5 years to 10 years.**

The tendering Service Provider's experience on comparable projects during the past 5 to 10 years. The number of current and previous comparable projects performed by the Tenderer as per the evaluation report prepared by the Consultant Team, based on its research and inspection of a representative sample of the Tenderer's current and previous work as reflected on form DPW-09 (EC), as well as, if necessary, of any additional work executed by the Tenderer, not reflected on form DPW-09 (EC) or any alternative accepted format. Failing to provide contactable references will result in the tender offer will be *mutatis mutandis* declared non-responsive. A bidder will not be afforded to provide alternative references, if the bidder's initial reference is contactable, or don't respond to the Department. If a reference letter is not listed in on form DPW-09 (EC) or any alternative accepted format, but the reference letter is submitted with the bid and it is valid, it will be considered

Aspects to be regarded as "comparable" includes (but may be extended according to circumstances): size of projects (measured against monetary value or other project quantifying parameters), nature of projects (building, engineering, high/low rise, etc.), locality/area of execution (site-specific influences, knowledge of local conditions, etc.), complexity of project, projects for similar client department irrespective of end purpose of buildings/facilities created or in progress of being created and time scales of projects (normal, fast track, etc.) and stage of its/their development.

### **Criterion 2: Contractual commitment and quality of performance on comparable projects during the past 5 to 10 years.**

Adherence to contractual commitments and quality of performance of comparable current and previous projects performed by the Tenderer during the past 5 to 10 years as per the evaluation report prepared by the Consultant Team, based on its research and inspection of a representative sample of the Tenderer's current and previous work as reflected on form DPW-09 (EC) or any alternative accepted format, as well as, if necessary, of any additional work executed by the Tenderer, not reflected on form DPW-09 (EC). Failing to provide contactable references will result in the tender offer be *mutatis mutandis* declared non-responsive.

Aspects to be considered include, but are not limited to the following:

1. The level of progress on current projects in relation to the project programme or, if such is not available/applicable, to the contractual construction period in general;
2. The degree to which previous projects have been completed within the contractual completion periods and/or extensions thereto, and the extend of penalties imposed;
3. Project performance: time management & programming of works, timeous ordering of materials and appointment of subcontractors;
4. Financial management: payment to suppliers and cash flow problems;
5. Quality of workmanship: extent of reworks and timeous attention to remedial works;
6. Personnel resources: suitably qualified and experienced, turnover in site staff and labour force, specifically site manager and foreman;
7. Personnel management: extent of labour disputes and ability to resolving labour disputes amicably;
8. Sub-contractors: extent of turnover in subcontractors, general liaison and payment problems experienced;
9. Contract administration: contractual aspects such as complying to laws and regulations, insurances, security, submission of required documentation timeously, reaction to written contract instructions, appointments of subcontractors, etc. as can generally be expected in standard/normal conditions of contract.

10. Health & Safety: adherence to regulations and compliance, and number of transgressions & serious incidents.
11. Plant & equipment: sufficient resources on site and in time.
12. Delays: extent of causing delays, submission of claims timeously, and abuse of or exaggerated delay claims.
13. Final account: extent to which the contractor assisted in finalising the final account.

**Criterion 3: Suitably qualified and appropriately experienced human resources**

Allocation of suitably qualified and appropriately experienced human resources, both in respect of principals and/or other staff (contract manager, site agent, site foreman including other professional, technical and/or administrative) of the tendering Service Provider to the project, as proof that the tendering Service Provider will be able to react/respond appropriately to the Services required herein. The Company Organogram with CV's and certified ID's of all principals and employed workforce as well as proof of Professional Registration will be verified. Current and future workload of the tenderer in relation to capacity and capability will also be considered. The tenderer should demonstrate that he or she possesses the necessary professional and technical qualifications and -competence in relation to the scope of work and work to be undertaken.

**Criterion 4: Attendance of compulsory bid clarification meeting, if applicable**

When a bid briefing/ clarification meeting is compulsory, the bidder (an authorised representative of the bidder) must attend a compulsory bid briefing meeting, if applicable.

**6.3 Commercial risks:**

The financial viability assessment evaluates the risk over the life of the construction period, as to whether the tenderer will be able to deliver the goods and services which are specified in the contract and / or be able to fulfil guarantees or warranties provided for in the contract in order to complete the project successfully for the amount tendered.

**7. CONTRACT PARTICIPATION GOAL TARGETS AND CIDB B.U.I.L.D. PROGRAMME**

The contractor shall achieve in the performance of the contract the following Contract Participation Goals (CPGs) as described in PG-01.2 (EC): Scope of Work and PG-02.2 (EC): Pricing Assumptions and in accordance with the feasibility study, which forms part of the specifications in the CPG Section of the Specification of this contract.

(a)	Minimum Targeted Local Manufacturers of Material Contract Participation Goal, in accordance with the cidb Standard for Contract Participation Goals for Targeting Enterprises and Labour through Construction Works Contracts as published in the Government Gazette Notice No. 41237 of 10 November 2017, as amended in cidb Best Practice Project Assessment Scheme Notice No. 43726 of 18 September 2020 – Condition of Contract.	<b>Not applicable</b>
(b)	Minimum Targeted Local Building Material Suppliers Contract Participation Goal in accordance with the cidb Standard for Contract Participation Goals for Targeting Enterprises and Labour through Construction Works Contracts as published in the Government Gazette Notice No. 41237 of 10 November 2017, as amended in cidb Best Practice Project Assessment Scheme Notice No. 43726 of 18 September 2020 – Condition of Contract.	<b>Not applicable</b>
(c)	Minimum Targeted Local Labour Skills Development Contract Participation Goal in accordance with the cidb Standard for Contract Participation Goals for Targeting Enterprises and Labour through Construction Works Contracts as published in the Government Gazette Notice No. 41237 of 10 November 2017, as amended in cidb Best Practice Project Assessment Scheme Notice No. 43726 of 18 September 2020 – Condition of Contract.	<b>Not applicable</b>
(d)	<b>CIDB BUILD Programme:</b> Minimum Targeted Enterprise Development Contract Participation Goal in accordance with the cidb Standard for Indirect Targeting for Enterprise Development through Construction Works Contracts, No 36190 Government Gazette, 25 February 2013, as amended in cidb Best Practice Project Assessment Scheme Notice No. 43726 of 18 September 2020 – Condition of Contract.	<b>Not applicable</b>
(e)	<b>cidb BUILD Programme:</b> Minimum Targeted Contract Skills Development Goal in accordance with the cidb Standard for Developing Skills through Infrastructure Contracts as published in the Government Gazette Notice No. 43495 of 3 July 2020, as amended in cidb Best Practice Project Assessment Scheme Notice No. 43726 of 18 September 2020 – Condition of Contract.	<b>Not applicable</b>
(f)	DPWI National Youth Service training and development programme (NYS) – Condition of Contract.	<b>Not applicable</b>
(g)	Labour Intensive Works – Condition of Contract.	<b>Not applicable</b>

**ACCEPTANCE**

By signing this part of this form of offer and acceptance, the Employer identified below accepts the Tenderer’s offer. In consideration thereof, the Employer shall pay the Service Provider the amount due in accordance with the conditions of contract identified in the contract data. Acceptance of the Tenderer’s offer shall form an agreement between the Employer and the Tenderer upon the terms and conditions contained in this agreement and in the contract that is the subject of this agreement.

**Bid No: PET 28/2023**

**Bid/ Project Description: EAST LONDON & MDANTSANE: BOILERS: MAINTENANCE AND REPAIRS OF BOILERS FOR A PERIOD OF 36 MONTHS**

**The terms of the contract, are contained in:**

- Part 1 Agreements and contract data, (which includes this agreement)
- Part 2 Pricing data
- Part 3 Scope of work.
- Part 4 Site information

and drawings (where applicable) and documents or parts thereof, which may be incorporated by reference into Parts 1 to 4 above.

Deviations from and amendments to the documents listed in the tender data and any addenda thereto as listed in the tender schedules as well as any changes to the terms of the offer agreed by the Tenderer and the Employer during this process of offer and acceptance, are contained in the schedule of deviations attached to and forming part of this agreement. No amendments to or deviations from said documents are valid unless contained in this schedule.

The Tenderer shall within two weeks after receiving a completed copy of this agreement, including the schedule of deviations (if any), contact the Employer’s agent (whose details are given in the contract data) to arrange the delivery of any bonds, guarantees, proof of insurance and any other documentation to be provided in terms of the conditions of contract identified in the contract data. Failure to fulfil any of these obligations in accordance with those terms shall constitute a repudiation of this agreement.

Notwithstanding anything contained herein, this agreement comes into effect, if delivered by hand on the day of delivery, or if delivered by courier within two working days after submission by the Employer to the courier services for a door-to-door delivery to the tenderer, provided that the Employer notifies the tenderer of the tracking number within 24 hours of such submission. Unless the tenderer (now Service Provider) within seven working days of the date of such submission notifies the Employer in writing of any reason why he cannot accept the contents of the schedule of deviation to this agreement if applicable), this agreement shall constitute a binding contract between the parties.

<b>1.1.6. Subject:</b>
<b>Detail:</b>

By the duly authorised representatives signing this agreement, the Employer and the Tenderer agree to and accept the foregoing schedule of deviations as the only deviations from and amendments to the documents listed in the tender data and addenda thereto as listed in the tender schedules, as well as any confirmation, clarification or changes to the terms of the offer agreed by the Tenderer and the Employer during this process of offer and acceptance.

It is expressly agreed that no other matter whether in writing, oral communication or implied during the period between the issue of the tender documents and the receipt by the Tenderer of a completed signed copy of this Agreement shall have any meaning or effect in the contract between the parties arising from this agreement.

**PA-11: BIDDER’S DISCLOSURE**

**1. PURPOSE OF THE FORM**

Any person (natural or juristic) may make an offer or offers in terms of this invitation to bid. In line with the principles of transparency, accountability, impartiality, and ethics as enshrined in the Constitution of the Republic of South Africa and further expressed in various pieces of legislation, it is required for the bidder to make this declaration in respect of the details required hereunder.

Where a person/s are listed in the Register for Tender Defaulters and / or the List of Restricted Suppliers, that person will automatically be disqualified from the bid process.

**2. BIDDER’S DECLARATION**

2.1 Is the bidder, or any of its directors / trustees / shareholders / members / partners or any person having a controlling interest<sup>3</sup> in the enterprise, employed by the state?  YES  NO

2.1.1 If so, furnish particulars of the names, individual identity numbers, and, if applicable, state employee numbers of sole proprietor/ directors / trustees / shareholders / members/ partners or any person having a controlling interest in the enterprise, in table below.

Full Name	Identity Number	Name of State institution

---

<sup>(3)</sup> the power, by one person or a group of persons holding the majority of the equity of an enterprise, alternatively, the person/s having the deciding vote or power to influence or to direct the course and decisions of the enterprise.

Any reference to words “Bid” or Bidder” herein and/or in any other documentation shall be construed to have the same meaning as the words “Tender” or “Tenderer”.  
For External Use

2.2 Do you, or any person connected with the bidder, have a relationship with any person who is employed by the procuring institution?

YES  NO

2.2.1 If so, furnish particulars:

.....  
.....

2.3 Does the bidder or any of its directors / trustees / shareholders / members / partners or any person having a controlling interest in the enterprise have any interest in any other related enterprise whether or not they are bidding for this contract?

YES  NO

2.3.1 If so, furnish particulars:

.....  
.....

**3. DECLARATION**

I, the undersigned, (name)..... in submitting the accompanying bid, do hereby make the following statements that I declare to be true and complete in every respect:

- 3.1 I have read and I understand the contents of this disclosure;
- 3.2 I understand that the accompanying bid will be disqualified if this disclosure is found not to be true and complete in every respect;
- 3.3 The bidder has arrived at the accompanying bid independently from, and without consultation, communication, agreement or arrangement with any competitor. However, communication between partners in a joint venture or consortium<sup>4</sup> will not be construed as collusive bidding.
- 3.4 In addition, there have been no consultations, communications, agreements or arrangements with any competitor regarding the quality, quantity, specifications, prices, including methods, factors or formulas used to calculate prices, market allocation, the intention or decision to submit or not to submit the bid, bidding with the intention not to win the bid and conditions or delivery particulars of the products or services to which this bid invitation relates.
- 3.5 The terms of the accompanying bid have not been, and will not be, disclosed by the bidder, directly or indirectly, to any competitor, prior to the date and time of the official bid opening or of the awarding of the contract.
- 3.6 There have been no consultations, communications, agreements or arrangements made by the bidder with any official of the procuring institution in relation to this procurement process prior to and during the bidding process except to provide clarification on the bid submitted where so required by the institution; and the bidder was not involved in the drafting of the specifications or terms of reference for this bid.

---

<sup>4</sup> Joint venture or Consortium means an association of persons for the purpose of combining their expertise, property, capital, efforts, skill and knowledge in an activity for the execution of a contract.

Any reference to words "Bid" or Bidder" herein and/or in any other documentation shall be construed to have the same meaning as the words "Tender" or "Tenderer".  
For External Use

3.7 I am aware that, in addition and without prejudice to any other remedy provided to combat any restrictive practices related to bids and contracts, bids that are suspicious will be reported to the Competition Commission for investigation and possible imposition of administrative penalties in terms of section 59 of the Competition Act No 89 of 1998 and or may be reported to the National Prosecuting Authority (NPA) for criminal investigation and or may be restricted from conducting business with the public sector for a period not exceeding ten (10) years in terms of the Prevention and Combating of Corrupt Activities Act No 12 of 2004 or any other applicable legislation.

**I DECLARE THAT THE INFORMATION FURNISHED IN PARAGRAPHS 1, 2 and 3 ABOVE IS CORRECT. I ACCEPT THAT THE STATE MAY REJECT THE BID OR ACT AGAINST ME IN TERMS OF PARAGRAPH 6 OF PFMA SCM INSTRUCTION 03 OF 2021/22 ON PREVENTING AND COMBATING ABUSE IN THE SUPPLY CHAIN MANAGEMENT SYSTEM SHOULD THIS DECLARATION PROVE TO BE FALSE.**

## PA-16: PREFERENCE POINTS CLAIM FORM IN TERMS OF THE PREFERENTIAL PROCUREMENT REGULATIONS 2022

This preference form must form part of all tenders invited. It contains general information and serves as a claim form for preference points for specific goals.

**NB: BEFORE COMPLETING THIS FORM, TENDERERS MUST STUDY THE GENERAL CONDITIONS, DEFINITIONS AND DIRECTIVES APPLICABLE IN RESPECT OF THE TENDER AND PREFERENTIAL PROCUREMENT REGULATIONS, 2022**

### 1. GENERAL CONDITIONS

1.1 The following preference point systems are applicable to invitations to tender:

- the 80/20 system for requirements with a Rand value of up to R50 000 000 (all applicable taxes included); and

### 1.2 Preference Points System to be applied

The applicable preference point system for this tender is the **80/20** preference point system.

### 1.3 Points for this tender shall be awarded for:

1.3.1 Price: Maximum 80 points

1.3.2 Specific Goals: Maximum 20 points

### 1.4 The maximum points for this tender are allocated as follows:

Preference Points System to be applied	80/20
PRICE	80
SPECIFIC GOALS	20
<b>Total points for Price and Specific Goals</b>	<b>100</b>

### 1.5 Breakdown Allocation of Specific Goals Points

1.5.1 For procurement transactions with rand value greater than R1 Million and up to R50 Million (Inclusive of all applicable taxes) the specific goals as listed in the table below are applicable:

Serial No	Specific Goals	Preference Points allocated out of 20	Documentation to be submitted by bidders to validate their claim for points
1.	An EME or QSE or any entity which is at least 51% owned by black people	10	<ul style="list-style-type: none"> <li>• SANAS Accredited BBBEE Certificate or sworn affidavit where applicable.</li> </ul>
2.	Located in Eastern Cape for work to be done or services to be rendered in the Eastern Cape area	2	<ul style="list-style-type: none"> <li>• Official Municipal Rates Statement which is in the name of the bidder. Or</li> <li>• Any Account or statement which is in the name of the Bidder. Or</li> <li>• Permission To Occupy from local chief in case of rural areas (PTO) which is in the name of the bidder. Or</li> <li>• Lease Agreement which is in the name of the bidder.</li> </ul>

Serial No	Specific Goals	Preference Points allocated out of 20	Documentation to be submitted by bidders to validate their claim for points
3.	An EME or QSE or any entity which is at least 51% owned by black women	4	<ul style="list-style-type: none"> <li>SANAS Accredited BBBEE Certificate or sworn affidavit where applicable.</li> </ul>
4.	An EME or QSE or any entity which is at least 51% owned by black people with disability	2	<ul style="list-style-type: none"> <li>SANAS Accredited BBBEE Certificate or sworn affidavit where applicable. and</li> <li>Medical Certificate indicating that the disability is permanent or</li> <li>South African Social Security Agency (SASSA) registration indicating that the disability is permanent</li> <li>Or</li> <li>National Council for Persons with Physical Disability in South Africa registration (NCPDPSA)</li> </ul>
5.	An EME or QSE or any entity which is at least 51% owned by black youth	2	<ul style="list-style-type: none"> <li>ID Copy and SANAS Accredited BBBEE Certificate or sworn affidavit where applicable.</li> </ul>

1.6 Failure on the part of the tenderer to submit proof or documentation required in terms of this tender to claim points for specific goals, if the service provider/ tenderer did not submit proof or documentation required to claim for specific goals will be interpreted to mean that preference points for specific goals are not claimed.

1.7 The organ of state reserves the right to require of a service provider/tenderer, either before a tender is adjudicated or at any time subsequently, to substantiate any claim in regard to preferences, in any manner required by the organ of state.

## 2. DEFINITIONS

- “**tender**” means a written offer in the form determined by an organ of state in response to an invitation to provide goods or services through price quotations, competitive tendering process or any other method envisaged in legislation;
- “**price**” means an amount of money tendered for goods or services, and includes all applicable taxes less all unconditional discounts;
- “**rand value**” means the total estimated value of a contract in Rand, calculated at the time of bid invitation, and includes all applicable taxes;
- “**tender for income-generating contracts**” means a written offer in the form determined by an organ of state in response to an invitation for the origination of income-generating contracts through any method envisaged in legislation that will result in a legal agreement between the organ of state and a third party that produces revenue for the organ of state, and includes, but is not limited to, leasing and disposal of assets and concession contracts, excluding direct sales and disposal of assets through public auctions; and
- “**the Act**” means the Preferential Procurement Policy Framework Act, 2000 (Act No. 5 of 2000).

## FORMULAE FOR PROCUREMENT OF GOODS AND SERVICES

### 3.1. POINTS AWARDED FOR PRICE

#### 3.1.1. THE 80/20 OR 90/10 PREFERENCE POINT SYSTEMS

A maximum of 80 or 90 points is allocated for price on the following basis:

**80/20      or      90/10**

$$Ps = 80 \left( 1 - \frac{Pt - P_{min}}{P_{min}} \right) \quad \text{or} \quad Ps = 90 \left( 1 - \frac{Pt - P_{min}}{P_{min}} \right)$$

Where

Ps = Points scored for price of tender under consideration

Pt = Price of tender under consideration

Pmin = Price of lowest acceptable tender

### 3.2. FORMULAE FOR DISPOSAL OR LEASING OF STATE ASSETS AND INCOME GENERATING PROCUREMENT

#### 3.2.1. POINTS AWARDED FOR PRICE

A maximum of 80 or 90 points is allocated for price on the following basis:

$$Ps = 80 \left( 1 + \frac{Pt - P_{max}}{P_{max}} \right) \quad \text{or} \quad Ps = 90 \left( 1 + \frac{Pt - P_{max}}{P_{max}} \right)$$

Where

Ps = Points scored for price of tender under consideration

Pt = Price of tender under consideration

Pmax = Price of highest acceptable tender

### 4. POINTS AWARDED FOR SPECIFIC GOALS

4.1. In terms of Regulation 4(2); 5(2); 6(2) and 7(2) of the Preferential Procurement Regulations, preference points must be awarded for specific goals stated in the tender. For the purposes of this tender the tenderer will be allocated points based on the goals stated in table 1,2 and 3 above as may be supported by proof/ documentation stated in the conditions of this tender:

4.2. In cases where organs of state intend to use Regulation 3(2) of the Regulations, which states that, if it is unclear whether the 80/20 or 90/10 preference point system applies, an organ of state must, in the tender documents, stipulate in the case of—

(a) an invitation for tender for income-generating contracts, that either the 80/20 or 90/10 preference point system will apply and that the highest acceptable tender will be used to determine the applicable preference point system; or

(b) any other invitation for tender, that either the 80/20 or 90/10 preference point system will apply and that the lowest acceptable tender will be used to determine the applicable preference point system,

then the organ of state must indicate the points allocated for specific goals for both the 90/10 and 80/20 preference point system.

**Table 1: Specific goals for the tender and points claimed are indicated per the table below.**

**(Note to organs of state: Where either the 90/10 or 80/20 preference point system is applicable, corresponding points must also be indicated as such.**

**Note to tenderers: The tenderer must indicate how they claim points for each preference point system.)**

The specific goals allocated points in terms of this tender	Number of points allocated (80/20 system) (To be completed by the organ of state)	Number of points claimed (80/20 system) (To be completed by the tenderer)
1. An EME or QSE or any entity which is at least 51% owned by black people	10	
1. Located in Eastern Cape for work to be done or services to be rendered in the Eastern Cape area	2	
2. An EME or QSE or any entity which is at least 51% owned by black women	4	
3. An EME or QSE or any entity which is at least 51% owned by black people with disability	2	
4. An EME or QSE or any entity which is at least 51% owned by black youth	2

## SPECIAL CONDITIONS OF BID (SCB-1)

### 1 INTERPRETATION

- 1.1 The word “Bidder” in these conditions shall mean and include any firm of Contractors, Services Providers or any company or body incorporated or unincorporated or any other legal entities.
- 1.2 The word “Department” in these conditions shall mean the DEPARTMENT OF PUBLIC WORKS AND INFRASTRUCTURE
- 1.3 Any reference to words “Bid” or “bidder” herein and or any other documentation shall be construed to have the meaning as the words “Tender” or Tenderer”.

### 2 PRECEDENCE

- 2.1. If any other condition (bid rule) in the bid document is in contradiction with the “Special Conditions of Bid” the “Special Conditions of Bid” will take preference.
- 2.2. The “Special Conditions of Bid” can only be amended by an official addendum before the closing date of the bid.

### 3 GENERAL BID RULES

- 3.1. “Written” or “in writing” means hand-written in non-erasable ink or any form of electronic or digital writing and or a combination thereof.
- 3.2. The digital and or electronic completion and signing of documents is permitted.
- 3.3. A bidder participates in this bid process entirely at its own risk and cost.
- 3.4. The Department may accept or reject any bid offer and may cancel the bid process (or reject all bid offers at any time) prior to the formation of a contract, due to the following:
  - 3.4.1. due to changed circumstances, there is no longer a need for the goods or services specified in the invitation;
  - 3.4.2. funds are no longer available to cover the total envisaged expenditure;
  - 3.4.3. no acceptable tender is received;
  - 3.4.4. there is a material irregularity in the tender process; or
  - 3.4.5. there is material change in the scope of works.
- 3.5. The Department shall not accept or incur any liability for such cancellation or rejection or acceptance, but will give written reasons for such action upon receiving a written request to do so.
- 3.6. Completed bid documents in a sealed envelope, endorsed with the relevant bid number, bid description and the closing, must be deposited in the bid box as indicated in the bid document.
- 3.7. Bidders must ensure that bids submitted via courier services are deposited by the courier service in the Departmental Bid box, prior to the closing date and time. The Department will not accept responsibility for any bids, which are not timeously deposited in the Bid Box.
- 3.8. A Bid will be treated as a late bid, if it is not received in the bid box. The Department will not accept responsibility for any late depositing of bids or for the non-depositing of bids in the bid box, which are as a result from an act committed or omitted by an official. This is not limited to the following cases:
  - 3.8.1. A Bidder handed over its bid to a departmental official or to the security services personnel timeously, but they omits to deposit the bid in the bid box on or before the closing date and time.
  - 3.8.2. If a courier service delivers the bid to a departmental official or to the security services personnel timeously and it is not deposited in the bid box timeously.
  - 3.8.3. The bid documents were send through mail / Post Office and it is not timely collected and or timely deposited in the Departmental Bid Box.
- 3.9. Bids received after the closing date and time will not be accepted for consideration and where practical, be returned unopened to the Bidder(s).
- 3.10. Bidders who are not registered on the CSD, must register on the CSD within 7 working days, if requested to do so. No award letters or purchase orders or contracts will be signed, with a bidder not registered on the CSD.

- 3.11. The Department will download the following documents, to verify the information submitted by bidders:
- 3.11.1. CSD registration certificate (if the bidder is registered in the CSD)
  - 3.11.2. CIPC registration
  - 3.11.3. CIDB registration
- 3.12. Bidders are not allowed to recruit or shall not attempt to recruit an employee of the Department for purposes of preparation of the bid or for the duration of the execution of this contract or any part thereof.

#### **4 AMBIGUITIES/ CONTRADICTIONS / OMISSIONS**

- 4.1. If a bidder becomes aware of any ambiguities or contradictions or omissions in the bid document or the specifications, drawings or descriptions or functionality or quality, or any part of the bid document, this should be clarified with the Department, at least five (5) working days before the closing time stated in the tender data.
- 4.2. If the Department found, after the closing date of the bid, that there is an ambiguity/ contradiction or omission in the bid document, the Department reserves the right to:
- 4.2.1. If the ambiguity or contradiction or omission in the bid document is of an administrative nature, request bidders to correct any non-compliances caused by the ambiguity or contradiction or omission or
  - 4.2.2. If the ambiguity or contradiction or omission is immaterial, proceed to finalise the procurement process and notify the delegated authority in the submission of the ambiguity or contradiction or omission for the consideration of the approving authority or
  - 4.2.3. Cancel the bid and process

#### **5 PERIOD OF VALIDITY FOR BIDS AFTER CLOSING DATE**

- 5.1 All Bids must remain valid from the closing date for a period as stipulated in the bid document.
- 5.2 The Department reserves the right to request for the validity extensions of bids, should it deemed necessary. The following conditions will apply when the Department request for a validity extension of a bid:
- 5.2.1 The request for a validity extension will be done while the validity period of the bids are still valid.
  - 5.2.2 Bidders have the right to refuse the extension of the validity period of their bids.
  - 5.2.3 If a request for validity extensions are send to bidders while the validity period of the bids are still valid, non-replying to the request for validity extension before the expiry date will be deemed a tacit agreement to the extension of the validity period. The Department will communicate with the affected bidders to confirm such tacit agreement.
  - 5.2.4 Should the bidder not agree with the tacit agreement, the bidder shall be deemed to be non-responsive and not considered for further evaluation.
  - 5.2.5 If a bidder(s) refused a validity extension, it will be deemed that the bidder(s) had withdrawn their bids from the bidding process. The Department reserves the right to continue with its bid evaluation and adjudication of the remaining bids and finalise the process.

#### **6 BRAND NAMES**

- 6.1 Wherever a brand name is specified in this bid document (i.e. in the specifications, pricing schedule or bill of quantities or anywhere in this document), the department's requirement is not limited to the specified brand name, but requires an item similar/equivalent or better than specified.

#### **7 CONTRACTUAL PRICE ADJUSTMENTS**

- 7.1 The Bid will not be subjected to any price escalation, unless indicated otherwise in the bid document.

## 8 AUTHORITY TO SIGN BID DOCUMENTS

- 8.1 No authority to sign (PA 15.1: Resolution of Board of Directors) is required from an enterprise which has only one director or is a sole ownership.
- 8.2 In the case of a bid being submitted on behalf of a company, close corporation or partnership, evidence should be submitted with the bid at the closing time, that the Bid has been signed by a person properly authorised by resolution of the directors or under the articles of the entity. For that purpose, forms PA-15.1-15.3 (Resolution of Board of Directors) are included in the bid document for completion by the relevant Board(s) of Directors
- 8.3 The department further accepts that, in the absence of a PA 15.1: Resolution of Board of Directors, any director or any member of the enterprise may have the authority to bind the enterprise. Therefore the following will apply when only one director or one member of the enterprise signed the bid documents:
  - 8.3.1 The signature of any one of the directors or any one of the members of the enterprise will bind the enterprise and all the directors/ members of the enterprise. This condition will therefore render the bid valid; and
  - 8.3.2 The Department will verify the authority to sign (if deemed necessary) and where possible, may request proof of such authority of the relevant director or relevant member to act on behalf of the enterprise in the form of a “Resolution of the Board of Directors”, if such “ (PA 15.1: Resolution of Board of Directors),” was not submitted with the bid or was not completed or was incorrectly completed,
- 8.4 In the case of a sub-contractor agreement, a joint venture or consortia, the signing of the sub-contractor agreement, or Joint Venture or Consortia agreement by any director or member of each of the parties to the agreement, will render the sub-contractor agreement or Joint Venture or Consortia agreement valid. Therefore:
  - 8.4.1 The Department reserves the right to request from each party to the sub-contractor agreement or Joint Venture or Consortia” agreement, proof of such authority of the relevant director or relevant member to act on behalf of the enterprise(s), in the form of a “Resolution of the Board of Directors”, if it was not submitted with the bid or was not completed or was incorrectly completed,
- 8.5 In the event that a non-member or non-director to the enterprise(s) sign the bid documents and or sign a joint venture or consortia agreement, an “Authority to sign” issued by a director of the enterprise(s) or by the Board of Directors of the enterprise(s) must be submitted with the bid at the closing date. Failure to comply with this requirement at the closing date of the bid, will invalidate the bid submitted.

## 9 CONTRACT PERIOD

- 9.1 The expected contract period is as stipulated in the Contract Data. The construction period is as stipulated within the Contract Data from date of handing over of site in the case of contractors.

## 10 NEGOTIATION WITH THE IDENTIFIED PREFERRED BIDDER

- 10.1 The Bid will be awarded to the bidder who scores the highest PPPFA number of points:
  - 10.1.1 However, should an offer not be market related, the Department reserves the right to negotiate with bidders a reasonable market price /offer?

## 11 AWARD OF CONTRACTS TO TENDERERS NOT SCORING HIGHEST POINTS

- 11.1 The Department reserves the right to award the bid to a tenderer, other than the highest scoring bidder, after having applied an objective criteria (i.e risk assessment, as per the risk assessment criteria in the notice to invitation to tender/quote).

## 12 TAX COMPLIANCE

- 12.1 No tender shall be awarded to a bidder who is non tax -compliant.
- 12.2 All bidders’ tax matters must be in order prior to award.
- 12.3 Bidders’ tax matters will be verified through CSD.

- 12.4 If the recommended bidder's tax status is non-compliant, the recommended bidder must submit written proof from SARS of their tax compliant status or submit written proof that they have made an arrangement with SARS to meet their outstanding tax obligations.
- 12.5 The recommended bidder will be given a maximum of seven (7) working days to correct their tax compliance status.
- 12.6 Failure to comply within seven (7) working days, from the date of the request, the Department will reject the bid submitted by the bidder.

### 13 REGISTRATION AS A VAT-VENDOR

- 13.1 Non-VAT vendors do not have to include VAT in their bid prices.
- 13.2 Non-VAT vendors who submit bids for contracts that would, if successful, take their annual turnover above the threshold of R1 million, must include VAT in the prices quoted and must therefore immediately upon award of the contract, register with the South African Revenue Service (SARS) as VAT vendors.
- 13.3 The award of contract would be conditional (for Non-VAT vendors who included VAT in their prices) conditional pending the successful bidder submitting proof of registration as VAT vendor with SARS within 21 days of award.
- 13.4 Failure to comply within 21 days after being notified to do so will lead to the automatic withdrawal of the "provisional letter of award" and elimination of the bidder's offer.
- 13.5 VAT vendors must include VAT in their bid prices and failure to comply will lead to an automatic elimination of the bidder's offer.
- 13.6 In all other instances, where bidders have excluded VAT from the prices quoted, if the bidder is successful, the letter of award will clearly state that the price at which the contract is awarded is exclusive of VAT and that VAT will not be added on at any stage after the contract has been signed.
- 13.7 If a Non-VAT vendor/ bidder is contracted with the Department with a price which is Excluded Vat, and it becomes a VAT vendor after award or alternatively becomes a VAT vendor due to a cumulative number of awards, the bidder will have to absorb the adverse financial implications of not including VAT in their price quoted. VAT cannot be claimed from the Department for any payments already made or from any future payments.

### 14 CERTIFICATION OF DOCUMENTS

- 14.1 Where so required in the bid documents, bidders are required to submit copies which are certified as a "true copy of the original".
- 14.2 If a bidder submitted an uncertified copy of an original document, or an original copy which is not correctly certified, the bidder will be afforded an opportunity to correct such non-compliance within a minimum period of 48 hours as follows:
- 14.2.1 The corrected noncompliance must be made from the initial copied document and not from a new document or from another document.
- 14.3 All bidders' whose copies complies with the minimum requirements above, will be "deemed in order" and will be subjected for consideration in further evaluation processes, even if the Department did not request any corrections.
- 14.4 No submissions of new or alternative documents or certified copies of new or alternative documents will be allowed after the bid closing date.
- 14.5 The Department will not accept a copy of a copied document and will not provide any bidder an opportunity to correct such a non-compliance.

### 15 REQUIREMENTS FOR A VALID BBBEE CERTIFICATES AND SWORN AFFIDAVITS

- 15.1 A valid B-BBEE Certificate is a B-BBEE Certificate which has not expired at the closing date of the bid.
- 15.2 A "Sworn Affidavit" must comply with the following minimum requirements at the closing date, to be considered valid. If the submitted "Sworn Affidavit" does not comply with the minimum requirements below, the bidder will not be given an opportunity to correct it:
- 15.2.1 The "Sworn Affidavit" must not be expired at the closing date.
- 15.2.2 The BBBEE Level Contributor must be indicated (ticked)
- 15.2.3 The "Sworn Affidavit" must be signed and dated by the bidder (Deponent).

- 15.2.4 The "Sworn Affidavit" submitted must be signed and stamped by the "Commissioner of Oath".
  - 15.2.5 The "latest financial year-end" field must not be left blank.
  - 15.2.6 In respect of "Sworn Affidavits" of the Construction sector, Property Sector, the field (block) where the bidder must confirm its financial information (i.e. Net Assets or Annual Turnover) must be completed (ticked) and must not be left blank or not ticked.
  - 15.2.7 The Commissioner of Oath cannot be an employee or ex officio of the enterprise because, a person cannot by law, commission a sworn affidavit in which they have an interest.
- 15.1 The Department will deal with all other matters, which is not listed under the minimum requirements as reflected above, as administrative matters, should it be deemed necessary.
  - 15.2 For all sectors (example the construction sector, the property Sector and or any sector), a "Sworn Affidavit" issued in terms of the relevant sector must be used. All the minimum requirements applicable to "valid sworn affidavits" as per this "Special Conditions of Bid" will apply.

## **16 AWARDING OF POINTS FOR SPECIFIC GOALS (PA-16)**

- 16.1 In accordance with the PPPFA regulations 2022, bidders will not be eliminated if they do not submit a BBBEE – certificate or a "valid sworn affidavits". The bidder will not be scored for points, but will be evaluated further.
- 16.2 For a bidder to be awarded points for specific goals as per the bid, the bidder must submit proof as specified in the bid document with the bid at the closing date and time.
- 16.3 The requirements of a valid BBBEE-Certificate and or "Sworn Affidavit" as specified in the Special Conditions of Tender applies.
- 16.4 Parties in an unincorporated joint venture must submit its own consolidated B-BBEE certificate, which has not expired at the closing date of the bid.
- 16.5 If a bidder submit with the bid at the closing date the required proof for specific goals, as specified in the bid document, but the proof is not certified or is certified incorrectly, the bidder will be given a minimum of 48 hours to submit a copy which is correctly certified. The copy maybe certified after the closing date of the bid. The copies maybe certified after the closing date of the bid.
- 16.6 Non-submission of the PA-16 form or non-completion the PA-16 form or an incomplete PA-16 form, is not an elimination criteria.
- 16.7 If a bidder submit at the closing date of the bid a valid proof as specified in the bid document, but the bidder's PA 16 is not signed or dated or witnessed or it is not properly completed, or its not completed or submitted or did not claim points, the bidder will be given a minimum of 48 hours to submit or correctly complete its PA 16.
- 16.8 All bidders' whose submitted proof as specified in the bid document and it complies with the minimum requirements above, will be "deemed in order" and will be subjected for consideration in further evaluation, even if the Department did not request any corrections/ certifications.
- 16.9 No submissions of alternative proof for specific goals as specified in the bid document will be allowed after the bid closing date.
- 16.10 Bidders who failed to submit the required proof for points for specific goals, will not be scored for the relevant specific goal(s), but there offers will still be evaluated further.

## **17 BIDDER'S DISCLOSURE/ BIDDER'S DECLARATION (PA - 11)**

- 17.1 The Department will afford a bidder an opportunity to correct its PA-11 form, if the bidder omitted to sign or to complete or to properly complete this form.
- 17.2 A bidder's offer maybe eliminated if the bidder's declaration is proven false during the bid evaluation process.

## 18 FORM OF OFFER AND ACCEPTANCE

- 18.1 The tender amount in words takes precedence, where there is a discrepancy between the amount in figures, and the amount in words will govern.
- 18.2 The successful bidder will be required to balance its rates prior signing of a contract.
- 18.3 If the tenderer makes an obvious grammatical error in the amount of words, the wording will be compared to all the submitted comparative figures (i.e. the amount in figures on the submitted "Form of Offer and Acceptance" and the amount stipulated in the bills of quantities or the final summary page, or activity schedule or pricing schedule) and if deemed the same:
  - 18.3.1 The tenderer's offer will not be disqualified.
  - 18.3.2 The tenderer can be requested to correct the error and ratify its "Form of Offer and Acceptance".
- 18.4 If there is no amount in words, the amount in figures on the submitted "Form of Offer and Acceptance" will be compared to all the submitted comparative figures (i.e. the amount stipulated in the submitted bills of quantities or the final summary page or the activity schedule, or the pricing schedule) and if deemed the same:
  - 18.4.1 The tenderer's offer will not be disqualified.
  - 18.4.2 The tenderer can be requested to correct the omission of the amount in words and ratify its "Form of Offer and Acceptance".
- 18.5 In addition to the above, the form of Offer and Acceptance, must at the closing date of the bid, comply with the following minimum criteria:
  - 18.5.1 It must be signed by an authorised person of the Bidder;
  - 18.5.2 The Surname with Initials/ Name of the authorised person must be clearly indicated;
  - 18.5.3 The date on the form of offer must be completed;
  - 18.5.4 The name of the bidder/ legal entity must be clearly indicated.
- 18.6 If both the "amount in words" and the "amount in figures" is not completed, the bid will not be considered further.

## 19 CORRECTION OF ERRORS

- 19.1 Only the authorised signatory to the tender should initial corrections in the tender document.
- 19.2 All corrections must be in non-erasable ink and the use of correcting fluid (tippex) is prohibited.
- 19.3 In the event that a correction is not initialled or the correction is initialled by a person not having the prescribed authority, the Department will:
  - 19.3.1 Seek the necessary clarification from the tenderer and;
  - 19.3.2 If accepting the response from the tenderer, evaluate the bid further and or;
  - 19.3.3 Allow the tenderer to correct/ ratify any noncompliance, where necessary.

## 20 CONDITIONS WITHDRAWN FROM THE GENERAL CONDITIONS OF CONTRACT

- 20.1 N/A

## 21 INCOMPLETE SECTIONS OR SCHEDULES IN BID DOCUMENTS

- 21.1 Bidders' who omitted or incorrectly completed a section(s) or a schedule(s) in the bid document, but have submitted with the bid the required/ specified proof or supportive documents for that particular sections of the document, maybe allowed to correct such non-compliance.

## 22 TESTIMONIALS

- 22.1 The word "testimonial" and "reference letter" means the same
- 22.2 Testimonials must be submitted with the bid and must comply with the following minimum requirements to be considered valid:
  - 22.2.1 The testimonials must be signed.

- 22.2.2 The project must be within the period specified in the bid.
- 22.2.3 The testimonial's contract period and R- value must be for a single contract and not the sum of various contracts.
- 22.2.4 The project must have a minimum contract period as specified in the bid.
- 22.3 The testimonial must clearly indicate the contract start date and contract end date/ practical completion date.
- 22.3.1 The testimonial must indicate the client's name, contact particulars and Email address.
- 22.3.2 The testimonial must be dated.
- 22.3.3 The testimonial must be stamped by the client. If the testimonial is not stamped, the Department may still consider the testimonial after the authenticity has been verified by the Department.
- 22.4 In the case of a rates based contract, the actual expenditure or work certified will be deemed the contract value.
- 22.5 The bidders performance should be indicated in the testimonial either as (or indicated as a combination of):
- 22.5.1 An unacceptable performance or
- 22.5.2 Not unacceptable, but needs Improvement or
- 22.5.3 A Satisfactory performance or
- 22.5.4 Above Satisfactory
- 22.5.5 Excellent performance
- 22.6 If the bidder's performance is not indicated in the testimonial, the Department will be deemed that the bidder's performance was unsatisfactory and will not verify the contrary.
- 22.7 It is the bidder's responsibility to ensure that their references are contactable.
- 22.8 The Department will only engage once with the bidder to provide alternative contact numbers to verify the testimonial, if it is not contactable on the Department's first attempt.
- 22.9 If the Department receives no response on the bidder's testimonials, the bidder will be deemed to have performed unsatisfactory work on the relevant project. Also a "no comment" reply will be deemed as an unsatisfactory performance.
- 22.10 Bidders will not be afforded to submit new testimonials, if their initial references/ testimonials are not responding.
- 22.11 An appointment letter/ award letter and or signed contract are not accepted as a testimonial.
- 22.12 Bidders may use the testimonial template provided in the bid document (if included in the Bid Document) or may use the format of their clients. The testimonial must cover the minimum requirements as specified in these special conditions.

## **23 POINTS FOR SPECIFIC GOALS**

- 23.1 To qualify for points for Specific goals, as specified in the "Invitation to Bid" and the "PA-16", bidders must comply with the requirements at the closing date of the bid.
- 23.2 It is the bidder's responsibility to ensure that it submit the correct evidence at the closing date of the bid, for the validation of the points the bidder is claiming.
- 23.3 Bidder's will not be given an opportunity to submit evidence after closing date, if the evidence is not submitted or if incorrect evidence was submitted.

## 24 THE OTHER ADDITIONAL INFORMATION WHICH MAY BE REQUIRED FOR EVALUATION

## 25 DISCLAIMER

25.1 It is impractical and cumbersome for the Department to communicate with all qualifying bidders to correct/ ratify all eligible matters as articulated in this "Special Conditions of Bid". The Department therefore reserves the right and discretion, during its evaluation and other administrative processes to:

- 25.1.1 Limit its correspondences for corrections/ ratifications/ clarities to potential higher point scoring bidders only and to
- 25.1.2 Further evaluate any potential qualifying lower scoring bidder(s) as "deemed responsive" or giving points, etc, without requesting the corrections/ ratifications of a matter which is eligible as per the "Special Conditions of Bid".

– End Special Conditions of Bid –  
(Version: Approved 29 August 2023)

# FACILITIES MANAGEMENT CONDITIONS OF CONTRACT (DPW)

## SEPT. 2005 VERSION 1

## PA-10 (FM): CONDITIONS OF CONTRACT

### 2. DEFINITIONS

- 1.1. *The following words and expressions shall have the meanings hereby assigned to them except where the context otherwise requires:*
- 1.1.1. *“Additional Services” are increases in the quantity of the routine Services detailed in the Scope of Works.*
- 1.1.2. *“Bill of Quantities” means the document so designated in the Pricing Data that describes the Services and indicates the quantities and rates associated with each item which the Employer agrees to pay the Service Provider for the Services completed;*
- 1.1.3. *“Certificate of Completion” means the certificate issued by the Service Manager signifying that the Contract has expired;*
- 1.1.4. *“Commencement Date” means the date on when the Service Provider is notified of the Employer’s acceptance of its offer;*
- 1.1.5. *“Contract” means the Contract signed by the Parties and of which these Conditions of Contract form part of, and such amendments and additions to the Contract as may be agreed in writing between the Parties;*
- 1.1.6. *“Contract Data” means the specific data, which together with these Conditions of Contract, Scope of Works and Pricing Data collectively describe the risks, liabilities and obligations of the contracting Parties and the procedures for the administration of the Contract;*
- 1.1.7. *“Contract Period” is from Commencement Date for the period stated in the Contract Data;*
- 1.1.8. *“Contract Price” means the price to be paid for the Services in accordance with the Pricing Data, subject to such additions thereto or deductions there from as may be made from time to time under the provisions of the Contract;*
- 1.1.9. *“Contract Sum” refers to the amount stated by the Service Provider in the Form of Offer and Acceptance;*
- 1.1.10. *“CPAP” means contract price adjustment provisions used for the adjustment of fluctuations in the cost of labour, plant and materials and goods as stated in the Contract Data;*
- 1.1.11. *“Day” means a calendar day;*
- 1.1.12. *“Drawings” means all drawings, calculations and technical information which are made available to the Service Provider for inspection at a venue and time to be announced by the Service Manager and any modifications thereof or additions thereto from time to time approved in writing by the Employer or delivered to the Service Provider by the Employer;*
- 1.1.13. *“Employer” means the contracting Party named in the Contract Data who appoints the Service Provider;*
- 1.1.14. *“Equipment” includes all appliances, tools implements, machinery, articles and things of whatsoever nature required in or for the rendering, completion or defects correction of the Services but does not include materials;*

- 1.1.15.** *"Facilities" means the land and buildings, detailed in the Scope of Works, and any additions, or omission thereto, made available by the Employer for the purposes of the Contract, on, under, over, in or through which the Services are to be rendered or carried out;*
- 1.1.16.** *"Form of Offer and Acceptance" means the written communication by the Employer to the Service Provider recording the acceptance of the Service Provider's offer;*
- 1.1.17.** *"Identified Projects" means any projects, other than routine Services, identified and agreed to by the Parties during the Contract period or any extensions thereto, to be completed in terms of the Contract.*
- 1.1.18.** *"Materials" includes all materials, commodities, articles and things required to be furnished under the Contract for the execution of the Services;*
- 1.1.19.** *"Month" refers to the period commencing on a certain day of a month to the day preceding the corresponding day of the next month;*
- 1.1.20.** *"Parties" means the Employer and the Service Provider;*
- 1.1.21.** *"Pricing Data" means the document that contains the Bill of Quantities and provides the criteria and assumptions, which it will be assumed in the Contract were taken into account by the Service Provider when developing his prices;*
- 1.1.22.** *"Services" means all the work to be performed by the Service Provider during the Contract Period in accordance with the Contract, as more fully set out in the Scope of Works, as amended from time to time by written agreement between the Parties;*
- 1.1.23.** *"Service Provider" means the Tenderer, as named in the Contract Data, whose offer has been accepted by or on behalf of the Employer and, where applicable, includes the Service Provider's heirs, executors, administrators, trustees, judicial managers or liquidators, as the case may be, but not, except with the written consent of the Employer, any assignee of the Service Provider;*
- 1.1.24.** *"Service Manager" means the representative of the Employer named as the Service Manager in the Contract Data. The Employer reserves the right to replace the said Service Manager, by written notice to the Service Provider, without the need to furnish reasons therefor;*
- 1.1.25.** *"Scope of Work" refers to the document which defines the Employer's objectives and requirements and specifications and any other requirements and constraints relating to the manner in which the Services must, or may, be provided or performed;*
- 1.1.26.** *"Service Period" refers to the period indicated in the Contract Data during which the Service Provider shall render the Services required in terms of the Contract;*
- 1.1.27.** *"Transitional Stage" refers to the period indicated in the Contract Data, which commences immediately on the expiry of the Service Period, and during which the Services to be provided by the Service Provider shall include, inter alia, the provision and transfer to the incoming service provider of managerial support and information, as detailed in the Scope of Works.*

### **3. INTERPRETATION**

#### **2.1. In this Contract, except where the context otherwise requires:**

- 2.1.1** *The masculine includes the feminine and the neuter, vice versa;*

- 2.1.2 *The singular includes the plural; and vice versa*
- 2.1.3 *Any reference to a natural person includes a body corporate, firm, association or consortium/joint venture/partnership, vice versa.*
- 2.2. *The headings to the clauses of this Contract are included for reference purposes only and shall not affect the interpretation of the provisions to which they relate.*
- 2.3. *Words and phrases defined in any clause shall bear the meanings assigned thereto.*
- 2.4. *The various parts of the Contract are severable and may be interpreted as such.*
- 2.5. *The expressions listed in clause 1 bear the meanings as assigned thereto and cognate expressions bear corresponding meanings.*
- 2.6. *If any provision in a definition clause is a substantive provision conferring rights or imposing obligations on any Party, effect shall be given to it as if it were a substantive clause in the body of the Contract, notwithstanding that it is only contained in the interpretation clause.*
4. **DURATION**
  - 3.1. *The rights and obligations of the Parties to this Contract shall commence on the Commencement Date.*
  - 3.2. *Subject to the terms of clauses 33 and 34 relating to breach and termination respectively, the Contract will commence on the Commencement Date and terminate on the expiry of the Contract Period, unless it is extended in terms of clause 3.3.*
  - 3.3. *The terms or duration of the Contract may be extended as a result of bona fide negotiations between the Parties. No extension of term or duration of the Contract shall however be valid unless the terms and conditions of such extension has been reduced to writing and signed by the authorised representatives of both Parties.*
5. **RIGHTS AND OBLIGATIONS OF THE EMPLOYER**
  - 4.1. *The Employer shall give access to or supply the Service Provider with:*
    - 4.1.1 *All relevant, available data and information required and requested by the Service Provider for the proper execution of the Services; and*
    - 4.1.2 *Such assistance as shall reasonably be required by the Service Provider for the execution of its duties under the Contract.*
6. **RIGHTS AND OBLIGATIONS OF THE SERVICE PROVIDER**
  - 5.1. *The Service Provider shall, in executing his obligations, comply with the Service Manager's written instructions on any matter relating to the Services.*
  - 5.2. *The Service Provider shall take instructions only from the Service Manager or other persons authorised by the Service Manager in terms of Clause 6.*
  - 5.3. *The Service Provider shall not have the power of attorney or authority to enter into any contract or to otherwise bind or incur liability on behalf of the Employer, save where prior written authorisation has been obtained.*

- 5.4. *The Service Provider shall ensure that it, its employees, agents and representatives have the relevant experience and capacity necessary for rendering of the Services with the reasonable degree of skill, care and diligence that may be expected of professionals providing services similar to the Services.*
- 5.5. *Should any member of the Service Provider's team, in the opinion of the Service Manager or occupants of the Facilities, misconduct himself or is incompetent or negligent in the delivery of the Services, or whose presence on the Facilities is otherwise considered by the Service Manager, or occupants of the Facilities, on reasonable grounds, to be undesirable, the Employer may, in writing and together with reasons therefor, request that such person be removed. Such person shall not again be employed on the Services without the prior written consent of the Employer.*
- 5.6. *The Service Provider undertakes to effect such removal, as referred to in 5.5 above, within a day of receipt of the Employer's written request.*
- 5.7. *The Service Provider shall ensure that reasonable levels of care and responsibility are exercised when using items belonging to the Employer in the delivery of the Services.*
- 5.8. *During the ongoing provision of the Services the Service Provider shall at all times keep the Facilities clean and in a safe condition.*
- 5.9. *Notwithstanding anything herein contained to the contrary, it is specifically agreed that the appointment of the Service Provider shall not create an employment contract or relationship between the Parties and the Service Provider or his employees shall therefore not be entitled to any benefits to which the employees of the Employer may be entitled.*
7. **SERVICE MANAGER**
- 6.1. *The Service Manager shall administer the Contract on behalf of the Employer in accordance with the provisions of the Contract.*
- 6.2. *The Service Manager may delegate any of his powers and authority and may cancel such delegation, on the prior written notification thereof to the Service Provider.*
- 6.3. *Such delegation shall continue in force until the Service Manager notifies the Service Provider in writing that the delegation is terminated.*
- 6.4. *The Service Provider may at any time, prior to giving effect thereto, refer any written order or instruction of the Service Manager's delegatee to the Service Manager who shall confirm, reverse or vary such order or instruction.*
8. **SECURITY**
- 7.1. *The Service Provider shall provide to the Employer security in the amount and in the form set out in the Contract Data and any expenditure incurred in doing so shall be borne by the Service Provider.*
- 7.2. *Should the Service Provider fail to select the security to be provided or should the Service Provider fail to provide the Employer with the selected security within 21 days from Commencement Date, it shall be deemed that the Service Provider has selected a security in the form of a retention of 2.5 % of the Contract Sum (excl. VAT).*
9. **SECURITY CLEARANCE**

8.1. *In the event of security clearance becoming necessary, the Service Provider, any subcontractors and all human resources utilized by the Service Provider undertake to undergo security clearance, for which purpose the necessary forms will be made available to the Service Provider at the relevant time by the Employer. The Service Provider accepts that if he or any of his human resources refuses to undergo the required security clearance, they will not be allowed on the Facilities to render the Services.*

8.2. *It is required that all persons engaged in the rendering of the Services shall be easily identifiable and where required, security cleared.*

## 10. CONFIDENTIALITY

9.1. *The Service Provider undertakes to keep any and all information, of whatever nature, relating to the Contract or which he becomes privy to due to his presence at the Facilities, strictly confidential and such shall not be sold, traded, published or otherwise disclosed to anyone in any manner whatsoever, including by means of photocopy or other reproduction, without the Employer's prior written consent. As disclosure or improper use of the confidential information, without the Employer's prior written consent, will cause the Employer harm:*

9.1.1 *the Service Provider shall be liable for any loss or damages suffered by the Employer and shall indemnify the Employer against any claims by third parties as a result of such unauthorised disclosure or use thereof, either in whole or in part; and/or*

9.2.1 *the Employer shall be entitled to cancel the Contract*

9.2. *The Service Provider shall be entitled to disclose such confidential information to the following persons, who have a clear need to know interest, in order to assist with the rendering of the Services on the Contract:*

9.2.1 *employees, officers and directors of the Service Provider; and*

9.2.2 *any professional consultant or agent retained by the Service Provider for the purpose of rendering the Services, provided that the identity of such consultant or agent is made known to the Employer in writing and the Employer acknowledges in writing that the confidential information may be disclosed to such person.*

9.3. *The Service Provider shall be responsible for ensuring that all persons to whom the confidential information is disclosed under this Contract shall keep such information confidential and shall not disclose or divulge the same to any unauthorised person.*

9.4. *The confidential information shall remain the property of the Employer and the Employer may demand the return or destruction thereof, at the cost of the Service Provider, at any time upon giving written notice to the Service Provider. Within ten (10) days of receipt of such notice, the Service Provider shall return all of the original confidential information and shall destroy all copies and reproductions (both written and electronic) in its possession or in the possession of persons to whom it was disclosed and furnish a certificate to the Employer stating as much.*

## 11. AMBIGUITY IN DOCUMENTS

10.1. *The several documents forming the Contract are to be taken as mutually explanatory of one another and any ambiguity in or discrepancy between them shall be explained and, if necessary, rectified by the Service Manager who shall thereupon issue to the Service Provider a written explanation giving details of the adjustments, if any, and a written instruction directing what Service, if any, is to be delivered.*

## 12. INSURANCES

11.1. *It is the responsibility of the Service Provider to assess his risks on this project and to ensure that he obtains and maintains the adequate insurances to cover such risks.*

## 13. ACCESS TO THE FACILITIES AND COMMENCEMENT OF THE SERVICES

12.1. *The Service Provider shall provide the Employer, within 21 days of the Commencement Date, with an acceptable health and safety plan and such other information required in terms of the Occupational Health and Safety Act (85 of 1993).*

12.2. *The Service Period shall commence 30 days from Commencement date, or on such other date as maybe specified in the Contract Data*

12.3. *Notwithstanding the provision of 12.2, the Service Provider shall be given access to the Facilities or portions thereof, only after the provision by the Service Provider of an acceptable health and safety plan and of security clearance being obtained in terms of Clauses 12.1 and 8.1 respectively.*

12.4. *The Service Provider shall be given access to the Facilities or portions thereof and shall render the Services in accordance with its programme, referred to in clause 13 or after the receipt by him of a written instruction to this effect.*

12.5. *If the Employer fails to give the Service Provider access to the facility or any portion thereof for any reason other than default by the Service Provider and the Service Provider suffers additional costs as a result thereof, the Service Provider shall be entitled to make a claim therefor provided that the Service Provider is able to prove his claim and that he has taken all reasonable steps to mitigate the additional costs.*

## 14. PROGRAMME

13.1. *The Service Provider shall deliver to the Service Manager within 14 days from Commencement Date, a realistic programme and a cash flow for the delivery of the Services. The programme shall describe and detail the order in which the Services are to be rendered and shall be subject to the approval of the Service Manager, which written approval shall not be unreasonably withheld.*

13.2. *The Service Provider shall, on receipt of a written request from the Service Manager, furnish the Employer with any documents or information, of whatever nature, in support of the programme and/or in relation to the manner in which the Services are to be rendered and/or the resources to be supplied and used in the rendering of the Services and/or progress of the various parts of the Contract; and/or a detailed cash flow forecast.*

13.3. *A programme and the cash flow forecast will be submitted in terms of 13.1 and reviewed quarterly or as circumstances may require.*

13.4. *Agreement to the programme by the Service Manager or any adjustment thereto will not alter the responsibilities of the Service Provider in terms of this Contract.*

## 15. SUBCONTRACTING

14.1. *The Service Provider may subcontract any part of the Services at its discretion. The subcontracts shall incorporate the applicable terms, conditions and requirements of this Contract.*

14.2. *Subcontracting by the Service Provider shall not be construed as relieving the Service Provider from any obligations under the Contract or imposing any liability on the Employer.*

**16. INTELLECTUAL PROPERTY RIGHTS INDEMNITY**

15.1. *The Service Provider undertakes to obtain the necessary consent from the proprietors or their licensees should the Service Provider make use of the intellectual property of any other person.*

15.2. *The Service Provider further indemnifies the Employer against any claim or action (including costs on an attorney and client scale) caused by or arising from the failure to obtain such consent.*

**17. COMPLIANCE WITH LEGISLATION**

16.1. *This clause applies to legislation emanating from national and provincial government as well as that of any local authorities in whose area of jurisdiction the Facilities fall and which have a bearing on the delivery of the Services and Facilities under this Contract.*

16.2. *All the applicable legislation, which does not specifically allow discretion in respect of compliance by the Employer, shall be followed exactly as intended by such legislation regardless of any instructions, verbal or in writing, to the contrary.*

16.3. *Should any applicable legislation allow discretion in respect of compliance by the Employer it shall be followed exactly as intended by the relevant legislation as if no discretion is allowed until such time as specific instructions in writing are issued to the Service Provider by the Service Manager.*

16.4. *The Service Provider shall in the provision of the Services comply with the provisions of, and give all notices and pay all fees, taxes, levies and other charges required to be given or paid in terms of any legislation or imposed by any other body or person. The Service Provider hereby indemnifies the Employer against any liability for any breach of the provision of this clause.*

16.5. *It is the responsibility of the Service Provider to obtain the consents, permissions and/or permits, referred to in Clause 16.4, in the provision of the Services.*

16.6. *The Service Provider shall not have a claim against the Employer, and the Employer shall not be liable to refund the Service Provider for any of the fees, taxes, levies and other charges referred to Clause 16.4.*

**18. REPORTING OF INCIDENTS**

17.1. *In addition to the above, the Service Provider shall, as soon as possible, notify the Employer in writing of any incidents at the Facilities, which resulted or could have resulted in damage to property or injury or death to persons.*

17.2. *The Service Provider shall verbally notify the Service Manager of any of the incidents referred to in 17.1 immediately after the occurrence thereof.*

17.3. *The Service Provider shall follow up the verbal notification referred to in 17.2 with a detailed written report on such incidents to the Service Manager within the time frame indicated by the Service Manager, but in any event within 48 hours of the incident.*

17.4. *The written report referred to in 17.3 shall provide for all incidents, which resulted in injury, death or damage to property.*

17.5. *The Service Provider shall notify the Employer immediately, on becoming aware of the Contract requiring him to undertake anything that is illegal or impossible*

## 19. NUISANCE

18.1. *The Service Provider shall deliver the Services in a manner that shall not cause unnecessary noise, nuisance, or hinder the normal activities in the Facilities.*

18.2. *The Service Provider hereby indemnifies the Employer against any liability arising out of the Service Provider's non-compliance with his obligations in terms of Clause 18.1.*

## 20. MATERIALS, WORKMANSHIP AND EQUIPMENT

19.1. *All Services delivered, and materials and workmanship shall comply with the requirements of this Contract, the manufacturer's specification; good industry practice and the Service Manager's written instructions and shall be suitable for the purpose intended.*

19.2. *The Service Provider shall, in accordance with the Scope of Works or if instructed by the Service Manager, carry out tests demonstrating the acceptability of the relevant Services provided, or the suitability of materials or equipment to be used.*

19.3. *The Service Provider shall provide all necessary assistance, labour, materials, testing equipment and instruments for the purpose of such tests to be performed by himself or, if so instructed by the Service Manager, for the purposes of tests to be performed by any other person.*

19.4. *All costs for tests carried out shall be deemed to be included in the Service Provider's prices*

19.5. *Copies of the reports on the tests referred to in Clause 19.2 shall be forwarded by the Service Provider to the Employer within 10 days of the tests being completed.*

## 21. URGENT WORK

20.1. *The Employer may, by itself or through another service provider, effect any remedial or other repair work which becomes necessary due to no act or omission on the part of the Service Provider.*

20.2. *If the remedial or repair work became necessary due to an act or omission on the part of the Service Provider, its employees, agents or representatives, the Service Provider shall effect such remedial or repair work at its own cost.*

20.3. *If the remedial or repair work is urgently necessary due to an act or omission on the part of the Service Provider, its employees, agents or representatives and the Service Provider refuses to or is not available or able to effect such remedial or repair work, the Employer may effect such remedial or repair work either by itself or through another service provider.*

20.4. *If the Employer effects the remedial or repair work in terms of 20.3, then the Employer may recover such costs, losses or damages from the Service Provider or by deducting the same from any amount still due under this Contract or under any other contract presently or hereafter existing between the Employer and the Service Provider and for this purpose all these contracts shall be considered one indivisible whole.*

## 22. INDEMNIFICATIONS

21.1. *The Service Provider shall be liable for and hereby indemnifies the Employer against any liability, claim, demand, loss, cost, damage, action, suits or legal proceedings whether arising in common law or by statute consequent upon:*

21.1.1 *personal injuries to or the death of any person arising out of, related to, occasioned by, attributed to, or in the cause of or caused by the rendering of the Services;*

21.1.2 *loss of or damage to any movable or immovable or personal property or property contiguous to the Facilities whether belonging to or under the control of the Employer or any other body or person arising out of, related to, occasioned by, attributed to, or in the cause of or caused by reason of the rendering of the Services;*

21.1.3 *any liens, attachments, charges or other encumbrances or claims upon or in respect of any materials parts, work-in-process or finished work furnished to, or in respect of which any payment has been made by the Employer.*

21.2. *The Employer accepts liability for all acts or omissions of its employees, agents or representatives.*

## 23. VARIATIONS

22.1. *The Employer may at any time during the Contract Period, vary the Services by way of additions, omissions, or substitutions.*

22.2. *No variation by the Employer of whatever nature shall vitiate the Contract.*

22.3. *Any Services required by the Employer outside of the Services as referred to in the Scope of Works will be regarded as being Identified Projects and shall be dealt with under clause 23 and shall be executed as a variation order.*

22.4. *The Service Provider shall inform the Employer of any instructions that are deemed to be Additional Services prior to such instructions being executed.*

22.5. *Additional Services will only be executed by the Service Provider after receipt by him of a written instruction from the Service Manager.*

22.6. *If no prior written authorisation, as required in 22.5 above, has been obtained, the Employer shall not reimburse the Service Provider for the Additional Services so executed, and the Service Provider agrees that it shall not have a claim for payment for such Additional Services.*

22.7. *The Additional Services will be valued at the rates in the Pricing Data.*

## 24. IDENTIFIED PROJECTS

23.1. *The Service Provider shall inform the Employer of any instructions that are deemed to be Identified Projects prior to such instructions being executed.*

23.2. *The Employer is not obliged to engage the services of the Service Provider on Identified Projects. The Employer may, by itself, through another service provider or through the Service Provider effect the services/works under Identified Projects.*

23.3. *Identified Projects will only be executed by the Service Provider after receipt by him of a written instruction from the Service Manager.*

- 23.4. *If no prior written authorisation, as required in 23.3 above, has been obtained, the Employer shall not reimburse the Service Provider for the Identified Projects so executed, and the Service Provider agrees that it shall not have a claim for payment for such Identified Projects.*
- 23.5 *In respect of the Identified Projects, the written instruction referred to in 23.3 shall:*
- (a) *describe the services/works required to be executed by the Service Provider under the Identified Project;*
  - (b) *state the due commencement and completion dates of the relevant Identified Project;*
  - (c) *state the total cost of the relevant Identified Project as agreed to between the Parties; and*
  - (d) *any additional requirements, conditions of contract and/or restrictions, other than those already stated in the Contract, that will be applicable.*
- 23.6 *Within 14 days of receipt of the written instruction referred to in 23.5, the Service Provider shall furnish the Employer with a realistic programme and a cash flow for the relevant Identified Project as required in 13.*
- 23.7 *Where an Identified Project comprises services/works that are of the same or similar character executed under the same or similar conditions as those to which the rates in the Pricing Data apply, it shall be valued at such rates.*
- 23.8 *Where an Identified Project comprises services/works that are not of the same or similar character executed under the same or similar conditions as those to which the rates in the Pricing Data apply, it shall be valued at market related rates to be agreed to in writing between the Employer and the Service Provider and in advance of executing the Identified Project. Failing agreement, the rates applicable shall be as determined by the Employer.*
- 23.9 *If the Service Provider fails to complete the Identified Project by the completion date specified in the written instruction referred to in 23.3, then the Service Provider will be liable for a penalty, at the rate stated in the Contract Data, for every day that lapses from the due completion date of the relevant Identified Project to the date of the actual completion of such Identified Project.*
- 23.10 *If the Identified Projects are delayed by variations, omissions, additions, substitutions or organised work stoppages by any workman not due to any action on the part of the Service Provider, exceptionally inclement weather, any substantial increase in provisional quantities or any other cause beyond the Service Provider's control, including delays caused by the Employer, then the Service Provider shall be entitled to apply in writing within 21 days of the cause of delay arising to the Service Manager for extension of the due completion date of the relevant Identified Project stating the cause of delay and period of extension applied for.*
- 23.11 *If during the period for completion of the Identified Project or any extension thereof abnormal rainfall or wet conditions occur, the formula below shall be used to calculate separately the delay for each calendar month or part thereof. It shall be calculated each month during the period referred to herein above, or until the issue date of the certificate of completion for the relevant Identified Project, whichever is the shorter period. The delay calculated for a given month shall be used to determine the interim extension of time granted for the month. At the end of the applicable period referred to above, the aggregate of the monthly delays will be taken into account for the final determination of the total extension of time for the Contract:*

$$V = \frac{(Nw - Nn) + (Rw - Rn)}{X}$$

*V = Delays due to rain in calendar days in respect of the calendar month under consideration.*

*Nw = Actual number of days during the calendar month on which a rainfall of Y mm or more per day has been recorded*

*Rw = Actual rainfall in mm for the calendar month under consideration.*

*Nn = Average number of days in the relevant calendar month (as derived from existing rainfall records provided in the project specifications) on which a rainfall of Y mm or more per day has been recorded.*

*Rn = Average rainfall in mm for the calendar month, as derived from the rainfall records supplied in the project specifications.*

*X = 20, unless otherwise provided in the project specifications.*

*Y = 10, unless otherwise provided in the project specifications.*

*The total delay that will be taken into account for the determination of the total extension of time for the Contract shall be the algebraic sum of the monthly totals for the period under consideration. But if the grand total is negative, the time for completion shall not be reduced on account of abnormal rainfall. The total extension of time for any calendar month shall not exceed (Nc – Nn) calendar days, where Nc = number of days calendar days in the month under consideration*

*The factor (Nw – Nn) shall be considered to represent a fair allowance for variations from the average number of days during which rainfall equals or exceeds Y mm per day.*

*The factor (Rw – Rn) ÷ X shall be considered to represent a fair allowance for variations from the average for the number of days during which rainfall does not equal or exceed Y mm per day, but when wet conditions prevent or disrupt work.*

*This formula does not take into account any flood damage, which could cause further or concurrent delays and which should be treated separately in so far as extension of time is concerned.*

*Accurate rain gaugings shall be taken at a suitable point on the site daily at 08:00 unless otherwise agreed to by the Service Manager, and the Contractor shall, at his own expense, take all necessary precautions to ensure that the rain gauges cannot be interfered with by unauthorized persons.*

*Information regarding existing rainfall records, if available from a suitable rainfall station near the site, will be supplied in the project specifications, together with calculations of rain delays for previous years in accordance with the above formula. The average of these delays will be regarded as normal rain delays which the Contractor shall accommodate in his programme, and for which no extension of time will be considered.*

- 23.12 *Upon receipt of such written application, referred to in 23.10, the Employer may in writing extend the due completion date of the relevant Identified Project by a period to be determined by the Employer or may refuse to extend the due completion date of the relevant Identified Project. The due completion date of an Identified Project may not be extended beyond the end of the Contract Period stated in the Contract Data.*

- 23.13 *Any decision given by the Employer, in terms of 23.12, shall be final and binding on the Parties.*
- 23.14 *Should the Service Provider fail to apply in writing for an extension of the due completion date of the relevant Identified Projects within the 21 days referred to in 23.10, or should the Employer not grant an extension of the due completion date then the due completion date stipulated in the relevant written instruction referred to in 23.5 shall not be extended nor the Service Provider exonerated from liability to pay the penalty stipulated in 23.9 or from specific performance of the service/works within the period in the relevant written instruction.*

## **25. SUSPENSION OF THE SERVICES**

- 24.1 *The Service Provider shall, on the written order of the Service Manager, suspend the provision of the Services or any part thereof for such time or times and in such manner as the Service Manager shall order and shall, during such suspension, properly protect the Services so far as is necessary.*
- 24.2 *If the Service Provider is instructed in writing by the Service Manager to suspend any or all of the Services, the Service Provider shall re-schedule the relevant Services. For the duration of such suspension all penalties applicable to that Service will be waived. Should the Service Provider suffer any additional costs resulting from such suspension, the Service Provider shall be entitled to make a claim therefor provided that the Service Provider shall prove his claim and that he has taken all reasonable steps to mitigate the additional costs.*
- 24.3 *If the Service Provider is unable to render any of the Services for any reason other than an instruction by the Employer to suspend the Services in terms of clause 24.1, the Employer shall not be liable for any claim of whatever nature, including a claim for costs, by the Service Provider.*

## **26. PENALTY FOR NON-PERFORMANCE**

- 25.1 *The Service Provider shall be liable for a performance deduction, if the Service Provider in rendering any of the Services required under the Scope of Works, as amended from time to time,*
- 25.1.1 *delays in performing any of the Services;*
- 25.1.2 *fails to perform any of the Services;*
- 25.1.3 *fails to perform any of the Services to the standard required in the Scope of Works, as amended from time to time.*
- 25.2 *The performance deduction shall be calculated in accordance with the formula detailed in the Scope of Works.*
- 25.3 *The Service Provider shall not be liable for a performance deduction, if the Service Provider is unable to perform due to no fault of his own, his employees, agents or representatives.*

## **27. PAYMENTS**

- 26.1 *The Service Manager will evaluate the Service Provider's performance on a monthly basis.*
- 26.2 *The Service Provider shall submit a monthly certificate taking into account the following:*
- 26.2.1 *the assessment of the Services rendered during the assessment month, including routine services, management fees, and services using call down rates;*

- 26.2.2 *adjustments in terms of the pricing data;*
- 26.2.3 *additional work rendered by the Service Provider;*
- 26.2.4 *CPAP adjustment where stated in the Contract Data; and*
- 26.2.5 *VAT. Vat will be indicated separately in all documents.*
- 26.3 *If the Service Provider elects a security of 2,5% retention, or a 1,25% cash and 1,25% retention, then 5% of all moneys (excl. VAT) in the monthly certificate assessed by the Service Manager as being due to the Service Provider will be retained until such time as the amount retained equals 2.5% or 1,25%, whichever is applicable, of the Contract Sum (excl. VAT)*
- 26.4 *The monthly certificate shall be supported by a detailed report substantiating the Services rendered at each Facility during the month under assessment.*
- 26.5 *The monthly certificate shall be assessed by the Service Manager. If the Service Manager agrees with the certificate, he will issue a statement within 14 days of the receipt of the certificate, taking into account inter alia the following:*
- i. *Deductions for penalties;*
  - ii. *Deductions for overpayments;*
  - iii. *Deductions for retention*
  - iv. *Deductions for damages.*
- 26.6 *The Service Provider shall, on receipt of the statement referred to in 26.5, issue to the Employer a tax invoice in the amount reflected in the statement. The Employer shall effect payment to the Service Provider within 16 days of receipt of the tax invoice.*
- 26.7 *If the Service Manager does not agree with the certificate issued by the Service Provider in terms of Clause 26.2, the Service Manager shall within 14 days of receipt of the certificate, issue a statement in the amount to which the Service Manager agrees and shall give reasons for rejecting the balance of the claim indicated in the statement.*
- 26.8 *The Service Provider shall furnish the Employer with a tax invoice in the amount indicated in the statement referred to in Clause 26.7.*
- 26.9 *With regards to the claim in dispute, the Service Provider may, within 14 days of the Service Manager issuing the statement referred to in 26.7, submit a revised certificate or a justification for his claim or declare a dispute in terms of 34.*
- 26.10 *If it is later resolved that the amount in dispute or any part thereof is owing to the Service Provider, the Employer shall be liable for interest thereon from 30 days after the issue of the relevant monthly certificate referred to in 26.2 until the date of payment at the interest rate determined from time to time, by the Minister of Finance in terms of section 80 (1)(b) of the Public Finance Management Act, 1999 (Act 1 of 1999), as amended.*
- 26.11 *All the work shall be evaluated in accordance with the provisions of the Pricing Data.*
- 26.12 *In assessing the quality of the work presented by the Service Provider, the Employer may enlist the assistance of third persons. In assessing the work the third person shall act reasonably. The selection of such third persons shall be in the absolute discretion of the Employer and the Service Provider shall abide by such selection.*

26.13 *Any and all extra costs incurred by the Service Provider, resulting from the Service Provider having to address and/or rectify queries arising from a claim submitted in respect of work done, shall be for the account of the Service Provider.*

## 28. RELEASE OF SECURITY

27.1 *If the Service Provider has furnished a security by way of a variable guarantee of 2.5% of the Contract Sum (excl. VAT), the security will be reduced and be released in accordance with the provisions of such variable guarantee.*

27.2 *If the Service Provider elects to furnish a security by way of a cash deposit of 2.5% of the Contract Sum (excl. VAT), then the security will be released as follows:*

27.2.1 *annually in equal portions, subject to 27.2.2 and 27.2.3;*

27.2.2 *95% of the last annual portion of retention shall be released within 30 days of the expiry of the Service Period;*

27.2.3 *the remaining retention shall be released within 30 days of the issue of the Certificate of Completion.*

27.3 *If the form of security selected is:*

(a) *a retention of 2.5% of the Contract Sum (excl. VAT); or*

(b) *a 1,25% cash deposit and a 1,25% retention of the Contract Sum (excl. VAT),*

*then security will only be released after the 2,5% or 1,25% retention respectively has been accumulated, as follows:*

27.3.1 *annually in equal portions, subject to 27.3.2 and 27.3.3;*

27.3.2 *95% of the last annual portion of retention shall be released within 30 days of the expiry of the Service Period;*

27.3.3 *the remaining retention shall be released within 30 days of the issue of the Certificate of Completion.*

## 29. OVERPAYMENTS

28.1 *If any overpayment of whatever nature is made to the Service Provider, the Service Provider shall be obliged to repay such amount to the Employer and the Employer shall be entitled to deduct such over payment from any amount due to the Service Provider, in respect of this Contract or any other contract, which the Employer may have with the Service Provider. The Employer shall be entitled to claim interest on any and all overpayments made to the Service Provider at the rate prescribed, from time to time, by the Minister of Finance in terms of section 80 (1)(b) of the Public Finance Management Act, 1999 (Act 1 of 1999), as amended.*

## 30. COMPLETION

28.1 *At the expiry of the Service Period the Service Manager shall furnish the Service Provider with a written list of Employer's Assets and Data handed over at commencement of the Contract and accumulated during the Contract Period.*

- 29.2 *At the expiry of the Contract Period, the Service Manager shall issue to the Service Provider a Certificate of Completion.*
- 29.3 *Upon the issue of a Certificate of Completion, unless otherwise provided in the Contract:*
- 29.3.1 *The Guarantee shall be returned, if applicable.*
- 29.3.2 *The final cash deposit or retention, whichever is applicable, shall be reduced to zero.*
31. **ASSIGNMENT**
- 30.1 *The rights and obligations of the Parties in terms of this Contract shall not be ceded, assigned, delegated, or otherwise transferred, by either Party to any person outside of the Service Provider and the Employer, save with the prior written consent of the other Party.*
- 30.2 *Each Party warrants that he is acting as a principal and not as an agent of an undisclosed principal.*
32. **INDULGENCES**
- 31.2 *No extension of time, latitude or other indulgences which may be given or allowed by either Party to the other shall constitute a waiver or alteration of this Contract, or affect such Party's rights, or prevent such Party from strictly enforcing due compliance with each and every provision of this Contract.*
33. **OWNERSHIP AND PUBLICATION OF DOCUMENTS**
- 32.1 *The Employer will become the owner of the information, documents, advice, recommendations and reports collected, furnished and/or compiled by the Service Provider during the course of, and for the purposes of executing this Contract, all of which will be handed over to the Employer, unless otherwise stipulated in the Contract, within ten (10) days of request therefor, but in any event on the termination and/or cancellation of this Contract for whatever reason. The Service Provider relinquishes its retention or any other rights to which it may be entitled.*
- 32.2 *The copyright of all documents, recommendations and reports compiled by the Service Provider during the course of and for the purposes of finalising Services, and the Contract as a whole, will vest in the Employer, and may not be reproduced or distributed or made available to any person outside the Employer's service, or to any institution in any way, without the prior written consent of the Employer. The Employer shall have the right to use such material for any other purpose without the approval of, notification to or payment to the Service Provider.*
- 32.3 *The copyright of all electronic aids, software programmes etc. prepared or developed in terms of this Contract shall be vested in the Employer, who shall have the right to use such material for any other purpose without the approval of, information or payment to the Service Provider.*
- 32.4 *In case of the Service Provider providing documents or material to the Employer, the development of which has not been at the expense of the Employer, copyright shall not be vested in the Employer. The Service Provider shall be required to indicate to which documents and/or materials this provision applies.*
- 32.5 *The Service Provider hereby indemnifies the Employer against any action or claim that may be instituted against the Employer and for any damages suffered or legal costs (including costs on an attorney and client scale) incurred on the grounds of an alleged infringement of*

*any copyright or any other intellectual property right in connection with the work outlined in this Contract.*

- 32.6 *All information, documents, recommendations, programmes and reports collected or compiled must be regarded as confidential and may not be communicated or made available to any person outside the Employer's service and may not be published either during the currency of this Contract or after termination thereof without the prior written consent of the Employer.*

#### **34. BREACH OF CONTRACT**

- 33.1 *In the event of a breach by the Service Provider of any of the terms and conditions of this Contract, the Employer shall issue a notice of non-compliance requiring compliance within 10 (ten) days. In the event that the Service Provider fails to remedy such breach on expiry of the notice period, then the Employer shall without prejudice to any other rights that it may have, be entitled to exercise any or all of the following rights:*

33.1.1 *Enforce strict compliance with the terms and conditions of the Contract;*

33.1.2 *To terminate this Contract without prejudice to any other rights it may have;*

33.1.3 *To suspend further payments to the Service Provider;*

33.1.4 *To appoint other service providers to complete the execution of the Services, in which event the Service Provider shall be held liable for costs incurred in connection with and arising from the appointment of such a service provider as well as damages suffered.*

- 33.2 *The Service Provider agrees to, within ten (10) days of written request from the Employer, give access to and to make available all information, documents, programmes, advice, recommendations and reports collected, furnished and/or compiled by them to enable the Employer to assume responsibility for and the benefit of the project as a whole.*

- 33.3 *In the event of breach by the Employer of the terms and conditions of this Contract, and in the event of the Employer remaining in breach after ten (10) days' written notice calling for rectification of the breach, the Service Provider shall be entitled to:*

33.3.1 *enforce strict compliance with the terms and conditions of the Contract; or*

33.3.2 *terminate the Contract by delivering written notice to the Employer to that effect to the extent that such breach is of a material term of this Contract.*

#### **35. STOPPAGE AND/OR TERMINATION OF CONTRACT**

- 34.1 *The Employer reserves the right to terminate this Contract or temporarily stop the Services, or any part thereof, at any stage of completion.*

- 34.2 *The Employer shall have the right to terminate this Contract without prejudice to any of its rights upon the occurrence of any of the following acts:*

34.2.1 *on breach of this Contract by the Service Provider as stipulated in Clause 33;*

34.2.2 *on commencement of any action for the dissolution and/or liquidation of the Service Provider, except for purposes of an amalgamation or restructuring approved in advance by the Employer in writing;*

- 34.2.3 *if the Service Provider receives a court order to be placed under judicial management or to commence liquidation proceedings that is not withdrawn or struck out within five (5) days;*
- 34.2.4 *if the Service Provider informs the Employer that it intends to cease performing its obligations in terms of this Contract;*
- 34.2.5 *if the Service Provider informs the Employer that it is incapable of completing the Services as described; or*
- 34.2.6 *if in the opinion of the Employer the Service Provider acted dishonestly;*
- 34.3 *The Employer reserves the right to, even in the absence of breach or the events referred to in 34, terminate this Contract at any time, by giving one (1) calendar month written notice to the Service Provider.*
- 34.4 *Further, the Contract shall be considered as having been terminated:*
  - 34.4.1 *where the Employer stops the Contract and/or the Project and instructions to resume or reinstate the Services are not issued within twelve (12) months of the instruction; or*
  - 34.4.2 *if instructions, necessary for the Service Provider to continue with the Services after a stoppage instruction, are not received from the Employer within three (3) months after such instructions were requested by the Service Provider.*
- 34.5 *Should the Contract between the Employer and the Service Provider, or any part thereof, be terminated by either of the Parties due to reasons not attributed to the Service Provider:*
  - 34.5.1 *The Service Provider will be remunerated for the appropriate portion of the Services satisfactorily completed, calculated in accordance with the agreed rates.*
  - 34.5.2 *Invoices for work done shall be submitted to the Employer within three (3) months after the termination of the Contract, failing which the Employer will not be obliged to pay same.*
  - 34.5.3 *The Service Provider shall not be entitled to advance a right of retention or any similar right if this Contract is terminated and specifically agrees to, within ten (10) days of written request from the Employer, give access to and to make available all information, documents, programmes, advice, recommendations and reports collected, furnished and/or compiled by them to enable the Employer to assume responsibility for and the benefit of the Contract as a whole.*

## **36. DISPUTE RESOLUTION**

- 35.1 *In the event of a dispute, the Parties shall endeavour to resolve such dispute through negotiation, in good faith.*
- 35.2 *If the Parties fail to resolve a dispute through negotiation as mentioned in 35.1, within 14 days of a dispute being declared, the Parties may by written agreement refer the matter to mediation.*
- 35.3 *The mediator shall be a person agreed to by the Parties, failing agreement, the President: South African Facilities Management Institute shall nominate the mediator.*
- 35.4 *Whether or not mediation resolves the dispute and irrespective of the outcome of thereof, the Parties shall bear their own costs arising from the mediation and shall equally share the*

*costs of the mediator and related costs. The mediator and the Parties shall, before the commencement of the mediation, agree on a scale of fees on which the mediator's fees will be based.*

- 35.5 *The Parties shall appoint the mediator within 21 days of agreeing to mediate.*
- 35.6 *On appointment of the mediator, the Parties shall jointly with the mediator decide on the procedure to be followed, representation, dates and venue for the mediation.*
- 35.7 *If the dispute or any part thereof is settled, the agreement shall be recorded by the mediator and signed by both Parties. The agreement shall be binding on the Parties to the extent that it correctly records the issues agreed upon between the Parties.*
- 35.8 *If the dispute or any part thereof remains unresolved, it may be resolved by litigation proceedings.*
- 35.9 *If the mediator or any Party, at any time during the mediation process, is of the opinion that the mediation will not resolve the dispute, then he may in writing stop the mediation process. The dispute may then be dealt with in terms of 35.8.*
- 35.10 *Notwithstanding anything else herein contained to the contrary, it is agreed that irrespective of the fact that the dispute is referred to negotiation, mediation or litigation in court, the decision of the Employer on the dispute involved will immediately be given effect to by the Service Provider and the Service Provider shall proceed with the Services with all diligence unless the Parties agree otherwise in writing.*

### **37. GENERAL**

- 36.1 *This is the entire Contract between the Parties and may only be amended if reduced to writing and signed by the duly authorised representatives of both Parties, whereafter such amendments will take effect.*
- 36.2 *The Contract shall be governed by, construed and interpreted according to the law of the Republic of South Africa.*

### **38. DOMICILIUM CITANDI ET EXECUTANDI**

- 37.1 *The domicilium citandi et executandi of the Parties for all purposes arising from this Contract for the service of notices and legal process shall be as specified by the Parties in the Contract Data.*
- 37.2 *Each of the Parties shall be entitled at any time by way of written notice to the other Party, to change its domicilium citandi et executandi to another physical address.*
- 37.3 *Any notice in terms of the conditions of the Agreement must either be:*
- 37.3.1 *delivered by hand during normal business hours of the recipient; or*
- 37.3.2 *sent by prepaid registered post to the address chosen by the addressee.*
- 37.4 *A notice in terms of the provisions of this Agreement shall be considered to be duly received:*
- 37.4.1 *if hand-delivered on the date of delivery;*

- 37.4.2 if sent by registered post as indicated in clause 37.3.2 above, ten (10) days after the date it was posted, unless the contrary is proved.*
- 37.5 Notwithstanding anything to the contrary contained or implied in this Agreement, the written notice or communication actually received by one of the Parties from the other, including by way of facsimile transmission, shall be adequate written notice or communication to such Party.*
- 37.6 Any notice, request, consent, or other communication made between the Parties pursuant to the Contract shall be in writing and shall be deemed to have been made when delivered in person to an authorized representative of the Party to whom the communication is addressed, or one day after being sent by facsimile to such Party at the number specified in the Contract Data or one week after being sent by registered post to the addressee specified in the Contract Data.*

## TERMS OF REFERENCE/ SPECIFICATIONS

**Bid no: PET 28/2023**

**Bid/ Project Description: EAST LONDON & MDANTSANE: BOILERS: MAINTENANCE AND REPAIRS OF BOILERS FOR A PERIOD OF 36 MONTHS**

### C2.3.1 STANDARD SPECIFICATIONS

Tender no:

#### C3.1 STANDARD SPECIFICATIONS:

The standard specifications on which this contract is based is the South African Bureau of Standards Application of the National Building Regulations SABS 10400: 1990 (SABS 0400)

Although not bound in nor issued with this Document, the following list of standards shall be adhered to for the duration of the contract. Standards not mentioned below, but referenced to in the Technical, Particular and Additional specifications shall also be adhered to for the duration of the contract. Any amendments, revisions or new versions (latest specifications) shall supersede the listed documents and be applicable in all respects.

SANS 10400	-	Application of the National Building Regulations
SANS 164	-	Plugs, socket-outlets and couplers for industrial purposes*
SANS 241	-	South African Standard Specification for drinking water
SANS 515	-	Decorative paint with a non-aqueous solvent base for interior use*
SANS 558	-	Cast iron surface boxes and manhole and inspection covers and frames*
SANS 630	-	Decorative high gloss enamel paints*
SANS 631	-	Decorative oil gloss paint for interior and exterior use*
SANS 633	-	Emulsion paints for interior decorative purposes*
SANS 634	-	Emulsion paints for exterior use*
SANS 675	-	Zinc-coated fencing wires (plain and barbed)*
SANS 678	-	Primers for wood for interior and exterior use*
SANS 681	-	Undercoats for paints*
SANS 682	-	Aluminium paint*
SANS 683	-	Roof paints (relevant sections)*
SANS 723	-	Wash primer (metal etch primer)*
SANS 801	-	Epoxy-tar paints*
SANS 887	-	Varnish for interior use*

SANS 926 - Two-pack zinc-rich epoxy primer\*

- SANS 935 - Hot-dip (galvanised) zink coatings (other than on continuously zinc-coated sheet and wire)\*
- SANS 950 - Un-plasticized polyvinyl chloride rigid conduit and fittings for use in electrical Installations
- SANS 10252-2 - Code of Practice "Water Supply and Drainage for Buildings, Part 2: Drainage Installations for Buildings", Annexure B: Septic Tank Systems\*
- SANS 1085 - Wall outlet boxes for the enclosure of electrical accessories\*
- SANS 1200 - Standardised Specifications for Civil Engineering Construction\*
- SANS 1227 - Textured wall coatings, emulsion base, for interior and exterior use\*
- SANS 1239 - Plugs, socket-outlets and couplers for industrial purposes\*
- SANS 1250 - Capacitors for use with fluorescent and other discharge lamp ballasts\*
- SANS 1319 - Zinc phosphate primers for steel\*
- SANS 1373 - Chain-link fencing and its wire accessories\*
- SANS 1411 - Materials of insulated electric cables and flexible cords\*
- SANS 1507 - Electric cables with extruded solid dielectric insulation for fixed installations
- SANS 1777 - Photoelectric control units for lighting (PECUs)
- SANS 4831 - Microbiology: General guidance for the enumeration of coliforms: Most probable number technique\*
- SANS 4833 - Microbiology: General guidance for the enumeration of coliforms: Colony count technique at 30°C\*
- SANS 5011 - Water – pH-Value\*\
- SANS 5217 - Water – free and saline ammonia content\*
- SANS 6048 - Water – chemical oxygen demand\*
- SANS 6052 - Residual chlorine content of water\*
- SANS 6057 - Electrical conductivity of water\*
- SANS 10064 - The preparation of steel surfaces for coating\*
- SANS 10114 - Interior lighting\*
- SANS 10142 - Wiring of premises\*
- SANS 10160 - The general procedures and loadings to be adopted in the design of buildings\*
- SANS 10162 - The structural use of steel\*

SANS 10198 - The selection, handling and installation of electric power cables of rating not exceeding 33 kV

SANS 10298 - Indirect small to medium-sized gas chlorination systems for the disinfection of water\*

SANS 10299 - Development, maintenance and management of groundwater resources\*

SANS 10306 - The management of potable water in distribution systems\*

SANS 10329 - The design and construction of sectional steel tanks for storage of liquids at or above ground level\*

SANS 61084 - Cable trunking and ducting systems for electrical installations

SABS 948 - 3-phase induction motors\*

SABS 1222 - Enclosure for electrical equipment (classified according to the degree of protection that the enclosure provides)\*

SANS ISO 5667-2 - Water quality sampling, part2: Guidance on sampling techniques\*

OW 371 - Specification of Materials and Methods to be used. Fourth revision, October 1993 or latest version.\*\*

Standard Specification for the Electrical Equipment and Installation for Mechanical Services, Issue VIII December 1984\*\*

Standard Electrical Specifications, January 1984, GPS 24-0367\*\*

Department of Public Works Standard Specifications for Electrical Installations and Equipment pertaining to Mechanical Installations\*\*

\*\* Not issued with this document but available from the Director General, Department of Public Works, Private Bag X65, PRETORIA 0001, or any office of the Regional Representative of this Department.

\*\*\* Copies of the Standard Department of Public Works Specifications are obtainable from the Director-General: Department of Public Works, Private Bag X 3913, Port Elizabeth, 6056, or on the website: <http://www.publicworks.gov.za>

## C2.3.2 PROJECT SPECIFICATIONS

### CONTENTS

- PS 1 GENERAL DESCRIPTION
- PS 2 DETAILS OF CONTRACT
- PS 5 CONSTRUCTION PROGRAMME
- PS 4 SITE FACILITIES AVAILABLE
- PS 5 FEATURES REQUIRING SPECIAL ATTENTION
- PS 6 CERTIFICATES OF PAYMENT
- PS 7 CONSTRUCTION IN RESTRICTED AREAS
- PS 8 DRAWINGS
- PS 9 LEGISLATION
- PS 10 INSURANCE AMOUNTS
- PS 11 TIMES FOR COMPLETION
- PS 12 PRACTICAL COMPLETION
- PS 13 PENALTIES
- PS 14 NON-WORKING DAYS AND HOURS

The Project Specification contains a general description of the works, the site and the requirements to be met. In the event of any discrepancy between a part or parts of the Standardised of Particular Specifications and the Project Specification, the Project Specification shall take precedence. In the event of a discrepancy between the specifications, (including the Project Specifications) and the drawings and / or the Bill of Quantities, the discrepancy shall be resolved by the Departmental Representative / Engineer before the execution of the work under the relevant item.

## PS 1 GENERAL DESCRIPTION

Each installation requires work that may include any one or more of the activities as set out in clause PS2 below: decommissioning, repair, reconditioning, testing, re-commissioning and maintenance during the 36-month Contract. The work may also include compilation of operating and maintenance manuals as well as training of User Client operators and all maintenance personnel.

NOTE: Repair and maintenance work will be carried out within facilities that are occupied by User Client's personnel and associates.

## PS 2 DETAILS OF CONTRACT

All work forming part of this Contract is divided into installations. The repair and maintenance work to be performed as part of an installation under this Contract mainly consists of the following:

The St Albans prison mechanical term project comprises the repair and maintenance of the following mechanical services

Steam Generating Installations (see FA and PFA)  
Steam Distribution Installations (see FB and PFB)  
Hot water Generating Installations (see FC and PFC)

Maintenance of each of these installations will be the responsibility of the Contractor and will be evaluated on a monthly basis by the Departmental Representative / Engineer. The remuneration for maintenance work and responsibilities will be certified accordingly.

The description of the Works given above is not necessarily complete and shall not limit the work to be carried out by the Contractor under this Contract.

Approximate quantities of each type of work are given in the Bill of Quantities.

NOTE: A clear distinction will be made between the repair work to be done and the maintenance responsibilities applicable to each installation.

## PS 3 CONSTRUCTION PROGRAMME

Instructions by the Departmental Representative / Engineer to expedite progress shall not be the subject of additional compensation to the Contractor unless the instruction explicitly states that the Contractor is entitled to additional compensation and cites the amount of such compensation or the basis on which it is to be determined.

The approval by the Departmental Representative / Engineer of a programme shall have no contractual significance other than that the Departmental Representative / Engineer will be satisfied if the work is carried out according to the programme. The said approval shall not limit the right of the Departmental Representative / Engineer to instruct the Contractor to vary the programme if necessary. The Contractor is also referred to Clause PS 8 and Clause PS 12 when preparing this programme.

NOTE: For reasons of limited access, it may not be possible to carry out the repair work on some of the installations in parallel with repair work on other installations. The repair work of some of the installations shall follow sequentially as indicated in the specifications.

The Contractor shall organise his work in such a manner as to cause the minimum inconvenience to the User Client's personnel and operations.

#### PS 4.1 CAMPSITE AND STORE ROOM

(a) Repair work

An area for the campsite will be provided after consultation with the User Client area manager. Only one night watchman will be allowed in the campsite at night.

(b) Maintenance responsibilities

The Contractor must provide his own storeroom facilities for the duration of the maintenance phase.

#### PS 4.2 WATER, ELECTRICITY AND SEWERAGE

(a) Water supply

The Contractor must make his own arrangements for water supply. Water will be available at specific points not necessarily adjacent to working areas. Water will be available free of charge but wastage will not be tolerated. The Contractor must supply his own standard fittings to couple up at the points where water is available.

(b) Electrical power supply

Electrical power supply is available on the Site and will be free of charge. The Contractor must make his own arrangements for a connection to the electrical power supply. The Contractor will be responsible, at his own cost, for the distribution of electricity for construction and domestic use.

(c) Sewerage connection

Refer to Sub clause PSA 4.2 in connection with toilet requirements. Chemical toilets shall be used.

Note: The Employer shall not be held responsible for any losses or inconvenience due to a disruption in the supply of water and/or electricity.

#### PS 4.3 PARKING FACILITIES

Parking facilities are available on the Site.

#### PS 5 FEATURES REQUIRING SPECIAL ATTENTION

##### PS 5.1 INSTALLATIONS AT FACILITIES

The installations at all facilities shall be carefully checked for damage and all damages shall be listed and discussed with the Departmental Representative / Engineer before commencement of repair and maintenance work. The Contractor shall present copies of all correspondence in this regard for discussion at the following site meeting.

##### PS 5.2 SECURITY

(a) Restrictions on movement and limited access

The Contractor's personnel, vehicles and equipment will be restricted to areas of construction only. The Contractor shall comply with any requirements that the Departmental Representative / Engineer may have in this regard and shall take note that for security reasons the access to some areas, may be limited.

(b) Prohibition on taking of photographs

The Contractor's attention is drawn to the Defence Act, 1957 (Act No 44 of 1957) and the Correctional Services Act, 1998 (Act No 111 of 1998) which clearly state that the taking of photographs is prohibited and that even the possession of a camera on Site is an offence.

(c) Security check on personnel

The Employer may require the Contractor to have his personnel or a certain number of them security-classified, if so required by any competent authority. In the event of the Employer or any competent authority requiring the removal of a person or persons from the site for security reasons, the Contractor shall do so forthwith and the Contractor shall thereafter ensure that such person or persons are denied access to the site and/or to any documents or information relating to the work. In such circumstances the Contractor shall indemnify the Employer and the Departmental Representative / Engineer and shall hold the Employer and the Departmental Representative / Engineer harmless against any and all claims of whatever nature arising.

(d) Access cards to security areas

Should the work fall within a security area, the Contractor must obtain from the Departmental Representative / Engineer access cards for his security-cleared personnel and employees who work within such an area. The Contractor must comply with any regulations or instructions issued from time to time, concerning the safety of persons and property, by the Department of Correctional Services or SA Police services.

### PS 5.3 SITE TO BE KEPT CLEAN

During progress of the work and upon completion thereof, the Site of the Works shall be kept and left in a clean and orderly condition. The Contractor shall store materials and equipment for which he is responsible in an orderly manner, and shall keep the Site free from debris and obstructions.

All redundant materials, rubbish and waste arising from the work must be removed from the Site at the Contractor's cost and the site and buildings left clean and tidy.

### PS 5.4 FACILITIES TO OTHER CONTRACTORS

In addition to the requirements of Clause 18 of the General Conditions of Contract the Contractor must make allowances for other Contractors on the Site. This may involve adapting his programme to accommodate the work of other contractors and ensuring access to their sites along prescribed routes over the Site of this Contract.

### PS 5.5 SUBCONTRACTORS

In addition to the requirements of Clause 6 of the General Conditions of Contract as amended in Part 1 of the Contract Data, the Contractor shall be responsible for work carried out by subcontractors on his behalf. The Departmental Representative / Engineer will not liaise directly with such subcontractors. Problems related to payments, programming, workmanship, etc, shall be the responsibility of the Contractor and the subcontractor, and the Departmental Representative / Engineer will not become involved.

### PS 5.6 SANS SPECIFICATIONS AND CODES OF PRACTICE

All reference in this document to South African Bureau of Standards specifications and codes of practice, or any other standard specifications or codes of practice, including National Building Regulations, shall be deemed to be references to the latest issues of such specifications and codes.

### PS 5.7 MATERIALS

The monthly payment for materials brought onto the Site will only be applicable for repair work and not for maintenance work. Unless otherwise instructed in writing by the Departmental Representative / Engineer, all proprietary materials are to be used, mixed, applied, fixed, etc. strictly in accordance with the manufacturer's recommendations.

## PS 5.8 BORROW PITS

There will be no designated borrow pits. The Contractor shall utilise the material on Site or import material from commercial sources.

## PS 5.9 PROTECTION OF FURNITURE AND EQUIPMENT

Most of the work to be done inside buildings and occupied houses will be carried out in places where there is furniture and other equipment.

The Contractor shall be responsible for moving the furniture and equipment in order to provide working space for his personnel. The programme shall be drawn up in such a way as to keep the movement of furniture and equipment to the very minimum and the Contractor shall be solely responsible for any damage to furniture or equipment.

## PS 5.10 TESTING AND QUALITY CONTROL

The Contractor shall engage the services of an approved independent laboratory or other institution as applicable for quality testing, to ensure that his work complies with the Specifications.

No separate payment will be made for such testing, the cost of which will be deemed to be included in the Contractor's rates bid for the items of work that require testing in accordance with the Specifications.

The onus to produce work that conforms in quality and accuracy of detail to the requirements of the Specifications and Drawings rests with the Contractor, and the Contractor shall, at his own expense, institute a quality-control system and provide experienced Departmental Representative / Engineers, foremen, surveyors, materials technicians, other technicians and technical staff, together with all transport, instruments and equipment to ensure adequate supervision and positive control of the Works at all times.

The cost of supervision and process control, including testing carried out by the Contractor, will be deemed to be included in the rates bid for the related items of work.

The Contractor's attention is drawn to the provisions of the various Specifications regarding the minimum frequency of testing required. The Contractor shall, at his own discretion, increase this frequency where necessary to ensure adequate control.

On completion and submission of every part of the work to the Departmental Representative / Engineer for examination, the Contractor shall furnish the Departmental Representative / Engineer with the results of the relevant tests to indicate compliance with the Specifications.

## PS 6 CERTIFICATES OF PAYMENT

The statement to be submitted by the Contractor in terms of Clause 49 of the General Conditions of Contract shall be prepared in accordance with the standard payment certificate prescribed by the Departmental Representative / Engineer and shall comprise at least two sets of A4-size paper copies.

All costs for the preparation and submission of the statements shall be borne by the Contractor.

## PS 7 CONSTRUCTION IN RESTRICTED AREAS

Working space in certain areas may be restricted. The construction method used in these restricted areas largely depends on the Contractor's Plant. However, the Contractor must note that measurement and payment will be according to the specified cross-sections and dimensions irrespective of the method used, and that the rates and prices submitted will be deemed to include full compensation for difficulties

encountered while working in restricted areas. No extra payment nor any claim for payment due to these difficulties will be considered.

## PS 8 DRAWINGS

The Contractor will, in terms of Clause 13 of the General Condition of Contract, be provided free of charge with three paper prints of each drawing issued to them.

All information in the possession of the Contractor that is required by the Departmental Representative / Engineer's representative to complete the as-built drawings must be submitted to the Departmental Representative / Engineer's representative before a Certificate of Completion will be issued.

Only figured dimensions shall be used and drawings shall not be scaled unless required by the Departmental Representative / Engineer. The Departmental Representative / Engineer will provide the dimensions that may have been omitted from the Drawings.

## PS 9 LEGISLATION

Changes in legislation

Reference in the General Conditions of Contract and in any other standard document forming part of this Contract to legislation which has been amended or superseded by other legislation since the most recent publication of such standard document, shall be deemed to be a reference to the amended or replacement legislation.

Such amended or replaced legislation shall be applicable during the Contract Period provided the amendment or replacement occurred more than 28 days before the closing date for bids in terms of Clause 46.4 of the General Conditions of Contract as amended in Part 1 of the Contract Data.

The Occupational Health and Safety Act

The Contractor shall be required to comply with the Occupational Health and Safety Act, 1993: Construction Regulations, 2003 as promulgated in Government Gazette No 25207 and Regulation Gazette No 7721 of 18 July 2003. Non-compliance with these regulations, in any way whatsoever, will be adequate reason for suspending the Works.

The proposed type of work, materials to be used and hazards likely to be encountered on this Contract are detailed in the Scope of Work, Pricing Data and Drawings. The Employers' health and safety specifications (subclause 4(1)) of the regulations will be issued separately.

The Contractor shall in terms of subclause 5(1) provide a comprehensive health and safety plan detailing his proposed compliance with the regulations, for approval by the Employer.

The Contractor shall at all times be responsible for full compliance with the approved plan as well as the Construction Regulations and no extension of time will be considered for delays due to non-compliance with the abovementioned plan or regulations.

A payment item is included in the Bill of Quantities to cover the Contractor's cost for compliance with the OHS Act and the abovementioned Construction Regulations 2003.

## PS 10 INSURANCE AMOUNTS

The amounts for which the Contractor must insure the Works in terms of Clause 35 of Part 1 of the Contract Data are stated in the Agreement.

## PS 11 TIMES FOR COMPLETION

Times for completion of repair work to installations as well as the maintenance down-time for different types of breakdowns are given under Clause 42.1 of Part 1 of the Contract Data. The time for completion will start on the date of access to an installation.

## PS 12 PRACTICAL COMPLETION

(a) The Contractor shall be entitled in terms of Clause 51.1 of the General Conditions of Contract to receive a Certificate of Practical Completion when the Works to be executed under the Contract have been completed to the stage where:

all materials which are required to be replaced have been replaced and installed to the satisfaction of the Departmental Representative / Engineer; and

all repair works have been completed.

(b) The Departmental Representative / Engineer shall issue to the Contractor and the Employer a Certificate of Completion in terms of Clause 51.4 of the General Conditions of Contract except where a thirty day commissioning period, as stated in paragraph (c) below, is applicable.

(c) Where indicated at the end of this paragraph, the issuing of a Certificate of Practical Completion for a certain installation will be followed by a thirty day commissioning period. The tasks of the Contractor during the thirty day commissioning period are described in Additional specification SC: General Decommissioning, Testing and Commissioning Procedures. After the completion of the thirty day commissioning period to the satisfaction of the Departmental Representative / Engineer, a certificate of completion will be issued to the Contractor as described in Clause 51.4 of the General Conditions of Contract.

## PS 13 PENALTIES

Penalties in terms of Clause 43.1 of the General Conditions of Contract for late completion of repair work to different installations are given under Clause 43.1 of Part 1 of the Contract Data. Payment reductions for exceeding the maintenance down-time for different types of breakdowns are given under the applicable pay items in the Bill of Quantities for Additional specifications SA: General Maintenance. Penalties will run concurrently where applicable.

(a) Penalty for failing to meet undertakings and/or conditions pertaining to Targeted Procurement for the award of points – Note: Not applicable to the term contract.

If the bid adjudication points awarded to the Contractor are found to be based on incorrect or false information or the conditions pertaining to the award of points are not met and the Contractor fails to substantiate that such failure is due to a reason acceptable to the Employer (as being) beyond the Contractor's control, the Contractor shall be liable for and pay to the Employer, an amount determined in accordance with clause 2 and subject to clause 1 both of the Works Information, Part 2 of the Conditions of Bid.

(b) Payment reduction for non-performance

If the Contractor shall fail to rectify an emergency maintenance breakdown, an ordinary maintenance breakdown and damage breakdown within the time as stipulated in Additional Specifications SA: General Maintenance, the Contractor shall be liable to the Employer for the sum/sums stated in the Bill of Quantities for Additional Specification SA as a payment reduction for every hour/day down-time counting from the hour/day the breakdown was reported to the Contractor until the day it was repaired. These payment reductions will be cumulative and will run concurrently.

Where indicated above that the money will be recovered from the Contractor by means of payment reductions, the fixed negative amounts in the rate column of the Bill of Quantities will be used to reduce payments due to the Contractor.

The imposition of such payment reductions shall not relieve the Contractor from his obligation to complete the Works or from any of his obligations and liabilities under the Contract.

(c) Application of penalties to be accumulative

The imposition of all penalties in terms of this clause shall be accumulative and shall not relieve the Contractor from his obligation to complete the Works or from any of his obligations and liabilities under the Contract.

#### PS 14 NON-WORKING DAYS AND HOURS

Whenever any special non-working days stated in Clause 1.6 and Clause 38 of Part 1 of the Contract Data fall within the days allowed or stipulated in the Contract in terms of Clause 1.6 of Part 1 of the Contract Data, such special non-working days shall also be excluded from the calculation of the number of working days concerned.

The Contractor shall not work on any statutory public holidays or on any public holidays declared by the Government to be statutory non-working days, except for work related to repair fatal and emergency breakdowns which influences the functionality of any of the installations.

Working hours might be limited and the Contractor shall work in close cooperation with the User Client and Departmental Representative / Engineer in this regard. Working hours for the different installations are indicated at the end of this clause where applicable.

The Departmental Representative / Engineer shall be entitled at any time during the Contract, to vary the normal working hours specified in the Bid documents, including increasing or decreasing the total number of hours per day during which the Contractor may execute the Works or specific portions thereof.

If any variation by the Departmental Representative / Engineer of the normal working hours specified in the Bid Documents should result in an increase or a decrease in the total number of hours per week during which the Contractor is permitted to execute the Works or any particular portions of Works, then the time allowed in the Contract for the completion of the respective part of the Works to which the varied normal working hours apply shall be adjusted proportionately in relation to:

the remaining time allowed for completion of the specific part or parts of the Works; and  
the extent of the variation in the total normal working hours per week.

#### PS 15 TRANSPORT

##### 15.1 Scope

Provide for certain works to be executed on the basis of Dayworks where specified or instructed. This item may only be utilised on the specific instruction of the Engineer. All overhead costs shall be included.

In the case of work provided for in terms of Provisional Sums the Contractor shall submit a detailed quotation prior to commencing work. The amount of the quotation shall not be exceeded without approval prior to completion of the work concerned. In the case of Transport for planned maintenance, a prior quotation is not required.

##### 15.2 Measurement

Labour : Time (hrs) including the full cost of employment such as wages, transport (excluding authorised transport), insurances, subsistence, allowances, overheads, etc. Materials markup as a portion of proven materials cost eg 15% = 0,15.

Materials: An allowance for the cost of materials utilised in connection with work performed in terms of day works. The materials mark-up rate shall include full compensation to the Contractor for quotation profit & attendance costs. The mark-up rate shall be given as a portion of the proven cost of the materials utilised, ie 15% must be entered as 0,15.

Transport: Authorised distance travelled measured in km, is separately quantified.

Vehicular transport measured in km between the reference location and the various sites at which services are performed will be determined on the basis of the following distance table. Transport between the contractor's head office and the reference location is not reimbursable, the costs thereof being an overhead for the contractor's own account. Where more than one service is performed on the same day in the same area transport costs will be calculated on actual distance travelled as defined in this measurement clause. The measured quantity in km is provisional, to be adjusted as utilised. The distances travelled shall be

recorded in a log book with odometer readings, date, and origin & destination places. Logbook copies shall be submitted with the monthly job card claims.

Reference Location: General Post Office, Govan Mbeki Avenue, Central, Port Elizabeth.

The following table illustrates an example of the method of measurement which shall be adopted in order to minimise travel costs. It is the Contractor's responsibility to ensure that all consumables, tools and spares are loaded in the transport for the sites to be visited to avoid the need to make an additional return to the depot during the day before the day's scheduled site visits are completed. Any claims for such return journey shall be rejected unless fully motivated and approved prior to the event.

Reference location to site A	8km
Site A to site B	1km
Site B to site C	2km
Site C to reference location	6km
Total Distance	17km

### 15.3 Payment

Payment will be subject to the submission of a detailed claim for materials utilised and transport, together with the monthly submission of job cards for maintenance & servicing or other tasks instructed to be performed in terms of dayworks. Payment claims shall include full details of the work performed with supporting materials invoices, close-out reports, labour time sheets & transport details with distance travelled log.

## 16 UNPLANNED MAINTENANCE

### 16.1 Scope

The Department operates a reporting system for any plant faults or breakdowns (complaints) which may occur.

The call centre is operated on behalf of the Department by Advance Call. The Contractor shall register with the call centre by submitting an application form & paying the required registration fee. The Contractor shall furthermore pay to the call centre a monthly subscription fees, call fees and reporting fees.

Client or tenant department staff report such plant faults or breakdowns to the DPW call centre which will log the complaint and transmit it by fax, e-mail & sms to the Contractor.

The contractor shall respond to the complaint as necessary in accordance with the assigned priority level & the breakdown (complaint) shall be repaired as necessary to restore the plant to full operation in the minimum time. On completion of the complaint remedy the contractor shall complete a Job Card and submit to the Engineer with a copy to the facility concerned. The Contractor shall attach to the Job Card the following documents associated with the complaint.

- Copies of vendor tax invoices for materials used, each endorsed with the Complaint Number
- The Contractor's stamp and the Contractor's original signature.
- Travel log sheet for travel exclusively incurred in attending to the Complaint. If the Complaint was repaired during a scheduled service visit to the plant concerned, then the travel log for the complaint shall be appropriately endorsed.
- Time sheets of staff who attended to the Complaint all stamped and endorsed with the Contractor's original signature.
- Further information which may be necessary or instructed.

The Engineer will be responsible for closing the call. The Contractor shall be responsible for obtaining the fax number of each facility and establishing to whom the said fax must be transmitted.

Should the contractor not be able to complete the required breakdown repair work within the maximum down-time period allowed, it shall be his responsibility to obtain extension of down-time from the Engineer. The written report shall clearly state the reasons for the extension, as well as the actual extension required.

Extension of down-time will only be granted by the Engineer if;

- (a) The maximum down-time is unreasonable in relation to the scope of the repair work required.
- (b) The delivery time of a new component/subassembly/machine or spares required for the repair of the defective component/subassembly does not enable the contractor to successfully complete the repair work within the maximum breakdown down-time allowed.

Priority Level Maximum Down-Time Allowed (MDTA) Penalties for non-performance per day

Fatal breakdown where specified 4 hours (immediate response) R 1,500.00  
 Emergency breakdown 24 hours R 750.00  
 Ordinary breakdown 7 days R 1000.00  
 Quoted work Agreed program - failure R 1000.00

“Maximum down time” shall mean the period of time allowed to repair a breakdown, and “actual down-time” shall mean the measured period from the instant when the breakdown was logged with the contractor until the installation has been repaired to its functional specification.

**17 Measurement & Payment**

a) Breakdown Repair work :

Materials, labour & transport elsewhere measured under Dayworks.

b) Call Centre Services :

The rates shall include all relevant costs associated with the call centre services but excluding the actual repair work. Items shall include the profit & attendance of the contractor on the call centre plus the call centre fees. The rate for Breakdown Calls shall furthermore include the cost of the specified administration actions. The following table of call centre fees represents the current status. Future annual adjustments are deemed to be covered by the Contract Price Adjustment Provisions (CPAP) allowed in terms of the contract.

b1). Registration Fee	R 0 (initial once off fee)
b2). Monthly subscription	R 0 (per month per department)
b3). Breakdown calls	R 0 (per breakdown includes all telephone calls and faxes)
b4). Breakdown reporting	R 0 (per report)

The stated rates exclude VAT.

**17.1 Payment**

Payment will be subject to the submission of detailed claims for materials utilised and transport, together with the submission of unplanned maintenance Job Cards. Payment claims shall include full details of the work performed with supporting materials invoices, Job Cards, labour time sheets & transport details with distance travelled

FA 12 ASH REMOVAL RECORDING AND CONTROL

FA 13 WATER TREATMENT CHEMICAL DELIVERIES AND CONTROL

FA 14 BOILER EFFICIENCY CONTROL

FA 15 REPAIR WORK TO INSTALLATIONS, SYSTEMS AND EQUIPMENT

FA 16 MAINTENANCE TO INSTALLATIONS, SYSTEMS AND EQUIPMENT

FA 01 SCOPE

- (a) This specification covers the general repair and maintenance of steam generating installations which include the following two types of coal-fired boilers:
- (i) Horizontal packaged wetback shell and fire-tube type boilers with chain grate stokers
- (b) This specification also covers the repair and maintenance to the following ancillary boiler and boiler house equipment:
- (i) Coal handling equipment
  - (ii) Ash handling equipment
  - (iii) Grit collectors and chimneys
  - (iv) Chain grate and underfeed stokers
  - (v) Induced draught fan and damper controls
  - (vi) Forced draught fan and damper controls
  - (vii) Boiler level controls and alarms
  - (viii) Feed-water pumps
  - (ix) Hot well tanks
  - (x) Water treatment plant and equipment
  - (xi) Coal chutes and hoppers
  - (xii) Boiler main steam valves, safety valves, non-return valves, blow-down and drain valves
  - (xiii) Soot blower (if applicable)
  - (xiv) Refractories
  - (xv) Instrumentation and controls
  - (xvi) Electrical control panel
  - (xvii) Spares and tooling
  - (xviii) Insulation and cladding
  - (xix) Ladders and landings.
- (c) This specification also addresses the following:
- (i) Hydraulic testing and internal and external inspections
  - (ii) Training and boiler efficiencies
  - (iii) Operating of boilers
  - (iv) Coal quality and control.
- (d) This specification shall form an integral part of the repair and maintenance contract document, and shall be read in conjunction with the additional and particular specifications compiled as part of this document.

This specification shall act as a guideline to the Particular Specification and, in the event of any discrepancies between the Technical Specification and the Particular Specification, the latter shall take precedence.

The Contractor shall at all times adhere to this specification unless otherwise specified in the Particular Specification.

FA 02 STANDARD SPECIFICATIONS

FA 02.01 GENERAL STANDARD SPECIFICATIONS, REGULATIONS AND CODES

The latest edition, including all amendments up to date of tender, of the following specifications, publications and codes of practice shall be read in conjunction with this specification and shall be deemed to form part thereof:

FA 02.01.01 SANS and other specifications and codes

- SANS 0400 - The applications of the building regulations
- SANS 0142 - Code of practice for the wiring of premises
- SANS 0140 - Identification colour marking
- SANS 044 - Parts I to IV: Welding
- SANS 460 - Copper tubes for domestic plumbing
- SANS 0103 - The measurement and rating of environmental noise with respect to annoyance and speech communications.

SANS Specifications listed on page 3 of the DPW specification OWG 371

- CKS 332 - Specifications for industrial V-belts

Atmospheric Pollution Prevention Act, No 45 of 1965

- BS 2790
- BS 1740
- BS 21
- BS 1640

FA 02.01.02 Department of Public Works specifications

- OWG 371 - Specification of materials and methods to be used
- STD.PWD.VII - Standard Specification for steam boiler installations (Issue VII 1997)
- Standard Specification for electrical installations and equipment pertaining to mechanical installations

FA 02.01.03 Occupational Health and Safety Act of 1993

All regulations and statutory requirements as laid down in the latest edition of the Occupational Health and Safety Act, 1993 (Act No 85 of 1993) shall be adhered to.

FA 02.01.04 Manufacturers' specifications, codes of and practice and installation instructions

All equipment and materials shall be installed, serviced and repaired strictly in accordance with the manufacturers' specifications, instructions and codes of practice.

FA 02.01.05 Municipal regulations, laws and by-laws

All municipal regulations, laws, by-laws and special requirements of the Local Authority shall be adhered to unless otherwise specified.

FA 02.01.06 CSIR Publications

Technical Guide K15, CSIR 1970: A guide to water treatment in low-pressure and medium-pressure boilers

FA 03 VARIATIONS AND ADDITIONS TO STANDARD SPECIFICATIONS

The following additional general specifications and requirements shall be read in conjunction with this specification and shall be adhered to unless otherwise specified in the Particular Specification.

FA 03.01 GENERAL REPAIR AND INSTALLATIONS REQUIREMENTS

- (a) All materials and equipment supplied and installed shall be of new high quality, design and manufactured to the relevant specifications, suitable for providing efficient, reliable and trouble-free service.
- (b) All work shall be executed in a first-class workman-like manner by qualified tradesmen.

- (c) All equipment, component parts, fittings and materials supplied and/or installed, shall conform in respect of quality, manufacture, test and performance to the requirements of the applicable current SANS specifications and codes, except where otherwise specified or approved by the Engineer/Departmental Representative in writing.
- (d) All materials and workmanship which, in the opinion of the Engineer/Departmental Representative, is inferior to that specified for the work will be condemned. All condemned material and workmanship shall be replaced or rectified as directed and approved by the Engineer/Departmental Representative.
- (e) The Contractor shall submit a detailed list of the equipment and material to be used to the Engineer/Departmental Representative for approval before placing orders or commencing installation.
- (f) All new equipment, materials and systems shall be installed and positioned such as to not impede on access routes, entrances and other services. The Contractor shall coordinate these items taking other services and equipment into account.
- (g) All control equipment and serviceable items shall be installed and positioned such that they will be accessible and maintainable.
- (h) The Contractor shall make sure that all safety regulations and measures are applied and enforced during the repair and construction periods to ensure the safety of the public and User Client.
- (i) Repair work shall be programmed in accordance with General Decommissioning, Testing and Commissioning Procedures, to ensure the shortest possible down-time of any service and the least inconvenience to the User Client and the public. The Contractor shall make sure that the necessary notifications and notices are timeously put into place for these activities.

#### FA 04 OPERATING AND MAINTENANCE MANUALS

The Contractor shall be responsible for the compilation of an inventory list and operating and maintenance manuals.

This shall be done in accordance with Operating and Maintenance Manuals.

All information shall be recorded and reproduced in electronic format, as well as three sets of hard copies to be supplied to the Department.

Over and above what is specified in Operating and Maintenance Manuals, the operating and maintenance manual to be compiled shall be structured to include at least the following:

- (a) System description
  - Complete system description and the working of the plant.
- (b) Commissioning data
  - Complete commissioning, test and inspection data of plant.
- (c) Operating data
  - (i) Plant running check list and frequency of servicing required;
  - (ii) Safety precautions to be implemented;
  - (iii) Manual and automatic operation;
  - (iv) Operator's duties (logging requirements);
  - (v) Lubricating oils and service instructions;
  - (vi) Pre-start checklist for each system;
  - (vii) Starting and stopping procedures.
- (d) Mechanical equipment

- addresses and
- (i) Description of all major items with the make, model number, names, telephone numbers of the suppliers, manufacturer or their agents;
  - (ii) Design capacities of all equipment, including selection parameters, selection curves, capacity tables, etc;
  - (iii) Manufacturers' brochures and pamphlets;
  - (iv) Schedule of spares with part numbers recommended to be held as stock.
- (e) Maintenance instructions
- (i) Schedule of maintenance particulars, frequency of services and replacements;
  - (ii) Trouble-shooting guide;
  - (iii) Part number of all replacement items and spares;
  - (iv) Capacity curves of pumps, fans and compressors;
  - (v) Serial numbers of all items of equipment.
- (f) Electrical equipment
- (i) Schedule of equipment, indicating manufacturer, type, model number, capacity and addresses and telephone numbers of suppliers;
  - (ii) Maintenance instructions;
  - (iii) Manufacturers' brochures and pamphlets;
  - (iv) Complete as-built circuit diagrams and diagrammatic representation of interconnections of all electrical equipment.
- (g) Instrumentation and control
- (i) Description of each control system;
  - (ii) Schedule of control equipment indicating manufacturer, type, model number, capacity and addresses and telephone numbers of suppliers;
  - (iii) Maintenance instructions;
  - (iv) Manufacturer's brochures and pamphlets.
- (h) Drawings
- (i) Paper prints of all as-built mechanical and electrical drawings;
  - (ii) Wiring diagrams framed behind glass shall be mounted adjacent to each relevant control panel.

#### FA 05 LOGGING AND RECORDING PROCEDURES

The Contractor shall under this repair and maintenance contract institute a logging and recording system as part of his maintenance control plan as defined in General and Maintenance. This shall consist of a log and record book which shall be utilised to log and record all operations, faults, system checks, breakdowns, maintenance visits, inspections, coal delivery, chemical and salt deliveries, ash removal, readings, etc.

The logbook shall be kept in a safe place inside the boiler house and shall only be utilised by the boiler house supervisor, the Contractor and the Engineer/Departmental Representative. Copies of the monthly entries and recordings into the logbook shall be submitted by the Contractor together with his monthly report to the Engineer/Departmental Representative.

The logbook shall be structured to include at least the following:

- (a) Daily inspection and maintenance actions;
- (b) Monthly inspection and maintenance actions;
- (c) Three-monthly inspection and maintenance actions;
- (d) Six-monthly inspection and maintenance actions;
- (e) Annual inspection and maintenance actions;
- (f) Breakdown reports;

- (g) Daily boiler plant operating conditions, observations, recordings and measurements (including CO<sub>2</sub> measurement, steam consumption if available, steam pressure, water meter readings, etc);
- (h) Statutory inspection and test comments and reports;
  - (i) Coal delivery report, stating the date, quality, quantity and delivery vehicle registration number;
  - (j) Chemical and salt delivery reports, stating the date, quantity, description and vehicle registration number;
  - (k) Ash removal report, stating the date and vehicle registration number.

The Contractor shall also institute an attendance register which shall be kept in a safe place inside the boiler house. This register shall be completed by all persons visiting the boiler house, including:

- (a) Boiler house operators, cleaning staff and supervisor
- (b) Contractor and maintenance personnel
- (c) Inspectors
- (d) Department personnel
- (e) Engineer.

The register shall state the date, time-in, time-out, name, company and reason for visit.

A copy of the register shall be submitted by the Contractor together with his monthly report.

#### FA 06 TESTS AND INSPECTIONS ON COMPLETION OF REPAIR WORK

Except where otherwise provided in the Contract, the Contractor shall provide all labour, materials, power, fuel, accessories and properly calibrated and certified instruments necessary for carrying out such tests. The Contractor shall make arrangements for such tests and shall give at least 72 hours written notice to the Engineer, before commencing the test.

In the event of the plant or installation not passing the test, the Department shall be at liberty to deduct from the Contract amount all reasonable expenses incurred by the Employer or the Engineer/Departmental Representative attending the repeated test.

Whenever any installation or equipment is operated for testing or adjusting as provided for above, the Contractor shall operate the entire system for as long a period as may be required to prove satisfactory performance at all times in the occupied space served by that system for up to twenty-four hours a day continuously until the system is handed over.

The Contractor shall provide all labour and supervision required for such operation and the Department may assign operating personnel as observers, but such observation time shall not be counted as instruction time.

After completing the installation or system, all equipment shall be tested, adjusted and readjusted until they operate to the satisfaction and approval of the Engineer/Departmental Representative.

The Contractor shall submit certificates of tests carried out to prove the efficiency of all equipment, as well as certificates to be obtained from all relevant authorities and statutory bodies, etc.

#### FA 07 QUALITY ASSURANCE SYSTEM

The Contractor shall institute an approved quality assurance (QA) system which shall be submitted to the Engineer for approval. The records of this QA system shall be kept throughout the duration of the Contract and submitted to the Engineer at regular intervals as required.

#### FA 08 COMMISSIONING AND RE-COMMISSIONING OF PLANT AND INSTALLATION

##### FA 08.01 GENERAL

On completion of the repair work and/or the installation of new systems the plant and equipment shall be put into operation after all tests and adjustments have been carried out to the satisfaction of the Engineer/Departmental Representative. Where new plant is installed, the Contractor shall run and operate the system for a period of time as specified by the Engineer/Departmental Representative and train the staff of the User Client to operate and maintain the system.

Logging of the operation of the installations shall commence immediately upon startup.

The Contractor shall submit a full commissioning report.

#### FA 08.02 RE-COMMISSIONING OF BOILERS AND ANCILLARY EQUIPMENT

On completion of the statutory inspections and tests or major boiler repairs the Contractor shall re-commission the boiler and its ancillary equipment. This operation shall be done strictly in accordance with the manufacturer's specification and shall be witnessed by the Engineer. This shall include but not be limited to the following:

(a) All required pre-commissioning mechanical checks:

Check boiler shell waterside to ensure that it is clean of all residue and foreign matter.  
Check that all fittings, hand holes, manholes, blow-down valves, pipe connections, etc, are properly secured and installed in accordance with the manufacturer's specification.  
Clean out feed pump strainers.  
Check that all joint seals are replaced with new and properly installed.  
Check boiler shell gas side to ensure that it is clean of any dust, slag, ash, loose refractory waste material, etc.  
Check and inspect all refractory work for compliance with manufacturer's specification.  
Check that all tube holes has been brushed and free of any foreign matter.  
Check that all moving components are free to move and that they are securely installed.  
Check all expansion joints and seals. Reinstall all covers and doors and check that they are properly secured.  
Check that the stoker is properly installed and that all components are installed in accordance with manufacturer's specification. These checks shall include alignment, tensioning, movement of grate without obstruction, seals, movement of dampers, guillotine door, grate links, set points, secureness of all equipment and components.  
Check for the correct installation and operation of the soot blowers.  
Check and record that all lubrication to equipment and components have been done in accordance with manufacturer's specification.  
Check that the FD and ID fans have been correctly installed and reassembled in accordance with manufacturer's specification.  
Check and clean grit collector and ensure that grit discharge port seals are in place and seal properly  
Check that chimneys are clean and securely supported and fixed.  
Check and ensure that all valves and safety valves are correctly installed and in the correct operating position, safety valves to be set in accordance with the required blow-off pressure for this installation.  
Check and clean out hot well tank and flush out water supply to boilers.

(b) All required pre-commissioning electrical checks

- (i) Check all wiring connections for tightness and repair any hot connections.
- (ii) Check that all electrical equipment have been properly reconnected in accordance with the manufacturer's specification.
  - (iii) Perform and record all required electrical insulation tests on equipment.
  - (iv) Check and test all controls with main circuits isolated.
  - (v) Check all motor-driven equipment for correct rotational directions.
  - (vi) Check and test the operation of all indication and warning lights.
- (vii) Check, set, record and readjust all equipment control and set points in accordance with manufacturer's specification.
- (viii) Run all motor-driven equipment for a period to ensure free movement and correct operation, feed pumps only to be operated for a short interval to check rotation.

(c) Commissioning of the boiler

On completion of the pre-commissioning checks the Contractor shall proceed with the commissioning of the boiler. This shall be done strictly in accordance with the manufacturer's specification and shall include but not be limited to the following:

- (i) Fill boiler with feed water from the hot well tank to the prescribed level in the manner as described by the manufacturer.

- (ii) During this process all level and warning system checks shall be performed on the water level control system.
- (iii) The feed pump's operation must be tested and indication lights checked.
- (iv) Check, test and set up water softener and chemical dosing equipment to the required water quality for the boiler.
- (v) Set and adjust all stoker controls in accordance with the manufacturer's specification.
- (vi) Set and adjust ID and FD damper controls in accordance with the manufacturer's specification.
- (vii) Set and adjust combustion controls in accordance with the manufacturers specification.
- (viii) Set and test steam pressure detector to the correct boiler operating pressure.
- (ix) Check the operation of the guillotine door and adjust to the required starting coal bed depth.
- (x) Check the coal hopper and coal level controls. Check and ensure that the coal conveying system operates and that the coal is at the correct level inside the hopper.
- (xi) Check and test the draught gauges for the correct operation.
- (xii) Proceed with lighting the fire.
- (xiii) Bring boiler up to steam, following the correct procedures as described by the manufacturer and ensuring correct combustion, coal bed depth, ignition line, etc, and that all controls are functioning properly and are set in the correct position.
- (xiv) When operating pressure has been reached the steam valve to the system has to be cracked open until full supply pressure to system is achieved, on which the valve can be fully opened.
- (xv) During the load conditions the boiler has to be readjusted and finally switched to automatic operation on completion of all automatic control functions for correct operation.

The Contractor shall visit, inspect, test and readjust the boiler over the 30-day period following the re-commissioning to ensure the correct functioning of the boiler and its associated equipment.

#### FA 09 GUARANTEE OF INSTALLATION AND EQUIPMENT

The Contractor shall provide guarantees obtained from the manufacturer(s) and/or supplier(s) to the effect that each piece of new equipment, supplied and installed under the repair work, complies with the required performance and will function as part of the complete system.

All new equipment, including, the complete new installations and the systems as a whole shall be guaranteed for a period of 12 (twelve) months commencing upon day of issue of certificate of completion for repair work of the installation.

#### FA 10 MAINTENANCE TOOLS AND SPARES

Each boiler house shall be equipped with the necessary maintenance tools and spares required by the specific type of boilers and installation for the daily operation and maintenance of the plant. At the start of the repair and maintenance contract the Contractor shall in the presence of the User Client make an inventory of the existing tools and spares, and any shortfall or damaged tools and spares shall be replaced with new. All replacement tools and spares shall be as specified by the boiler and equipment manufacturers. These tools and spares shall be kept in a lockable room or cabinet of which the boiler house supervisor and the Contractor shall carry keys. The Contractor shall on a monthly basis take stock of these items in the presence of the boiler house supervisor and record and report to the Engineer/Departmental Representative. Any shortfall shall be replaced by the Contractor as part of his responsibility under this Contract.

The tools and spares to be carried shall include but not be limited to at least the following:

- (a) Tools
  - Manhole spanner
  - Hand hole spanner
  - Double-ended spanners
  - Tube cleaning rods
  - Correct size tube cleaning brushes
  - Correct size tube de-scaling tools
  - Tube cleaning machine where required
  - CO2 analyser
  - Grate crank handle
  - Ash shovel
  - Grease gun

### Driving drift

Shear pins  
All other necessary tools for the type of installation

(b) Spares

Manhole and hand hole joints  
Replacement gauge glasses and accessories  
Replacement sight glasses  
Replacement belt drives  
Grate links and rods  
Any other spares that may be required for the specific installation and/or due to the remoteness of the installation.

### FA 11 COAL DELIVERY RECORDING AND CONTROL

As part of this repair and maintenance contract, the Contractor shall, in collaboration with the User Client and coal provider, institute a quality and delivery control plan for each boiler house. This control plan shall consist of a set of records to be completed with each coal delivery, stating the following:

- (a) Delivery note number
- (b) Date of coal delivery
- (c) Quantity of coal delivered
- (d) Type of coal delivered
- (e) Coal sample identification number
- (f) Contractor's signature on acceptance of information and coal sample
- (g) Coal deliverer's signature
- (h) Boiler house supervisor's signature
- (i) Comments by any party.

The type of coal to be accepted shall comply with the specification to be agreed between the User Client and the Engineer/Departmental Representative.

The Contractor shall be responsible for taking a sample of each batch of delivered coal and sending it to an approved laboratory for confirmation that the coal samples conform to the agreed type of coal for the specific installation. The result of the tested sample shall contain the following:

- (a) Various coal sampled mesh sizes
- (b) Calorific value
- (c) Moisture content
- (d) Ash content
- (e) Ash fusion temperature
- (f) Volatile content.

The results of these tests shall be submitted to the Engineer/Departmental Representative.

The recorded information shall also be utilised to determine the boiler efficiency, together with other relevant information to be gathered.

The Contractor shall, in collaboration with the Engineer/Departmental Representative, institute the necessary measures to ensure the safe keeping and security of the coal storage.

All the relevant recorded information shall be submitted monthly together with Contractor's maintenance schedules to the Engineer/Departmental Representative.

### FA 12 ASH REMOVAL RECORDING AND CONTROL

As part of this repair and maintenance contract, the Contractor shall, in collaboration with the User Client, ash removal company and the Engineer/Departmental Representative institute an ash removal control plan for each boiler house. This control plan shall consist of a set of records to be completed with each removal taking place and shall include the following:

- (a) Date of contact of removal company for removal of ash;

- (b) Date of actual ash removal;
- (c) Approximate quantity of ash removed;
- (d) Ash destination address, to be completed by removal company;
- (e) Random samples of ash taken and recorded by Contractor;
- (f) Contractor's signature on acceptance of information;
- (g) Removal company signature;
- (h) Boiler house supervisor's acceptance signature;
- (i) Comments by any party.

The Contractor shall at random take samples of the ash and send it to an approved laboratory for analysis in order to determine the amount of un-burnt carbon. The un-burnt carbon in the ash should normally not be more than 20 % per volume.

The Contractor shall, in collaboration with the User Client and the Engineer/Departmental Representative, also institute a control plan to ensure safe handling and storing of the ash.

All the relevant recorded information shall be submitted, together with Contractor's maintenance schedules, monthly to the Engineer/Departmental Representative.

#### FA 13 WATER TREATMENT CHEMICAL DELIVERIES AND CONTROL

As part of this repair and maintenance contract, the Contractor shall, in collaboration with the User Client and chemical supplier, institute a quality and delivery control plan for each boiler house. The control plan shall consist of a set of records to be kept up to date with each delivery of chemicals, stating the following:

- (a) Delivery note number
- (b) Date of delivery
- (c) Type and quantity of salts and chemicals delivered
- (d) Make-up water volume, recorded regularly
- (e) Feed-water volume, recorded regularly
- (f) Random sampled feed-water recorded by chemical supplier
- (g) Contractor's signature on acceptance of information
- (h) Chemical supplier deliverer's signature
- (i) Boiler house supervisor's signature
- (j) Comments by any party.

The type of salts and chemicals to be accepted as in compliance with the specification shall be agreed between the User Client and the Engineer/Departmental Representative, and shall be applicable to the type of boilers employed, as well as the make-up water supplied to the feed tank.

The Contractor shall ensure, together with the chemical supplier, that at regular intervals the boiler feed-water be sampled and analysed, feed-water treatment equipment be adjusted to ensure the correct dosing percentages and treatment for the specific installation.

The Contractor shall, in collaboration with the User Client and Engineer/Departmental Representative, also institute a control plan to ensure safe handling and storing of the chemicals.

All the relevant recorded information shall be submitted, together with Contractor's maintenance schedules, monthly to the Engineer/Departmental Representative.

Where specified in the Particular Specification and/or Schedule of Quantities the Contractor shall be responsible for the supply and delivery to site of the chemicals and salts for the 36-month maintenance contract period. The Contractor shall appoint an approved chemical supplier for the delivery of these chemicals and salts. The Engineer/Departmental Representative reserves the right to send samples of these chemicals and feed water for analysis by an independent laboratory for compliance checks.

#### FA 14 BOILER EFFICIENCY CONTROL

As part of this repair and maintenance contract, the Contractor shall, in collaboration with the boiler house supervisor, institute a boiler efficiency control plan for each boiler house. The control plan shall consist of a set of records to be completed regularly by monitoring the following:

- (a) Date and time entries recorded

- (b) Make-up water meter reading
- (c) Feed-water to boiler meter reading
- (d) Steam pressure gauge reading
- (e) CO<sub>2</sub> percentage reading of exhaust gases
- (f) Final exhaust gas temperature reading
- (g) Furnace pressure gauge reading
- (h) Steam flow meter reading if installed
- (i) Quantity of coal consumed.

The Contractor shall, in collaboration with the boiler house supervisor, ensure that these records are taken at predetermined intervals to ensure the efficient operation of the plant. Together with the boiler manufacturer's information and the above-mentioned recorded information, the Contractor shall issue a calculation indicating the approximate plant efficiency.

All the relevant recorded information shall be submitted, together with the Contractor's maintenance schedules, monthly to the Engineer. It shall be the responsibility of the Contractor to ensure that the boiler can operate at the design efficiency in all respects.

## FA 15 REPAIR WORK TO INSTALLATIONS, SYSTEMS AND EQUIPMENT

### FA 15.01 GENERAL

During the repair and maintenance contract all the systems, installations and equipment shall be repaired as specified in the Particular Specification. This repair work shall include but not be limited to the specified Particular Specification details.

All repair work shall be executed using approved materials and equipment suitable to the systems and/or installations they serve. The said repair work shall be executed in accordance with the relevant codes of practice, standards, regulations, municipal laws and by-laws, manufacturer's specifications and codes of practice and all additional and particular specifications included in this document.

The repair work items are listed in tabular form in the Particular Specification with all relevant details, such as capacity, size, manufacturer, model number, etc.

All repair work shall be executed within the period specified in the Appendix to Tender. All new equipment, materials and systems shall be furnished with a written guarantee of a defects liability period of 12 months commencing on the date of issue of a certificate of completion of the repair work. These guarantees shall be furnished in favour of the Department of Public Works.

Repair work items for the steam generating installations are categorised under the following headings:

- (a) Statuary inspections and tests
  - (i) Internal and external inspection
  - (ii) Hydraulic pressure test
- (b) Coal-fired boiler
  - (i) Boiler shell water side
  - (ii) Boiler shell gas side
  - (iii) Integral piping
  - (iv) Boiler valves and mountings
  - (v) Refractories and brickwork
  - (vi) Soot blowers
  - (vii) Lagging and cladding
- (c) Feed-water equipment and controls
  - (i) Feed-water tanks
  - (ii) Feed-water pumps
  - (iii) Water level equipment and controls

(d) Combustion and draught equipment

- (i) Stoker and stoker controls
- (ii) Fans and damper controls
- (iii) Combustion controls
- (iv) Chimneys
- (v) Ducting

(e) Coal handling and conveying equipment

- (i) Coal bunker and gratings
- (ii) Coal conveying equipment

(f) Ash and grit removal equipment

- (i) Grit collectors
- (ii) Ash conveying equipment
- (iii) Ash and grit trolleys
- (iv) Ash storage and handling

(g) Electrical installation, wiring and control panels

- (i) Instrumentation and controls
- (ii) General electrical power and lighting installation
- (iii) Electrical control panels

(h) Water treatment equipment

- (i) Water softener
- (ii) Chemical dosing equipment

(i) Boiler house ancillary equipment

- (i) Blow-down sump
- (ii) Ladders and galleries
- (iii) Painting of equipment, plant and building.

FA 15.02 STATUTORY INSPECTIONS AND TESTS

The Contractor shall at the commencement of the repair and maintenance contract arrange for the compulsory statutory inspections and tests on each of the boilers in his contract in accordance with the Occupational Health and Safety Act, 1993. This shall include an internal and external inspection and hydraulic test of the boilers. These inspections and tests shall be performed and certified by an approved inspection authority. The Contractor shall be responsible for all the preparation work and ancillary work as specified. Only one boiler at a time shall be taken out of commission for these purposes in accordance with General Decommissioning, Testing and Commissioning Procedures.

During this period the Contractor shall inspect, service, repair, replace and overhaul all ancillary boiler equipment associated with these boilers. These actions shall be planned in such a manner as to minimise the down-time of the boiler, as well as without influencing the operation of the rest of the plant. All defective equipment shall be replaced and repair work required to the boilers shall be done.

All inspections and findings shall immediately be reported to the Engineer/Departmental Representative.

FA 15.02.01 Hydraulic pressure testing and internal and external inspections

A hydraulic pressure test and internal and external inspection shall be performed on each boiler in accordance with the requirements of The Occupational Health and Safety Act, No 85 of 1993 as amended and shall be witnessed and certified by an approved inspection authority.

The inspections and hydraulic test shall be performed every 24 months as prescribed in the Occupational Health and Safety Act of 1993.

In accordance with the regulations the Contractor shall be responsible for providing the necessary tools, workmen, lights, equipment and apparatus which may be required by the Inspector for the purposes of the inspection and tests, and shall include the following equipment and actions:

- (a) All equipment, tools, rigging and other facilities necessary for conducting the test and inspections shall be provided.
- (b) The boiler test pump and gauges calibration certificates shall be made available prior to commencing the hydraulic testing.
- (c) The hydraulic test medium shall be clean cold water. The required test pressure shall be as stipulated in the Occupational Health and Safety Act, No 85 of 1993, as amended.
- (d) The maximum rating of any hand-held light source shall be 50 volt.
- (e) The hydraulic test date shall be confirmed/negotiated with the approved inspection authority.
- (f) All notices as required by the regulations shall be provided and put into place.
- (g) The up to date boiler log book and Government boiler register shall be made available to the Inspector.

#### FA 15.02.02 Boiler preparation for statutory inspection and testing

The following preparation work shall be carried out, prior to the external and internal inspection and hydraulic test, by the Contractor:

- a) All electrical supplies and controls to the boiler shall be isolated prior to starting of testing and inspection procedures.
- b) The boiler shall be emptied and cleaned. All scale deposits are to be removed from internal shell, tubes and water spaces. Methods to be used shall be approved by the Engineer/Departmental Representative and shall carry the approval of the boiler manufacturer.
- c) Dismantle and remove boiler lagging and cladding where necessary and where directed by the Engineer/Departmental Representative.
- d) Remove stoker from boiler
- e) Remove required refractory brickwork from boiler before inspection.
- f) All boiler fittings shall be stripped down, de-scaled, machined, re-seated, overhauled and tested to manufacturer's specification by approved engineering works. These are to be certified as complying with the manufacturer's specification. Each boiler fitting shall be hydraulically tested and witnessed as such by the Engineer/Departmental Representative.
- g) Any boiler fittings found to be beyond repair shall be replaced with new on approval of the Engineer/Departmental Representative.
- h) Remove all manholes, hand hole covers, mud holes and wash-out plugs.
- i) Remove boiler fusible plug and replace with new.
- j) Clean out and wire brush stacks, smoke boxes, flues and plates.
- k) Smoke boxes, stack uptake and domes to be painted in accordance with manufacturer's specification.
- l) Tubes to be cleaned, inspected and replaced if necessary.
- m) Open and clean out all blow-down and other trenches and replace damaged and leaking pipework.
- n) Chemical cleaning of the tubes shall not be allowed without the consent of the Engineer/Departmental Representative.
- o) Internal parts of the boiler shall only be painted on completion of the successful boiler inspection by the Inspector.

#### FA 15.02.03 Internal and external inspection

On completion of all the required preparation work the Contractor shall notify the Engineer/Departmental Representative and shall arrange for the external and internal inspection of the boiler to take place by the approved inspection authority. The inspection shall be certified with relevant comments by the inspection authority.

#### FA 15.02.04 The hydraulic pressure test

On completion of the necessary preparation work and internal and external inspection and relevant repair work, the Contractor shall prepare for the hydraulic test to be executed, which shall include the following:

- (a) Replace all manholes, hand hole covers, mud holes and wash-out plugs. All joints are to be renewed.
- (b) Replace boiler refractory brickwork and refractories prior to hydraulic pressure.
- (c) Properly clean and expose all boiler seams, stayheads and mountings.
- (d) All safety valves, steam valves and other connections to the boiler shall be blanked off prior to starting of testing procedures.
- (e) Ensure that all water gauge cocks are in the off-position and that all gauge glass protectors are in place.
- (f) The boiler shall be filled with clean water up to the highest opening of the boiler shell.
- (g) The system shall be put under the specified hydraulic pressure, with the boiler test pump, at least 15 minutes prior to the witnessing of the hydraulic test pressure.
- (h) The pressure shall be maintained for a minimum period as specified by the Inspector.
- (i) On completion of the hydraulic test, all boiler controls shall be tested.
- (j) Any leaks resulting from the hydraulic test shall be repaired and witnessed by the Engineer/Departmental Representative. Any repair work shall lead to a new hydraulic test to be witnessed by the Inspector.
- (k) The witnessed hydraulic test shall be signed off by the approved inspection authority.
- (l) After repair of defects and reinstallation of all equipment, components, lagging, fittings, etc, and approval and certification of all inspections and tests the Contractor shall put the boiler back into operation.

The re-commissioning shall be done strictly in accordance with the boiler manufacturer's specification and shall be witnessed by the Engineer/Departmental Representative.

#### FA 15.03 BOILER PLANT EQUIPMENT AND INSTALLATION

Any repair work which may be required on the boiler plant installation shall be executed with approved materials, equipment, methods and tooling suitable for the specific application. The said repair work shall be executed in accordance with the relevant codes of practice, standards, regulations, statutory regulations, manufacturers' specifications and codes of practice and as specified in all additional and particular specifications included in this document. During the statutory inspections and tests the following items are to be repaired and serviced as required by the Inspection Authority, boiler manufacturer and this specification.

##### FA 15.03.01 Coal-fired boilers

###### (a) Boiler shell water side

Check and inspect boiler shell for any signs of corrosion, leaks, damages and ensure that the inside is clear of all foreign matter. All scale deposits are to be removed by means of approved method of the boiler manufacturer. If any signs of damage and/or corrosion are observed, the Contractor shall notify the Engineer. Together with the Inspection Authority a decision shall be taken on the approved type of repairs to be implemented, if repair work is possible. All repair work to the boiler shell shall be done in accordance with the boiler manufacturer's specification, by qualified personnel, and shall be approved and witnessed as complying by the Inspection Authority. Check and inspect all internal pipe connections for correct fitting and soundness, ensure that all openings are clear of any foreign matter. Replace all hand hole, manhole and mud hole covers using new joint seals and rings. All existing paint work to boiler shell shall be properly prepared and repainted in accordance with the manufacturer's specification.

###### (b) Boiler shell gas side

Remove all smoke box covers and doors. Clear and clean out all dust, slag, ash and any foreign matter. Brush and clean out furnace tubes ensuring that no foreign matter is left behind. Boiler furnace tubes are to be inspected by the Inspection Authority. If any tubes are found in need of replacement these shall be done in accordance with the boiler manufacturer's specification, by qualified personnel, and shall be approved and witnessed by the Inspection Authority. All existing paintwork to boiler shell shall be properly prepared and repainted in accordance with the manufacturer's specification. Replace all smoke box covers and doors and ensure that they are all properly secured.

###### (c) Integral pipe work

All integral pipe work to the boiler to be inspected, cleaned and checked. The Contractor shall ensure that any defective piping, fittings, etc, be replaced and/or repaired in accordance with the manufacturer's specification.

(d) Boiler valves and mountings

All boiler valves including safety, blow-down, steam stop, air release, feed-water check, sequencing, drain valves, etc, are to be stripped, de-scaled, inspected, and overhauled. Where valves are found to be beyond repair these shall be replaced with new ones on approval of the Engineer/Departmental Representative.

Overhauling of valves shall include repacking of gland packing's, machining and reseating of valve seats and valves. All boiler valves and fittings shall be inspected by the Inspection Authority prior to reassembling. All valves shall be hydraulically pressure tested, prior to refitting, and witnessed by the Inspection Authority.

The Contractor shall ensure that certificates of compliance to the manufacturer's specification are obtained and issued to the Engineer/Departmental Representative, on all overhauled and refurbished valves, prior to refitting to boilers.

All overhauling and refurbishing work to boiler valves shall be done in accordance with the manufacturer's specification.

All boiler valve mountings on removed boiler valves are to be inspected and replaced with approved new mountings in accordance with the manufacturer's specification, which shall include washers, bolts, nuts, studs, etc.

Safety valves are to be adjusted and tested to the correct blow-off pressure.

(e) Refractories and brickwork

All removed refractories and brickwork during the internal and external inspection are to be replaced with new in accordance with the manufacturer's specification. All other refractories and brickwork not removed shall be inspected and repaired where necessary.

All recasting and replacement brickwork and refractories shall be done with approved materials, tooling, moulds, etc, in accordance with the manufacturer's specification.

On completion of the above work the Inspection Authority shall inspect and certify the work.

(f) Soot blowers

All soot blowers are to be removed, inspected, cleaned, overhauled and refurbished in accordance with the manufacturer's specification. On completion prior to refitting the soot blowers shall be tested in the presence of the Inspection Authority.

(g) Lagging and cladding

Boiler lagging and cladding are to be inspected, repaired and/or replaced where necessary.

On completion of statutory inspections and testing the removed lagging and cladding are to be replaced in an approved manner, replacing damaged sections of cladding and lagging, fixing screws to be properly secured and missing screws replaced. On completion cladding has to be repainted if necessary.

Where lagging and cladding are damaged beyond repair it shall be replaced with approved type as supplied by the manufacturer of the boiler.

FA 15.03.02 Feed-water equipment and controls

(a) Feed-water tanks

The feed-water tank has to be emptied, inspected, cleaned, repaired and refilled and put back into operation. Where only a single feed-water tank exists, this operation shall be carefully planned, as a complete plant shut-down will have to be arranged. This shall be done in close collaboration with the User Client and

Engineer, ensuring the minimum shut-down period. Where dual feed-water tanks are present, only one tank at a time shall be taken out of operation for the necessary repair and service work.

The repair work to these tanks shall include at least the following:

- (i) Inspect and test the feed-water tank and associated equipment and pipework for any leakages.
- (ii) Isolate supply water, condensate inlets and feed-water outlet to tank.
- (iii) Empty tank by means of draining it through the drain valves.
- (iv) Remove and clean tank of all mud, sediment, scale deposits and foreign matter by means of approved methods.
- (v) Carry out all necessary repair work to the tanks and associated equipment and pipework.
- (vi) Inspect tank lining for any defects and corrosion and if necessary carry out any required repair actions.
- (vii) Inspect, test, repair and replace if necessary the filling mechanism.
- (viii) Inspect tank stand for any defects and damages, and carry out the necessary repair work if any.
- (ix) Inspect lagging and cladding to feed-water tanks and carry out the necessary repair or/and replacement work.
- (x) Refill feed-water tank with clean water and open feed-water supplies to boilers.
- (xi) Inspect painting to tank and tank stand and if necessary prepare and repaint.

(b) Feed-water pumps

The feed-water pumps to the boilers are to be inspected, tested, serviced, repaired together with their associated equipment and pipe work. All repair and service work shall be done strictly in accordance with the manufacturer's specification.

The repair work to the feed-water pumps and equipment shall include at least the following:

- (i) Inspect and test the feed-water pumps for correct operation.
- (ii) Replace gland packings, seals and gaskets.
- (iii) Inspect and test for any bearing noise and replace if necessary.
- (iv) Clean out pump strainers, check non-return valves, valves, etc.
- (v) Test pump motor windings for balance phases, insulation test and check wiring.
- (vi) Inspect pump mountings and repair if necessary.

(c) Water level equipment and controls

The boiler water level and feed pump controls are to be inspected, tested, adjusted, serviced and repaired in accordance with the manufacturer's specification. This shall include at least the following:

- (i) Float type water level controls are to be dismantled, stripped, de-scaled, cleaned, serviced, repaired and where necessary replaced.
- (ii) All water level controls are to be reassembled, refitted, tested and adjusted in accordance with the manufacturer's specification. The adjustments shall be in accordance with the manufacturer's specification for starting and stopping the pumps.
- (iii) Low water level alarms shall be tested, inspected and adjusted to the correct level ensuring that the alarms are sound and indicated.
- (iv) Where modulating valves are fitted these shall be inspected, tested, serviced and repaired in accordance with the manufacturer's specification. The pressure relief valve on pump discharge shall be cleaned, serviced, overhauled and readjusted to the correct blow-off level.
- (v) Replace water level gauge glasses and gaskets.

FA 15.03.03 Combustion and water treatment

(a) Stoker and stoker controls

The stoker and stoker controls are to be inspected, tested, serviced, repaired together with their associated equipment. All repair and service work shall be done strictly in accordance with the manufacturer's specification.

- (i) The repair work to the stoker, stoker controls and equipment shall include at least the following:
- (ii) Remove stoker from boiler furnace during the statutory inspections.
- (iii) Inspect and replace burnt or/and damaged chain grate links and rods where necessary.

- (iv) Replace chain grate bearings.
- (v) Inspect sprockets and replace if required.
- (vi) Inspect shafts, rear roller and re-machine or replace if necessary.
- (vii) Inspect stoker chassis for straightness, alignment and possible damages, and repair if necessary.
- (viii) Inspect undergrate damper guide vanes and ensure that they are clean of any dust, slag and foreign matter.
- (ix) Renew and recast all refractories and brickwork in accordance with the manufacturer's specification.
- (x) Inspect main worm wheel for any defects and replace if necessary.
- (xi) Replace all joint seals with new.
- (xii) Reassemble stoker and stoker components.
- (xiii) Replace guillotine door support cables.
- (xiv) Inspect, service and overhaul stoker drive and gearbox in accordance with the manufacturer's specification.
- (xv) Replace shearpin.
- (xvi) Adjust and readjust grate tension.
- (xvii) Check and adjust fuel bed depth indicator.
- (xviii) Lubricate all required lubrication points as directed by the manufacturer.
- (xix) Mount FD fan and controls onto stoker.
- (xx) Reinstall stoker into boiler furnace in accordance with manufacturer's specification.

(b) Fans and damper controls

The FD and ID fans and associated dampers and damper controls are to be dismantled, stripped, inspected, serviced, repaired and, where necessary, components have to be replaced. All repair and service work shall be done strictly in accordance with the manufacturer's specification.

The repair work to the FD and ID Fans, dampers and damper controls shall include at least the following:

- (i) Dismantle and strip down above equipment during the statutory inspections.
- (ii) Inspect fan impeller blades, clearances, etc, for correct curvature and clearance adjustment.
- (iii) Replace V-belts.
- (iv) Replace FD and ID fan bearings with new.
- (v) Inspect fan casings and repair if required.
- (vi) Clean casing and repaint.
- (vii) Inspect damper controls and dampers for free movement, fan impeller clearance adjustment, linkage adjustments, control movements and settings. Repair, service and replace any defective equipment.
- (viii) Test fans and pulling motor windings for balance phases, insulation test and check wiring.
- (ix) Lubricate all required lubrication points and replace oils as directed by the manufacturer.
- (x) Inspect fan mountings and repair if necessary.
- (xi) Reassemble and refit fans, damper controls and dampers.

(c) Combustion controls

The combustion control equipment shall be dismantled, stripped, inspected, serviced, repaired and, where necessary, components be replaced. All repair and service work shall be done strictly in accordance with the manufacturer's specification.

The repair work to the combustion control equipment shall include at least the following:

- (i) Dismantle and strip down above equipment during the statutory inspections.
- (ii) Inspect, service, adjust and repair combustion control equipment.
- (iii) Inspect, service, repair and adjust chain drives and linkages.
- (iv) Test motor windings for balance phases, insulation and check wiring.
- (v) Lubricate all required lubrication points and replace oils as directed by the manufacturer.
- (vi) Inspect mountings and repair if necessary.

(d) Chimneys

The chimney stacks shall be inspected and repaired where required. This shall include at least the following:

For self-supporting stacks check torque tension of holding-down bolts, check access door and reseal, inspect chimney stack for any defects and repair if required, clean out the base of the stack, check and repair lagging and cladding if fitted, prepare and repaint where required.

For guyed type chimneys inspect and replace, if necessary, guy cables and securing points, re-tension guy cables, check and repair lagging and cladding if fitted, prepare and repaint where required.

(e) Ducting

The gas ducting shall be inspected and repaired where necessary. This shall include replacing all joint and expansion seals, cleaning out of ducting of all foreign matter, repairing and/or replacing any defective ducting, prepare and repaint ducting.

FA 15.03.04 Coal handling and conveying equipment

(a) Coal bunker

The coal bunkers or coal storage shall be inspected, cleaned out, and damaged structural elements and brickwork be repaired.

For coal bunkers the coal gratings and supports shall be inspected and all defective and/or damaged sections be repaired and/or replaced as might be necessary. Clear the coal storage area of any foreign objects.

(b) Coal conveying equipment

The coal conveying equipment shall be inspected, serviced, tested, repaired and, where necessary, components be replaced. All repair and service work shall be done strictly in accordance with the manufacturer's specification.

The repair work to the coal conveying equipment shall include at least the following:

- (i) Test all equipment for correct functioning.
- (ii) For en masse conveyors open covers, inspect links, chains and travelling ducting for any defects and/or damages, repair and/or replace components where necessary.
- (iii) For screw elevators inspect bushes, screw, casing, etc, for any defects and/or damages, repair and/or replace components where necessary.
- (iv) Inspect, service, lubricate and where necessary repair gear boxes and drives.
- (v) Test conveying equipment motor windings for balance phases, insulation and check wiring. Where necessary motors shall be reconditioned.
- (vi) Inspect, test, service, adjust and where necessary repair and/or replace hopper coal level equipment.
- (vii) Inspect, test, service and repair coal conveying electrical control panel ensuring that all controls function properly in accordance with the design.

FA 15.03.05 Ash and grit removal equipment

(a) Grit collectors

The grit collector shall be inspected, serviced, tested, repaired and, where necessary, components be replaced. All repair and service work shall be done strictly in accordance with the manufacturer's specification.

The repair work to the grit collector shall include at least the following:

- (i) Inspect grit collector supports and mountings for sturdiness, and repair and/or replace where necessary.
- (ii) Clear out grit collector of all grit, dust and foreign matter.
- (iii) Inspect all discharge port and other access opening seals and replace with new ones, ensure that grit trolley seals seat tightly onto grit trolley. Check flap operation.

(iv) Prepare and repaint grit collector casing and supports.

(b) Ash conveying equipment

If ash conveying equipment are installed these equipment shall be inspected, serviced, tested, repaired and, where necessary, components be replaced. All repair and service work shall be done strictly in accordance with the manufacturer's specification.

The repair work to the ash conveying equipment shall include at least the following:

- (i) Test all equipment for correct functioning.
- (ii) For submerged belt ash conveyors drain sump, clean out, inspect belt, roller bearings, frame, etc, any defects and/or damages, repair and/or replace components where necessary.
- (iii) For screw ash elevators inspect bushes, screw, casing, etc, for any defects and/or damages, repair and/or replace components where necessary.
- (iv) Inspect, service, lubricate and where necessary repair gear boxes and drives.
- (v) Test ash conveying equipment motor windings for balance phases, insulation test and check wiring. Where necessary motors shall be reconditioned.
- (vi) Inspect, test, service, adjust and where necessary repair and/or replace control equipment.
- (vii) Inspect, test, service and repair ash conveying electrical control panel ensuring that all controls function properly in accordance with the design.

(c) Ash and grit trolleys

All ash and grit trolleys are to be inspected, serviced and repaired where necessary.

FA 15.03.06 Electrical installation, wiring and control panels

(a) Instrumentation and controls

All instrumentation and control equipment shall be inspected, tested, repaired, adjusted and where necessary replaced. All repair and service work shall be done strictly in accordance with the manufacturer's specification.

The repair work to the instrumentation and control equipment shall include at least the following:

- (i) Test all equipment for correct operation.
- (ii) Inspect, test, service, adjust setting and if necessary repair and/or replace steam detector.
- (iii) Inspect, recalibrate and if beyond repair replace steam pressure gauge.

(b) General electrical power and lighting installation

The Contractor shall be responsible for the repair and maintenance work of the general power and lighting installation inside the boiler house. All repair work to this installation shall be done in accordance with the Standard Specification for Electrical Installations and Equipment pertaining to Mechanical Services of the Department of Public Works. This work shall include all repair work to the existing power sockets, cabling, wiring, lighting, and distribution boards.

(c) Electrical control panels

All electrical control panels shall be inspected, tested, and repaired, including all equipment inside the control panel. All repair and service work shall be done strictly in accordance with the manufacturer's specification.

The repair work to the electrical control panels shall at least include the following:

- (i) Test all control equipment for correct operation.
- (ii) Check and test all MCBs, isolators, contactors, overloads, other type of motor drives, pilot lights, control switches, etc, and readjust all set points; where equipment is found to be faulty these shall be replaced with new approved equipment.
- (iii) Check all wiring and connections for proper conducting and replace where hot connections are found.

(iv) Clean out panel interior and exterior, inspect panel body, fascias, doors, paintwork, etc, and repair where necessary.

FA 15.03.07 Water treatment equipment

(a) Water softener

The water softener shall be inspected, tested, repaired, adjusted and, where necessary, components be replaced. All repair and service work shall be done strictly in accordance with the manufacturer's specification.

The repair work to the water softener shall at least include the following:

- (i) Test all equipment for correct operation.
- (ii) Sample of feed-water shall be taken and analyzed to ensure that water softener is adjusted to the correct percentage. The hardness of the water shall be within the boiler manufacturer's specification.
- (iii) Check control and mixing equipment and salt container.

(b) Chemical dosing equipment

The chemical dosing units and containers shall be inspected, tested, repaired, adjusted and where necessary, components be replaced. All repair and service work shall be done strictly in accordance with the manufacturer's specification.

The repair work to the chemical dosing units and containers shall include at least the following:

- (i) Test all equipment for correct operation.
- (ii) Sample of feed-water shall be taken and analysed to ensure that the chemical dosing rate and chemicals conform to the requirements of the boiler manufacturer.
- (iii) Check, inspect, service and repair control and dosing pump equipment.
- (iv) The above work shall be done in collaboration with the water treatment supplier company.

FA 15.03.08 Boiler house ancillary equipment

(a) Blow-down sump

The blow-down sump shall be emptied, cleaned out, inspected and any repair work to the structure, manhole covers and frames, vent pipes, sparge pipes, etc, to be carried out.

(b) Ladders and galleries

The ladders and galleries inside the plant room shall be inspected and any defects and/or damages repaired. Ladders and galleries shall be prepared and repainted. All mountings and fixing points shall be inspected and repaired if necessary.

(c) Painting of equipment, plant and building

The Contractor shall on completion of the repair work clean and repaint the complete plant room and equipment as specified in accordance with the Department's Specification.

FA 16 MAINTENANCE TO INSTALLATIONS, SYSTEMS AND EQUIPMENT

FA 16.01 GENERAL

Monthly maintenance responsibilities for each installation including all units and components as specified, shall commence with access to the site. A difference shall be made in payment for the maintenance prior to and after practical completion of repair work.

Maintenance responsibilities of the completed installation shall commence upon the issue of a certificate of practical completion for repair work, and shall continue for the remainder of the 36-month contract period. This part of the Contract shall include:

- (a) Routine preventative maintenance;

- (b) Corrective maintenance, and
- (c) Breakdown maintenance,

as defined in General Maintenance, for the specified installations described under FA 01 of this specification.

The maintenance work to be performed and executed shall be done strictly in accordance with Additional Specification SA: General Maintenance, and as specified in Particular Specification PFA and this specification.

The said maintenance work shall be executed in accordance with the relevant codes of practice, statutory regulations, standards, regulations, municipal laws and by-laws and the manufacturers' specifications and codes of practice.

The maintenance schedules and frequency shall be developed under the maintenance control plan to be instituted by the Contractor, as specified in General Maintenance.

All new equipment, components and materials supplied and installed under the maintenance contract shall be furnished with a prescribed manufacturer's guarantee.

The maintenance work and items are to be categorised for each maintenance activity under the following headings:

- (a) Coal-fired boiler
- (b) Combustion equipment
- (c) Coal handling equipment
- (d) Ash handling equipment
- (e) Grit collection and draught equipment
- (f) Water treatment and feed-water tanks
- (g) Steam and condensate installation
- (h) Electrical installation and controls.

The Contractor shall be remunerated monthly, based on his performance, for maintaining the complete installation in a perfect functional condition.

**FA 16.02 ROUTINE PREVENTATIVE MAINTENANCE**

This routine maintenance of the installations, systems and equipment shall be done in accordance with General Maintenance and the Particular Specification related to this work.

The routine maintenance work to be performed and executed shall include, but not be limited to the items listed in tables FA 16.02/1, FA 16.02/2, FA 16.02/3, FA 16.02/4, FA 16.02/5 and FA 16.02/6 below under the respective headings.

These actions and findings shall be logged and reported on the relevant approved schedules and reports.

**TABLE FA 16.02/1: DAILY ACTIONS AND MAINTENANCE**

ITEM	MAINTENANCE DESCRIPTION	ACTION RESPONSIBILITY	ACTION
1	Measure CO2 content of exhaust with CO2 analyser.	Boiler house supervisor	
	Check/Record		
2	Blow-down gauge glasses.	Boiler house supervisor	
	Check/Record		
3	Test level controls for correct functioning.	Boiler house supervisor

TABLE FA 16.02/2: Weekly actions and maintenance

ITEM	MAINTENANCE DESCRIPTION	ACTION RESPONSIBILITY	ACTION
1	All as listed under table FA 16.02/1 Check/Record/Adjust/Repair	Boiler house supervisor and Contractor	
2	Test safety valves as described by the boiler manufacturer. Test/Record	Contractor	
3	Check the furnace draught gauge for correct operation in accordance with the manufacturer's specification. Check/Record	Contractor	
4	Inspect stoker brickwork and refractories and if found to be damaged it must be repaired. Check/Record	Contractor	
5	Lubricate all required lubrication points, including sootblowers, stoker drive shaft bearings, guillotine door and check stoker drive oil level. Check/Service/Record	Boiler house supervisor and Contractor	
6	Visual inspection of all boiler house equipment and installations for any pending defects, faults, etc. Check/Record	Boiler house supervisor and Contractor	
7	Inspect and test all control functions and readjust if necessary. Test/Record/Adjust	Contractor	

TABLE FA 16.02/3: MONTHLY ACTIONS AND MAINTENANCE

ITEM	MAINTENANCE DESCRIPTION	ACTION RESPONSIBILITY	ACTION
1	All as listed under tables FA 16.02/1 and FA 16.02/2 Check/Record Adjust/Repair	Boiler house supervisor and Contractor	
2	Clean out all strainers. Check/Service/Record	Contractor	
3	Inspect and test sootblowers for correct operation. Check/Record	Contractor	
4	Inspect all V-Belts and replace if necessary. Check/Record/Replace	Contractor	
5	Inspect all brickwork and refractories and repair and/or replace where necessary. Check/Record Repair	Contractor	
6	Inspect all seals and joints for leakages and replace if necessary. Check/Record Replace	Contractor	
7	All grease nipples to be greased with specified grease in accordance with equipment manufacturer's specification. Check/Service/Record	Contractor	

	8	Test and analyse water quality, adjust and repair water treatment equipment if necessary and where specified, Adjust/Repair supply and deliver chemicals and salts.	Contractor and chemical supplier
	9	Sample and analyse coal quality. Check/Record/Test	Boiler house supervisor, coal supplier and Contractor
	10	Check ash removal implementation and report. Check/Record	Boiler house supervisor, ash removal company and Contractor
	11	Test and record boiler efficiency. Test/Record	Boiler house supervisor and Contractor
	12	Check coal conveying equipment for correct functioning and check for any visual faults or defects and repair if necessary. Check/Record/Repair	Contractor
	13	Inspect, service, repair and replace where required all electrical equipment and installations. Adjust/Repair	Contractor Test/Record
	14	Inspect, service all steam and condensate piping and equipment. Test/Record Adjust/Repair	Contractor

TABLE FA 16.02/4: THREE-MONTHLY ACTIONS AND MAINTENANCE

ITEM	MAINTENANCE DESCRIPTION	ACTION RESPONSIBILITY	ACTION
	All as listed under tables FA 16.02/1, FA 16.02/2 and FA 16.02/3	Boiler house supervisor and Contractor	
2.00	Lubricate ID and FD damper control units. Record Service	Contractor	Check/
3.00	Replace ID and FD fan bearing grease. Record Service	Contractor	Check/
4.00	Brush and clean fire tubes and clean flue, back plate, combustion chamber and remove all grit and soot deposits. Inspect and repair where necessary. Check/Record/Service/Repair	Contractor	
5.00	Check boiler water side for scale deposits and clean and de-scale. Check/Record/Service/Repair	Contractor	
6.00	Replace stoker gear box and drive oils. Service/Repair	Contractor	Check/Record
7.00	Check, inspect, service all coal conveying equipment and repair where necessary. Service/Repair	Contractor	Check/Record
8.00	Check, inspect, service and repair if necessary grit collectors and chimney stacks. Service/Repair	Contractor	Check/Record
9.00	Inspect, repair and replace where necessary all lagging and cladding. Service/Repair	Contractor	Check/Record

TABLE FA 16.02/5: SIX-MONTHLY ACTIONS AND MAINTENANCE

ITEM	MAINTENANCE DESCRIPTION	ACTION RESPONSIBILITY	ACTION
------	-------------------------	-----------------------	--------

	1 All as listed under tables FA 16.02/1, and Contractor Check/Record/Adjust/Repair FA 16.02/2 and FA 16.02/3	Boiler house supervisor
2	Inspect stoker chassis, repair and replace Check/Record/Service/Repair as required.	Contractor
3	Fully test, inspect, service, adjust, repair Check/Record/Service/Repair and replace as required ID and FD dampers.	Contractor
4	Inspect, descale, clean out, repair and replace Check/Record/Service/Repair as required feed-water tanks.	Contractor

**TABLE FA 16.02/6: ANNUAL ACTIONS AND MAINTENANCE**

ITEM	MAINTENANCE DESCRIPTION	ACTION RESPONSIBILITY	ACTION
1	All as listed under tables FA 16.02/1, Check/Record/Adjust/Repair FA 16.02/2, FA 16.02/3 and FA 16.02/4		Boiler house supervisor and Contractor
2	Annual survey by Occupational, Inspect/Test/Service/Repair Health and Safety Inspector.		Contractor, Department and Inspector
3	Inspect and repaint all equipment and building Inspect/Test/Service/Repair elements where required.		Contractor
4	Inspect, clean, repair blow-down sump. Inspect/Test/Service/Repair		Contractor
5	Remove, strip, service, repair, adjust and repair level controls, alarms and safety equipment. Inspect/Test/Service/Repair		Contractor

**FA 16.03 CORRECTIVE MAINTENANCE**

This corrective maintenance of the installations, systems and equipment shall be done in accordance with General Maintenance and the Particular Specification related to this work.

The Contractor shall inspect and check all equipment, materials, systems and installation for any pending breakdowns, maladjustments or anomalies of equipment.

The Contractor shall report and take actions to correct such shortfall.

**FA 16.04 BREAKDOWN MAINTENANCE**

Breakdown maintenance of the installations, systems and equipment shall be done in accordance with General Maintenance.

All breakdown problems experienced shall be acted upon within the time limitations allowed in the General Maintenance specifications.

All breakdown maintenance shall be done in accordance with the relevant specifications, standards, regulations and codes.

The Contractor shall have access to the necessary spares, equipment and tools for any possible breakdowns.

FB 09	GUARANTEE OF INSTALLATION AND EQUIPMENT
FB 10	MAINTENANCE TOOLS AND SPARES
FB 11	REPAIR WORK TO INSTALLATIONS, SYSTEMS AND EQUIPMENT
FB 12	MAINTENANCE TO INSTALLATIONS, SYSTEMS AND EQUIPMENT

#### FB 01 SCOPE

This specification covers the general repair and maintenance of steam distribution installations, which include the following:

- (a) Steam distribution piping, insulation and associated equipment
- (b) Condensate return piping, fittings, insulation and associated equipment
- (c) Condensate pumping systems
- (d) Steam control equipment
- (e) Steam trapping systems.

This specification also addresses the training of User Client and associates, and maintenance staff.

This specification shall form an integral part of the repair and maintenance contract document, and shall be read in conjunction with the additional and particular specifications compiled as part of this document.

This specification shall act as a guideline to the Particular Specification and, in the event of any discrepancies between the Technical Specification and the Particular Specification, the latter shall take precedence.

The Contractor shall at all times adhere to this specification, unless otherwise specified in the Particular Specification.

#### FB 02 STANDARD SPECIFICATIONS

##### FB 02.01 GENERAL STANDARD SPECIFICATIONS, REGULATIONS AND CODES

The latest edition, including all amendments up to date of tender, of the following specifications, publications and codes of practice shall be read in conjunction with this specification and shall be deemed to form part thereof:

##### FB 02.01.01 SANS and other specifications and codes

- |           |   |   |
|-----------|---|---|
| SANS 0400 | - | The applications of the building regulations  |
| SANS 0142 | - | Code of practice for the wiring of premises   |
| SANS 0140 | - | Identification colour marking   |
| SANS 044  | - | Parts I to IV: Welding  |
| SANS 460  | - | Copper tubes for domestic plumbing  |
| SANS 0103 | - | The measurement and rating of environmental noise with respect to annoyance and speech communications |

Atmospheric Pollution Prevention Act, No 45 of 1965

BS 2790  
BS 1740  
BS 21  
BS 1640

FB 02.01.02 Department of Public Works Specifications

OWG 371 - Specification of materials and methods to be used  
STD.PWD.VII - Standard specification for steam boiler installations (Issue VII 1997)  
- Standard Specification for electrical installations and equipment pertaining to mechanical installations (Issue IX December 1998)

FB 02.01.03 Occupational Health and Safety Act of 1993

All regulations and statutory requirements as laid down in the latest edition of the Occupational Health and Safety Act, 1993 (Act No 85 of 1993) shall be adhered to.

FB 02.01.04 Manufacturers' specifications, codes of and practice and installation instructions

All equipment and materials shall be installed, serviced and repaired strictly in accordance with the manufacturers' specifications, instructions and codes of practice.

FB 02.01.05 Municipal regulations, laws and by-laws

All municipal regulations, laws, by-laws and special requirements of the Local Authority shall be adhered to unless otherwise specified.

FB 03 VARIATIONS AND ADDITIONS TO STANDARD SPECIFICATIONS

The following additional general specifications and requirements shall be read in conjunction with this specification and shall be adhered to unless otherwise specified in the Particular Specification.

FB 03.01 General repair and installations requirements

All materials and equipment supplied and installed shall be of new high quality, design and manufactured to the relevant specifications, suitable for providing efficient, reliable and trouble-free service.

All work shall be executed in a first-class workman-like manner by qualified tradesmen.

All equipment, component parts, fittings and materials supplied and/or installed, shall conform in respect of quality, manufacture, test and performance to the requirements of the applicable current SANS specifications and codes, except where otherwise specified or approved by the Engineer/Departmental Representative in writing.

All materials and workmanship which, in the opinion of the Engineer/Departmental Representative, is inferior to that specified for the work, will be condemned. All condemned material and workmanship shall be replaced or rectified as directed and approved by the Engineer/Departmental Representative,

The Contractor shall submit a detailed list of the equipment and material to be used to the Engineer/Departmental Representative for approval before placing orders or commencing installation.

All new equipment, materials and systems shall be installed and positioned such as to not impede on access routes, entrances and other services. The Contractor shall coordinate these items taking other services and equipment into account.

All control equipment and serviceable items shall be installed and positioned such that they will be accessible and maintainable.

The Contractor shall make sure that all safety regulations and measures are applied and enforced during the repair and construction periods to ensure the safety of the public and User Client.

Repair work shall be programmed in accordance with General Decommissioning, Testing and Commissioning Procedures, to ensure the shortest possible down-time of any service and the least inconvenience to the User Client and public. The Contractor shall make sure that the necessary notifications and notices are timeously put into place for these activities.

#### FB 04 OPERATING AND MAINTENANCE MANUALS

The Contractor shall be responsible for the compilation of an inventory list and operating and maintenance manuals.

This shall be done in accordance with Operating and Maintenance Manuals.

All information shall be recorded and reproduced in electronic format, as well as three sets of hard copies to be supplied to the Department.

Over and above what is specified in Operating and Maintenance Manuals, the operating and maintenance manual to be compiled shall be structured to include at least the following:

- (a) System description
  - Complete system description and the working of the plant.
- (b) Commissioning data
  - Complete commissioning, test and inspection data of systems and equipment.
- (c) Operating data
  - (i) Systems and equipment running check list and frequency of servicing required;
  - (ii) Safety precautions to be implemented;
  - (iii) Operator's duties (logging requirements);
  - (iv) Lubricating oils and service instructions.
- (d) Mechanical equipment
  - (i) Description of all major items with the make, model number, names, addresses and telephone numbers of the suppliers, manufacturers or their agents;
  - (ii) Design capacities of all equipment, including selection parameters, selection curves, capacity tables, etc;
  - (iii) Manufacturer's brochures and pamphlets;
  - (iv) Schedule of spares with part numbers recommended to be held as stock.
- (e) Maintenance instructions
  - (i) Schedule of maintenance particulars, frequency of services and replacements;
  - (ii) Trouble-shooting guide;
  - (iii) Part numbers of all replacement items and spares;
  - (iv) Capacity curves of condensate pumps;
  - (v) Serial numbers of all items of equipment.
- (f) Electrical equipment
  - (i) Schedule of equipment, indicating manufacturer, type, model number, capacity and addresses and telephone numbers of suppliers;
  - (ii) Maintenance instructions;
  - (iii) Manufacturer's brochures and pamphlets;

(iv) Complete as-built circuit diagrams and diagrammatic representation of interconnections of all electrical equipment.

(g) Instrumentation and control

- (i) Description of each control system;
- (ii) Schedule of control equipment, indicating manufacturer, type, model number, capacity and addresses and telephone numbers of suppliers;
- (iii) Maintenance instructions;
- (iv) Manufacturer's brochures and pamphlets.

(h) Drawings

- (i) Paper prints of all as-built mechanical and electrical drawings;
- (ii) Wiring diagrams framed behind glass shall be mounted adjacent to each relevant control panel.

#### FB 05 LOGGING AND RECORDING PROCEDURES

The Contractor shall under this repair and maintenance contract institute a logging and recording system as part of his maintenance control plan as defined in General Maintenance. This shall consist of a log and record book, which shall be utilized to log and record all operations, faults, system checks, breakdowns, maintenance visits, inspections, etc.

The logbook shall be kept in a safe place as agreed with the User Client and the Engineer/Departmental Representative and shall only be utilized by the maintenance personnel, the Contractor and the Engineer/Departmental Representative. Copies of the monthly entries and recordings into the logbook shall be submitted by the Contractor together with his monthly report to the Engineer/Departmental Representative.

The logbook shall be structured to include at least the following:

- (a) Daily inspection and maintenance actions;
- (b) Monthly inspection and maintenance actions;
- (c) Three-monthly inspection and maintenance actions;
- (d) Six-monthly inspection and maintenance actions;
- (e) Annual inspection and maintenance actions;
- (f) Breakdown reports;
- (g) Daily system and equipment operating conditions, observations, recordings and measurements;
- (h) Inspection and test comments and reports.

The Contractor shall also institute an attendance register, which shall be kept in a safe place as agreed with the User Client and the Engineer/Departmental Representative. This register shall be completed by all persons visiting the installation, including:

- (a) Maintenance personnel
- (b) Contractor
- (c) Inspectors
- (d) Department personnel
- (e) Engineer/Departmental Representative.

The register shall state the date, time-in, time-out, name, company and reason for visit.

A copy of the register shall be submitted by the Contractor together with his monthly report.

#### FB 06 TESTS AND INSPECTIONS ON COMPLETION OF REPAIR WORK

Except where otherwise provided in the Contract, the Contractor shall provide all labour, materials, power, fuel, accessories and properly calibrated and certified instruments necessary for carrying out such tests. The Contractor shall make arrangements for such tests and he shall give at least 72 hours written notice to the Engineer/Departmental Representative before commencing the test.

In the event of the plant or installation not passing the test, the Employer shall be at liberty to deduct from the Contract amount all reasonable expenses incurred by the Employer or the Engineer/Departmental Representative attending the repeated test.

Whenever any installation or equipment is operated for testing or adjusting as provided for above, the Contractor shall operate the entire system for as long a period as may be required to prove satisfactory performance at all times in the occupied space served by that system for up to twenty-four hours a day continuously until the system is handed over.

The Contractor shall provide all labour and supervision required for such operation and the Department may assign operating personnel as observers, but such observation time shall not be counted as instruction time.

After completing the installation or system, all equipment shall be tested, adjusted and readjusted until it operates to the satisfaction and approval of the Engineer/Departmental Representative.

The Contractor shall submit certificates of tests carried out to prove the efficiency of all equipment, as well as certificates to be obtained from all relevant authorities and statutory bodies, etc.

The Contractor shall allow for all required inspections, tests and certification by an approved inspection authority on repair work where required by the Occupational Health and Safety Act.

#### FB 07            QUALITY ASSURANCE SYSTEM

The Contractor shall institute an approved quality assurance (QA) system which shall be submitted to the Employer and/or the Engineer/Departmental Representative for approval. The records of this QA system shall be kept throughout the duration of the Contract and submitted to the Engineer/Departmental Representative at regular intervals as required.

#### FB 08            COMMISSIONING AND RE-COMMISSIONING OF PLANT AND INSTALLATION

##### FB 08.01        GENERAL

On completion of the repair work and/or the installation of new systems the plant and equipment shall be put into operation after all tests and adjustments have been carried out to the satisfaction of the Engineer/Departmental Representative. Where new plant is installed, the Contractor shall run and operate the system for a period of time as specified by the Engineer/Departmental Representative and train the User Client's representatives to operate and maintain the system.

The work shall be done in accordance with General Decommissioning, Testing and Commissioning Procedures.

Logging of the operation of the installations shall commence immediately upon start-up. The Contractor shall submit a full commissioning report.

##### FB 08.02        RE-COMMISSIONING OF STEAM DISTRIBUTION INSTALLATION AND ANCILLARY EQUIPMENT

On completion of any repairs the Contractor shall re-commission the systems, installation and/or equipment influenced by such repairs.

This operation shall be done strictly in accordance with the manufacturer's specification and applicable standards, norms and specifications of the relevant body, authority and/or department. The operation shall include but not be limited to the following:

- (a) All required pre-commissioning mechanical checks
- (b) Check all steam, water and drain connections.
- (c) Check all moving parts.
- (d) Check seals, gaskets and joints.
- (e) Reinstall all plugs and covers and check that they are properly secured.
- (f) Check and record that all lubrication to equipment and components has been done in accordance with manufacturer's specification.

- (g) Check and ensure that all valves and safety valves are correctly installed and in the correct operating position. Safety valves are to be set in accordance with the required blow-off pressure for the installation.
- (h) Check and ensure that all control equipment such as pressure-reducing valves, heat control equipment, etc, are set and adjusted to the correct controlling value in accordance with the system parameters and manufacturer's specification.
- (i) Check and clean out condensate tanks and storage facilities.
- (j) Check, test and inspect the correct installation and operation of all condensate trapping arrangements.
- (k) Check, test and inspect the correct installation and operation of all condensate pumping installations.
- (l) Check that all the required pressure testing to the repaired installations and/or new equipment has been done, witnessed and recorded in accordance with the relevant specifications.
- (m) Check, test and inspect all bracketing and supports for the relevant installations and equipment to ensure that they are properly secured and installed in accordance with the manufacturer's specifications and installation specification of the relevant controlling authority.
- (n) Check, inspect and ensure that all logging and cladding are installed and repaired in accordance with the applicable specifications of the relevant controlling authority.
- (o) Check, inspect and ensure that no leaks to equipment, systems and installations occur.

#### All required pre-commissioning electrical checks

- (a) Check all wiring connections for tightness and repair any hot connections.
- (b) Check that all electrical equipment has been properly reconnected in accordance with the manufacturer's specification.
- (c) Perform and record all required electrical insulation tests on equipment.
- (d) Check and test all controls without livening up electrical equipment.
- (e) Check all motor-driven equipment for correct rotational directions.
- (f) Check and test the operation of all indication and warning lights.
- (g) Check, set, record and readjust all equipment control and set points in accordance with manufacturer's specifications.
- (h) Run all motor-driven equipment for a period to ensure free movement and correct operation, feed pumps only to be operated for a short interval to check rotation.

#### Commissioning of equipment

On completion of the pre-commissioning checks the Contractor shall proceed with the commissioning of the equipment. This shall be done strictly in accordance with the manufacturer's specification and system parameters and shall include but not be limited to the following:

- (a) During the commissioning process all level and warning system checks are to be performed on the water-level control system where applicable.
- (b) During load conditions the equipment shall be readjusted and finally switched to automatic operation on completion of all automatic control functions for correct operation where applicable.
- (c) Check steam pressure valves and readjust them where necessary to the correct set point under load conditions.
- (d) Check the operation of all steam trap arrangements.
- (e) Check the correct operation of all condensate pumping systems. Readjust level controls and/or other control equipment where applicable.
- (f) Test and check for any leaks to the system, equipment and installation.
- (g) Check for any unnecessary strain to system, equipment and installation due to expansion and contraction.

The Contractor shall visit, inspect, test and readjust the systems, equipment and installation during the week following the re-commissioning to ensure the correct functioning of the equipment and its associated components.

#### FB 09 GUARANTEE OF INSTALLATION AND EQUIPMENT

The Contractor shall provide guarantees obtained from the manufacturer(s) and/or supplier(s) to the effect that each piece of new equipment, supplied and installed under the repair contract, complies with the required performance and will function as part of the complete system.

All new equipment, including the complete new installations and the systems as a whole, shall be guaranteed for a period of 12 (twelve) months commencing on the day of issue of a certificate of completion for the repair work of the installation.

#### FB 10 MAINTENANCE TOOLS AND SPARES

Each installation shall be equipped with the necessary maintenance tools and spares required by the specific type of equipment and installation for the daily operation and maintenance of the system. At the start of the repair and maintenance contract the Contractor shall in the presence of the User Client make an inventory of the existing tools and spares, and any shortfall or damaged tools and spares shall be replaced with new. All replacement tools and spares shall be as specified by the equipment manufacturers. These tools and spares shall be kept in a lockable room or cabinet of which the maintenance supervisor and the Contractor shall carry keys. The Contractor shall on a monthly basis take stock of these items in the presence of the maintenance supervisor and Contractor and record and report to the Engineer/Departmental Representative. Any shortfall shall be replaced by the Contractor as part of his responsibility under this Contract.

The tools and spares to be carried shall include but not be limited to at least the following:

- (a) Tools
  - (i) Grease and oil lubrication equipment;
  - (ii) Equipment operating keys and tools.
- (b) Spares
  - (i) Spare sight glasses for sight glass indicators, glass seals and gaskets;
  - (ii) Spare seats, gaskets and gland packing for valves, etc;
  - (iii) Spare steam traps, at least one of each type present on the installation;
  - (iv) Spare pressure gauges, at least one of each range and type.

#### FB 11 REPAIR WORK TO INSTALLATIONS, SYSTEMS AND EQUIPMENT

##### FB 11.01 GENERAL

During the repair and maintenance contract all the systems, installations and equipment shall be repaired as specified in the Particular Specification. This repair work shall include but no be limited to the specified Particular Specification details.

All repair work shall be executed using approved materials and equipment suitable to the systems and/or installations they serve. The said repair work shall be executed in accordance with the relevant codes of practice, standards, regulations, municipal laws and by-laws, manufacturer's specifications and codes of practice and all additional and particular specifications included in this document.

The repair work items are listed in the Particular Specification and Schedule of Quantities with all relevant details, such as capacity, size, manufacturer, model number, etc.

All repair work shall be executed within the specified durations listed in the Appendix to Tender. All new equipment, materials and systems shall be furnished with a written guarantee of a defects liability period of 12 months commencing on the date of issue of a certificate of completion for the repair work. These guarantees shall be furnished in favour of the Department of Public Works.

Repair work items for the steam generating installations are categorised under the following headings:

- (a) General requirements for steam and condensate installations
- (b) Steam and condensate pipework
  - (i) Steam and condensate piping and fittings
  - (ii) Jointing methods and specification
  - (iii) Bracketing and support work

- (c) Lagging and cladding
  - (i) Lagging and cladding materials and installation requirements
- (d) Pressure testing
- (e) Steam trap arrangements
  - (i) Steam trap equipment
  - (ii) Steam trap installation requirements
- (f) Pressure-reducing equipment and requirements
  - (i) Pressure-reducing equipment
  - (ii) Pressure-reducing requirements
- (g) Heating control equipment
  - (i) Steam heating equipment
  - (ii) Steam heating requirements
- (h) Condensate pumping installations
  - (i) Steam operated condensate pumping installations
  - (ii) Electrically operated, steam operated installations
- (i) Steam and condensate piping ancillary equipment
  - (i) Strainers
  - (ii) Valves
  - (iii) Air vents
  - (iv) Separators
  - (v) Expansion equipment
  - (vi) Flow meters
  - (vii) Check valves
  - (viii) Vacuum breakers
  - (ix) Sight glasses
  - (x) Safety valves
  - (xi) Pressure gauges
  - (xii) Electrical installation, wiring and control panels
- (j) Electrical installation, wiring and control panels
  - (i) Electrical control panels
  - (ii) Wiring and cabling
  - (iii) Instrumentation and controls.

Any repair work, which may be required on the systems, equipment and installations, shall be executed using approved materials, equipment, methods and tooling suitable for the specific application. The said repair work shall be executed in accordance with the relevant codes of practice, standards, regulations, statutory regulations, manufacturer's specifications and codes of practice and as specified in all additional and particular specifications included in this document.

During the repair and maintenance contract, the specified repair work in the Particular Specification shall be done in accordance with the items listed below. Any repair work during the maintenance period shall also adhere to this specification.

#### FB 11.02 GENERAL REQUIREMENTS FOR STEAM AND CONDENSATE INSTALLATIONS

All repair work and new installation of steam and condensate installations shall adhere to the standard specifications of the Department of Public Works and the following general requirements:

All steam pipes shall be installed with a fall towards the steam traps of not less than 1:250. Pipes shall be so arranged that the piping can drain completely and no pockets of condensate shall be formed at points other than the trap points.

A sufficient amount of expansion loops and/or bellows are to be installed on all pipe runs to ensure the containment of expansion and contraction on the system thus ensuring that no unnecessary strain is enforced on the brackets, supports, pipe system and any structural element. These offsets or expansion bellows shall be installed with sufficient cold draw to allow pipes to return to normal when hot. All bellows expansion joints shall be capable of withstanding without damage, expansion movement of not less than 150 % of the predicted maximum in the location for which they are intended. Bellows expansion joints which are strained during tests due to being wrongly located, etc, shall at the Engineer/Departmental Representative's discretion be replaced by the Contractor at no extra cost to the Department.

Each bellow expansion joint shall be fitted with a clearly inscribed plate showing maximum working pressure, maximum and minimum operating lengths and direction of steam flow. They shall be installed strictly in accordance with the manufacturer's recommendations.

All branch pipes shall be taken off from the top of the steam mains.

Where it is necessary to reduce pipes in size on horizontal runs only eccentric reducing fittings shall be used. On vertical runs, only reducing sockets shall be used. Reducing bushes will not be allowed on any steam reticulation system.

All steam piping above 50 mm diameter shall be jointed to fittings by means of welding and to weld on flanges shall be used. Screwed and socketed joints shall only be permitted on piping smaller than and equal to 50 mm diameter. Sufficient flanged joints on pipes larger than 50 mm diameter and unions on pipes smaller than and equal to 50 mm diameter shall provide sufficient flexibility to the system for maintenance purposes.

Only full reduced levels are to be utilized on steam distribution networks. Elbows shall only be used with prior approval by the Engineer/Departmental Representative and/or if otherwise specified in the Particular Specification.

Pipes shall be neatly and properly supported. Where beams, stanchions, etc, interfere with the straight running of pipes, suitable offsets shall be provided so that pipes may follow the line of the walls both vertically and horizontally.

Where pipes pass through structures, walls and partitions, the pipe shall be sleeved with medium class black steel pipes, large enough to leave a clearance of at least 10 mm around the pipe, including lagging and cladding. Exposed pipes passing through floors or walls shall be provided with floor, ceiling and wall finishing plates. Plates shall allow for expansion and contraction and shall be securely fixed to the sleeves.

Dirt pockets shall be installed at all low points and before the trap take-off. These pockets shall extend at least 700 mm below the line trap take-off and shall be the same pipe size as the main steam line and equipped with a plugged 15 mm diameter globe valve for blow-down purposes.

Piping shall be so arranged that it will not obstruct other equipment.

Piping shall be connected to equipment in such a way as to permit the easy removal of the equipment with the minimum of dismantling of pipework.

Gravity condensate lines shall be laid to a fall of a minimum of 1:200 towards the discharge end. Pumped condensate lines shall have a minimum fall of 1:400 towards drain points.

Automatic air vents shall be installed at high points of the pipework as required or as indicated on the drawings.

Condensate lines supported off steam mains shall be installed with due regard to cold draw requirements for steam lines and relative expansion/construction that will occur between two lines.

Condensate branch lines shall connect into the top of condensate mains.

FB 11.03 STEAM AND CONDENSATE PIPEWORK

FB 11.03.01 Steam and condensate piping and fittings

During the repair and maintenance contract all the steam lines shall be inspected for any defects and/or damages. This system shall also be pressure tested to the required system test pressure to inspect it for any possible leaks. All dirt pockets shall be blown clear. Any repair and/or new piped installations shall be done to suit the existing installations with the appropriate materials and methods. The following materials shall be used:

(a) Steam piping

All steam pipes shall be uncoated seamless steam class schedule 40 pipe in accordance with SANS 62 or BS 1387, and shall be suitable for an operating pressure of at least 1000 kPa. All piping above 50 mm diameter must be welded and flanged. Piping smaller and equal to 50 mm diameter may be screwed and socketed.

All screwed and socketed fittings shall be heavy steam quality wrought steel fittings in accordance with BS 1740 with threads complying with ISO-R7.

All welded fittings shall be seamless carbon steel butt welded fittings complying with BS 1640 schedule 40.

(b) Condensate piping

All condensate pipes shall be copper tubing class 2 in accordance with SANS 460 with capillary soldered copper fittings conforming to BS 864, ISO 2016 or DIN 2856.

(c) Jointing methods

All pipe joints shall be prepared and executed in accordance with the accepted norms and standards applicable.

(i) Welded joints

All steel welded joints shall be performed by a qualified coded welder. All welding shall fully comply with SANS 044.

The Department reserves the right to randomly select one out of ten pipe welds to be cut out of the system for examination purposes. These pipe welds shall then be tested in accordance with SANS 044.

After removal of the joints, the Contractor shall make the piping good. Should any of the welds prove unsatisfactory, the Contractor will be called upon at his own cost to have all welds examined by X-ray and to have X-ray plates examined by the SANS or other approved authority. All welding proven unacceptable shall be put right at the Contractor's cost.

All flanges shall be welded both internally and externally.

Where in the opinion of the Engineer/Departmental Representative a welder is not competent, the Engineer/Departmental Representative shall request the authority to ask that such welder be replaced with a competent welder.

(ii) Threaded joints

All pipe threads shall be right-handed Whitworth standard taper pipe threads and shall comply with BS 21 or IS-R7. Threaded pipe joints shall be made with either an approved steam pipe jointing compound or PTFE tape.

All surplus compound or tape shall be cleaned off the joints before painting or finishing-off.

(iii) Copper soldered joints

All class 2 copper tubing shall be jointed to capillary soldered fittings by utilizing self-fluxing copper/phosphorus/7 % mm silver or eutectic 1504 solder rods jointed by means of an oxygen acetylene flame to the correct soldering temperature. Care must be taken not to overheat fittings and tubing.

(d) Bracketing and support work

The Contractor shall at the start of the repair and maintenance contract inspect and examine all steam and condensate pipe supports, brackets and hangers for compliance to the pipe loads and stresses exerted onto them, taking into account the expansion and contraction of the pipe system. Where any defects, damages and/or a shortfall of supports and bracketing exist, the Contractor shall rectify, remedy or upgrade the support and bracketing system to the acceptable norms and standards. All supports, brackets and hangers shall be in accordance with the Department's specification and approved by the Engineer/Departmental Representative before installation.

Distances between pipe supports and horizontal pipe runs unless otherwise specified or indicated, shall be not more than those shown below:

**STEEL PIPING**

Pipe size	Maximum span
15 - 20 mm	2,5 m
25 - 40 mm	3,0 m
40 - 50 mm	3,5 m
65 - 80 mm	4,5 m
100 - 150 mm	6,0 m

**COPPER PIPING**

Pipe size	Maximum span
15 - 20 mm	1,5 m
25 - 32 mm	2,0 m
40 - 50 mm	2,5 m
65 - 80 mm	3,5 m

All vertical steam pipes and condensate pipes shall be supported at intervals not larger than 2 m. Where horizontal steam pipe support distances are larger than the condensate support distances, condensate pipes shall be supported from the steam pipe by means of two brackets lined by a chain.

Clearance heights at road crossings shall be in accordance with the road ordinance for the applicable road and shall be approved in writing by the relevant parties before installation.

**FB 11.04 LAGGING AND CLADDING**

The Contractor shall at the start of the repair and maintenance contract inspect all lagging and cladding of the steam and condensate pipe installations for any defects, damages, missing sections and/or shortfall of lagging and cladding. All defects, damages, repairs, replacement and/or new sections of lagging and cladding work shall be attended to in accordance with the relevant specifications and accepted norms and standards.

**(a) Lagging and cladding materials and installation requirements**

All steam and condensate piping shall be insulated with preformed canvas covered fibreglass or mineral wool sections. All bends, tees, etc, shall be insulated with preformed insulation. All thermal insulation shall be applied and installed by a recognised specialist firm.

Where preformed bends and tees are not available loose lagging material such as asbestos-free composition may be used and bound with wire netting, then plastered to a smooth finish to the same size as the basic insulation.

All exposed piping insulation shall be insulated using valve boxes. Spindles, hand wheels and reducing valves to be left exposed. All exposed insulation ends to be weatherproofed.

All exposed piping insulation shall be provided with a covering of 0,6 mm thick galvanised pre-rolled cladding. The cladding sections shall be secured by 10 mm wide galvanised sheet metal strips spaced at not more than 500 mm centres. All items requiring routine inspection/maintenance shall be fitted with removable cladding secured with stainless steel self-tapping screws. The overlap of the cladding shall be not less than 40 mm and shall be arranged to be water shedding. All longitudinal joints, where possible, shall be made where they are least noticeable.

Sheet-metal cladding inside buildings shall be painted with a suitable primer, then painted the same colour as the walls with two coats of good quality paint.

The Tenderer shall state recommended thickness based on the table below. The Tenderer shall give heat losses and thermal conductivity of the proposed material so that the merits of insulating material can be assessed. Surface temperatures of insulation shall not exceed 40oC.

**INSULATION THICKNESS GUIDE**

**STEAM PIPING**

Pipe size	Preformed section thickness
15 - 25 mm dia	40 mm
32 - 50 mm dia	50 mm
65 - 150 mm dia	60 mm

**CONDENSATE PIPING**

Pipe size	Preformed section thickness
15 - 54 mm dia	30 mm
65 - 100 mm dia	40 mm

Fibreglass must be of 88 to 96 kg/m<sup>3</sup> density. Mineral wool must have a density in the range 160 - 185 kg/m<sup>3</sup>.

**FB 11.05 PRESSURE TESTING**

The Contractor shall at completion of the repair work arrange for a complete pressure test to be executed on the steam and condensate installation. This shall be done in collaboration with the User Client and/or Department to ensure the minimum down-time of the installation, as well as to establish a suitable period for this pressure test. All leaks shall be repaired and the system shall be tested at the cost of the Contractor. This test shall be witnessed by the Engineer/Departmental Representative.

The system shall be tested to a pressure of 1,5 times the operating pressure.

On completion the total system shall be flushed out to ensure it is left without welding slug, dust, etc.

**FB 11.06 STEAM TRAP ARRANGEMENTS**

The Contractor shall at the start of the repair and maintenance contract inspect, service, repair and if rendered irreparable replace all steam trap arrangements. All defects, damages, leaks, etc, shall be repaired in accordance with the manufacturer's specification.

Servicing and repair of steam traps shall be done strictly in accordance with the manufacturer's specification.

The Contractor shall also table all steam traps with their relevant details. The Contractor shall at the same time investigate and report on the suitability of the existing steam traps in the installation according to the condensate load and application, taking cold start-up into account.

The following table provides a guideline for the type of trap and the safety factor selection for various applications:

Application	Preferred trap type	Safety factor
Boiler header	IBLV and F&T	1.5:1
Steam mains and branch lines	IB or F&T	2:1 for along line and 3:1 if @ end of mains or before valve on branch
Steam separator	IBLV or F&T	3:1
Steam quality 90 % or less	F&T	3:1
Tracer lines	IB	2:1
Unit heaters and air handlers (Variable pressure)	IBLV or F&T F & T or IBLV	3:1 2:1 @ « psi differential
Finned radiation and pipe coils (Constant pressure)	IB	3:1 for quick heating 2:1 normally
(Variable pressure)	F & T or IB	3:1 for quick heating 2:1 normally
Process air heaters (Constant pressure)	IB or F & T	2:1
(Variable pressure)	F & T or IBLV	3:1 @ « max. pressure differential

Steam absorption machine (Chiller)	F & T	2:1
Shell and tube heat exchangers, pipe and embossed coils		
(Constant pressure)	IB or F & T	2:1
(Variable pressure)	F & T	2:1
Evaporator single effect and multiple effect	F&T	2:1
Jacketed kettles (Gravity drain)	IBLV or thermostatic	3:1
(Syphon drain)	IBLV	3:1
Rotating dryers	DC or IBLV	3:1 for DC. 8:1 for IB constant pressure. 10:1 for IB variable pressure
Flash tanks	IBLV	3:1

IBLV	=	Inverted bucket with large vent
IBCV	=	Inverted bucket with internal check valve
IBT	=	Inverted bucket with thermal vent
F&T	=	Float and thermostatic
DC	=	Differential condensate controller
Thermo.=		Thermostatic

FB 11.06.01 Steam trap equipment

The following repairs and servicing shall be performed on the various types of steam traps:

- (1) Inverted bucket steam trap
  - (a) Dismantle and strip down trap assembly.
  - (b) Clean out strainers and trap.
  - (c) Replace the following:
    - (i) Valve and seat assembly
    - (ii) All gaskets
    - (iii) Bucket
    - (iv) Bolts and nuts if necessary
    - (v) Strainer elements.
  - (d) Reassemble and put back into operation.
- (2) Float and thermostatic steam traps
  - (a) Dismantle and strip down trap assembly.
  - (b) Clean out all parts.
  - (c) Replace the following:
    - (i) Valve and seat assembly including ball float
    - (ii) Air vent assembly
    - (iii) Steam lock releases if installed
    - (iv) All gaskets.
  - (d) Reassemble and put back into operation.
- (3) Thermodynamic steam traps
  - (a) Dismantle and strip down trap assembly.
  - (b) Clean out strainer trap body.
  - (c) Replace the following:
    - (i) Replace disc and reseal body face
    - (ii) Strainer
    - (iii) All gaskets
    - (iv) Cap and strainer caps only if necessary.

(d) Reassemble steam trap and put back into operation.

(4) Balanced pressure thermostatic steam trap

(a) Dismantle and strip down trap assembly.

(b) Clean out all parts.

(c) Replace the following components:

(i) Element or capsule and seat assembly where applicable.

(ii) All gaskets and O-rings.

(iii) Strainer screen if installed.

(iv) Cover bolts if applicable.

(d) Reassemble and put back into operation.

(5) Bimetallic thermostatic steam trap

(a) Dismantle and strip down trap assembly.

(b) Clean out all parts.

(c) Replace the following components:

(i) Element set, and ensure that the joint faces are clean

(ii) Strainer screen

(iii) All gaskets

(iv) Cover bolts if necessary and where applicable.

(d) Reassemble and put back into operation.

All the above steam traps and those not mentioned in this specification shall be repaired and serviced in accordance with manufacturer's specification. The steam traps described above shall be regarded as a guideline to the required repairs and servicing.

#### FB 11.06.02 Steam trap installation requirements

The Contractor shall ensure that all steam traps are installed in accordance with the required installation norms and the manufacturer's specification.

This shall include the incorporation of strainers where necessary, sight glasses, shut-off valves on both sides, check valves where necessary, unions for maintainability, test valves, dirt pockets and ensuring that pipe sloping and connections are in accordance with specifications.

#### FB 11.07 PRESSURE-REDUCING VALVE INSTALLATIONS

The Contractor shall at the start of the maintenance and repair contract inspect, service, repair, readjust and overhaul, if required, all pressure-reducing valves. Servicing, repairs and overhauling shall be done strictly in accordance with the manufacturer's specification.

The pressure-reducing valves shall be tested under load and under no load to ensure that no creepage takes place, as well as that downstream pressure is maintained within the operating parameters.

The overhauling of the pressure-reducing valves shall preferably be performed by an Engineering works firm or manufacturer qualified to do so.

Where no duplicate pressure-reducing valve is installed at a control point, the Contractor shall collaborate with the User Client and the Engineer/Departmental Representative to service and repair the valve at a pre-arranged suitable time and to minimize the down-time of the steam supply to the system.

All pressure-reducing valve pressure set points, details and positions shall be logged by the Contractor.

The Contractor shall also report on the suitability of each pressure-reducing valve to serve the particular system.

The following service, repair and overhaul work shall be regarded as a guideline for the following types of pressure-reducing valves:

- (a) Direct acting pressure-reducing valve
  - (i) Dismantle and strip down pressure-reducing valve.
  - (ii) Clean out all parts, body, etc, and inspect.
  - (iii) Replace the pressure adjustment spring assembly.
  - (iv) Replace bellows assembly if necessary.
- (v) Replace valve and seat assembly and ensure that seat faces are clean and resealed.
  - (vi) Replace strainer element.
  - (vii) Replace all gasket sets.
  - (viii) Reassemble, set, test and adjust to the correct downstream pressure.
- (b) Pilot operated pressure-reducing valve
  - (i) Dismantle and strip down pressure-reducing valve.
  - (ii) Clean out all parts, body, etc, and inspect.
  - (iii) Replace the pressure adjustment spring assembly.
- (iv) Inspect balance and control pipe assemblies and if leaks exist and screw parts are worn, replace with new.
  - (v) Replace main valve assembly, spring and strainer.
  - (vi) Inspect main and pilot diaphragms and if required, replace with new.
  - (vii) Replace all gaskets and seals.
  - (viii) Inspect, clean and reseat valve seats.
- (ix) Reassemble, set, test and adjust pressure-reducing valve to the correct downstream pressure.
- (c) Pressure reducing valve installation requirements

The Contractor shall ensure that all pressure-reducing valves are installed in accordance with the manufacturer's requirements. This shall also include the incorporation of strainers, non-return valves, pressure gauges, correctly sized safety valves, shut-off valves for maintenance purposes, steam trap take-offs before pressure-reducing valve, etc.

#### FB 11.08 HEATING CONTROL EQUIPMENT

The Contractor shall at the start of the repair and maintenance contract inspect, test, repair, readjust, and if necessary replace heating controls for steam heating equipment.

This shall include the following:

- (a) Check for correct switching and/or control operating points.
- (b) Check, test and ensure that the safety cut-out mechanisms are in place and that switching controls control at the correct level.
- (c) Ensure that equipment has been installed in accordance with the manufacturers' specification.
- (d) Ensure that all pockets are descaled and free of any defects.

The following control equipment shall be serviced, repaired and when required, replaced if damaged beyond repair.

#### FB 11.08.01 Direct heating control equipment

Where immersed type thermostatic steam control valves are utilized, they shall be serviced and repaired as follows:

- (a) Dismantle and strip down thermostatic control valve including removal of pocket.
- (b) De-scale and clear all equipment.
- (c) Replace element subassembly if necessary.
- (d) Replace cover joint, gland packing, heater coupling joint and all gaskets where applicable.
- (e) Check valve seat and if necessary re-seat.
- (f) Reassemble control valve and reinstall, test and adjust to correct level.

## FB 11.08.02 Remote capillary control equipment

Where remote control equipment are utilized for heating purposes, these shall be serviced, repaired and overhauled in accordance with the manufacturers' specification.

## FB 11.09 CONDENSATE PUMPING INSTALLATIONS

The Contractor shall at the start of the repair and maintenance contract inspect all condensate pumping installations for any defects, damages, and/or shortfall. All defects, damages, repairs, replacement and/or pumps are to be serviced, repaired, overhauled and installed in accordance with the relevant specifications, accepted norms and standards, and manufacturer's specifications.

The following two types of condensate pumping systems shall be regarded as a guideline for repairs, services and overhauling.

### FB 11.09.01 Steam operated automatic condensate pumps

The Contractor shall inspect and service these units as follows:

- (a) Inspect receiver for any defects and corrosion and clean out.
- (b) Inspect steam-driven pumps for any defects and clean out.
- (c) Replace steam inlet valve assembly.
- (d) Inspect and clean float and replace if necessary.
- (e) Inspect guides and replace if necessary.
- (f) Replace all gaskets and seals.
- (g) Inspect and replace the lever assembly mechanism if necessary.
- (h) Inspect and service check valves including replacing of gaskets.
- (i) Inspect all steam piping, clean out and replace when necessary.
- (j) Clean out strainers and replace strainer elements if necessary.
- (k) Replace steam and condensate valve seals and gland packings.
- (l) Inspect vent pipe installation and repair where necessary.
- (m) Check all inlet and outlet pipe connections.
- (n) Service and repair steam traps.
- (o) Service and repair sight glasses.
- (p) Reassemble and put steam operated pumps back into operation.

### FB 11.09.02 Electrically operated automatic condensate pumps

The condensate pumps are to be inspected, tested, serviced, repaired together with their associated equipment and pipework. All repair and service work shall be done strictly in accordance with the manufacturer's specification.

The repair work to the condensate pumps and equipment shall include at least the following:

- (a) Inspect and test the pumps for correct operation.
- (b) Replace gland packings, seals and gaskets.
- (c) Inspect and test for any bearing noise and replace if necessary.
- (d) Clean out pump strainers, check non-return valves, valves, etc.
- (e) Test pump motor windings for balance phases, insulation test and check wiring.
- (f) Inspect pump mountings and repair if necessary.
- (g) Inspect, clean out and repair the condensate tank where necessary.
- (h) Inspect, test, service, readjust the level controls on the condensate tank.

## FB 11.10 STEAM AND CONDENSATE PIPING ANCILLARY EQUIPMENT

The Contractor shall at the start of the repair and maintenance contract inspect, service, repair all ancillary steam and condensate equipment using the following as guideline:

- (a) Replace damaged, broken, leaking, corroded equipment.
- (b) Repair, replace and service valves including new gaskets, gland packings, seals, bolt and nuts, etc.
- (c) Test the proper closing of all valves and where not satisfactory, valves are to be refurbished, de-scaled and replaced if necessary.

(d) Repair, clean and service all strainers including replacement of strainer elements where corroded and installation of new gaskets.

- (e) Repair, service and check the proper functioning of all non-return valves.
- (f) Repair, service, readjust and calibrate all safety release valves.
- (g) Repair, service and clean out all air release valves and vacuum breakers.
- (h) Repair, service and log readings of flow meters including cleaning of integral strainers.
- (i) Repair, service and check for any damages to the expansion bellows and expansion joints.
- (j) Repair, service and clean out all steam separators.
- (k) Repair, service and replace glasses and gaskets on sight glass equipment.
- (l) Check, service, readjust and calibrate test pressure and temperature gauges.
- (m) Pressure test and sterilize repaired new installation and equipment.
- (n) Reinstate and make good walls, tiling, floors, concrete, finishes, holes, chases, surfaces, etc, to an acceptable level where any repair, upgrade and/or service work have been executed.
- (o) Prepare and repaint all piping equipment, brackets, supports, etc.

#### FB 11.11 ELECTRICAL INSTALLATION, WIRING AND CONTROL PANELS

##### FB 11.11.01 Instrumentation and controls

All instrumentation and control equipment shall be inspected, tested, repaired, adjusted and where necessary replaced. All repair and service work shall be done strictly in accordance with the manufacturer's specification.

The repair work to the instrumentation and control equipment shall include at least the following:

- (a) Test all equipment for correct operation.
- (b) Inspect, test, service, adjust setting and if necessary repair and/or replace steam detector.
- (c) Inspect, recalibrate and if beyond repair, replace steam pressure gauge.

##### FB 11.11.02 Electrical control panels

All electrical control panels shall be inspected, tested, and repaired, including all equipment inside the control panel. All repair and service work shall be done strictly in accordance with the manufacturer's specification.

The repair work to the electrical control panels shall include at least the following:

- (a) Test all control equipment for correct operation.
- (b) Check and test all MCBs, isolators, contactors, overloads, other type of motor drives, pilot lights, control switches, etc, and readjust all set points. Where equipment is found to be faulty it shall be replaced with new approved equipment.
- (c) Check all wiring and connections for proper conducting and replace where hot connections are found.
- (d) Clean out panel interior and exterior, inspect panel body, fascias, doors, paintwork, etc, and repair where necessary.

#### FB 12 MAINTENANCE TO INSTALLATIONS, SYSTEMS AND EQUIPMENT

##### FB 12.01 GENERAL

Monthly maintenance responsibilities for each installation including all units and components as specified, shall commence with access to the site. A difference shall be made in payment for the maintenance prior to and after practical completion of repair work.

Maintenance responsibilities of the completed installation shall commence upon the issue of a certificate of practical completion for repair work, and shall continue for the remainder of the 36-month contract period.

This part of the Contract shall include:

- (a) Routine preventative maintenance;
- (b) Corrective maintenance, and
- (c) Breakdown maintenance,

as defined in General Maintenance, for the specified installations described under FB 01 of this specification.

The maintenance work to be performed and executed shall be done strictly in accordance with General Maintenance, and as specified in Particular Specification PFB and this specification.

The said maintenance work shall be executed in accordance with the relevant codes of practice, statutory regulations, standards, regulations, municipal laws and by-laws and the manufacturers' specifications and codes of practice.

The maintenance schedules and frequency shall be developed under the maintenance control plan to be instituted by the Contractor, as specified in General Maintenance.

All new equipment, components and materials supplied and installed under the maintenance contract shall be furnished with a prescribed manufacturer's guarantee.

The maintenance work and items are to be categorized by the Contractor for each maintenance activity under the following headings:

- (a) Steam piping installation
- (b) Condensate piping installation
- (c) Supports and bracketing
- (d) Lagging and cladding
- (e) Steam ancillary equipment
- (f) Condensate ancillary equipment
- (g) Condensate pumping systems
- (h) Electrical controls, panels and wiring.

The Contractor shall be remunerated monthly, based on his performance, for maintaining the complete installation in a perfect functional condition.

**FB 12.02      ROUTINE PREVENTATIVE MAINTENANCE**

The routine maintenance of the installations, systems and equipment shall be done in accordance with General Maintenance, and the Particular Specification related to this work.

The routine maintenance work to be performed and executed shall include, but not be limited to the items listed in tables FB 12.02/1, FB 12.02/2, FB 12.02/3 and FB 12.02/4 below under the respective headings. These actions and findings shall be logged and reported on the relevant approved schedules and reports.

**TABLE FB 12.02/1:      WEEKLY ACTIONS AND MAINTENANCE**

ITEM	MAINTENANCE DESCRIPTION	ACTION RESPONSIBILITY	ACTION
	Inspect all steam and condensate installations for any visible defects, leaks, damages or/and pending faults.	Contractor	Check/Record
	Check and record all pressure gauge readings and readjust equipment if necessary.	Contractor	Adjust/Check/Record
	Check operation of condensate pumps and controls for correct functioning.	Contractor	Check/Record
	Check steam trap arrangements for correct operation.	Contractor	Check/Record
	Report any faults, defects, leaks, damages, etc, to Engineer/Departmental Representative.	User Client	Check/Record/Report

**TABLE FB 12.02/2:      MONTHLY ACTIONS AND MAINTENANCE**

ITEM	MAINTENANCE DESCRIPTION	ACTION RESPONSIBILITY	ACTION
------	-------------------------	-----------------------	--------

1 All as listed under table FB 12.02/1 Contractor/User/Client

Check/Record/Adjust/Repair/Report			
2	Blow down all dirt pockets and record.	Contractor	Service/Record
3	Clean out all strainers and record.	Contractor	Service/Record
4	Check all valve gland seals and packings for leaks and replace and repair if necessary.	Contractor	Check/Service/Repair/Record
	Check, inspect and repair if necessary all expansion joints for leaks and damages.	Contractor	Check/Repair/Record
	Check sight glasses and repair, clean and replace where necessary.	Contractor	Check/Service/Repair/Record
	Check all safety devices for correct operation and repair and replace where necessary.	Contractor	Check/Service/Repair/Record
	Check and test all electrical control functions and operations. Repair and report any faults and defects.	Contractor	Check/Service/Repair/Record
9	Complete logbook and report.	Contractor	Report

TABLE FB 12.02/3: SIX-MONTHLY ACTIONS AND MAINTENANCE

ITEM	MAINTENANCE DESCRIPTION	ACTION RESPONSIBILITY	ACTION
	All as listed under tables FB 12.02/1 and FB 12.02/2	User Client/Contractor	Check/Record/Adjust/Repair
	Service, repair, clean, replace seals, gaskets, reset and/or replace worn parts as directed by the manufacturer of all steam traps.	Contractor	Check/Service/Repair/Report
	Service, repair, replace glasses and gaskets where necessary and clean all sight glasses.	Contractor	Check/Service/Repair/Report
	Repair lagging and cladding where necessary.	Contractor	Check/Repair/Report
5	Repair all steam leaks.	Contractor	Check/Repair/Report
6	Clean out and repair all condensate tanks.	Contractor	Check/Service/Report
7	Test, inspect and repair all condensate pumps.	Contractor	Check/Service/Repair/Report
	Lubricate all lubrication points in accordance with the manufacturer's specification.	Contractor	Check/Service/Report
9	Complete logbook and report.	Contractor	Report

#### FB 12.03 CORRECTIVE MAINTENANCE

This corrective maintenance of the installations, systems and equipment shall be done in accordance with General Maintenance, and the Particular Specification related to this work.

The Contractor shall inspect and check all equipment, materials, systems and installation for any pending breakdowns, maladjustments or anomalies of equipment.

The Contractor shall report and take actions to correct such shortfall.

#### FB 12.04 BREAKDOWN MAINTENANCE

Breakdown maintenance of the installations, systems and equipment shall be done in accordance with General Maintenance.

All breakdown problems experienced shall be acted upon within the time limitations allowed in the General Maintenance specifications.

All breakdown maintenance shall be done in accordance with the relevant specifications, standards, regulations and codes.

The Contractor shall have access to the necessary spares, equipment and tools for any possible breakdowns.

FC 11 REPAIR WORK TO INSTALLATIONS, SYSTEMS AND EQUIPMENT

FC 12 MAINTENANCE TO INSTALLATIONS AND EQUIPMENT

FC 01 SCOPE

This specification covers the general repair and maintenance of hot-water generating installations, which include the following:

- (a) Steam generated hot-water heating equipment
- (c) Primary and secondary pumps
- (d) Hot-water storage vessels
- (e) Lagging and cladding of vessels and piping systems
- (f) Hot-water reheating vessels
- (g) Corrosion protection linings to storage vessels and re-heaters
- (h) Hot, cold and drainage pipework to the plant room installation
- (i) Electrical control systems, wiring and control panels
- (j) Thermostats and safety equipment.

This specification also addresses the training of User Client and associates, and maintenance staff.

This specification shall form an integral part of the repair and maintenance contract document, and shall be read in conjunction with the additional and particular specifications compiled as part of this document.

This specification shall act as a guideline to the particular specification and, in the event of any discrepancies between the Technical Specification and the Particular Specification, the latter shall take precedence.

The Contractor shall at all times adhere to this specification, unless otherwise specified in the Particular Specification.

FC 02 STANDARD SPECIFICATIONS

FC 02.01 GENERAL STANDARD SPECIFICATIONS, REGULATIONS AND CODES

The latest edition, including all amendments up to date of tender of the following specifications, publications and codes of practice shall be read in conjunction with this specification and shall be deemed to form part thereof:

FC 02.01.01 SANS and other specifications and codes

- SANS 0400 - The applications of the building regulations
- SANS 0142 - Code of practice for the wiring of premises
- SANS 0140 - Identification colour marking
- SANS 044 - Parts I to IV: Welding
- SANS 460 - Copper tubes for domestic plumbing
- SANS 0252 - Parts I and II
- SANS 0103 - The measurement and rating of environmental noise with respect to annoyance and speech communications

SANS Specifications listed on page 3 of the DPW specification OWG 371

Atmospheric Pollution Prevention Act, No 45 of 1965

BS 2790

BS 1740

BS 21

BS 1640

BS 5500

FC 02.01.02 Department of Public Works specifications

- OWG 371 - Specification of materials and methods to be used
- STD.PWD.VII - Standard Specification for steam boiler installations (Issue VII 1997)

Standard Specification for electrical installations and equipment pertaining to mechanical installations (Issue IX 1998)

FC 02.01.03 Occupational Health and Safety Act of 1993

All regulations and statutory requirements as laid down in the latest edition of the Occupational Health and Safety Act, 1993 (Act No 85 of 1993) shall be adhered to.

FC 02.01.04 Manufacturers' specifications, codes of and practice and installation instructions

All equipment and materials shall be installed, serviced and repaired strictly in accordance with the manufacturers' specifications, instructions and codes of practice.

FC 02.01.05 Municipal regulations, laws and by-laws

All municipal regulations, laws, by-laws and special requirements of the Local Authority shall be adhered to unless otherwise specified.

FC 03 VARIATIONS AND ADDITIONS TO STANDARD SPECIFICATIONS

The following additional general specifications and requirements shall be read in conjunction with this specification and shall be adhered to unless otherwise specified in the Particular Specification.

FC 03.01 General repair and installations requirements

All materials and equipment supplied and installed shall be of new high quality, design and manufactured to the relevant specifications, suitable for providing efficient, reliable and trouble-free service.

All work shall be executed in a first-class workman-like manner by qualified tradesmen. All equipment, component parts, fittings and materials supplied and/or installed, shall conform in respect of quality, manufacture, test and performance to the requirements of the applicable current SANS specifications and codes, except where otherwise specified or approved by the Engineer/Departmental Representative in writing.

All materials and workmanship which, in the opinion of the Engineer/Departmental Representative, is inferior to that specified for the work, will be condemned. All condemned material and workmanship shall be replaced or rectified as directed and approved by the Engineer/Departmental Representative.

The Contractor shall submit a detailed list of the equipment and material to be used to the Engineer/Departmental Representative for approval before placing orders or commencing installation.

All new equipment, materials and systems shall be installed and positioned such as to not impede on access routes, entrances and other services. The Contractor shall coordinate these items taking other services and equipment into account.

All control equipment and serviceable items shall be installed and positioned such that they will be accessible and maintainable.

The Contractor shall make sure that all safety regulations and measures are applied and enforced during the repair and construction periods to ensure the safety of the public and User Client.

Repair work shall be programmed in accordance with General Decommissioning, Testing and Commissioning Procedures, to ensure the shortest possible down-time of any service and the least inconvenience to the User Client and public. The Contractor shall make sure that the necessary notifications and notices are timeously put into place for these activities.

FC 04 OPERATING AND MAINTENANCE MANUALS

The Contractor shall be responsible for the compilation of an inventory list and operating and maintenance manuals.

This shall be done in accordance with Operating and Maintenance Manuals.

All information shall be recorded and reproduced in electronic format, as well as three sets of hard copies to be supplied to the Department.

Over and above what is specified in Operating and Maintenance Manuals, the operating and maintenance manual to be compiled shall be structured to include at least the following:

- (a) System description
  - (i) Complete system description and the working of the plant.
- (b) Commissioning data
  - (i) Complete commissioning, test and inspection data of systems and equipment.
- (c) Operating data
  - (i) Systems and equipment running check list and frequency of servicing required;
  - (ii) Safety precautions to be implemented;
  - (iii) Operator's duties (logging requirements);
  - (iv) Lubricating oils and service instructions.
- (d) Mechanical equipment
  - (i) Description of all major items with the make, model number, names, addresses and telephone numbers of the suppliers, manufacturers or their agents;
  - (ii) Design capacities of all equipment, including selection parameters, selection curves, capacity tables, etc;
  - (iii) Manufacturer's brochures and pamphlets;
  - (iv) Schedule of spares with part numbers recommended to be held as stock;
  - (v) Vessels pressure test and certification certificates.
- (e) Maintenance instructions
  - (i) Schedule of maintenance particulars, frequency of services and replacements;
  - (ii) Trouble-shooting guide;
  - (iii) Part number of all replacement items and spares;
  - (iv) Capacity curves of all pumps;
  - (v) Serial numbers of all items of equipment.
- (f) Electrical equipment
  - (i) Schedule of equipment, indicating manufacturer, type, model number, capacity and addresses and telephone numbers of suppliers;
  - (ii) Maintenance instructions;
  - (iii) Manufacturer's brochures and pamphlets;
  - (iv) Complete as-built circuit diagrams and diagrammatic representation of interconnections of all electrical equipment.
- (g) Instrumentation and control
  - (i) Description of each control system;
  - (ii) Schedule of control equipment, indicating manufacturer, type, model number, capacity and addresses and telephone numbers of suppliers;
  - (iii) Maintenance instructions;
  - (iv) Manufacturer's brochures and pamphlets.
- (h) Drawings
  - (i) Paper prints of all as-built mechanical and electrical drawings;
  - (ii) Wiring diagrams framed behind glass shall be mounted adjacent to each relevant control panel.

FC 05 LOGGING AND RECORDING PROCEDURES

The Contractor shall under this repair and maintenance contract institute a logging and recording system as part of his maintenance control plan as defined in General and Maintenance. This shall consist of a log and record book, which shall be utilized to log and record all operations, faults, system checks, breakdowns, maintenance visits, inspections, etc.

The logbook shall be kept in a safe place as agreed with the User Client and the Engineer/Departmental Representative and shall only be utilized by the maintenance personnel, the Contractor and the Engineer/Departmental Representative. Copies of the monthly entries and recordings into the logbook shall be submitted by the Contractor together with his monthly report to the Engineer/Departmental Representative.

The logbook shall be structured to include at least the following:

- (a) Weekly inspection and maintenance actions;
- (b) Monthly inspection and maintenance actions;
- (c) Four-monthly inspection and maintenance actions;
- (d) Annual inspection and maintenance actions;
- (e) Breakdown reports;
- (f) Daily system and equipment operating conditions, observations, recordings and measurements;
- (g) Inspection and test comments and reports.

The Contractor shall also institute an attendance register, which shall be kept in a safe place as agreed with the User Client and the Engineer/Departmental Representative. This register shall be completed by all persons visiting the installation, including:

- (a) Maintenance personnel
- (b) Contractor
- (c) Inspectors
- (d) Department personnel
- (e) Engineer/Departmental Representative.

The register shall state the date, time-in, time-out, name, company and reason for visit.

A copy of the register shall be submitted by the Contractor together with his monthly report.

#### FC 06 TESTS AND INSPECTIONS ON COMPLETION OF REPAIR WORK

Except where otherwise provided in the Contract, the Contractor shall provide all labour, materials, power, fuel, accessories and properly calibrated and certified instruments necessary for carrying out such tests. The Contractor shall make arrangements for such tests and he shall give at least 72 hours written notice to the Engineer/Departmental Representative before commencing the test.

In the event of the plant or installation not passing the test, the Employer shall be at liberty to deduct from the Contract amount all reasonable expenses incurred by the Employer or the Engineer/Departmental Representative attending the repeated test.

Whenever any installation or equipment is operated for testing or adjusting as provided for above, the Contractor shall operate the entire system for as long a period as may be required to prove satisfactory performance at all times in the occupied space served by that system for up to twenty-four hours a day continuously until the system is handed over.

The Contractor shall provide all labour and supervision required for such operation and the Department may assign operating personnel as observers, but such observation time shall not be counted as instruction time.

After completing the installation or system, all equipment shall be tested, adjusted a readjusted until it operates to the satisfaction and approval of the Engineer/Departmental Representative. The Contractor shall submit certificates of tests carried out to prove the efficiency of all equipment, as well as certificates to be obtained from all relevant authorities and statutory bodies, etc.

#### FC 07 QUALITY ASSURANCE SYSTEM

The Contractor shall institute an approved quality assurance (QA) system that shall be submitted to the Engineer/Departmental Representative for approval. The records of this QA system shall be kept throughout the duration of the Contract and submitted to the Engineer/Departmental Representative at regular intervals as required.

FC 08 COMMISSIONING AND RE-COMMISSIONING OF PLANT AND INSTALLATION

FC 08.01 GENERAL

On completion of the repair work and/or the installation of new systems the plant and equipment shall be put into operation after all tests and adjustments have been carried out to the satisfaction of the Engineer/Departmental Representative. Where new plant is installed the Contractor shall run and operate the system for a period of time as specified by the Engineer/Departmental Representative and train the staff of the User Client to operate and maintain the system.

Logging of the operation of the installations shall commence immediately upon start-up. The Contractor shall submit a full commissioning report.

FC 08.02 RE-COMMISSIONING OF HOT-WATER GENERATING INSTALLATION AND ANCILLARY EQUIPMENT

On completion of any repairs the Contractor shall re-commission the systems, installation and/or equipment influenced by such repairs.

This operation shall be done strictly in accordance with the manufacturer's specification and relevant standards, norms and specifications from the applicable body, authority and/or department. The operation shall include but not be limited to the following:

- (a) All required pre-commissioning mechanical checks
- (b) Check all steam, water and drain connections (when applicable).
- (c) Check all moving parts.
- (d) Check seals, gaskets and joints.
- (e) Reinstall all plugs and covers and check that they are properly secured.
- (f) Check and record that all lubrication to equipment and components has been done in accordance with manufacturer's specification.
- (g) Check and ensure that all valves and safety valves are correctly installed and in the correct operating position. Safety valves are to be set in accordance with the required blow-off pressure for the installation.
- (h) Check and ensure that all control equipment such as pressure-reducing valves, heat control equipment, etc, are set and adjusted to the correct controlling value in accordance with the system parameters and manufacturer's specification.
- (i) All steam and condensate pre-commissioning checks shall be done in accordance with Technical Specification FB (where applicable).
- (j) Check and confirm that all required tests and inspections to storage vessels, primary heater vessels and re- heater vessels have been done and that all required certificates are in place.
- (k) Check and ensure that the domestic hot-water and cold-water piping system is operational and that no leaks are present.
- (l) Check, test and inspect the correct installation and operation of all primary and secondary pumping (where applicable).
- (m) Check that all the required pressure testing to the repaired installations and/or new equipment has been done, witnessed and recorded in accordance with the relevant specifications.
- (n) Check, test and inspect all bracketing and supports for the relevant installations and equipment to ensure that they are properly secured and installed in accordance with the manufacturer's specifications and installation specification.
- (o) Check, inspect and ensure that all lagging and cladding to the vessels and piping installation are installed and repaired in accordance with the applicable specifications from the relevant controlling authority.
- (p) Check, inspect and ensure that no leaks to equipment, systems and installations occur.
- (q) All required pre-commissioning electrical checks
  - (i) Check all wiring connections for tightness and repair any hot connections.
- (ii) Check that all electrical equipment has been properly reconnected in accordance with the manufacturer's specification.

- (iii) Perform and record all required electrical insulation tests on equipment.
- (iv) Check and test all controls without livening up electrical equipment.
  - (v) Check all motor-driven equipment for correct rotational directions.
  - (vi) Check and test the operation of all indication and warning lights.
- (vii) Check, set, record and readjust all equipment control and set points in accordance with manufacturer's specifications.
- (viii) Run all motor-driven equipment for a period to ensure free movement and correct operation.

#### FC 08.03 Commissioning of equipment

On completion of the pre-commissioning checks the Contractor shall proceed with the commissioning of the equipment. This shall be done strictly in accordance with the manufacturer's specification and system parameters and shall include but not be limited to the following:

- (a) During the commissioning process all safety and warning system checks are to be performed on the thermostatic control system where applicable.
- (b) During load conditions the equipment shall be readjusted and finally switched to automatic operation on completion of all automatic control functions for correct operation where applicable.
- (c) Check that steam pressure valves are readjusted where necessary to the correct set point under load conditions where applicable.
- (d) This shall be done in accordance with Technical Specification FB: Steam Generating Installations.
- (e) Check the operation of all steam trap arrangements where applicable.
- (f) This shall be done in accordance with Technical Specification FB: Steam Generating Installations.
- (g) Check that water pressure-reducing valves are adjusted and set to the correct operating value for the specific system.
- (h) Check the correct operation of all systems. Readjust primary and secondary pumping control equipment where applicable.
- (i) Test and check for any leaks to the system, equipment and installation.
- (j) Check for any unnecessary strain to system, equipment and installation due to expansion and contraction.
- (k) Check the correct functioning of all heating temperature control equipment to ensure the correct switching levels and that all safeties are operational.
- (l) Record temperatures and flow conditions.

The Contractor shall visit, inspect, test and readjust the systems, equipment and installation during the week following the re-commissioning to ensure the correct functioning of the equipment and its associated components.

#### FC 09 GUARANTEE OF INSTALLATION AND EQUIPMENT

The Contractor shall provide guarantees obtained from the manufacturer(s) and/or supplier(s) to the effect that each piece of new equipment, supplied and installed under the repair contract, complies with the required performance and will function as part of the complete system.

All new equipment, including, the complete new installations and the systems as a whole shall be guaranteed for a period of 12 (twelve) months commencing upon the day of issue of a certificate of completion for the repair work of the installation.

#### FC 10 MAINTENANCE TOOLS AND SPARES

Each installation shall be equipped with the necessary maintenance tools and spares required by the specific type of equipment and installation for the daily operation and maintenance of the system. At the start of the repair and maintenance contract the Contractor shall in the presence of the User Client make an inventory of the existing tools and spares, and any shortfall or damaged tools and spares shall be replaced with new. All replacement tools and spares shall be as specified by the equipment manufacturers. These tools and spares shall be kept in a lockable room or cabinet of which the maintenance supervisor and the Contractor shall carry keys. The Contractor shall on a monthly basis take stock of these items in the presence of the User Client's maintenance supervisor and record and report to the Engineer/Departmental Representative. Any shortfall shall be replaced by the Contractor as part of his responsibility under this Contract.

The tools and spares to be carried shall include but not be limited to at least the following:

(a) Tools

- (i) Grease and oil lubrication equipment;
- (ii) Equipment operating keys and tools.

(b) Spares

- (i) Spare sight glasses for sight glass indicators, seals and gaskets (where applicable);
- (ii) Spare seats, gaskets and gland packings for valves, etc;
- (iii) Spare steam traps, at least one of each type present on the installation (where applicable);
- (iv) Spare pressure gauges, at least one of each range and type;
- (v) Spare electrical elements (where applicable);
- (vi) Spare thermostats, at least one of each type present on the installation (where applicable);
- (vii) Spare pilot lights, contactors, circuit brackets, relays, thermal overloads, etc, for electrical control panels;
- (viii) Spare temperature gauges, at least one of each range and type.

FC 11 REPAIR WORK TO INSTALLATIONS, SYSTEMS AND EQUIPMENT

FC 11.01 GENERAL

During the repair and maintenance contract all the systems, installations and equipment shall be repaired as specified in the Particular Specification. This repair work shall include but no be limited to the specified Particular Specification details.

All repair work shall be executed using approved materials and equipment suitable to the systems and/or installations they serve. The said repair work shall be executed in accordance with the relevant codes of practice, standards, regulations, municipal laws and by-laws, manufacturer's specifications and codes of practice and all additional and particular specifications included in this document.

The repair work items are listed in the Particular Specification and Schedule of Quantities with all relevant details, such as capacity, size, manufacturer, model number, etc.

All repair work shall be executed within the specified durations listed in the Appendix to Tender. All new equipment, materials and systems shall be furnished with a written guarantee of a defects liability period of 12 months commencing on the date of issue of a certificate for completion of the repair work. These guarantees shall be furnished in favour of the Department of Public Works.

Repair work items for the hot water generating installations shall be categorised under the following headings:

- (a) General requirements for hot-water generating installations
- (b) Steam and condensate pipework (where applicable) Refer to Technical Specification FB: Steam Distribution Installations.
- (c) Hot-water storage vessels
  - (i) Existing hot-water storage vessels
  - (ii) Electrically driven storage vessels, new hot-water storage vessels
  - (iii) Heating services for hot-water storage vessels.
- (d) Lagging and cladding of vessels and piping
  - (i) Vessel lagging and cladding
  - (ii) Hot-water and hot-water return pipe lagging and cladding
- (e) Pressure testing
- (f) Corrosion protection linings
- (g) Sterilization of installation
- (h) Heating control equipment
  - (i) Steam heating equipment
  - (ii) Electrical heating equipment
- (i) Instruments and controls
  - (i) Type of instrumentation and controls
  - (ii) Instrumentation and controls, installation requests
- (j) Primary and secondary pumping installations
  - (i) Primary pumping equipment
  - (ii) Secondary pumping equipment

(k) Domestic hot-water and cold-water pipe installations

- (i) Strainers
- (ii) Valves
- (iii) Air vents
- (iv) Thermostatic water flow control valve
- (v) Expansion equipment
- (vi) Flow meters
- (vii) Check valves
- (viii) Vacuum breakers
- (ix) Expansion release valve
- (x) Safety valves
- (xi) Pressure gauges

(l) Electrical installations

- (i) Electrical control panels
- (ii) Wiring and cabling.

Any repair work, which may be required on the systems, equipment and installation, shall be executed using approved materials, equipment, methods and tooling suitable for the specific application. The said repair work shall be executed in accordance with the relevant codes of practice, standards, regulations, statutory regulations, manufacturer's specifications and codes of practice and as specified in all additional and particular specifications included in this document.

At the start of the repair and maintenance contract, the repair work specified in the Particular Specification shall be done in accordance with the items listed. Any repair work during the maintenance period shall also adhere to this specification.

FC 11.02 GENERAL REQUIREMENTS FOR HOT-WATER GENERATING INSTALLATIONS

All repair work and new installation of hot-water generating installations shall adhere to the standard specifications of the Department of Public Works and all relevant specifications, norms, standards and regulations applicable to this type of installation, including the following general requirements:

The hot-water generating installation shall be repaired, installed and maintained as a complete functional unit, with all the responsibilities, functions and operating parameters taken into account to ensure the continuous supply of hot water to the consumer points.

The hot-water generating installation shall be capable of providing ample supply of hot water to the consumer points by means of ensuring the correct sizing of the hot-water storage and production.

FC 11.03 STEAM AND CONDENSATE PIPEWORK

All steam and condensate installations shall be done in accordance with Technical Specification FB: Steam Distribution Installations.

FC 11.04 HOT-WATER STORAGE VESSELS

FC 11.04.01 Existing hot-water storage vessels

At the start of the maintenance and repair contract the Contractor shall inspect, repair, service, clean out and test all hot-water storage vessels.

The inspection shall include the following:

- (a) Isolate drain, open manholes and clean out hot-water vessels.
- (b) Inspect vessel welds.
- (c) Inspect internal corrosion lining and check for any pit holes and damages to the vessel material and connections.
- (d) Inspect lagging and cladding.
- (e) Inspect condition of all elements, steam heating coils, controls, safety valves, etc.
- (f) During this inspection the Contractor shall notify the Engineer/Departmental Representative in advance to allow the Engineer/Departmental Representative to witness the Contractor's findings. The Contractor shall submit a written report on the findings.

- (g) All manhole and pipe gaskets shall be replaced.

No repair work shall be proceeded prior to approval from the Engineer/Departmental Representative. Should any welding repair work be required it shall be performed by a coded welder in accordance with acceptable practices, codes and norms.

Should the corrosion lining be damaged or corroded, thus necessitating the relining of the vessel, this shall be done with an approved lining suitable for the water quality and operating temperature under which this system is functioning.

For further details on repair to resisting linings and installation of new linings refer to FC11.06.

All safety valves shall be serviced, overhauled and readjusted to the correct safety pressure blow-off part.

All lagging and cladding shall be inspected, repaired and where necessary replaced.

On completion of all repair and service work the Contractor shall reinstate all equipment, fill the hot-water vessel with water and pressure test it to 1,5 times the permissible operating pressure or allowable test pressure.

On passing of the pressure test the Contractor shall re-commission the hot-water vessels and put it back on line.

#### FC 11.04.02 New hot-water storage vessels

Where new hot-water storage vessels are to be installed it shall be done in accordance with the following specification and on approval of the necessary workshop drawings to be provided by the Contractor.

The storage vessels shall be of the vertical cylindrical type with dished ends on both sides, and shall be manufactured to BS 5500 Category II in mild steel for a working pressure as indicated for the three systems. A pressure test certificate for each vessel shall be supplied by the manufacturer.

The vessel shall be equipped with at least the following :

- (a) Properly sized flanged manhole for easy access
- (b) Flanged inlets and outlets to SANS 1123 Table 10
- (c) Sparge pipe on the cold-water inlet
- (d) Correctly sized thermometer
- (e) Correctly sized temperature and pressure relief valve
- (f) Air release valve
- (g) Correctly sized pressure gauge
- (h) BSP threaded sockets for thermostats
- (i) 40 mm diameter BSP threaded socket at the lowest point of the storage tank for draining purposes
- (j) 50 mm diameter boss element segments for auxiliary elements.

An expansion relief valve shall be installed on the inlet to the storage vessels for thermal expansion.

Where pipe connections to the storage vessel are done by dissimilar materials (such as copper), isolating flanges shall be used (dielectric coupling).

Before ordering and manufacturing of storage vessels a workshop drawing shall be submitted to the Engineer/Departmental Representative for approval.

The Contractor shall satisfy himself that access and plantroom sizes are to the dimensions on the drawings and that the equipment will fit into the space allowed.

#### FC 11.04.03 Heating sources for hot-water storage vessels

- (a) Electrical elements

Where electrical immersion elements are used to heat the water inside the hot-water storage vessel, these elements shall be replaced at the start of the repair and maintenance contract.

All the thermostat controls and safety cut outs shall be cleared, inspected, tested, adjusted to the correct valve and where necessary replaced.

**(b) Steam heating**

Where steam heat exchangers are used to heat the water inside the storage vessel, these coils shall be removed together with the steam chest and associated equipment. The coils shall be de-scaled, cleaned, inspected and tested.

Where necessary the heat exchanger and/or coils shall be replaced.

**FC 11.05 LAGGING AND CLADDING**

All lagging and cladding to hot-water vessels, primary heaters, secondary heaters and hot and circulation water piping shall be inspected for defects, damages and shortages at the start of the repair and maintenance contract. The Contractor shall report his findings to the Engineer/Departmental Representative in writing.

All repairs to be done shall match the existing installation and the Contractor shall ensure that no sharp edges from the metal cladding pose a danger to anybody.

The following specification shall be adhered to:

**(a) Vessel lagging and cladding**

The storage vessels shall be insulated with a 80 mm thick layer of mineral glass wool with a density of 88 kg/m<sup>3</sup> and finally covered with 0,6 mm thick galvanized sheet metal. The sheet-metal work has to be done by a specialist. (All edges are to be rolled and no sharp edges will be allowed.)

**(b) Hot-water and return water pipe lagging and cladding**

All hot water and hot-water return pipes shall be insulated with preformed fibreglass sections covered with galvanized sheet-metal muffers in a water tight manner. Sheet-metal muffers shall be installed with the joints overlapping at least 50 mm and the longitudinal overlap pointing downwards to prevent ingress of water. The sheet-metal muffer shall be strapped with 10 mm galvanized straps by means of a strapping tool with a minimum of 2 straps/section. All pipe bends, T-pieces, etc, shall be insulated with 25 mm diameter fibreglass rope covered with a 12 mm thick layer of self-setting fibre cement. A reinforcing gauze shall be wrapped over the fibre cement while wet and then painted with mastic paint when dry.

Table FC 11.05/1 below provides a guideline for the preformed fibreglass section thickness to be used.

The fibreglass sections shall have a density of 88 at least kg/m<sup>3</sup>.

**TABLE FC 11.05/1: FIBREGLASS SECTION THICKNESS**

PIPE SIZE (STEEL)	PIPE SIZE (COPPER)	THERMAFLEX THICKNESS
100 mm dia	108 mm dia	50 mm
80 mm dia	76 mm dia	40 mm
65 mm dia	67 mm dia	40 mm
50 mm dia	54 mm dia	25 mm
40 mm dia	42 mm dia	25 mm
32 mm dia	35 mm dia	25 mm
25 mm dia	28 mm dia	20 mm
20 mm dia	22 mm dia	20 mm
15 mm dia	15 mm dia	15 mm

**FC 11.06 PRESSURE TESTING**

The Contractor shall at the completion of the repair contract arrange for a complete pressure test to be executed on the hot-water generating installation. This shall be done in collaboration with the User Client and Engineer/Departmental Representative to ensure the minimum down-time of the installation, as well as to establish a suitable period for this pressure test. All leaks shall be repaired and the system shall be tested at the cost of the Contractor. This test shall be witnessed by the Engineer/Departmental Representative.

The tests shall be performed on all hot-water storage vessels, primary heating vessels, secondary heater vessels and domestic water pipe systems.

All safety and expansion release valves shall be removed and plugged, and on completion these shall be reinstalled.

The systems shall be filled with water after all branches have been plugged, sealed or closed.

The systems shall be hydraulically pressure tested by means of a suitable manually operated or mechanically driven pressure pump.

A pressure of at least 1,5 times the working pressure of the class rating of pipes or fittings shall be applied for a period of time specified in the specifications or as recommended by the manufacturers. (Refer to SANS 1200 for minimum and maximum test pressures.)

Tests should not be performed against closed valves.

Leakage which occurs shall be measured, calculated and checked against the allowable losses, as specified in SANS 1200.

If the completed sections comply with all specifications and pass the tests and inspection, it can be approved and the Contractor may be instructed to re-commission the plant.

#### FC 11.07 CORROSION PROTECTION LININGS

All vessel corrosion protection linings shall be inspected and repaired and/or replaced where necessary.

Repairs shall only be done to linings where the supplier and installer of these linings approve of such repairs. These repairs shall then be done strictly in accordance with the manufacturer's specification and shall be certified by an approved inspection authority.

Where new linings are to be installed, the required preparation work including sand blasting and removed of old lining shall be done in accordance with the recommendation of the supplier of the new lining.

Where new linings are to be introduced they shall be similar or equal to the following:

Internally coated with a durable, high operating temperature glass flake lining with DTF of one millimetre, similar or equal to a Polygrass VE lining as supplied by Corrocoate, suitable for an operating temperature of 95oC at the indicated working pressures.

The applications of these linings shall be witnessed and certified to the manufacturer's application standards by an approved inspection authority.

Externally the vessels shall be coated with two coats of red oxide paint.

#### FC 11.08 STERILISATION OF WATER SIDE OF INSTALLATION

The Contractor shall at the completion of the repair contract sterilize the complete water side of the hot-water system including vessels and pipes.

This shall be done as described in the following guidelines.

The complete system shall be filled with potable water chlorinated to a concentration of 15 mg of chlorine per litre of water which shall remain in contact with the inner surface of the pipeline for a period of not less than 24 hours. The pipeline shall be filled for sterilizing in such a manner that no chlorine shock is created or air is trapped in the pipeline.

The Contractor shall submit full details of the proposed method for sterilizing the pipeline to the Engineer/Departmental Representative for approval at least 14 days before commencing sterilizing. The cost of water for filling the pipeline for sterilizing shall be borne by the Contractor.

The Contractor shall provide all materials, tools, equipment and labour necessary to sterilize the pipeline. After sterilizing the pipeline the Contractor shall, at no extra cost, empty the pipeline and dispose of the water in a manner approved by the Engineer/Departmental Representative.

The Contractor may use the following products as a source of chlorine:

- (i) Chloride of lime to SANS 295 yielding 33 % free chlorine by mass;
- (ii) Calcium hypochlorite to SANS 295 yielding 70 % free chlorine by mass;
- (iii) Chlorine gas applied by chlorinator.

After sterilization, an approved water quality test to a minimum number of 10 % of the total water points, randomly selected, evenly spread and marked on drawings, shall be carried out. This test shall include a full bacteriological test as per SANS 241 and the results shall be submitted to the Engineer/Departmental Representative for inclusion in the Contract documents. Each abortive test shall be for the Contractor's cost.

When tested the water shall comply with the limits given in column 2 or 3, as relevant, of table FC 11.08/1.

TABLE FC 11.08/1: BACTERIOLOGICAL REQUIREMENTS

PROPERTY	RECOMMENDED MAXIMUM LIMIT	MAXIMUM ALLOWABLE LIMIT
Total coliform bacteria count per 100 millilitre	Nil*	5
Faecal coliform bacteria count per 100 millilitre	Nil	Nil
Standard plate count per millilitre	100	Not specified

Note:

\* If any coliform bacteria are found in a sample, take a second sample immediately after the tests on the first sample have been completed; this sample shall be free from coliform bacteria.

Not more than 5 % of the total number of water samples (from any one reticulation system) tested per year may contain coliform bacteria.

#### FC 11.09 HEATING CONTROL EQUIPMENT

The Contractor shall at the start of the repair and maintenance contract inspect, test, repair, readjust, and if necessary replace heating controls for the hot-water system.

This shall include the following:

- (a) Check for correct switching and/or control temperature operating points.
- (b) Check, test and ensure that the safety cut-out mechanisms are in place and switch and/or control at the correct level.
- (c) Ensure that equipment has been installed in accordance with the manufacturer's specification.
- (d) Ensure that all pockets are de-scaled and free of any defects.

The following control equipment shall be serviced, repaired and where required replaced if damaged beyond repair.

##### FC 11.09.01 Steam heating control equipment

Where immersed type thermostatic steam control valves are utilised they shall be serviced and repaired as follows:

- (a) Dismantle and strip down thermostatic control valve including removal of pocket.
- (b) De-scale and clean all equipment.
- (c) Replace element subassembly if necessary.
- (d) Replace cover joint, gland packing, heater joint, coupling joint and all gaskets where applicable.
- (e) Check valve seat and if necessary reseal.
- (f) Reassemble control valve and reinstall, test and adjust to correct level.

All other type of thermostatic heating control valves shall be serviced, repaired and overhauled in accordance with the manufacturer's specification.

#### FC 11.09.02 Electrical heating control equipment

All electrical thermostat control equipment shall be serviced and repaired in accordance with the manufacturer's specification. This shall include the following:

- (a) Dismantle, clean and de-scale thermostat pockets.
- (b) Test switching actions for correct operation.
- (c) Test safety cut-out switching points for correct operation.

Replace thermostat if the switching does not take place in accordance with the manufacturer's specification.

#### FC 11.10 PRIMARY AND SECONDARY PUMP INSTALLATIONS

The Contractor shall at the start of the repair and maintenance contract inspect, test, service and if required replace primary and secondary circulating pumps.

The pumps are to be inspected, tested, serviced and repaired together with their associated equipment and pipework. All repair and service work shall be done strictly in accordance with the manufacturer's specification.

The repair work to the pumps and equipment shall include at least the following:

- (a) Inspect and test the pumps for correct operation.
- (b) Replace gland packings, seals and gaskets.
- (c) Inspect and test for any bearing noise and replace if necessary.
- (d) Clean out pump strainers, check non-return valves, valves, etc.
- (e) Test pump motor windings for balance phases, insulation test and check wiring.
- (f) Inspect pump mountings and repair if necessary.

Where in-line glandless canned pumps are used, these shall be inspected, tested, serviced where possible, impeller inspected and cleaned and if found beyond repair, replace with a suitable replacement in accordance with the operating parameters.

#### FC 11.11 DOMESTIC HOT AND COLD WATER INSTALLATIONS

The Contractor shall at the start of the repair and maintenance contract inspect, tests, service, repair and if required, replace damaged items on the complete hot and cold-water piping installation inside the hot-water generating plant rooms.

The repair work specification shall be read in conjunction with Technical Specification AA: Plumbing and Drainage Installations.

Repair work to the domestic hot and cold-water installation networks shall be as detailed in the Particular Specification and shall include, but not be limited to the following:

- (a) Replace damaged, broken, leaking and corroded above and underground pipework, fittings and equipment.
- (b) Repair, replace and service valves, including new gaskets, gland packings, seals, bolt and nuts, etc.
- (c) Test the proper closing of all valves and where valves do not close properly, the valves shall be refurbished, de-scaled and if necessary replaced.
- (d) Repair, clean and service all strainers including replacement of strainer elements where corroded and installation of new gaskets.
- (e) Repair, service, test and readjust pressure-reducing valves. Pressure gauges shall be recalibrated and checked. Up and downstream pressures are to be logged. Downstream pressure to be adjusted to an acceptable level taking the allowable working pressure of the system and its components into account.
- (f) Repair, service and check the proper functioning of all non-return valves.
- (g) Repair, service, readjust and calibrate all safety and expansion relief valves.

- (h) Repair, service and clean out all air release valves and vacuum breakers.
- (i) Do repair work to bracketing systems including fixing and repair of existing brackets and the introduction of additional brackets where required.
- (j) Hot-water pipe lagging and cladding shall be inspected, repaired, sealed and replaced where required.
- (k) Repair, service and log readings of water meters including cleaning of integral strainers.
- (l) Water pipes are to be sampled for corrosion and scaling. The Engineer/Departmental Representative shall evaluate the actions to be carried out if the outcome of this sampling requires attention.
- (m) Water supply shall be sampled and chemically analyzed for the suitability to the systems and materials it serves.
- (n) Pressure test and sterilize repaired new installation and equipment.
- (o) Reinstate and make good walls, tiling, floors, concrete, finishes, holes, chases, surfaces, etc, to an acceptable level where any repair, upgrade and/or service work has been executed.

#### FC 11.12 ELECTRICAL INSTALLATION, WIRING AND CONTROL PANELS

##### FC 11.12.01 Instrumentation and controls

All instrumentation and control equipment shall be inspected, tested, repaired, adjusted and where necessary replaced. All repair and service work shall be done strictly in accordance with the manufacturer's specification.

The repair work to the instrumentation and control equipment shall include at least the following:

- (a) Test all equipment for correct operation.
- (b) Inspect, test, service, adjust setting and if necessary repair, and/or replace steam detector.
- (c) Inspect, recalibrate and, if beyond repair, replace steam pressure gauge.

##### FC 11.12.02 Electrical control panels

All electrical control panels shall be inspected, tested, and repaired, including all equipment inside the control panel. All repair and service work shall be done strictly in accordance with the manufacturer's specification.

The repair work to the electrical control panels shall include at least the following:

- (a) Test all control equipment for correct operation.
- (b) Check and test all MCBs, isolators, contactors, overloads, other type of motor drives, pilot lights, control switches, etc, and readjust all set points; where equipment is found to be faulty these shall be replaced with new approved equipment.
- (c) Check all wiring and connections for proper conducting and replace where hot connections are found.
- (d) Clean out panel interior and exterior, inspect panel body, fascias, doors, paintwork, etc, and repair where necessary.

#### FC 12 MAINTENANCE TO INSTALLATIONS AND EQUIPMENT

##### FC 12.01 GENERAL

Monthly maintenance responsibilities for each installation including all units and components as specified, shall commence with access to the site. A difference shall be made in payment for the maintenance prior to and after practical completion of repair work. Maintenance responsibilities of the completed installation shall commence upon the issue of a certificate of practical completion for repair work, and shall continue for the remainder of the 36-month contract period.

This part of the Contract shall include:

- (a) Routine preventative maintenance;
- (b) Corrective maintenance, and
- (c) Breakdown maintenance,

as defined in for the specified installations described under FC 01 of this specification.

The maintenance work to be performed and executed shall be done strictly in accordance with General Maintenance, and as specified in Particular Specification PFC and this specification.

The said maintenance work shall be executed in accordance with the relevant codes of practice, statutory regulations, standards, regulations, municipal laws and by-laws and the manufacturers' specifications and codes of practice.

The maintenance schedules and frequency shall be developed under the maintenance control plan to be instituted by the Contractor, as specified in General Maintenance.

All new equipment, components and materials supplied and installed under the maintenance contract shall be furnished with a prescribed manufacturer's guarantee.

The maintenance work and items are to be categorized by the Contractor for each maintenance activity under the following headings:

- (a) Steam and condensate pipework (where applicable)
- (b) Hot-water storage vessels
- (c) Heating equipment
- (d) Lagging and cladding of vessels and piping
- (e) Corrosion protection linings
- (f) Circulating pumps
- (g) Domestic hot and cold-water piping systems
- (h) Electrical controls, panels and wiring.

The Contractor shall be remunerated monthly, based on his performance, for maintaining the complete installation in a perfect functional condition.

#### FC 12.02 ROUTINE PREVENTATIVE MAINTENANCE

The routine maintenance of the installations, systems and equipment shall be done in accordance with General Maintenance and the Particular Specification related to this work.

The routine maintenance work to be performed and executed shall include but not be limited to the items listed in tables FC 12.02/1, FC 12.02/2, FC 12.02/3 and FC 12.02/4 below under the respective headings. These actions and findings shall be logged and reported on the relevant approved schedules and reports.

TABLE FC 12.02/1: Weekly actions and maintenance

ITEM	MAINTENANCE DESCRIPTION	ACTION RESPONSIBILITY	ACTION
1	Inspect equipment, components and installations for any visible defects, leaks, damages and/or pending faults.	Contractor	Check/Record
2	Check and record all pressure gauge temperature and flow meter readings, and readjust equipment if necessary.	Contractor	Adjust/Check/Record
3	Check operation of pumps, heating equipment and controls for correct functioning.	Contractor	Check/Record
4	Check electrical control panels for any faults.	Contractor	Check/Record
5	Report any faults, defects, leaks, damages, etc, to Engineer/Departmental Representative.	User/Client	Check/Record/Report

TABLE FC 12.02/2: Monthly actions and maintenance

ITEM	MAINTENANCE DESCRIPTION	ACTION RESPONSIBILITY	ACTION
1	All as listed under table FC 12.02/1	Contractor/User Client	Check/Record/Adjust/Repair/Report
2	Blow down all dirt pockets and record.	Contractor	Service/Record
3	Clean out all strainers and record.	Contractor	Service/Record

4	Check all valve gland seals and packings for leaks and replace and repair if necessary.	Contractor	Check/Service/Repair/Record
5	Check, inspect and repair if necessary all expansion joints for leaks and damages.	Contractor	Check/Repair/Record
6	Check all safety devices for correct operation and repair and replace where necessary.	Contractor	Check/Service/Repair/Record
7	Check and test all electrical control functions and operations.	Contractor	Check/Service/Repair/Record
8	Repair and report any faults and defects. Complete logbook and report.	Contractor Contractor	Check/Service/Repair/Record Report

TABLE FC 12.02/3: Four-monthly actions and maintenance

ITEM	MAINTENANCE DESCRIPTION	ACTION RESPONSIBILITY	ACTION
	All as listed under tables FC 12.02/1 and FC 12.02/2.	User Client/ Contractor	Check/Record/Adjust/Repair
	Service, repair, clean, replace seals gaskets, reset and/or replace worn parts as directed by the manufacturer of all steam traps (where applicable).	Contractor	Check/Service/Repair/Report
	Service, repair, replace glasses and gaskets where necessary and clean all sight glasses.	Contractor	Check/Service, Repair, Report
	Repair lagging and cladding where necessary.	Contractor	Check/Repair/Report
5	Repair all steam leaks.	Contractor	Check/Repair/Report
6	Repair all water leaks.	Contractor	Check/Repair/Report
7	Inspect and test all heating equipment Repair where necessary.	Contractor	Check/Repair/Report
8	Inspect all hot -water storage vessels for any leaks and packing faults. Repair if necessary.	Contractor	Check/Repair/Report
9	Test, inspect and repair all pumps.	Contractor	Check/Service/ Repair/Report
10	Lubricate all lubrication points in accordance with the manufacturer's specification.	Contractor	Check/Service/ Report
11	Complete logbook and report.	Contractor	Report

TABLE FC 12.02/4: ANNUAL ACTIONS AND MAINTENANCE

ITEM	MAINTENANCE DESCRIPTION	ACTION RESPONSIBILITY	ACTION
	All as listed under tables FC 12.02/1, FC 12.02/2 and FC 12.02/3.	User Client / Contractor	Check/Record/ Adjust/Repair
	Drain, clean out, inspect and repair all defects and linings on hot-water storage vessels.	Contractor	Inspect / Test / Service / Repair
	Inspect and repaint all equipment where required.	Contractor	Inspect / Test / Service / Repair
	Remove, strip, service, repair,		

	adjust and replace where necessary		
	all pressure control and safety valve equipment.	Contractor	Service / Repair / Adjust / Report
5	Complete logbook and report.	Contractor	Report

FC 12.03 CORRECTIVE MAINTENANCE

This corrective maintenance of the installations, systems and equipment shall be done in accordance with General Maintenance, and the Particular Specification related to this work.

The Contractor shall inspect and check all equipment, materials, systems and installation for any pending breakdowns, maladjustments or anomalies of equipment.

The Contractor shall report and take actions to correct such shortfall.

FC 12.04 BREAKDOWN MAINTENANCE

Breakdown maintenance of the installations, systems and equipment shall be done in accordance with General Maintenance.

All breakdown problems experienced shall be acted upon within the time limitations allowed in the General Maintenance specifications.

All breakdown maintenance shall be done in accordance with the relevant specifications, standards, regulations and codes.

The Contractor shall have access to the necessary spares, equipment and tools for any possible breakdowns.

DEPARTMENT OF PUBLIC WORKS

FORT GLAMORGAN & MDANTSANE PRISON

REPAIR & MAINTENANCE PROGRAM - MECHANICAL INSTALLATIONS

PARTICULAR SPECIFICATION PFA - STEAM GENERATING INSTALLATION

CONTENTS

- PFA 01 SCOPE
- PFA 02 GENERAL DESCRIPTION OF INSTALLATION
- PFA 03 TECHNICAL DETAILS OF EXISTING INSTALLATION
- PFA 04 STATUS OF EXISTING INSTALLATION
- PFA 05 DETAILS OF REPAIR WORK
- PFA 06 DETAILS OF MAINTENANCE WORK

PFA 01 SCOPE

(a) This specification covers the particulars of the repair and maintenance work to the steam generating installation at the St Albans Prison. This Particular Specification shall be read in conjunction with the Technical Specification FA: Steam Generating Installation; and all additional and technical specifications compiled as part of this document.

The intended repair and maintenance work to this installation will restore the existing installation to a safe, efficiently functional system that complies with all statutory regulations and applicable standards, in the process repairing all defects and shortfalls. Monthly maintenance responsibilities for each installation shall

commence with access to the site. A difference shall be made in payment for maintenance prior to and after practical completion of repair work. On completion of the repair work, the completed installation shall be maintained and serviced by the Contractor for the remainder of the 36-month Contract period.

(b) The installations to be maintained under this Contract includes the following:

- (i) Two coal fired horizontal boilers;
- (ii) Coal storage and handling equipment;
- (iii) Feed-water storage and control equipment;
- (iv) Water-treatment equipment;
- (v) Steam and condensate piping and equipment inside the boiler house;
- (vi) Electrical control equipment wiring, cabling, panels and general electrical installation inside the boiler house.

**PFA 02 GENERAL DESCRIPTION OF INSTALLATION**

The central steam generating installation is situated in the east corner of the prison, entry is via the gate to the enclosed complex. This installation generates steam by means of two coal fired boilers, which is distributed via a steam and condensate reticulation network to all steam consumption equipment at this prison.

This installation provides the following plant and installations with steam:

- (a) Central laundry. The laundry does not form part of this contract.
- (b) Central kitchen. The kitchen does not form part of this contract.
- (c) Hot-water calorifier installation at the boiler house which serves the kitchen, laundry and ablution facilities

**PFA 03 TECHNICAL DETAILS OF EXISTING INSTALLATION**

At the time of compilation of this document the existing installation consisted of the equipment and plant listed below with their relevant technical details.

**PFA 03.01 TECHNICAL DETAILS: COAL-FIRED BOILER NO 1**

1	Manufacturer	John Thompson
2	Model no	826
3	Boiler Serial no	71456
4	Registration certificate number	Not available
5	Boiler type	Horizontal coal fired multi-tubular
6	Design code	BS 2790-1992 Class 1
7	Factory no	71456
8	Manufacturing date	1976
9	Maximum continuous rating	ca 1800kg/hr from and at 100oC
10	Design pressure rating	1040 kPa
11	Authorised working gauge pressure	1040 kPa
12	Normal operating pressure	1000 kPa
13	Safety blow-off pressure	1000 kPa
14	Stoker make & type	JTA – chain grate type
15	Stoker motor capacity	TBA
16	Feed pumps	2 no Grundfoss multistage
17	Feed pump power capacity	ca 11 kW 400 volt three-phase 50 Hz per pump
18	Chimney stack type	Guyed 350 mm dia. supported from boiler
19	Boiler control panel	Standard - mounted against boiler
20	Level controls	Single and dual switch float operated level switches

(Mobrey)

**PFA 03.02 TECHNICAL DETAILS: COAL-FIRED BOILER NO 2**

1 Manufacturer

John Thompson

2	Model no	826
3	Boiler Serial no	71456
4	Registration certificate number	Not available
5	Boiler type	Horizontal coal fired multi-tubular
6	Design code	BS 2790-1992 Class 1
7	Factory no	71456
8	Manufacturing date	1976
9	Maximum continuous rating	ca 1800kg/hr from and at 100oC
10	Design pressure rating	1034 kPa
11	Authorised working gauge pressure	1034 kPa
12	Normal operating pressure	1000 kPa
13	Safety blow-off pressure	1000 kPa
14	Stoker make & type	JTA – chain grate type
15	Stoker motor capacity	TBA
16	Feed pumps	2 no Grundfoss multistage
17	Feed pump power capacity	ca 11 kW 400 volt three-phase 50 Hz per pump
18	Chimney stack type	Guyed 350 mm dia. supported from boiler
19	Boiler control panel	Standard - mounted against boiler
20	Level controls	Single and dual switch float operated level switches

(Mobrey)

PFA 03.03 TECHNICAL DETAILS: FEED-WATER TANK

1	Dimensions	2000 x 2000 x 1400 mm
2	Division wall	No
3	Quantity	1
4	Capacity	4500 litre
5	Make-up water	40 mm dia. with ball-float valve
6	Insulation	Insulation wool with galvanised cladding
7	Heating equipment	Steam heating coil in bottom of tank

PFA 03.04 TECHNICAL DETAILS: WATER SOFTENER PLANT

1	Manufacturer	TBA
2	Model no.	TBA
3	Pipe size	TBA
4	Serial no.	TBA
5	Service provider	TBA
6	Salt container	TBA

PFA 03.05 TECHNICAL DETAILS: CHEMICAL TREATMENT EQUIPMENT

1	Type	Dosing pumps (pulsating type)
2	Quantity	1
3	Model no	NA
4	Service provider	None at present
5	Chemical container	25 litre

PFA 03.06 TECHNICAL DETAILS: OPERATOR TOOLS AND SPARES

The following tools and spares are currently in the plant room.

Coal spades	4
Coal rakes	3
Grease gun	1
Step ladders	0
Blow-down spanners	2
Goggles	1

PFA 03.07 TECHNICAL DETAILS: ELECTRICAL SUPPLY AND EQUIPMENT

1 Main electrical control panel 150 kW 400 volt plus Neutral 50 Hz feeding the following equipment:

- Two coal-fired boiler control panels
- Water softener plant
- Feed water pumps

2 Plant room DB providing power to the following:

- Boiler house lighting
- Boiler house switched socketed outlets
- Four 450mm dia propeller type extract fans

PFA 04 STATUS OF EXISTING INSTALLATION

At the time of compilation of this document the status of the equipment and installation was briefly as follows:

PFA 04.01 COAL-FIRED BOILERS

(a) Boiler no 1

Boiler is approximately 38 years old, has been maintained and is in reasonable condition

(b) Boiler no 2

Boiler is approximately 38 years old, has been maintained and is in reasonable condition

(c) General

Feed-water tank and pumps are in reasonable condition

Pumps are in good condition

(iii) Chemical dosing equipment and water softener are in reasonable condition

These equipment were serviced and maintained in terms of a previous repair and maintenance contract.

PFA 05 DETAILS OF REPAIR WORK REQUIRED

The following work shall form part of the repair work to the coal-fired boiler plant room installation. This work shall be done in accordance with the relevant regulations, codes, specifications and Technical Specification FA: Steam Generating Installation, as set out in this document. The work to be included is set out in PFA 05.01, PFA 05.02 and PFA 05.03 below:

The repair work shall be carried out in the following sequence in accordance with the requirements of General Decommissioning, Testing and Commissioning Procedures (SC 02 - Phased repairs and upgrading of the installation):

1. Decommission, test and re-commission coal-fired boiler no 1.
2. Decommission, test and re-commission coal-fired boiler no 2.

No work shall be done to decommission any boiler unless the previous boiler in the sequence has been tested and commissioned. A minimum of one boiler shall always be in full operation at any one time.

PFA 05.01 GENERAL DESCRIPTION OF REPAIR WORK

The repair work to this installation shall at least include, but not be limited to the work listed below. Any items, components, installations and systems not detailed in particular shall be repaired and/or replaced if found to be defective and/or inoperative.

- (a) Statutory internal and external inspections and hydraulic pressure tests on both boilers at the commencement of the contract.
- (b) Testing and re-commissioning of all equipment and installations as may be required and directed by the Departmental representative/Engineer /Departmental Representative.
- (c) Implementation of control plans for fuel delivery, water treatment and boiler efficiency by the Contractor.
- (d) Supply and compilation of maintenance manuals. (Should it be required)

## PFA 05.02 STATUTORY INSPECTIONS AND TESTS

The Contractor shall at the start of the Maintenance portion of the Contract perform the required statutory internal/external inspection and hydraulic pressure test in accordance with the Occupational Health and Safety Act, no 85 of 1993 (as amended) and as specified in Technical Specification FA: Steam generating installation, on each of the boilers inside the plant room. During this period all boiler ancillary equipment and components shall be repaired as may be required, serviced, adjusted and tested.

### PFA 05.02.01 Internal and external inspection

This work shall be performed in accordance with FA 16.02 of the Technical Specification FA: Steam Generating Installation, the manufacturer's specification and the requirements of the Occupational Health and Safety Act of 1993 and shall include:

- (a) Decommissioning of boilers and electrical isolation;
- (b) All required preparation work for the internal and external inspection to the two boilers including all items listed under item PFA 05.03;
- (c) Repairs of all defects, replacement of defective equipment/components and servicing of all equipment/components;
- (d) Rendering all the necessary assistance, providing the required equipment and tools for the inspection by the approved Inspection Authority;
- (e) Providing and making sure that all record books and inspection reports and certificates are completed in full and submitted to the Departmental representative/Engineer /Departmental Representative;
- (f) Reassembling, recasting, refitting and adjustment of all boiler equipment components and ancillary equipment in accordance with the manufacturer's specification and Technical Specification FA: Steam Generating Installation.

### PFA 05.02.02 Hydraulic pressure tests

This work shall be performed in accordance with FA 16.02 of Technical Specification FA: Steam installation, the manufacturer's specification and the requirements of the Occupational Health and Safety Act of 1993 and shall include:

- (a) All preparation work required for the hydraulic pressure test to the boilers;
- (b) Rendering all the necessary assistance, providing the required equipment and tools for the test by the approved Inspection Authority;
- (c) Putting the boilers under the required pressure for witnessing by the Inspection Authority;
- (d) Providing and making sure that all record books and inspection reports and certificates are completed in full and submitted to the Departmental representative/Engineer /Departmental Representative;
- (e) Reassembling, recasting, refitting and adjustment of all boiler equipment, components and ancillary equipment in accordance with the manufacturer's specification and Technical Specification FA: Steam generating installation.

## PFA 05.03 REPAIR WORK TO BOILERS AND ANCILLARY EQUIPMENT

The following refers to work required in preparing boilers for statutory inspections

PFA 05.03.01 Coal-fired boilers

- (a) Boiler shell water side - Refer to Standard Specification FA clause FA 16.03.01(a)
  - (i) Clean out and descale boiler.
  - (ii) Inspect boiler water side and integral pipework.
  - (iii) Replace all manhole, handhole and mudhole cover seals and joint rings.
  - (iv) Replace fusible plug with new.
- (v) Execute any required repair work to boiler as directed by the Inspection Authority or the Departmental representative/Engineer.
- (b) Boiler shell gas side - Refer to Standard Specification FA clause FA 16.03.01(b)
  - (i) Clear and clean out all dust, slag, ash, grit and foreign matter.
  - (ii) Brush and clean out all fire tubes.
  - (iii) Inspect boiler gas side.
  - (iv) Allow for any replacement of tubes and required repairs as result of the inspection as directed by the Inspection Authority or the Departmental representative/Engineer.
  - (v) Replace all smoke box covers and door joint seals and insulation with new approved joint seals and insulation.
- (c) Integral pipework - Refer to Standard Specification FA clause FA 16.03.01(c)
  - (i) Clear and clean out all integral pipework and fittings.
  - (ii) Inspect boiler gas side.
  - (iii) Allow for any required repairs as result of the inspection as directed by the Inspection Authority or the Departmental representative/Engineer.
- (d) Boiler valves and mountings - Refer to Standard Specification FA clause FA 16.03.01(d)
  - (i) Dismantle, remove and strip down all boiler valves.
  - (ii) De-scale and clean all boiler valves and mountings.
  - (iii) Inspect boiler valves and mountings.
  - (iv) Overhauling all boiler valves by approved Departmental Representative/Engineer.
  - (v) Hydraulic testing, setting, adjustment and reassembling of all boiler valves.
- (vi) Certification of boiler valves in accordance with manufacturer's specification.
  - (vii) Replace boiler mountings.
  - (viii) Test and adjust safety valves.
- (ix) Refitting, installing, testing and adjustment of all boiler valves and mountings.
- (e) Refractories and brickwork - Refer to Standard Specification FA clause FA 16.03.01(e)
  - (i) Remove and break down all refractories and brickwork.
  - (ii) Recast and install new brick work on completion of inspection.
- (f) Lagging and cladding - Refer to Standard Specification FA clause FA 16.03.01(g)
  - (i) Replace lagging and cladding to oil-fired boilers on completion of statutory inspections and tests with new stainless steel cladding as specified by the manufacturer.

PFA 05.03.02 Feed-water equipment and controls

- (a) Feed-water tank - Refer to Standard Specification FA clause FA 16.03.02(a)
  - (i) Isolate, empty, clean out, de-scale and inspect feed-water tank.
  - (ii) Check make-up water ball float valve and adjust to correct level.
- (iii) Internally line tank with anti-corrosion coating suitable for 110oC operating temperature.
  - (iii) Refill tank with treated make-up water.
  - (iv) Prepare and repaint tank stand and exposed steel parts.

(v) Allow for temporary feed-water tank during repairs to feed-water tank including all temporary pipes and fittings.

(b) Feed-water pumps - Refer to Standard Specification FA clause FA 16.03.02(b)

- (i) Isolate, strip, dismantle, de-scale and clean out feed-water pumps.
- (ii) Inspect, and report on condition of pump and motor components.
- (iii) Replace packings, seals, bearings and gaskets.
- (iv) Replace any worn-out or/and damaged parts and components on report back as directed by the Departmental representative/Engineer.
  - (v) Clean out pump strainers.
  - (vi) Inspect and repair pump mountings.
  - (vii) Refit, install and test feed-water pumps.

(c) Water level equipment and controls - Refer to Standard Specification FA clause FA 16.03.02(c)

- (i) Dismantle, strip, de-scale and clean dual and single switch float operated controls (Mobrey type).
- (ii) Dismantle, strip, descale and clean water level gauge glasses and replace gauge glasses and gaskets. Refit to boiler.
- (iii) Dual and single level controls to be overhauled, inspected, tested, adjusted and refitted.
  - (iv) Test alarm levels and operation.
  - (v) Test blow-down valves and operation.

PFA 05.03.03 Combustion and draught equipment

(a) Stoker and stoker controls - Refer to Standard Specification FA clause FA 16.03.03(a)

- (i) Remove stoker from boiler furnace during the statutory inspections.
- (ii) Inspect and replace burnt or/and damaged chain grate links and rods where necessary.
- (iii) Replace chain grate bearings.
- (iv) Inspect sprockets and replace if required.
- (v) Inspect shafts, rear roller and re-machine or replace if necessary.
- (vi) Inspect stoker chassis for straightness, alignment and possible damages, and repair if necessary.
- (vii) Inspect under grate damper guide vanes and ensure that they are clean of any dust, slag and foreign matter.
- (viii) Renew and recast all refractories and brickwork in accordance with the manufacturer's specification.
- (ix) Inspect main worm wheel for any defects and replace if necessary.
- (x) Replace all joint seals with new.
- (xi) Reassemble stoker and stoker components.
- (xii) Replace guillotine door support cables.
- (xiii) Inspect, service and overhaul stoker drive and gearbox in accordance with the manufacturer's specification.
- (xiv) Replace shear pin.
- (xv) Adjust and readjust grate tension.
- (xvi) Check and adjust fuel bed depth indicator.
- (xvii) Lubricate all required lubrication points as directed by the manufacturer.
- (xviii) Mount FD (Forced Draft) fan and controls onto stoker.
- (xix) Reinstall stoker into boiler furnace in accordance with manufacturer's specification.

(b) Fan and damper controls - Refer to Standard Specification FA clause FA 16.03.03(b)

- (i) Dismantle, strip down FD (Force Draft) and ID induction fan and damper control equipment during the statutory inspections.
- (ii) Inspect fan impeller blades, clearances, etc, for correct curvature and clearance adjustment. Replace damaged parts and components.
  - (iii) Replace FD and ID fan bearings with new if required
  - (iv) Inspect fan casings and repair if required.
  - (v) Clean casings, prepare and repaint.
- (vi) Inspect damper controls and dampers for free movement, fan impeller clearance adjustment, control movements and settings. Repair, service and replace any defective equipment.
- (vii) Test fan motor windings for balanced phases, insulation test and check wiring.
  - (viii) Lubricate all required lubrication points as directed by the manufacturer.

- (ix) Inspect fan mountings and repair if necessary.
- (x) Reassemble and refit fans, damper controls and dampers.

(c) Combustion controls - Refer to Standard Specification FA clause FA 16.03.03(c)

- (i) Inspect, service, adjust and repair where necessary combustion control equipment.
- (ii) Lubricate all required lubrication points and replace oils as directed by the manufacturer.
- (iii) Inspect mountings and repair if necessary.

(d) Chimneys - Refer to Standard Specification FA clause FA 16.03.03(d)

- (i) Inspect and clean chimney stacks.
- (ii) Inspect guyed cables securing points, repair if necessary and re-tension and secure fixing points.
- (iii) Repair flashing and seal chimney stack roof penetrations.
- (vi) Prepare and repaint chimney stacks.

PFA 05.03.04 Coal Handling and Conveying Equipment

Refer to clause FA 16.03.04

(a) Coal Bunkers

The coal bunkers or coal storage shall be inspected, cleaned out, and damaged structural elements and brickwork be repaired.

(b) Coal Conveying Equipment

The coal conveying equipment shall be inspected, serviced, tested, and repaired and, where necessary, components be replaced. All repair and service work shall be done strictly in accordance with the manufacturer's specification.

The repair work to the coal conveying equipment shall include at least all items listed in clause FA 16.03.04(b)

PFA 05.03.05 Ash and Grit Removal Equipment

Refer to clause FA 16.03.05

(a) Grit Collectors

The grit collector shall be inspected, serviced, tested, repaired and, where necessary, components be replaced. All repair and service work shall be done strictly in accordance with the manufacturer's specification.

The repair work to the grit collector shall include at least all items listed in clause FA 16.03.05(a)

(b) Ash Conveying Equipment

If ash conveying equipment are installed these equipment shall be inspected, serviced, tested, repaired and, where necessary, components be replaced. All repair and service work shall be done strictly in accordance with the manufacturer's specification.

The repair work to the ash conveying equipment shall include at least all items listed in clause FA 16.03.05(b)

(c) Ash and Grit Trolleys

All ash and grit trolleys are to be inspected, serviced and repaired where necessary.

PFA 05.03.06 Electrical installation, wiring and control panels

- (a) Instrumentation and controls - Refer to Standard Specification FA clause FA 16.03.06(a)
  - (i) Inspect, test, service and clean all instrumentation and control equipment.
  - (ii) Inspect, test, service, recalibrate and adjust steam pressure detector and pressure gauge.
  - (iii) Inspect all access ports and discharge ports and replace all joint seals and gaskets with new.
  - (iv) Repair and/or replace any defective parts or/and components.
- (b) General electrical power and lighting installation - Refer to Standard Specification FA clause FA 16.03.06(b)
  - (i) Inspect, test, service and clean the complete general electrical power installation, including distribution boards, lighting, power points, etc.
  - (ii) Repair and/or replace any defective parts or/and components, including replacing light fitting globes.
- (c) Electrical control panels - Refer to Standard Specification FA clause FA 16.03.06(c)
  - (i) Inspect, test, service and clean all the electrical control panels.
  - (ii) Inspect and test the operation and condition of all MCBs, motor starters, overloads, indication lights, control equipment, selector switches, etc, and replace where necessary.
  - (iii) Check and repair/replace all primary and secondary control panel wiring for proper conducting and replace where required.
  - (iv) Clean out control panels interior and exterior, inspect penel body, fascias, doors, paintwork, etc, and repair where necessary.
- (d) Extract fans

Clean, check and repair

PFA 05.03.07 Water treatment equipment

- (a) Water softener - Refer to Standard Specification FA clause FA 16.03.07(a)
  - (i) Inspect, test, descale, service and clean the water softener equipment.
  - (ii) Sample and analyze feed-water, and adjust water softener to the correct water hardness as specified by boiler manufacturer.
  - (iii) Check and clean out salt container and recharge with salt.
- (b) Chemical dosing equipment - Refer to Standard Specification FA clause FA 16.03.07(b)
  - (i) Inspect, test, service, clean and re-commission the chemical dosing equipment and re-connect to the feed-water supplies.
  - (ii) Sample and analyze feed-water, and adjust chemical dosing equipment to the correct water quality as specified by boiler manufacturer.
  - (iii) Ensure that each chemical container is filled with the correct chemicals for this application.

PFA 05.03.08 Boiler house ancillary equipment

- (a) Blow-down sump - Refer to Standard Specification FA clause FA 16.03.08(a)
  - (i) Empty, clean out, de-sludge and inspect blow-down sump, manhole covers and frames, sparge pipe, vent and other piping for any defects and damages.
  - (ii) Repair/replace all defects and damages.
  - (iii) Put blow-down sump back into operation.
- (b) Ladders and galleries - Refer to Standard Specification FA clause FA 16.03.08(b)
  - (i) Clean and inspect ladders and galleries for any defects, corrosion, mountings and supports.
  - (ii) Repair/replace all defects and damage.

(iii) Prepare and repaint ladders and galleries.

(c) Painting of equipment, plant and building - Refer to Standard Specification FA clause FA 16.03.08(c)

(i) Clean, prepare and repaint boiler house interior walls, structure, doors, frames, inside roof, etc, in accordance with Specification OWG 371: Specification of Materials and Methods to be used (Fourth edition, October 1993 or latest version).

PFA 05.03.09 Piped installations

(a) Steam and condensate installation - Refer to Technical Specification FB: Steam Distribution Installations.

(i) Clean, test, inspect, service and repair all steam and condensate pipe fittings, accessories, components and equipment inside the boiler house.

(ii) Supply, deliver, install, test, commission, and hand over a water meter on the feed water line to each boiler inside the boiler house. This shall include all cutting into existing pipework, fixing, bracketing, fittings, testing and putting back into operation of the feed water line. This water flow meter shall be of Kent or equal and approved manufacture. This equipment shall be installed and commissioned as directed by the manufacturer complete with all ancillary equipment and components.

(iii) Repair/replace all defective and damaged equipment and components.

(iv) Fit a steam flow and pressure recorder. The recorder shall be capable of graphically showing steam pressure in kilo-Pascals and flow in kg/hr on a monthly basis. In addition the recording system shall be capable of printing out the average steam pressure for the month as well as the total quantity of steam supplied either in kilograms or tonnes. The unit shall be complete with orifice plate and electronic data capturing equipment and all electrical connections and equipment required to enable it to function reliably under the conditions of high temperature imposed on it. It shall be a continuously rated device. Provision shall be made for easy and quick replacement of any component should it be required. A calibration certificate from a recognized testing authority competent to check the accuracy of the unit shall be supplied with it.

(b) Blow-down pipe installation - Refer to Technical Specification FB: Steam Distribution Installations.

(i) Clean out blow-down pipe channel and replace all blow-down and drain pipework and accessories.

(ii) All blow-down and drain pipework shall be done with steam schedule 40 piping and welded fittings.

(iii) Check that the drainage point to the channel is open and functioning properly.

(iv) Test and hand over pipe system.

PFA 06 DETAILS OF MAINTENANCE WORK

PFA 06.01 GENERAL

The Contractor shall be responsible for the complete maintenance of all the equipment, components, installations and systems forming part of this repair and maintenance contract for Steam Boiler Plant from the commencement of the contract until final completion. The Contractor shall strictly adhere to Technical Specification FA: Steam Generating Installations, with regard to the maintenance period, obligations, responsibilities, actions and activities, etc, which shall also include the following maintenance actions:

(a) Routine preventative maintenance: A guideline to the required actions is provided in Specification FA. The actions will not be limited to these guidelines, but shall include all additional actions, work, materials, etc, necessary to maintain this installation at an acceptable level.

(b) Corrective maintenance as described and defined in General Maintenance.

(c) Breakdown maintenance as described and defined in General Maintenance.

For this particular installation fatal breakdown shall be defined as both boilers being unable to provide steam to the system.

Emergency breakdown shall be defined as any other equipment, components, and systems preventing the provision of steam at the required pressure and flow to the system.

PFA 06.02 ADDITIONAL MATERIALS

For this particular installation the contractor shall be responsible for providing the required quality and quantity of chemicals and salts to operate and maintain the boilers for a period of 36 months. The Contractor shall ensure that the boiler feed water supply to the boiler conforms to the following by providing the required water treatment.

(i)	Total dissolved solids	350 mg/litre (max)
(ii)	Total alkalinity	350 to 700
(iii)	Caustic alkalinity	350 mg litre (max) 150 mg/litre (min)
(iv)	Phosphate residual	30 to 60 mg/litre
(v)	Sulphate residual	30 to 50 mg/litre
(vii)	Calcium hardness	Zero
(viii)	pH	10.5 to 11.4

Sampling and analysis of feed water shall form part of the Contractor's routine preventative maintenance responsibilities. The chemicals and water treatment system shall comply in all respects with the specification FA 14 and the boiler manufacturer's requirements.

PFA 06.04 OPERATION OF THE BOILERS

a) Introduction

It is required in terms of this contract that the successful contractor, in addition to the functions described before, take over the day-to-day operation of the complete boiler house at the prison site.

b) Occupational Health and Safety Act

It is required that the boilers be operated at all times strictly in accordance with the regulations and requirements of the Occupational Health and Safety Act (as amended). This covers the following:

- (i) The boiler operators shall be qualified to operate the boilers in terms of the Act.
- (ii) The minimum number of operators required in terms of the regulations shall be adhered to at all times.
- (iii) Gauge glasses shall be blown down on a shift basis.
- (iv) The boilers shall be blown down on a regular basis as dictated by chemical water treatment requirements.
- (v) A comprehensive log book shall be kept of all operations carried out on the boilers.
- (vi) All statutory tests and requirements shall be met and recorded.

c) Steam Quality and Availability

It is required that steam be produced and be available immediately upstream of all pressure reducing valves and steam using appliances that operate at boiler pressure at a pressure in the range 600 - 750 kPa gauge at all times. It is estimated that the steam draw-off will amount to approximately 2300 kg's per hour at the St Albans Prison, boilers are however only rated to 1800 kg's per hour.

The current prison regime requires that steam be available for cooking purposes, laundry operation and domestic hot water production at least between the hours of 2h00 and 17h30 daily. Firing of the boilers will thus have to commence sufficiently in advance of this time to ensure sufficient steam supply to the kitchen for the morning meals to be prepared. To this end it is recommended (but not an absolute requirement) that a timer be fitted and wired into the boiler control panels to enable the boiler(s) on line to be "banked" overnight and to maintain pressure and temperature ready for the early morning steaming requirements.

d) Change-over of Boilers

It will be required that the boilers in use be changed on a minimum of a monthly basis in order that the steaming load be spread evenly between the two boilers and to provide adequate time for routine

Maintenance and repair of the boilers shall be carried out as specified elsewhere in this document.

e) Coal Supply

It will be the Department of Correctional Services' responsibility to purchase an appropriate grade of coal suitable for firing in these boilers.

The Department of Correctional Services will be required to ensure that fuel is ordered in good time so as to ensure continuity of operation of the boiler plant.

f) Method of Payment

once approved a recording steam pressure/flow meter shall be installed in the boiler house to sense the steam pressure and flow in the main steam delivery line immediately outside the boiler house. The meter shall be capable of graphically recording the steam pressure over a monthly period together with the steam flow in tones per hour. In addition a facility shall be included to print out the average steam pressure for the period in question together with the total quantity of steam supplied during that period. It is recommended that the contractor have a spare or standby recorder available in case of breakdown of the steam flow recorder as payment will be dependant on these recordings.

Copies of these print-outs together with the graphical recordings shall be attached to claims for payment. Payment will thus be on the basis of a tendered rate per tonne of steam supplied. This rate shall include for the cost of boiler operators, supervisory staff, overheads and profit.

g) Penalties

Penalties for non-performance, lack of steam, etc will be levied as follows:

(i) Steam leaks from piping, valves and fittings left unattended and not repaired for more than five days from the date of such leak being reported and noted - 5% of the tendered monthly operating rate or R 500-00 per day in excess of the five day period, whichever is the greater.

To this end it will be required that an incident book be kept in the boiler house and which shall be accessible for Department of Correctional Services personnel or the Departmental representative/Engineer /Department Representative to note the date and time of steam leaks being observed and reported to the contractor for repair. Penalties will only be levied in respect of leaks entered in the book and signed in acknowledgement by the contractor.

(ii) Failure of steam supply – R 2 000-00 per day or part thereof should the lack be due to ineffective or inefficient boiler operation.

It is recognised that a lack of sufficient steam in, say, the kitchen could be due to damaged steam lines with the cause being beyond the boiler operators' control. The Departmental representative/Engineer /Department Representative will be required to take all relevant factors into consideration in determining whether penalties and in what amount are to be applied. In this respect the Departmental representative/Engineer 's/Department Representative's

DEPARTMENT OF PUBLIC WORKS

FORT GLAMORGAN & MDANTSANE PRISON

REPAIR & MAINTENANCE PROGRAM - MECHANICAL INSTALLATIONS

PARTICULAR SPECIFICATION PFB - STEAM DISTRIBUTION INSTALLATION

CONTENTS

PFB 01 SCOPE

- PFB 02 GENERAL DESCRIPTION OF INSTALLATION
- PFB 03 TECHNICAL DETAILS OF EXISTING INSTALLATION
- PFB 04 STATUS OF EXISTING INSTALLATION
- PFB 05 DETAILS OF REPAIR WORK
- PFB 06 DETAILS OF MAINTENANCE WORK

PFB 01 SCOPE

(a) This specification covers the particulars of the repair and maintenance work to the steam distribution installation at the St Albans Prison. This Particular Specification shall be read in conjunction with the Technical Specification FB: Steam Distribution Installations, and all additional and technical specifications compiled as part of this document, in particular the following Additional Specifications:

- SA: General Maintenance
- SB: Operating and Maintenance Manuals
- SC: General Decommissioning, Testing and Commissioning Procedures

The intended repair and maintenance work to this installation will restore the existing installation to a safe, efficiently functional system that complies with all statutory regulations and applicable standards, in the process repairing all defects and shortfalls. Maintenance responsibilities for each installation shall commence with access to the site. A difference shall be made in payment for maintenance prior to and after completion of repair work. On completion of the repair work, the completed installation shall be maintained and serviced by the Contractor for the remainder of the 36-month Contract period.

(b) The installations to be maintained under this Contract includes the following:

- (i) Steam and condensate distribution network on site;
- (ii) Condensate pump systems;
- (iii) Steam and condensate secondary piping systems to the following installations:
  - Laundry
  - Prison kitchens
  - Hot-water storage calorifier installations in boiler house.
  - Boiler plant room.
- (iv) Hot-water calorifier installations form part of Installation B. The maintenance responsibilities of hot-water calorifier installations shall form part of this installation. Reference must be made to Technical Specification FC.

PFB 02 GENERAL DESCRIPTION OF INSTALLATION

PFB 02.01 EXISTING INSTALLATION

The existing steam distribution network on site is reticulated by means of an overhead pipe system from the Central Boiler House, situated adjacent to the main kitchen, to the various steam consumer installations listed as follows.

- (a) Central laundry (should it be required)
- (b) Kitchen (should it be required)
- (c) Hot-water calorifier installations in the boiler house

PFB 02.02 CONDENSATE RETURN

From these installations and all the steam trap arrangements, a condensate return gravity installation is installed along the same route as the steam distribution network, leading both to the boiler feeder tank inside the boiler house.

PFB 02.03 ROUTING OF PIPEWORK

The routing of this steam distribution network is as follows:

- (a) From the boiler house to the prison kitchen supported from wall/pole brackets  $\pm$  25 metres;
- (b) From the boiler house to the central laundry supported from wall/pole brackets  $\pm$  30 metres;

PFB 03 TECHNICAL DETAILS OF EXISTING INSTALLATION

At the time of compilation of this document the existing installation consisted of the equipment and plant as listed below with their relevant technical details.

PFB 03.01 STEAM DISTRIBUTION PIPING

- 1 Pipe material: Schedule 40 seamless steam piping
- 2 Lagging and cladding: Fibreglass pre-formed sections with galvanised sheet metal muffs 3
- 3 Pipe route distance:  $\pm$  1100 metres
- 4 Supports: Galvanised post type pole supports and wall brackets with chain hangers.

PFB 03.02 CONDENSATE DISTRIBUTION PIPING

- 1 Pipe material: Steal welded/flanged and Copper to SANS 460 with capillary solder fittings
- 2 Lagging and cladding: Fibreglass pre-formed sections with galvanise muffs
- 3 Pipe route distance:  $\pm$  1100 metres
- 4 Supports: From steam support posts and hangers from steam lines

PFB 03.03 STEAM TRAP ARRANGEMENTS

- 1 Manufacturers: Armstrong & Spirax-Sarco
- 2 Type: Inverted bucket & float thermostatic
- 3 Model no: Various
- 4 Size: 15 & 20mm
- 5 Total number installed:  $\pm$  55

PFB 03.04 PRESSURE-REDUCING VALVES

- 1 Manufacturer: Armstrong or Spirax
- 2 Type: External Pilot operated PRV
- 3 Model no: Not available
- 4 Size: 40 mm dia
- 5 Quantity:  $\pm$  6
- 6 Down steam pressure: 100 kPa

PFB 03.05 CONDENSATE PUMP SYSTEMS

- 1. Prison Kitchen
  - 1.1 Type: Electrically driven pumps with condensate tank
  - 1.2 Pump Model no: TBA
  - 1.3 Pump manufacturer: Calpeda
  - 1.4 Pump motor: 0,75 kW 3-phase 230 V 50 Hz
  - 1.5 Condensate tank size: TBA litre

- 1.6 Number of tanks: 1  
1.7 Number of pumps: 2  
1.8 Electrical control panel: 1

#### PFB 04 STATUS OF EXISTING INSTALLATION

At the time of compilation of this document the status of the existing installation has been noted as follows:

- (a) Some steam leaks exist on the distribution network.
- (b) The steam and condensate reticulation is generally in a good condition.
- (c) Some line trap sets on the distribution network discharge directly into the atmosphere.

#### PFB 05 DETAILS OF REPAIR WORK

The following work shall form part of the repair work to the steam distribution installation. This work shall be done in accordance with the relevant regulations, codes, specifications and Technical Specification FB: Steam Distribution Installations, as set out in this document. The following work shall be included:

##### PFB 05.01 GENERAL

The Contractor shall at the start of the Repair and Maintenance Contract inspect the following items, systems, equipment, components and installations. This inspection shall include the establishing of any defects, leaks, conditions, damages, short falls, structural soundness, repairs required, details of existing equipment, suitability of equipment for the purpose it serves, etc. The Contractor shall report back to the Engineer/Departmental Representative in writing on all of the above and the following items. No repair work shall commence prior to approval by the Engineer/Departmental Representative:

- (a) Main and secondary steam and condensate pipe distribution network including all steam valves, expansion joints, pipe fittings, piping, air release valves, dirt pockets, etc;
- (b) Steam trap arrangements including steam traps, sight glasses, non-return valves, test valves, pipe connections, piping, etc;
- (c) Support and bracketing system to all steam and condensate pipe work;
- (d) Lagging and cladding of steam and condensate pipe work;
- (e) Pressure reducing valve installations;
- (f) Condensate pump installations.

The general scope of work at the time of going on tender is defined as follows:

- (a) Repair of all steam leaks;
- (b) The installation of blow-down valves and piping dirt pockets not equipped with blow-down valves.
- (c) Check, clean and repair condensate pump systems as required.
- (d) The servicing of all equipment including steam trap arrangements, PRV stations, valves, strainers, check-valves, pressure gauges, sight glasses, condensate pump system, control valves, safety valves, etc;
- (e) Flushing out of complete pipe system followed by a pressure test;
- (f) The Contractor shall allow for all required inspections and tests by an approved Inspection Authority on repair work where required by the Occupational Health and Safety Act as amended.
- (g) Preparation and painting of all exposed piping and equipment in accordance with the Department's painting specification;
- (h) The introduction of a maintenance control plan, including logging, recording and control procedures;
- (i) Handing over of complete system to the satisfaction of the Engineer on completion of the repair work on which the maintenance period of this contract shall commence.

##### PFB 05.02 DETAIL WORK

PFB 05.02.01 Steam and condensate pipe reticulation network - Refer to Standard Specification FB clause FB 12

- (a) Repair and replace damaged and missing sections of lagging and cladding to the steam and condensate pipe system as directed by the Engineer/Departmental representative. This shall include new fibre glass pre-formed sections and sheet metal muffs for short runs of piping and fittings. Rates will be as entered in the Schedule of Quantities.
- (b) Clean and blow out all dirt pockets.

- (c) Install 15 mm diameter steam globe valves with plugged end as required to existing plugged dirt pockets on the steam distribution installation. This shall include reducing bush nipples, valves and plugs. Quantities will be as specified in the Schedule of Quantities.
- (d) Clean, service, repair and replace sight glasses to all sight glass units. This shall include gaskets and new glasses.
- (e) Service all steam traps and replace all gaskets, O-rings, seals, strainer elements, buckets, thermostatic elements, valve assemblies, etc, as specified necessary for a full service on the specific steam traps. Quantities will be as specified in the Schedule of Quantities.
- (f) Replace damaged and defective steam traps beyond repair. Quantities will be as specified in the Schedule of Quantities.
- (g) Service, all steam and condensate valves and replace seals, gaskets, and gland packings. Quantities as specified in the Schedule of Quantities.
- (h) Repair steam leaks to steam piping. This shall include cutting, preparing, welding, cleaning, testing and all required fittings and making good of lagging and cladding.
- (i) Blow down all dirt pockets.

PFB 05.02.02 Steam and condensate pipe installation to the calorifier plant installation in the boiler house - Refer to Standard Specification FB clause FB 12

- (a) Decommission, disconnect and dismantle existing steam and condensate pipes to each calorifier in turn, check and repair steam trap sets to each calorifier as required and check for correct operation.
- (b) Service and repair steam and condensate valves and fittings
- (c) Clean, service and repair condensate sight glasses
- (d) Test, commission and hand over the complete steam and condensate steam installation.
- (e) Repair all steam leaks
- (f) Blow down and clean all dirt pockets/drain points
- (g) Repair all damaged lagging and cladding
- (h) Put systems back on line

PFB 05.02.03 Steam and condensate installation to the calorifier plant installations at the single quarters - Refer to Standard Specification FB clause FB 12

- (a) Decommission, disconnect and dismantle existing steam and condensate pipes to each calorifier in turn, check and repair steam trap sets to each calorifier as required and check for correct operation.
- (b) Service and repair steam and condensate valves and fittings
- (c) Clean, service and repair condensate sight glasses
- (d) Test, commission and hand over the complete steam and condensate steam installation.
- (e) Repair all steam leaks
- (f) Blow down and clean all dirt pockets/drain points
- (g) Repair all damaged lagging and cladding
- (h) Put systems back on line

PFB 05.02.04 Steam and condensate installation to laundry - Refer to Standard Specification FB clause FB 12

- (a) Service and repair all steam traps.
- (b) Service and repair safety valve to existing PRV installation.
- (c) Service and repair pressure reducing valves
- (d) Repair and service all steam and condensate valves.
- (e) Service, repair and clean condensate sight glasses
- (f) Blow down all dirt pockets.
- (g) Re-commission and put system back on line.

PFB 05.02.05 Steam and condensate installation to kitchen - Refer to Standard Specification FB clause FB 12

- (a) Service and repair pilot operated PRVs.
- (b) Service and repair all steam traps.
- (c) Service and repair all steam and condensate valves.
- (d) Service, repair and overhaul steam pop-up safety valve.
- (e) Clean out, service, repair sight glasses including replacement of glasses and gaskets.
- (f) Blow down all dirt pockets.

- (g) Re-commission and put system both into operation.

PFB 05.02.06 Condensate pump installations - Refer to Standard Specification FB clause FB 12

- (a) Inspect and report back to the Engineer/Departmental Representative in writing on the condition and status of all the condensate pump installations and their associated equipment.  
(b) Drain, empty, clean out and inspect all condensate tanks for any defects or damages, and report to the Engineer/Department Representative. The Engineer/Department Representative shall inspect these tanks prior to any further work or/and put back into operation.  
(c) Inspect, service, tests and report on the condition and functionality of all level controls.  
(d) Inspect, service and report on electrical condensate pumps including the following as described in FB 12.09.02.  
(e) Inspect, service, test and repair electrical control panels as described in FB 12.11.02.

PFB 05.03 PAINTING

The Contractor shall prepare, clean and paint all steel surfaces and equipment where directed by the Engineer in accordance with Specification OWG 371: Specification of Materials and Methods to be used (Fourth edition, October 1993 or latest edition).

PFB 05.04 NEW EQUIPMENT

PFB 05.04.01 Condensate Pumps and Motors

- (a) Condensate Pumps

Centrifugal pumps suitable for pumping hot, corrosive water are required for pumping condensate.

The required pump flow capacities and heads for each pump is 1,5 litres/sec at a head of approximately 20 - 25 metres.

It is essential that the following items of information be permanently marked on each pump:

- (i) flow capacity (l/sec);
- (ii) pump head (metres water gauge);
- (iii) impeller size;
- (iv) pump speed;
- (v) required motor power;
- (vi) make of pump;
- (vii) model;
- (viii) date of purchase.

Close coupled pumps/motors are not acceptable.

It is preferred that separate pumps and motors be supplied, mounted on a common rigid steel or cast iron frame.

Pumps must have shrouded impellers and replaceable wear rings. Impellers must be made of bronze or stainless steel and pump shafts must be of type 410 or 415 stainless steel.

Pump glands must be fully accessible without having to remove the motor. Gland packing must be PTFE and be readily replaceable.

Pump bearings, if not of the permanently lubricated type must be lubricated from an oil reservoir with sufficient capacity for at least six months operation.

The pump drive and coupling must be protected by a sturdy drive guard.

Pumps must be selected to operate at maximum efficiency. Pump speeds must not exceed 1450 rpm. and the installation must be quiet in operation.

Pumps must be mounted on drip trays neatly piped to the nearest drain point.

Pressure gauges must be fitted to pump discharge pipes. The normal operating pressure must be clearly marked on the dial face.

(b) Motors

Electric motors for condensate pump sets must be suitable for duty at ambient temperatures up to 60oC. Motors must be of the totally enclosed, drip proof, fan cooled type with life-time sealed bearings. Furthermore they must comply with the relevant BSI and SANS specifications. (SANS 948) (latest amendments.)

Motor control will be by means of the float/level switch specified in section 6.3 which will activate a direct-on-line starter.

Unless otherwise specified a suitably rated electrical supply will be brought into close proximity of the pump motor by others. The steam Contractor will be required to supply a switchboard containing a suitably rated isolator, circuit breaker, the necessary direct-on-line starter, etc. The steam Contractor will be required to terminate the cable brought in by others in the isolator and make the necessary connections to the motor.

It is essential that the board contain a low voltage release that will isolate the pump on voltage drop below 90% of the rated voltage. A timer is required to delay re-starting of the pump for 2 - 3 minutes after full power is restored. Similarly phase failure protection is required, again with the motor only restarting 2 - 3 minutes after restoration of full power. In both instances the motor must restart automatically.

A manual-auto switch is required on the board in order that the float switch can be over-ridden and the pump checked for maintenance purposes.

All electrical wiring must be done in accordance with the requirements of SANS 10142 (latest edition & amendments).

PFB 06            DETAILS OF MAINTENANCE WORK

PFB 06.01       GENERAL

The Contractor shall be responsible for the complete maintenance of all the equipment, components, installations and systems forming part of this repair and maintenance contract for Installation B. The Contractor shall strictly adhere to General Maintenance, and Technical Specification FB: Steam Distribution Installations, with regard to the maintenance period, obligations, responsibilities, actions and activities, etc, which shall also include the following maintenance actions:

- (a) Routine preventative maintenance: A guideline to the required actions is provided in specification FB. The actions will not be limited to these guidelines, but shall include all additional actions, work, materials, etc, necessary to maintain this installation at an acceptable level.
- (b) Corrective maintenance as described in General Maintenance.
- (c) Breakdown maintenance as described in General Maintenance.

For this particular installation fatal breakdown shall be defined as no steam being available at all due to a failure of this system as a whole.

Emergency breakdown shall be defined as any other equipment, components, and systems preventing the provision of steam to the consumer points due to a failure of part of this system at the particular point of incident.

DEPARTMENT OF PUBLIC WORKS

## FORT GLAMORGAN & MDANTSANE PRISON

### REPAIR & MAINTENANCE PROGRAM - MECHANICAL INSTALLATIONS

#### PARTICULAR SPECIFICATION PFC - HOT-WATER GENERATING INSTALLATION

##### CONTENTS

- PFC 01 SCOPE
- PFC 02 GENERAL DESCRIPTION OF INSTALLATION
- PFC 03 TECHNICAL DETAILS OF EXISTING INSTALLATION
- PFC 04 STATUS OF EXISTING INSTALLATION
- PFC 05 DETAILS OF REPAIR WORK
- PFC 06 DETAILS OF MAINTENANCE WORK

##### PFC 01 SCOPE

(a) This specification covers the particulars of the repair and maintenance work to the hot-water generating installation at the St Albans Prison. This Particular Specification shall be read in conjunction with the Technical Specification FC: Hot-water Generating Installations, and all additional and technical specifications compiled as part of this document, in particular the following Additional Specifications:

- SA: General Maintenance
- SB: Operating and Maintenance Manuals
- SC: General Decommissioning, Testing and Commissioning Procedures

The intended repair and maintenance work to this installation will restore the existing installation to a safe, efficiently functional system that complies with all statutory regulations and applicable standards, in the process repairing all defects and shortfalls. Monthly maintenance responsibilities for each installation shall commence with access to the site. A difference shall be made in payment for maintenance prior to and after practical completion of repair work. On completion of the repair work, the completed installation shall be maintained and serviced by the Contractor for the remainder of the 36-month Contract period.

(b) The installations to be maintained under this Contract includes the following:

- (i) Storage calorifier installation in the Boiler House and various other installations;
- (ii) All domestic water installations and equipment in the plant rooms;
- (iii) All hot-water circulating pump sets;
- (iv) Steam and condensate piping and equipment in the plant rooms;
- (v) Electrical control equipment, wiring, cabling, panels and instrumentation associated with each installation.

##### PFC 02 GENERAL DESCRIPTION OF EXISTING INSTALLATION

The existing hot-water generating installations are situated in various plant rooms at the various prisons. These installations currently consist of storage calorifiers with steam heater batteries and a pipes distribution network from and to the storage calorifiers. These installations are equipped with in-line hot-water circulating pump sets. Steam is provided to the steam heater batteries by means of the steam distribution network on site.

These systems provide hot water for ablution facilities, consisting of wash-hand basins, wash troughs and showers to the following:

- (a) Main prison ± 900 inmates
- (c) Boiler house also provides hot water to the central laundry and kitchen.

The technical details of these installations are provided in section PFC 03.

At the time of compilation of this document the existing installation consisted of the equipment and plant listed below with their relevant technical details.

PFC 03.01 TECHNICAL DETAILS: STORAGE CALORIFIERS

PFC 04 STATUS OF EXISTING INSTALLATION

At the time of compilation of this document the status of the existing installations was noted as follows:

- (a) Boiler house installation:
- (i) Generally in good condition
  - (ii) No condensate leaks
  - (iii) No water leaks from calorifiers
  - (iv) Circulating pump operational
  - (v) Lagging and cladding in good condition

PFC 05 DETAILS OF REPAIR WORK

The following work shall form part of the intended repair work to the hot-water generating installations. This work shall be done in accordance with the relevant regulations, codes, specifications and Technical Specification FC: Hot-water Generating Installations, as set out in this document. The following work shall be included:

PFC 05.01 GENERAL

The Contractor shall at the start of the contract inspect the items, systems, equipment, components and installations listed below. This inspection shall include the establishing of any defects, leaks, conditions,

damages, shortfalls, structural soundness, repairs required, details of existing equipment, suitability of equipment for the purpose they serve, etc. The Contractor shall report to the Departmental Representative/Engineer in writing on all the above and the following items. No repair work shall commence prior to approval by the Departmental Representative/Departmental Representative/Engineer:

Hot-water storage calorifiers, including lagging and cladding and steam heater batteries;  
Steam and condensate installation, including fittings, piping, valves, steam traps, lagging and cladding, etc;  
Bracketing system;  
Heating control equipment and instrumentation;  
Hot-water circulating pump sets;  
Electrical control panel and wiring.

The general scope of work at the time of going to tender is defined as follows:

The servicing of all hot-water storage calorifiers  
Preparation and painting of all exposed piping and equipment in accordance with the manufacturer's specification;  
The servicing, repair and where necessary replacing of existing hot-water circulating pumps to all the storage calorifier installations, including all related electrical work;  
Handing over of complete systems, to the satisfaction of the Departmental Representative/Engineer, on completion of the repair work on which the maintenance period shall commence;  
The supply and compilation of operating and maintenance manuals;  
The testing, adjusting and commissioning of all systems;  
The introduction of a maintenance control plan, including logging, recording and control procedures.

#### PFC 05.02 DETAIL WORK

##### PFC 05.02.01 Standby Hot Water Circulating Pumps

Additional hot water circulating pumps complete with inlet and outlet valves, strainers and non-return valves are required. They shall have flow rates adjustable up to 5 cubic metres/hour at heads up to 6 metres wg and be of Salmson or equal and approved manufacture.

The additional pumps are required as standby units to the existing pumps and allowance must be made for cutting into the existing hot water return piping supplying and installing the necessary piping, fittings, valves, etc required to return the systems to full working condition.

#### PFC 05.03 PAINTING

The Contractor shall prepare, clean and paint all steel surfaces and equipment where directed by the Departmental Representative/Engineer in accordance with Specification OWG 371: Specification of Materials and Methods to be used (Fourth edition, October 1993 or latest version).

#### PFC 06 DETAILS OF MAINTENANCE WORK

##### PFC 06.01 GENERAL

The Contractor shall be responsible for the complete maintenance of all the equipment, components, installations and systems forming part of this repair and maintenance contract for Installation C. The Contractor shall strictly adhere to General Maintenance, and Technical Specification FC: Hot-water Generating Installations, with regard to the maintenance period, obligations, responsibilities, actions and activities, etc, which shall also include the following maintenance actions:

- (a) Routine Preventative Maintenance. A guideline to the required actions is provided in specification FC. The actions will not be limited to these guidelines, but shall include all additional actions, work, materials, etc, necessary to maintain this installation at an acceptable level.
- (b) Corrective Maintenance as described and defined in General Maintenance.
- (c) Breakdown Maintenance as described and defined in General Maintenance.
- (d) For this particular installation no fatal breakdown is applicable.

(e) Emergency breakdown shall be defined as no provision of hot water to the consumer points due to a failure of equipment, components and systems of this particular installation.

## Section 1 OCCUPATIONAL HEALTH AND SAFETY

to eliminate or mitigate any hazard or potential hazard to the safety or health of employees and other contractors, before resorting to personal protective equipment;

making arrangements for ensuring, as far as is reasonably practicable, the safety and absence of risks to health in connection with the production, processing, use, handling, storage or transport of articles or substances;

establishing, as far as is reasonably practicable, what hazards to the health or safety of persons are attached to any work which is performed, any article or substance  
Definition : The "Principal Contractor" as defined in the Construction Regulations and used in this section of the specification shall mean the "Contractor" as defined in clause 1.1.8 of General Conditions of Contract 2004.

## CONTENTS

1. Applicable legislation and regulations
2. Scope of work
3. The principle contractor's general duties
4. The principle contractor's specific duties
5. The principle contractor's specific duties with regard to Hazardous work activities

### 1. APPLICABLE LEGISLATION AND REGULATIONS

This document was prepared to guide the Agent in the compilation of a Health and Safety Specification in terms of Sub-regulation 4(1)a of the Construction Regulation as published under Government Notice R.2003 of 18 July 2003. The content of this document or the fact it was made available for the use of the Agent will not relieve the Agent of any of his obligations in terms of the act.

The Occupational Health and Safety Act, 1993 (Act No. 85 of 1993) together with its applicable Regulations ("the Act") forms part of this Health and Safety Specification. Any word or expression to which a meaning has been assigned in the Act shall have the meaning so assigned to it unless the context otherwise indicates

### 2. SCOPE OF WORK

All work forming part of this Contract is divided into various sites. The repair work to be performed as well as any installation work under this Contract mainly consists of the works described in the project specification C2.1.

### 3. THE PRINCIPAL CONTRACTOR'S GENERAL DUTIES

The Principal Contractor's general duties in terms of this Health and Safety Specification are, but not limited to, the following:

Every Principal Contractor shall provide and maintain, as far as is reasonably practicable, a working environment that is safe and without risk to the health of his employees and other contractors.

Without derogating from the generality of a Principal Contractor's duties under subsection (1), the matters to which those duties refer include in particular -

the provision and maintenance of systems of work, plant and machinery that, as far as is reasonably practicable, are safe and without risks to health;

taking such steps as may be reasonably practicable which is produced, processed, used, handled, stored or transported and any plant or machinery which is used in his business, and he shall, as far as is reasonably practicable, further establish what precautionary measures should be taken with respect to such work, article, substance, plant or machinery in order to protect the health and safety of persons, and he shall provide the necessary means to apply such precautionary measures;

providing such information, instructions, training and supervision as may be necessary to ensure, as far as is reasonably practicable, the health and safety at work of his employees and other contractors;

not permitting any employee or contractor to do any work or to produce, process, use, handle, store or transport any article or substance or to operate any plant or machinery, unless the precautionary measures contemplated in paragraphs (b) and (d), or any other precautionary measures which may be prescribed, have been taken;

taking all necessary measures to ensure that the requirements of this Health and Safety Specification are complied with by every person in his employment or on premises under his control where plant or machinery is used;

- enforcing such measures as may be necessary in the interest of health and safety;
- ensuring that work is performed and that plant or machinery is used under the general supervision of a person trained to understand the hazards associated with it and who have the authority to ensure that precautionary measures taken by the employer are implemented; and
- causing all employees and other contractors to be informed regarding the scope of their authority as contemplated in section 37(1)(b) of the Act.

**4. THE PRINCIPAL CONTRACTOR'S SPECIFIC DUTIES**

The Principal Contractor's specific duties in terms of this Health and Safety Specification are specified in the Construction Regulation as published under Government Notice R. 2003 of 18 July 2003. (Hereinafter referred to as "Construction Regulation, 2003").

The Principal Contractor is specifically referred to the following sub regulations of the Construction Regulation, 2003:

Subject	Applicable subregulation of the Construction Regulation, 2003.
Definitions	1
Scope of application	2
Notification of construction work	3
Principal Contractor and Contractor	5
Supervision of construction work	6
Risk assessment	7
Approved inspection authorities	29
Offences and penalties	30
Withdrawal of regulations	31
Short title	

The Principal Contractor will acquaint himself with these duties and will make provision in his Contract price for the implementation and supervision of these duties.

**5. THE PRINCIPAL CONTRACTOR'S SPECIFIC DUTIES WITH REGARD TO HAZARDOUS WORK OR ACTIVITIES**

The following work or activities are defined as hazardous in terms of the Construction Regulations, 2003 and it is the duty of the Principal Contractor to ensure that the said work and activities are performed or carried out in terms of the relevant sub regulations of the Construction Regulation, 2003 and other applicable Regulations.

Hazardous work or activity	Applicable subregulation of the Construction Regulation, 2003.	Other applicable Regulations
Fall protection	8	
Structures	9	
Formwork and support work	10	

Hazardous work or activity	Applicable subregulation of the Construction Regulation, 2003.	Other applicable Regulations
Excavation	11	Precautionary measure as stipulated for confined spaces under the General Safety Regulations published under Government Notice R.1031 of 30 May 1986, as amended.
Demolition work	12	Asbestos related work will be conducted in accordance with the Asbestos Regulations published under Government Notice R. 155 of 10 February 2002 as amended. Lead related work will be conducted in accordance with the Lead Regulations published under Government Notice R. 236 of 28 February 2002 as amended.
Tunnelling	13	Any tunnelling activities will comply with the Tunnelling Regulations published under the Mine Health and Safety Act, 1996 (Act No. 29 of 1996) as amended.
Scaffolding	14	Section 44 of the Act.
Suspended scaffolds	15	Section 44 of the Act.
Boatswains chairs	16	
Material hoists	17	
Batch plants	18	Precautionary measure as stipulated for confined spaces under the General Safety Regulations published under Government Notice R.1031 of 30 May 1986, as amended. The Principal Contractor will ensure that all lifting machines and lifting tackle used in the operation of batch plant complies with the requirements of the Driven Machinery Regulations as published under Government Notice R.295 of 26 February 1988, as amended. The Principal Contractor will ensure that all precautionary measures are adhered to regarding the usage of electrical equipment in explosive atmospheres when entering a silo, as stipulated in the Electrical Installation Regulations as published under Government Notice R.2271 of 11 October 1995, as amended.
Explosive powered tools	19	
Cranes	20	Applicable provisions of the Driven Machinery Regulations as published under Government Notice R.533 of 16 March 1990, as amended.
Construction vehicles	21	
Electrical installations and machinery on construction sites.	22	Applicable provisions in the Electrical Installation Regulations published under Government notice R.2920 of 23 October 1992 and the Electrical Machinery Regulations published under Government Notice R.1953 of 12 August 1988 respectively as amended.
Use and temporary storage of flammable liquids on construction sites.	23	Applicable provisions as stipulated in the General Safety Regulations published under Government Notice R.1031 of 30 May 1986, as amended.

Hazardous work or activity	Applicable subregulation of the Construction Regulation, 2003.	Other applicable Regulations
Water environments	24	
Housekeeping on construction sites.	25	Applicable provisions as stipulated in the Environmental Regulations for Workplaces published under Government Notice R.2281 of 16 October 1987, as amended.
Stacking and storage on construction sites.	26	Applicable provisions as stipulated in the General Safety Regulations published under Government Notice R.1031 of 30 May 1986, as amended.
Fire precautions on construction sites.	27	Applicable provisions as stipulated in the Environmental Regulations for Workplaces published under Government Notice R.2281 of 16 October 1987, as amended.
Construction Welfare facilities	28	Applicable provisions as stipulated in the Facilities Regulations under Government Notice R.1593 of 12 August 1988, as amended.

		<b><u>REQUIRED WORK TO BOILERS DURING STATUTORY INSPECTIONS</u></b>				
		<b>Boiler shell water side:</b>				
	02011	Clean out and de-scale complete boiler (acid pickle) once (1) including final refilling of the boiler with treated water.	no	1		
	02012	Replace one manhole cover seal, including the installation of all items ready for pressure testing.	no	1		
	02013	Replace all manhole, hand-hole, mud-hole cover seals and joint rings, including the installation of all items ready for pressure testing.	no	1		
		<b>Carried Forward</b>				

		Brought Forward				
	02014	Additional boiler shell thickness test, as directed by the Inspection Authority.	m <sup>2</sup>	1		
	02015	Additional boiler welding crack test, as directed by the Inspection Authority.	m <sup>2</sup>	1		
	02016	Additional X - Ray Tests to the boiler shell water side and welds, as directed by the Inspection Authority.	m <sup>2</sup>	1		
	02017	Additional Non Destructive Test to the boiler shell water side and welds, as directed by the Inspection Authority.	m <sup>2</sup>	1		
	02018	Additional Magnetic Particle Test to the boiler shell water / steam and welds, as directed by the Inspection Authority.	m <sup>2</sup>	1		
	02019	Complete de-scale, de-rust and clean boiler shell. Prepare and repaint boiler external shell with undercoat and 2 (two) coats of approved steam boiler shell coating.	m <sup>3</sup>	1		
		<b>Boiler shell gas side:</b>				
	02020	Clear and clean all fire tubes to remove dust, slag, ash, grit and foreign matter, ready for inspection.	no	1		
	02021	Brush and clean out all fire tubes by means of (shot / water blast / scatter scaler to remove carbon residue) ready for inspection.	no	1		
	02022	Inspect boiler gas side, document condition and observations and deliver report to the Authorised Inspection Authority / Departmental Representative / Engineer.	no	1		
	02023	The complete removal and replacement of steam boiler gas tubes, as specified by the boiler manufacturer. The completed work shall be inspected and certified by an Authorised Inspection Authority and witnessed by the Departmental Representative / Engineer. Relacement includes boiler commissioning.	no	1		
		<b>Carried Forward</b>				

		Brought Forward				
	02024	The complete removal and replacement of boiler stay tubes, as specified by the boiler manufacturer. The completed work shall be inspected and certified by an Authorised Inspection Authority and witnessed by the Departmental Representative / Engineer. Relacement includes boiler commissioning.	no	1		
	02025	Prepare, clean and repaint all pipework / walkways / galleries (external) on boiler. Paint colour to suit existing.	m <sup>2</sup>	1		
		<b>Boiler valves and mountings complete per boiler:</b>				
	02026	Dismantle, remove and strip down all boiler valves.	no	1		
	02027	De-scale and clean all boiler valves and mountings.	no	1		
	02028	Inspection of all boiler valves and mountings.	no	1		
	02029	Overhauling all boiler valves by a Certified Technician.	no	1		
	02030	Hydraulic testing, setting, adjustment and reassembling of all boiler valves.	no	1		
	02031	Certification of all boiler valves in accordance with manufacturer's specification.	no	1		
	02032	Refitting, installing, testing and adjustment of all boiler valves and mountings.	no	1		
		<b>Refractories and brickwork:</b>				
	02033	Remove and break down all boiler refractories and brickwork.	no	1		
	02034	Recast and complete installion of all new rear flue brick work, with new on completion of inspection.	no	1		
	02035	Recast and complete installation of all new ignition and flue arches with new on completion of inspection.	no	1		
		<b>Carried Forward</b>				

		Brought Forward				
		<b>Boiler soot blowers</b>				
	02036	Dismantle, remove and strip down soot blowers.	no	1		
	02037	Clean all soot blower components.	no	1		
	02038	Inspection of soot blowers.	no	1		
	02039	Complete overhauling of boiler soot blower.	no	1		
	02040	Testing of soot blowers.	no	1		
	02041	Lubrication of soot blowers where required.	no	1		
	02042	Complete refitting, installation, testing, commissioning and adjustment of soot blower.	no	1		
	02043	Remove old redundant packing, repack soot blower with new packing, including commission and testing.	no	1		
		<b>Boiler chain grate (Stoker mat)</b>				
		<b>Remove and complete replacement of boiler chain grate damaged / defective parts. The replacement shall include the decommissioning of the boiler and all items required to install defective parts before recommission and testing boiler chain grate for full operation.</b>				
	02044	Removal and complete replacement of boiler chain grate common links.	no	1		
	02045	Removal and complete replacement of boiler chain grate drive links.	no	1		
	02046	Removal and complete replacement of boiler chain grate side links.	no	1		
	02047	Removal and complete replacement of boiler chain grate drive link rods. The replacement shall include washers and split pins.	no	1		
	02048	Removal of complete chain grate, ready for cleaning and inspection of boiler fire side.	no	1		
	02049	Re installation of chain grate after inspection, including chain grate commissioning.	no	1		
		<b>Carried Forward</b>				

		Brought Froward				
		<b>Chain grate drive mechanism and accessories</b>				
	02050	Remove and complete replacement of chain grate drive motor including complete installation.	no	1		
	02051	Remove and rewind chain grate drive motor including complete installation.	no	1		
	02052	Replace chain grate drive gearbox complete.	no	1		
	02053	Remove and total overhaul and recomission of drive gearbox, including complete installation.	no	1		
	02054	Remove and complete replacement of chain grate rear roller.	no	1		
	02055	Remove and complete replacement of chain grate front (Sprockets) roller complete.	no	1		
	02056	Remove and complete replacement of all chain grate side seals complete per boiler.	no	1		
	02057	Remove and complete replacement of chain grate carbofrax blocks end stops.( Retaining ends)	no	1		
	02058	Remove and complete replacement of chain grate carbofrax block stays/keeps.	no	1		
	02059	Remove and complete replacement of all chain grate carbofrax blocks.	no	1		
	02060	Remove and complete replacement of chain grate drive cogs. Per set of two (2).6 Sets	no	1		
		<b>Boiler lagging, insolation and steel cladding.</b>				
	02061	Remove and reinstall all removed lagging and cladding in preperation of statutory inspections as per manufacture specification.	sum	1		
	02062	Remove and complete replacement of damaged lagging / insolation sections to suit existing and installed as per manufacture specification.	m <sup>2</sup>	1		
	02063	Remove and replace damaged metal cladding sections to suit existing and installed as per manufacture specification.	m <sup>2</sup>	1		
		<b>Carried Forward</b>				

		Brought Forward				
		<b>Boiler feed-water tank.</b>				
	02064	Service as per Technical Specification FA 15.03.02	sum	1		
	02065	Remove and replace lagging and insulation with new galvanised sheeting to suit existing.	m <sup>2</sup>	1		
SC.12.01						
		<b><u>FEED-WATER EQUIPMENT AND CONTROLS</u></b>				
		<b>Feedwater tank additional requirements:</b>				
	02066	Adjust make-up water ball float valve to correct level.	sum	1		
	02067	Check and adjust tank temperature control system c/w all valves and sparge pipe.	sum	1		
		<b>Boiler feed-water pumps:</b>				
SC.12.02						
	02068	Complete replacement of 1 (one) boiler feed pump and motor complete to match manufacturer's specifications.	no	1		
	02069	Isolate boiler, strip, dismantle, de-scale and clean out feed water-pumps.	set	1		
	02070	Inspect and report on condition of pump and motor components.	no	1		
		<b>Carried Forward</b>				

		<b>Brought Forward</b>				
	02071	Replace packings, seals, pump and pump motor bearings and gaskets.	no	1		
	02072	Replace and worn-out or/and damaged impellers, diffusers and stage casings to suit existing, all inclusive of all gaskets and seals.	sum per stage	1		
	02073	Clean out pump strainers	set	1		
	02074	Inspect and repair pump mountings	set	1		
	02075	Remove insulation and cladding from feed water suction line and delivery line and set cladding aside for reuse. Replace insulation with rock wool insulation, refit cladding and paint over if applicable to mild steel.	m <sup>2</sup>	1		
	02076	Overhaul existing feed water check valves and test for correct operation.	no	1		
		Refit, install and test feed-water pumps	set	1		
		<b>Boiler water - level equipment and controls:</b>				
	02077	Dismantle, strip, de-scale and clean, replace dual and single switch float operated controls (Mobrey type)	set	1		
	02078	Supply and install new switch float operated controls (Mobrey type)	no	1		
	02079	Dismantle, strip, de-scale and clean both (2) water-level gauge glasses. Replace all with new, gauge glasses, rubbers, graphite gaskets and refit to boiler. Graphite Spindle bushes and spindles)	set	1		
	02080	Supply and install new single gauge glass with two rubbers. Refit to boiler.	no	1		
	02081	Supply and install new single gauge glass shut off valve shaft handle. Refit to boiler.	no	1		
	02082	Supply and install new single gauge glass shut off valve shaft. Refit to boiler.	no	1		
	02083	Supply and install new single gauge glass shut off valve graphite gasket. Refit to boiler.	no	1		
	02084	Dual and single level controls to be overhauled, inspected, tested, adjusted and refitted.	set	1		
	02085	Test alarm levels and operation and recalibrate.	set	1		
SC.12.02	02086	Test dual mobrey controls for correct operation and recalibrate.		1		
	02087	Inspect repair, reconditioning, commissioning, high water level controls.	no	1		
		<b>Carried Forward</b>				

		Brought Forward				
	02088	Inspect repair, reconditioning, commissioning, low water level controls.	no	1		
	02089	Remove and complete replacement / commissioning of new low water level control.	no	1		
	02090	Remove and complete replacement / commissioning of new high water level control.	no	1		
	02091	Remove and complete replacement / commissioning of new water level control alarm.	no	1		
		<b>Additional boiler related items</b>				
	02092	Inspect, test, service and recalibrate steam pressure gauge. Includes issue of certificate.	no	1		
	02093	Remove and repack gland packing on boiler main crown valve.	no	1		
	02094	Remove and repack boiler blowdown gland packing with new packing, including new stainless steel studs, nuts and washers.	no	1		
	02095	Remove and replace ID fan belts (one), including commissioning. (Match sets)	no	1		
		<b>Boiler chemicals and softner plant</b>				
	02096	Remove, supply and install new pressure pump and electric motor, to suit existing. Including commissioning.	no	1		
	02097	Remove, supply and install new pressure pump pressure vessel and bladder, to suit existing. Including commissioning.	no	1		
		<b>Carried Forward</b>				

		Brought Forward				
	02098	Remove, supply and install new pressure pump gauge, non return valve and pressure switch, to suit existing. Including commissioning.	no	1		
	02099	Supply, delivery and installation of steam boiler chemical plant for boiler working at full capacity, minimum of 17 hours per day, 7 days a week. Chemicals supplied shall conform to the boiler manufactures specification. Sufficient boiler chemical shall be kept on site at all times and the item shall be priced all inclusive for one months supply of chemicals.	no	1		
		<b>Ducting:</b>				
	02100	Inspect and clean all gas ducting	no	1		
	02101	Replace all joint seals and gaskets with new	no	1		
	02102	Prepare and repaint gas ducting	m <sup>2</sup>	1		
	02103	Weld socket on gas ducting and install new dial type gas thermometer to suit existing.	no	1		
	02104	Remove and replace main stack support brackets and cables.( Price per stack )	no	1		
		<b>Carried Forward</b>				

		<b>Brought Forward</b>				
		<b><u>COAL HANDLING AND CONVEYING EQUIPMENT</u></b>				
		<b>Coal bunker:</b>				
	02105	Inspect and clean out coal bunker for full access to the complete coal screw below ground level. Allowance shall be made by the contractor for the removal of coal.	m <sup>3</sup>	1		
	02106	Reinstall coal removed from coal bunker. Allowance shall be by the contractor for the install of coal.	m <sup>3</sup>	1		
	02107	Supply, deliver, install, test, commission and handing-over of a new permanent 1.5 Kw submersible pump installation inside coal conveying equipment chamber below coal bunkers. (Coal bunker drain sump)	no	1		
	02108	Remove, clean, test, reinstall and commission submersible pump inside coal conveying equipment chamber, below coal bunkers.	no	1		
		<b>Coal conveying equipment:</b>				
	02109	Remove and complete replacement of high level vertical coal screw with equivalent new unit, complete screw with new tube casing.	no	1		
	02110	Dismantle, strip down and replace worn flights on vertical coal screw shaft, refit.	M	1		
	02111	Inspect and service conveyor gearbox drive chains and gears.	no	1		
	02112	Remove and complete replacement of conveyor gearbox to suit existing.	no	1		
	02113	Remove and complete replacement of two (2) conveyor gearbox drive chain gears to suit existing.	no	1		
		<b>Carried Forward</b>				

		Brought Forward				
	02114	Test, inspect, service, commission motor drives and gear boxes, including testing windings for	no	1		
	02115	Lubricate all required lubrication points and replace gearbox oil as directed by the	no	1		
	02116	Remove and complete replacement of boiler coal receiving hopper and coal shut-off door.	no	1		
	02117	Remove and complete replacement of coal screw control panel/s. To match existing installation.	no	1		
	02118	Inspect, clean, test electrical control panel and controls.	no	1		
	02119	Prepare and clean complete coal screw casing, prepare and repaint with two coats of approved paint.	no	1		
	02120	Remove and complete replacement / commissioning of new coal screw drive motor and coupling, including commission.	no	1		
	02121	Remove and complete replacement of new vertical coal screw gearbox and coupling, including commissioning. Gearbox shall suit existing.	no	1		
	02122	Remove and complete replacement / commissioning of horizontal cross feed coal screw with gear box and motor. Gearbox shall suit existing.	no	1		
	02123	Remove and complete replacement of horizontal coal screw 150 mm diameter x 12 m.	no	1		
	02124	Remove and complete replacement of coal screw outer tube 150 mm or to suit diameter x 12 m. inclusive of flanges and bolts.	no	1		
	02125	Remove and complete replacement of coal screw coupling.	no	1		
		<b>Carried Forward</b>				

		<b>Brought Forward</b>				
		<b>COAL TESTING</b> <b>NOTE: COAL SUPPLIED BY USER</b> <b>DEPARTMENT</b>				
	02126	Test coal and report back to Departmental Representative / Engineer on conformance/non-conformance of coal as specified by the boiler manufacturer. Coal testing shall include, collecting sample, transport, test, certification from a approved laboratory. Priced per sample test.	no	1		
		<b>ASH AND GRIT REMOVAL EQUIPMENT</b> <b>NOTE:</b>				
		<b>Grit collectors:</b>				
	02127	Inspect, clean out all grit, dust and foreign matter, including inspection of grit collector supports and casing material.	sum	1		
	02128	Inspect all access ports and discharge ports, and replace all joint seals and gaskets with new.	no	1		
		Prepare and repaint complete grit collector, support structure and casing.	m <sup>2</sup>	1		
		<b>Ash and grit trolleys:</b>				
SC.12.02						
	02129	The supply, delivery and replacement of (set of 2) new ash trolley wheels to suit existing.(per trolley)	no of sets	1		
	02130	The supply and delivery of a new replacement ash trolley complete, to suit existing.	no	1		
		<b>Carried Forward</b>				

		<b>Brought Forward</b>				
		<b><u>ELECTRICAL INSTALLATION, WIRING AND CONTROL PANELS</u></b>				
		<b>Boiler Room Distribution Board</b>				
	02131	All wiring to be tidied up, neatly bundled and secured to backing plates, including replacement of an new updated legend card. Submit condition assessment report.	sum	1		
	02132	Removal and replacement of complete Boiler room main distribution board to match existing/comply with current electrical standards including the submission of a Certificate of Compliance.	no	1		
	02133	Inspect, test, service and clean all instrumentation and control equipment.	no	1		
		<b>Boiler mounted electrical control panels:</b>				
	02134	Inspect, test, service and clean all the electrical boiler control panels. Submit condition assessment report.	no	1		
	02135	Any additional tests which may be required by the Departmental Representative / Engineer resulting from the above inspections.	prov

B 15.0 SPECIFIC CHANGES MADE TO GCC 2015: 3<sup>RD</sup> EDITION

CONTRACT SPECIFIC DATA	
The following contract specific data, referring to the General Conditions of Contract for Construction Works, Third Edition (2015) are applicable to this Contract:	
CLAUSES	COMPULSORY DATA
1.1.1.5	Amend Clause 1.1.1.5 as follows: 'Commencement Date' means the date of possession of site by the contractor.
1.1.1.8	Amend Clause 1.1.1.8 to include the word "rights" to read as follows: "Contract Data" means the specific data which, together with these General Conditions of Contract, collectively describe the rights, risks, liabilities and obligations of the contracting parties and the procedures for the administration of the Contract.
1.1.1.13	Amend Clause 1.1.1.13 as follows, clarify when the defects liability period starts: "Defects Liability Period" means the period stated in the Contract Data, commencing on the date indicated on the Certificate of Completion for the works as a whole or Certificates of Completion in the event of more than one Certificate of Completion is issued for different parts of the Works, during which the Contractor has both the right and the obligation to make good defects in the materials, Plant and workmanship covered by the Contract.  Defects Liability Period is: 12 months. The Defects Liability Period for the works shall commence on the calendar day following the date of the Certificate of Completion for the works as a whole or Certificates of Completion in the event of more than one Certificate of Completion is issued for different parts of the Works and end at midnight (00:00) three hundred and sixty five days (365) calendar days from the date of the Certificate of Completion.
1.1.1.15	The name of the Employer's Project Manager as appointed from time to time: Refer to A3.2
1.1.1.21.A	<b>NEW CLAUSE</b> INTEREST: The interest rates applicable on this contract, whether specifically indicated in the relevant clauses or not, will be the rate as determined by the Minister of Finance from time to time, in terms of section 80(1)(b) of the Public Finance Management Act, 1999 (Act No 1 of 1999) as amended, calculated as simple interest, in respect of debts owing to the State, and will be the rate as published by the Minister of Justice and Correctional Services from time to time, in terms of section 1(2) of the Prescribed Rate of Interest Act, 1975 (Act No 55 of 1975) as amended, calculated as simple interest, in respect of debts owing by the State
1.1.1.27	This Pricing Strategy is a: Re-measurement Contract.
1.1.1.31	No Clause.
1.1.1.35	Insert the definition of "Value of Works" as Clause 1.1.1.35: "Value of Works" means the value of the Works certified by the Employer's Agent as having been satisfactorily executed and shall include the value of the works done, the value of the materials and/or plant and Contract Price Adjustments.

1.1.1.36	<p>Insert the definition of “Latent and Patent Defects” as Clause 1.1.1.36: A 'latent defect' is a material defect, which was not visible after 'reasonable' inspection. The latent defect period commences at the date of Final Approval Certificate and ends 5 years [after that date [5.16.3]. A patent defect is a flaw that is not hidden and ought to be easily identified upon reasonable inspection.</p>
1.1.1.37	<p>Contract participation goal documentation are as indicated in the tender data document DPW 03 (EC): TENDER DATA.</p>
1.2.3.	<p>Replace Clause 1.2.3. with the following: The Employer’s Agent is as indicated in clause B 5.0 and shall have the authority to act on behalf of the employer as indicated in the contract document read with the contract data. [3.2.3].</p>
1.3.4	<p>Not applicable to this Contract.</p>
1.3.5	<p>Replace Clause 1.3.5 with the following: The Employer will become the owner of the information, documents, advice, recommendation and reports collected, furnished and/or compiled by the Contractor during the course of, and for the purposes of executing this Contract, all of which will be handed over to the Employer on request during the contract, but in any event on completion of contract, the termination and/or cancellation of this Contract for whatever reason. The Contractor relinquishes its lien / retention or any other rights thereon to which it may be entitled. (b) The copyright of all documents, recommendations and reports compiled by the Contractor during the course of and for the purposes of finalizing the Works will vest in the Employer, and may not be reproduced or distributed or made available to any person outside the Employer’s service, or to any institution in any way, without the prior written consent of the Employer. The Employer shall have the right to use such material for any other purpose without the approval of information or payment to the Contractor. (c) The copyright of all electronic aids, software programmes etc. prepared or developed in terms of the Contract shall vest in the Employer, who shall have the right to use such material for any other purpose without the approval of, information or payment to the Contractor.</p>
	<p>(d) In case of the Contractor providing documents, electronic aids, software programs or like material to the Employer, the development of which has not been at the expense of the Employer, copyright shall not vest in the Employer. The Contractor shall be required to indicate to which documents, electronic aids, software programs or like material this provision applies. (e) The Contractor hereby indemnifies the Employer against any action, claim, damages or legal cost that may be instituted against the Employer on the grounds of an alleged infringement of any copyright, patents or any other intellectual property right in connection with the Works outlined in this Contract. (f) All information, documents, recommendations, programs and reports collected or compiled must be regarded as confidential and may not be communicated or made available to any person outside the Employer’s service and may not be published either during the currency of this Contract or after termination thereof without the prior written consent of the Employer.</p>

**TENDER/ QUOTATION NO: PET 28/2023**

1.3.7	<p>Replace Clause 1.3.7 with the following By entering into this contract, the Contractor waives any lien that he may have or acquire, notwithstanding any other condition/s in this contract.</p>
3.2.3	<p>1. The Employer’s Principal Agent’s authority to act and/or to execute functions or duties or to issue instructions are expressly excluded in respect of the following, unless same has been approved by the employer: (a) Appointment of Sub-contractors – clause 4.4.4; (b) Granting of an extension of time and/or ruling on claims associated with claims for extension of time – clauses 5.12, 10.1.5; (c) Rulings on claims and disputes – clauses 10.1.5, 10.2.3 and 10.3.3;</p>

- (d) Suspension of the Works – clause 5.11.2;
- (e) Final Payment Certificate – clause 6.10.9;
- (f) Issuing of *mora* notices to the Contractor – clauses 9.1.1, 9.1.2.1 and 9.2.1;
- (g) Cancellation of the contract between the Employer and Contractor – clauses 9.1.1, 9.1.2.1 and 9.2.1.
- (h) Any variation orders – clause 6.3.1
2. In order to be legally binding and have legal bearing and consequence, any ruling in respect of the above matters (a) to (h) must be on an official document, signed and issued by the Employer to the Contractor.
3. The Contractor must submit claims, demands, notices, notifications, updated particulars and reports in writing, as well as any other supporting documentation pertaining thereto, in respect of any of the above listed matters (a) to (h), to the Employer's Agent within the time periods and in the format(s) as determined in the relevant clauses of the Conditions of Contract. Failing to deliver such to the Employer's Agent and in the correct format will invalidate any claim and the consequences of such failure will *mutatis mutandis* be as stated in clause 10.1.4.
4. Clauses 6.10.9 and 10.1.5 shall be amended as follows to indicate the limitation on the Employer's Agent authority in respect thereof:
- Clause 6.10.9 – Amend to read as follows:  
Within 14 days of the date of final approval as stated in the Final Approval Certificate, the Contractor shall deliver to the Employer's Agent a final statement claiming final settlement of all moneys due to him (save in respect of matters in dispute, in terms of Clauses 10.3 to 10.11, and not yet resolved).  
The Employer's Agent shall within 14 days issue to the Contractor a Final Payment Certificate the amount of which shall be paid to the Contractor within 30 days of the date of such certificate, after which no further payments shall be due to the Contractor (save in respect of matters in dispute, in terms of Clauses 10.3 to 10.11 and not yet resolved).
- Clause 10.1.5 – Amend to read as follows:  
Unless otherwise provided in the Contract, the Employer shall, within 28 days after the Contractor has delivered his claim in terms of Clause 10.1.1 as read with Clause 10.1.2, deliver to the Contractor his written and adequately reasoned ruling on the claim (referring specifically to this Clause). The amount thereof, if any, allowed by the Employer shall be included to the credit of the Contractor in the next payment certificate. If no ruling has been made within the 28 days, as referred to in clause 10.1.5. or any extension thereof as agreed to by the parties, the claim shall be regarded as rejected by the Employer.

	<p>5. Insert the following under 3.2.3: Provided that, notwithstanding any provisions to the contrary in the Contract, the Employer shall have the right to reverse and, should it deem it necessary, to amend any certificate, instruction, decision or valuation of the Employer's Agent and to issue a new one, and such certificate instruction, decisions or valuations shall for the purposes of the Contract be deemed to be issued by the Employer's Agent, provided that the Contractor shall be remunerated in the normal manner for work executed in good faith in terms of an instruction issued by the Employer's Agent and which has subsequently been rescinded.</p>
3.3.2.1	<p>Amend Clause 3.3.2.1 to insert the word "plant" to read as follows: Observe how the Works are carried out, examine and test materials, plant and workmanship, and receive from the Contractor such information as he shall reasonably require.</p>
3.3.3.2	<p>Amend Clause 3.3.3.2 to insert the word "plant" to reads as follows: Notwithstanding any authority assigned to him in terms of Clauses 3.3.2 and 3.3.4, failure by the Employer's Agent's Representative to disapprove of any work, workmanship, plant or materials shall not prejudice the power of the Employer's Agent's thereafter to disapprove thereof and exercise any of his powers in terms of the Contract in respect of thereof.</p>
3.3.2.2.3 3.3.2.2.4	<p>Add to Clause 3.3.2.2.3 and 3.3.2.2.4 the following: All oral communication must be reduced into writing to be binding on the parties.</p>
4.4.4	<p>Ref Clause 3.2.3</p>
4.8.2.1	<p>Amend Clause 4.8.2.1 to include the word "person", as follows: Makes available to the Employer, or to any such contractor, person or authority, any roads or ways for the maintenance of which the Contractor is responsible, or</p>
4.8.2.2	<p>Amend Clause 4.8.2.2 to include "Employer" and "contractors", as follows: Provides any other facility or service of whatsoever nature o the Employer or to any of the said contractors, persons or authorities,</p>
4.12.3	<p>Add to Clause 4.12.3 the following: All oral communication must be reduced into writing to be binding on the parties.</p>
5.3.1	<p>The documentation required before commencement with Works execution are:  Health and Safety Plan to be provided within 14 calendar days from award (Ref Clause 4.3) Initial programme to be provided within 21 calendar days of handing over the site to the contractor (Ref Clause 5.6) Security (Ref Clause 6.2) Insurance (Ref Clause 8.6) <i>insert other requirements</i> insert other requirements insert other requirements</p>
5.3.2	<p>The time to submit the documentation required before commencement with Works execution is: 21 days.</p>

**TENDER/ QUOTATION NO: PET 28/2023**

5.4.2	The access to, and possession of, the Site referred to in Clause 5.4.1 shall be <i>enter "exclusive" or "not exclusive"</i> to the Contractor. In the event of access to, and possession of, the Site is not exclusive to the Contractor, the following limitations apply: <i>Insert an exposition of limitation.</i>
5.8.1	The non-working days are: Saturdays and Sundays The special non-working days are: Public Holidays; The year-end break annually published by the BCCEI (Bargaining Council for the Civil Engineering Industry)
5.9.1	Amend Clause 5.9.1 as follows:  On the Commencement Date, the Engineer shall deliver to the Contractor three (3) copies, at no cost to the Contractor, of the drawings and any instructions required for the commencement of the Works. The cost of any additional copies of such drawings and/or instructions, as may be required by the Contractor, will be for the account of the Contractor.
5.11.1	No Clause
5.11.2	Ref Clause 3.2.3
5.11.5	No Clause
5.11.6	No Clause
5.12	Ref Clause 3.2.3
5.12.2.2	Add the following to Clause 5.12.2.2 to read: "Abnormal climatic conditions means any weather conditions i.e. rain, wind, snow, frost, temperature (cold or heat) that are not in the norm for the area where the construction takes place and during which no work is possible on site"
5.13.1	Add the following to Clause 5.13.1: The penalty for failing to complete the Works: Refer to B10 CD
5.14.1	Amend the second paragraph of Clause 5.14.1 as follows: When the Works are about to reach the said stage, the Contractor shall, in writing, request a Certificate of Practical Completion and the Employer's Agent shall, within 14 days after receiving such request, issue to the Contractor a written list setting out the work to be completed to justify Practical Completion. Should the Employer's Agent not issue such a list within the 14 days, the Contractor shall notify the Employer accordingly. Should the Employer not issue such a list within 7 days of receipt of such notice, Practical Completion shall be deemed to have been achieved on the 14 <sup>th</sup> day after the contractor requested the Certificate of Practical Completion.
5.14.4	Add the following to Clause 5.14.4: Penalty for late due completion date will be 30% of penalty / calendar day. Penalty for late completion date will be 15% of penalty / calendar day.

**TENDER/ QUOTATION NO: PET 28/2023**

5.16.1	Amend Clause 5.16.1 by deleting the provision in the third paragraph of this clause.
5.16.2	Amend Clause 5.16.2 as follows: No certificate other than the Final Approval Certificate referred to in Clause 5.16.1 shall be deemed to constitute approval of the Works or shall be taken as an admission of the due performance of the Contract or any part thereof, nor of the accuracy of any claim made by the Contractor, nor shall any other certificate exclude or prejudice any of the powers of the Employer's Agent and/or the Employer.
5.16.3	The latent defect period for all works is: 5 years

6.2.1	The type of security for the due performance of the Contract, as selected by the Contractor in the Contract Data, must be delivered to the Employer.
6.2.3	Amend Clause 6.2.3 as follows: If the Contractor has selected a performance guarantee as security, he shall ensure that it remains valid and enforceable as required in terms of the Contract.
6.3.1	Add the following to the last paragraph “subject to obtaining approval from the Employer” (3.2.3)
6.5.1.2.3	The percentage allowance to cover overhead charges is: 33%, except on material cost where the percentage allowance is 10%.
6.8.2	When Contract Price Adjustment is applicable [B13] the value of payment certificates is to be adjusted by a Contract Price Adjustment Factor (CPAF):  The value of the certificates issued shall be adjusted in accordance with the Contract Price Adjustment Factor with the following values:  The value of “x” is 0.15.  The values of the coefficients are: a = 0.25. (Labour) b = 0.3 (Contractor’s equipment) c = 0.3 (Material) d = 0.15 (Fuel) The values of the coefficients for “Repair and Maintenance Project” (RAMP) contracts are: a = 0.35 (Labour) b = 0.20 (Contractor’s equipment) c = 0.35 (Material) d = 0.10 (Fuel) The urban area nearest the Site is <i>insert name of urban area</i> . (Select urban area from Statistical News Release, P0141, Table A)  The applicable industry for the Construction Material Price Index for materials / plant is <i>insert name of industry</i> . (Select the applicable industry from Statistical News Release, P0151.1, Tables 2,4,5)  The area for the Producer Price Index for fuel is <i>insert name of area</i> . (Select the area from Statistical News Release, P0142.1, Table 1.)  The base month is <i>insert month insert year</i> . (The month prior to the closing of the tender.)
6.8.3	Price adjustments for variations in the costs of special materials are not allowed.

**TENDER/ QUOTATION NO: PET 28/2023**

6.9.1	Replace Clause 6.9.1 with the following: “Plant and materials will only be certified and paid for upon furnishing proof of ownership by the contractor. Once paid, material and goods shall become the property of the Employer and shall not be removed from site without the written authority of the Employers Agent.
6.10.1	Add at end of Clause 6.10.1 The contractor shall provide the Employer’s Agent every month, on dates as agreed between parties / instructed by the Principal Agent, with the following information: Monthly Local content report, EPWP / NYS payment register, labour reports and certified ID document of EPWP/ NYS beneficiaries, Contract between Contractor and EPWP/ NYS beneficiaries, attendance register. (if applicable) Tax Invoice Labour intensive report Contract participation goal reports
6.10.1.5	The percentage advance on materials not yet built into the Permanent Works is: 85 %.

6.10.3	The limit of retention money is dependent on the security to be provided by the Contractor in terms of Clause 6.2.1.
6.10.4	Replace “28 days” with “30 days” provided all required documents have been submitted and are correct in all respects.
6.10.5	<p>Replace Clause 6.10.5 with the following:</p> <p><u>In respect of contracts up to R2 million and in respect of contracts above R2 million where the Contractor elects a security by means of a 10% retention, 50% of the retention shall be released to the Contractor when the Employer’s Agent issues the Certificate of Completion in terms of clause 5.14.4. The remaining 50% of the retention shall be released in accordance with the provisions of the conditions of contract and will become due and payable when the Contractor becomes entitled, in terms of Clause 5.16.1, to receive the Final Approval Certificate.</u></p> <p><u>In respect of contracts above R2 million, where the Contractor elects a security by means of a cash deposit or fixed guarantee of 5% of the Contract Sum (excl. VAT) and a 5% retention of the Value of the Works (excl. VAT), the cash deposit or fixed guarantee, whichever is applicable, shall be refunded to the Contractor or return to the guarantor, respectively, when the Employer’s Agent issues the Certificate of Completion in terms of Clause 5.14.4. The 5% retention of the Value of the Works (excl. VAT) shall become due and payable when the Contractor becomes entitled, in terms of Clause 5.16.1, to receive the Final Approval Certificate.</u></p> <p><u>In respect of contracts above R2 million, where the Contractor elects a security by means of a cash deposit or a variable guarantee of 10% of the Contract Sum (excl. VAT), the cash deposit or the variable guarantee, whichever is applicable, will be reduced to 5% of the Value of the Works (excl. VAT) when the Employer’s Agent issues the Certificate of Completion in terms of Clause 5.14.4. The balance of the cash deposit shall become due and payable or the variable guarantee shall expire when the Contractor becomes entitled in terms of Clause 5.16.1 to receive the Final Approval Certificate.</u></p>
6.10.6.2	<p>Replace Clause 6.10.6.2 with the following:</p> <p>“In the event of failure by the Employer to make the payment by the due date, he shall pay to the Contractor interest, at the rate as published by the Minister of Justice and Correctional Services from time to time, in terms of section 1(2) of the Prescribed Rate of Interest Act, 1975 (Act No 55 of 1975) as amended, calculated as simple interest, in respect of debts owing by the State”. (1.1.1.21.A).</p>
6.10.9	Ref Clause 3.2.3.

**TENDER/ QUOTATION NO: PET 28/2023**

7.2.1	The last sentence to read “Failing requirements or instructions, the Plant, workmanship and materials of the respective kinds shall be suitable for the intended purpose provided that materials procured for the works are from South African manufactures and suppliers. Imported materials shall only be considered under exceptional circumstances, based on compelling technical justifications, and subject to the approval by the DPWI. Failing to comply, unless specified or approval granted will result in a ten percent (10%) penalty of the value of imported material used without approval.
7.5.3	<p>Add the following to Clause 7.5.3</p> <p>“Should the work inspected by the Employer’s Agent be rejected, all consultant’s fees / costs pertaining to the unsuccessful inspection shall be recovered from the contractor”.</p>
7.9.1	<p>Insert the following at the end of Clause 7.9.1:</p> <p>Provided that, should the Contractor on demand not pay the amount of such costs to the Employer, such amount may be determined and deducted by the Employer from any amount due to or that may become due to the Contractor under this or any other previous or subsequent contract between the Contractor and the Employer.</p>
8.2.2.1	<p>Insert the following as a second paragraph to Clause 8.2.2.1:</p> <p>The Contractor shall at all times proceed immediately to remove or dispose of any debris arising from damage to or destruction of the Works and to rebuild, restore, replace and/or repair the Works, failing which the Employer may cause same to be done and recover the reasonable costs associated therewith from the Contractor.</p>

8.3.1.10	Replace Clause 8.3.1.10 with the following: “Ionising, radiation, or contamination by radioactivity from any nuclear fuel, or from any nuclear waste from the combustion of nuclear fuels, excluding leakages of any radioactive material / gases / corrosive liquids/chemicals, which are harmful to the environment and biological life, brought on to site for installation or used in the Works prior to final approval”.
8.4.3	Add the following as Clause 8.4.3:  Where the Contractor has caused damage to property (moveable and immovable), of any person, the Employer or third parties, the Contractor shall on receiving a written instruction from the Employer’s Agent immediately proceed at his own cost to remove or dispose of any debris and to rebuild, restore, replace and/or repair such property and to execute the Works.
8.6.1	Replace Clause 8.6.1 with the following: Except if provided otherwise in the Contract Data, the Contractor, without limiting his obligations in terms of the Contract, shall effect and keep the respective insurances [CD] in force, in favour of the employer as beneficiary, from the date of possession of the site until the issue of the certificate of practical completion and with an extension to cover the contractors obligations after the date of practical completion [8.2.1]
8.6.1.1.1	Ref B6.0 CD for value of insurance.
8.6.1.1.2	Ref B6.0 CD for value of insurance.
8.6.1.1.3	Ref B6.0 CD for value of insurance.
8.6.1.3	Amend Clause 8.6.1.3 to delete reference to limit of indemnity, to read as follows: Liability insurance that covers the Contractor against liability for the death of, or injury to any person, or loss of, or damage to any property (other than property while it is insured in terms of Clause 8.6.1.1) arising from or in the course of the fulfilment of the Contract, from the Commencement Date to the date of the end of the Defects Liability Period, if applicable, or otherwise to the issue of the Certificate of Completion.
8.6.4	Omit clause

**TENDER/ QUOTATION NO: PET 28/2023**

8.6.6	Replace Clause 8.6.6 with the following: Without limiting the contractor’s obligations in terms of the contract, the contractor shall, within twenty-one (21) calendar days of the date of letter of acceptance, but before commencement of the works, submit to the employer all the policies by which the insurances are effected and due proof of upfront payment of all premiums thereunder to keep the policies effective from the Commencement Date to the date of the end of the Defects Liability Period, if applicable, or otherwise to the issue of the Certificate of Completion.
8.6.7	Replace Clause 8.6.7 with the following:  If the Contractor fails to effect and keep in force any of the insurances referred to in Clause 8.6.1, the Employer may cancel the Contract in terms of Clause 9.2.
8.6.8	Add the following as Clause 8.6.8.  HIGH RISK INSURANCE  In the event of the project being executed in a geological area classified as a “High Risk Area”, that is an area which is subject to highly unstable subsurface conditions that might result in catastrophic ground movement evident by sinkhole or doline formation the following will apply:  (1) Damage to the Works  The Contractor shall, from the date of Commencement of the Works until the date of the Certificate of Completion, bear the full risk of and hereby indemnifies and holds harmless the Employer against any damage to and/or destruction of the Works consequent upon a catastrophic ground movement as mentioned above. The Contractor shall take such precautions and security measures and other steps for the protection of the Works as he may deem necessary.

	<p>When so instructed to do so by the Employer's Agent, the Contractor shall proceed immediately to remove and/or dispose of any debris arising from damage to or destruction of the Works and to rebuild, restore, replace and/or repair the Works, at the Contractor's own costs.</p> <p>(2) Injury to Persons or Loss of or damage to Properties</p> <p>The Contractor shall be liable for and hereby indemnifies and holds harmless the Employer against any liability, loss, claim or proceeding arising during the Contract Period whether arising in common law or by Statute, consequent upon personal injuries to or the death of any person whomsoever resulting from, arising out of or caused by a catastrophic ground movement as mentioned above.</p> <p>The Contractor shall be liable for and hereby indemnifies the Employer against any and all liability, loss, claim or proceeding consequent upon loss of or damage to any moveable, or immovable or personal property or property contiguous to the Site, whether belonging to or under the control of the Employer or any other body or person whomsoever arising out of or caused by a catastrophic ground movement, as mentioned above, which occurred during the Contract Period.</p> <p>(3) It is the responsibility of the Contractor to ensure that he has adequate insurance to cover his risk and liability as mentioned in Clauses 8.6.8(1) and 8.6.8 (2) above. Without limiting his obligations in terms of the Contract, the Contractor shall, within 21 days of the Commencement Date and before Commencement of the Works, submit to the Employer proof of such insurance policy, if requested to do so.</p> <p>(4) The Employer shall be entitled to recover any and all losses and/or damages of whatever nature suffered or incurred consequent upon the Contractor's default of his obligations as</p>
--	---

**TENDER/ QUOTATION NO: PET 28/2023**

	<p>set out in Clauses 8.6.8 (1), 8.6.8 (2) and 8.6.8 (3). Provided that, should the Contractor on demand not pay the amount of such costs to the Employer, such amount may be determined and deducted by the Employer from any amount due to or that may become due to the Contractor under this or any other existing or subsequent contract between the Contractor and the Employer.</p>
9.1.1	Ref Clause 3.2.3
9.1.2.1	Ref Clause 3.2.3
9.1.4	<p>Replace the first paragraph of Clause 9.1.4 with the following:</p> <p>"In the circumstances referred to in Clauses 9.1.1, 9.1.2 or 9.1.3 (provided that the circumstances in 9.1.3 is not due to the fault of the Contractor, his employees, contractors or agents), and whether or not the Contract is terminated under the provisions of this Clause, the Contractor shall be entitled on proof of payment of any increased cost of or incidental to the execution of the Works which is specifically attributable to, or consequent upon the circumstances defined in Clauses 9.1.1, 9.1.2 or 9.1.3; ..... necessary changes"</p>
9.1.5	<p>Replace the first paragraph of Clause 9.1.5 with the following:</p> <p>If the Contract is terminated on any account in terms of this Clause (provided that the circumstances in 9.1.3 is not due to the fault of the Contractor, his employees, contractors or agents) , the Contractor shall be paid by the Employer (insofar as such amounts or items have not already been covered by payments on account made to the Contractor) for all measured work executed prior to the date of termination, the amount (without retention), payable in terms of the Contract and, in addition: "</p>
9.1.5.5	No Clause
9.1.6	No Clause
9.2.1	Ref Clause 3.2.3
9.2.1.3.9	<p>Add the following as Clause 9.2.1.3.9:</p> <p>Has failed to effect and keep in force any of the insurances referred to in Clause 8.6.1.</p>
9.2.4	<p>Add the following as Clause 9.2.4:</p> <p>In the case where a contract is terminated by the Employer by no fault by any party, the contractor shall be entitled to no other compensation than for work done and materials on site as certified by the Principal Agent at the date of termination.</p>
9.3.2.2	Replace Clause 9.3.2.2 with the following:

	All Plant and Construction Equipment, Temporary Works and unused materials brought onto the Site by the Contractor, and where ownership has not been transferred to the Employer (see Clause 6.9.1), shall be removed from the Site on termination of the contract by any party.
9.3.2.3	No Clause
9.3.3	Add the following at the end of Clause 9.3.3  After cancellation of the Contract by the Contractor, the Contractor, when requested by the Employer to do so, shall not be entitled to refuse to withdraw from the Works on the grounds of any lien or a right of retention or on the grounds of any other right whatsoever. Nothing in this Clause shall prejudice the right of the Contractor to exercise, either in lieu of or in addition to the Contractor rights and remedies specified in this Clause, any other rights or remedies to which the Contractor may be entitled under the Contract or common law.

**TENDER/ QUOTATION NO: PET 28/2023**

10.1.3.1	Replace Clause 10.1.3.1 with the following: All facts and circumstances relating to the claims shall be investigated as and when they occur or arise. For this purpose, the Contractor shall deliver to the Employer's Agent, records in a form approved by the Employer's Agent, of all the facts and circumstances which the Contractor considers relevant and wishes to rely upon in support of his claims, including details of all construction equipment, plant, labour, and materials relevant to each claim. Such records shall be submitted promptly after the occurrence of the event giving rise to the claim.
10.1.4	Ref Clause 3.2.3.
10.1.5	Ref Clause 3.2.3.
10.1.6	Add the following as Clause 10.1.6:  If the Employer fails to give his ruling within the period referred to in Clause 10.1.5 he shall be deemed to have given a ruling dismissing the claim.
10.2.1	Replace Clause 10.2.1 with the following: In respect of any matter arising out of or in connection with the Contract, which is not required to be dealt with in terms of Clause 10.1 or which does not require the decision or ruling of the Employer, the Contractor or the Employer shall have the right to deliver a written dissatisfaction claim to the Employer's Agent. This written claim shall be supported by particulars and substantiated.
10.2.2	Replace Clause 10.2.2 with the following: If, in respect of any matter arising out of or in connection with the Contract, which is not required to be dealt with in terms of Clause 10.1 or which does not require the decision or ruling of the Employer, the Contractor or the Employer fails to submit a claim within 28 days after the cause of dissatisfaction, he shall have no further right to raise any dissatisfaction on such matter.
10.2.3	Ref clause 3.2.3.
10.3.2	Replace Clause 10.3.2 with the following: If either party shall have given notice in compliance with Clause 10.3.1, the dispute shall be referred immediately to mediation under Clause 10.5, unless amicable settlement is contemplated.
10.3.3	Replace Clause 10.3.3 with the following: In respect of a ruling given by the Employer (Ref clause 3.2.3), and although the parties may have delivered a Dispute Notice, the ruling shall be in full force and carried into effect unless and until otherwise agreed by both parties, or in terms of a mediation decision or court judgement.
10.4.2	Replace Clause 10.4.2 with the following: If the other party rejects the invitation to amicable settlement in writing, or does not respond in writing to the invitation within 14 days, or amicable settlement is unsuccessful, referral to mediation shall follow immediately. Should mediation be unsuccessful, the dispute shall be resolved by Litigation.
10.4.4	Replace Clause 10.4.4 with the following: Save for reference to any portion of any settlement, or decision which has been agreed to be final and binding on the parties, no reference shall be made by or on behalf of either party

	in any subsequent court proceedings, to any outcome of an amicable settlement, or to the fact that any particular evidence was given, or to any submission, statement or admission made in the course of the amicable settlement.
--	---

**TENDER/ QUOTATION NO: PET 28/2023**

10.5	<p>Replace Clause 10.5 with the following: The parties may, by agreement and at any time before Litigation, refer a dispute to mediation, in which event:</p> <p>10.5.1 The appointment of a mediator, the procedure, and the status of the outcome shall be agreed between the parties.</p> <p>10.5.2 Regardless of the outcome of a mediation the parties shall bear their own costs concerning the Mediation and equally share the costs of the mediator and related expenses.</p>
10.6	No Clause
10.7	No Clause
10.10.3	<p>Replace Clause 10.10.3 with the following: The court shall have full power to open up, review and revise any ruling, decision, order, instruction, certificate or valuation of the Employer's Agent and Employer and neither party shall be limited in such proceedings before such court to the evidence or arguments put before the Employer's Agent or Employer for the purpose of obtaining his ruling.</p>

**B 16.0 CONTRACT PARTICIPATION GOAL TARGETS AND CIDB B.U.I.L.D. PROGRAMME**

The contractor shall achieve in the performance of the contract the following Contract Participation Goals (CPGs) as described in PG-01.2 (EC): Scope of Work and PG-02.2 (EC): Pricing Assumptions and in accordance with the feasibility study, which forms part of the specifications in the CPG Section of the Specification of this contract.

(a)	Minimum Targeted Local Manufacturers of Material Contract Participation Goal, in accordance with the cidb Standard for Contract Participation Goals for Targeting Enterprises and Labour through Construction Works Contracts as published in the Government Gazette Notice No. 41237 of 10 November 2017, as amended in cidb Best Practice Project Assessment Scheme Notice No. 43726 of 18 September 2020 – Condition of Contract.	<i>Select</i>

**PART 2: CONTRACT DATA COMPLETED BY THE TENDERER:**

**C TENDERER'S SELECTIONS**

**C 1.0 Securities [11.0]**

In respect of contracts with a contract sum up to R1 million, the security to be provided by the contractor to the employer will be a payment reduction of five per cent (5%) of the value certified in the payment certificate (excluding VAT).

In respect of contracts with a contract sum more than R1 million, the security to be provided by the contractor to the employer will be selected by the Contractor as indicated below:

Guarantee for construction: Select Option A, B, C, D or E

n/a

Option A	cash deposit of 10 % of the contract sum (excluding VAT)
Option B	variable construction guarantee of 10 % of the contract sum (excluding VAT) (DPW-10.3 EC)
Option C	payment reduction of 10% of the value certified in the payment certificate (excluding VAT)
Option D	cash deposit of 5% of the contract sum (excluding. VAT) and a payment reduction of 5% of the value certified in the payment certificate (excluding. VAT)
Option E	fixed construction guarantee of 5% of the contract sum (excluding VAT) and a payment reduction of 5% of the value certified in the payment certificate (excluding VAT) (DPW-10.1 EC)]

**TENDER/ QUOTATION NO: PET 28/2023**

NB: Insurances submitted must be issued by either an insurance company duly registered in terms of the Insurance Act [Long-Term Insurance Act, 1998 (Act 52 of 1998) or Short-Term Insurance Act, 1998 (Act 53 of 1998)] or by a bank duly registered in terms of the Banks Act, 1990 (Act 94 of 1990) on the pro-forma referred to above. No alterations or amendments of the wording of the pro-forma will be accepted.

Guarantee for payment by employer [11.5.1; 11.10]	Not applicable
Advance payment, subject to a guarantee for advance payment [11.2.2; 11.3]	Not applicable

**TENDER/ QUOTATION NO: PET 28/2023**

C 2.0 Payment of preliminaries [25.0]

Contractor's selection

Select Option A or B

Where the contractor does not select an option, Option A shall apply

Payment methods

Option A	The preliminaries shall be paid in accordance with an amount prorated to the value of the works executed in the same ratio as the amount of the preliminaries to the contract sum, which contract sum shall exclude the amount of preliminaries. Contingency sum(s) and any provision for cost fluctuations shall be excluded for the calculation of the aforesaid ratio
Option B	The preliminaries shall be paid in accordance with an amount agreed by the principal agent and the contractor in terms of the priced document to identify an initial establishment charge, a time-related charge and a final dis-establishment charge. Payment of the time-related charge shall be assessed by the principal agent and adjusted from time to time as may be necessary to take into account the rate of progress of the works

Lump sum contract

Where the amount of preliminaries is not provided it shall be taken as 7.5% (seven and a half per cent) of the contract sum, excluding contingency sum(s) and any provision for cost fluctuations.

C 3.0 Adjustment of preliminaries [26.9.4]

Lump sum contract

Where the amount of preliminaries is not provided it shall be taken as 7.5% (seven and a half per cent) of the contract sum, excluding contingency sum(s) and any provision for cost fluctuations.

Contractor's selection

Select Option A or B

Where the contractor does not select an option, Option A shall apply.

### Provision of particulars

The contractor shall provide the particulars for the purpose of the adjustment of preliminaries in terms of his selection. Where completion in sections is required, the contractor shall provide an apportionment of preliminaries per section.

Option A	An allocation of the preliminaries amounts into Fixed, Value-related and Time-related amounts as defined for adjustment method Option A below, within fifteen (15) working days of the date of acceptance of the tender
Option B	A detailed breakdown of the preliminaries amounts within fifteen (15) working days of possession of the site. Such breakdown shall include, inter alia, the administrative and supervisory staff, the use of construction equipment, establishment and dis-establishment charges, insurances and guarantees, all in terms of the programme

### Adjustment methods

The amount of preliminaries shall be adjusted to take account of the effect which changes in time and/or value have on preliminaries. Such adjustment shall be based on the particulars provided by the contractor for this purpose in terms of Options A or B, shall preclude any further adjustment of the amount of preliminaries and shall apply notwithstanding the actual employment of resources by the contractor in the execution of the works.

Option A	<p>The preliminaries shall be adjusted in accordance with the allocation of preliminaries amounts provided by the contractor, apportioned to sections where completion in sections is required</p> <p>Fixed - An amount which shall not be varied.</p> <p>Value-related - An amount varied in proportion to the contract value as compared to the contract sum. Both the contract sum and the contract value shall exclude the amount of preliminaries, contingency sum(s) and any provision for cost fluctuations.</p> <p>Time-related - An amount varied in proportion to the number of calendar days extension to the date of practical completion to which the contractor is entitled with an adjustment of the contract value [23.2; 23.3] as compared to the number of calendar days in the initial construction period [26.9.4].</p>
Option B	The adjustment of preliminaries shall be based on the number of calendar days extension to the date of practical completion to which the contractor is entitled with an adjustment of the contract value [23.2; 23.3] as compared to the number of calendar days in the initial construction period [26.9.4]. The adjustment shall take into account the resources as set out in the detailed breakdown of the preliminaries for the period of construction during which the delay occurred.

### Failure to provide particulars within the period stated

Option A	<p>Where the allocation of preliminaries amounts for Option A is not provided, the following allocation of preliminaries amounts shall apply:</p> <p>Fixed - Ten per cent (10%) Value-related - Fifteen per cent (15%) Time-related - Seventy-five per cent (75%)</p> <p>Where the apportionment of the preliminaries per section is not provided, the categorised amounts shall be prorated to the cost of each section within the contract sum as determined by the principal agent</p>
Option B	Where the detailed breakdown of preliminaries amounts for Option B is not provided, Option A shall apply
