13	<input checked="" type="checkbox"/>	Contractor to submit valid letter of good standing with Workman's Compensation. (COIDA) Certificate SANS 1475 certification; (Company Registration) SANSA hydro - test station certificate (If subcontracting the Certificate must also be attached by the Tenderer)
14	<input type="checkbox"/>	Specify other responsiveness criteria
15	<input type="checkbox"/>	Specify other responsiveness criteria
16	<input type="checkbox"/>	Specify other responsiveness criteria
17	<input type="checkbox"/>	Specify other responsiveness criteria
18	<input type="checkbox"/>	Specify other responsiveness criteria

**4.3. Indicate administrative requirements applicable for specific goals, Tenderers will not be required to submit the below documents if not provided in the original tender proposals, Failure to comply with the criteria stated hereunder shall result in the tenderer not allocated points for specific goals**

1	<input checked="" type="checkbox"/>	Submission of (PA-16): Preference Points Claim Form in terms of the Preferential Procurement Regulations 2022
2	<input checked="" type="checkbox"/>	A trust, consortium or joint venture (including unincorporated consortia and joint ventures) must submit a consolidated B-BBEE Certificate issued by a SANAS accredited service provider

**5. THE FOLLOWING EVALUATION METHOD FOR RESPONSIVE BIDS WILL BE APPLICABLE:**

<input type="checkbox"/> Method 1 (Financial offer)	<input checked="" type="checkbox"/> Method 2 (Financial and Preference offer)
---	---

**5.1. This bid will be evaluated according to the 80/20 Preference points scoring system:**

**6. ELIGIBILITY IN RESPECT OF RISK TO THE EMPLOYER:**

**Standard risk management assessment criteria in respect of tenders received for routine projects in the engineering and construction works environments:**

Tender offers will be evaluated by an Evaluation Committee based on the technical and commercial risk criteria listed hereunder. Each criterion carries the same weight / importance and will be evaluated individually based on reports presented to the Bid Evaluation Committee by the Professional Team appointed on the project. A tender offer will be declared non-responsive and removed from any further evaluation if any one criterion is found to present an unacceptable risk to the Employer.

In order for the evaluation reports to be prepared by the Professional Team, the Tenderer is obliged to provide comprehensive information on form DPW-09 (EC). Failure to complete the said form will cause the tender to be declared non-responsive and removed from any further consideration. The Employer reserves the right to request additional information over and above that which is provided by the Tenderer on said form. The information must be provided by the Tenderer within the stipulated time as determined by the Bid Evaluation Committee, failing which the tender offer will *mutatis mutandis* be declared non-responsive.

**6.1 Technical risks:**

**Criterion 1: Experience on comparable projects during the past specify between 5 and 10 years.**

The tendering Service Provider's experience on comparable projects during the past specify between 5 and 10 years. The number of current and previous comparable projects performed by the Tenderer as per the evaluation report prepared by the Consultant Team, based on its research and inspection of a representative sample of the Tenderer's current and previous work as reflected on form DPW-09 (EC), as well as, if necessary, of any additional work executed by the Tenderer, not reflected on form DPW-09 (EC). Failing to provide contactable references will result in the tender offer will be *mutatis mutandis* declared non-responsive.

Aspects to be regarded as "comparable" includes (but may be extended according to circumstances): size of projects (measured against monetary value or other project quantifying parameters), nature of projects (building, engineering, high/low rise, etc.), locality/area of execution (site-specific influences, knowledge of local conditions, etc.), complexity of project, projects for similar client department irrespective of end purpose of buildings/facilities created or in progress of being created and time scales of projects (normal, fast track, etc.) and stage of its/their development.

**Criterion 2: Contractual commitment and quality of performance on comparable projects during the past specify between 5 and 10 years.**

Adherence to contractual commitments and quality of performance of comparable current and previous projects performed by the Tenderer during the past specify between 5 and 10 years as per the evaluation report prepared by the Consultant Team, based on its research and inspection of a representative sample of the Tenderer's current and previous work as reflected on form DPW-09 (EC), as well as, if necessary, of any additional work executed by the Tenderer.

Aspects to be considered include, but are not limited to the following:

1. The level of progress on current projects in relation to the project programme or, if such is not available/applicable, to the contractual construction period in general;

- The degree to which previous projects have been completed within the contractual completion periods and/or extensions thereto, and the extend of penalties imposed;
3. Project performance: time management & programming of works, timeous ordering of materials and appointment of subcontractors;
  4. Financial management: payment to suppliers and cash flow problems;
  5. Quality of workmanship: extent of reworks and timeous attention to remedial works;
  6. Personnel resources: suitably qualified and experienced, turnover in site staff and labour force, specifically site manager and foreman;
  7. Personnel management: extent of labour disputes and ability to resolving labour disputes amicably;
  8. Sub-contractors: extent of turnover in subcontractors, general liaison and payment problems experienced;
  9. Contract administration: contractual aspects such as complying to laws and regulations, insurances, security, submission of required documentation timeously, reaction to written contract instructions, appointments of subcontractors, etc. as can generally be expected in standard/normal conditions of contract.
  10. Health & Safety: adherence to regulations and compliance, and number of transgressions & serious incidents.
  11. Plant & equipment: sufficient resources on site and in time.
  12. Delays: extent of causing delays, submission of claims timeously, and abuse of or exaggerated delay claims.
  13. Final account: extent to which the contractor assisted in finalising the final account.

### **Criterion 3: Suitably qualified and appropriately experienced human resources**

Allocation of suitably qualified and appropriately experienced human resources, both in respect of principals and/or other staff (contract manager, site agent, site foreman including other professional, technical and/or administrative) of the tendering Service Provider to the project, as proof that the tendering Service Provider will be able to react/respond appropriately to the Services required herein. The Company Organogram with CV's and certified ID's of all principals and employed workforce as well as proof of Professional Registration will be verified. Current and future workload of the tenderer in relation to capacity and capability will also be considered. The tenderer should demonstrate that he or she possesses the necessary professional and technical qualifications and -competence in relation to the scope of work and work to be undertaken.

### **Criterion 4: Attendance of compulsory bid clarification meeting, if applicable**

If applicable, submission of confirmation of DPW-16.1 (PSB) attendance of compulsory bid clarification meeting or proof of attending the compulsory virtual meeting by a suitably qualified and experienced representative of the tenderer in terms of PA-04 (EC): Notice and Invitation to Tender.

## **6.2 Commercial risks:**

The financial viability assessment evaluates the risk over the life of the construction period, as to whether the tenderer will be able to deliver the goods and services which are specified in the contract and / or be able to fulfil guarantees or warranties provided for in the contract in order to complete the project successfully for the amount tendered.

Aspects to be considered include but are not limited to, the respective rates tendered, bank rating, financial capability and capacity whether the tenderer has or has access to sufficient financial resources to deliver the goods or services described in the tender documentation (including fulfilling any guarantees or warranty claims), whether the tenderer is not subject to any current or impending legal action (either formal proceedings or notification of legal action) which could impact on the financial standing of the tenderer or the delivery of the goods or services, financial report from auditors as proof of current liquidity, and company or any parent company or investor guarantee/s and financial statements.

## **7. COLLECTION OF QUOTATION DOCUMENTS**

☐ Quotation documents are available for collection during working hours

☐ Alternatively; quotation documents may be collected during working hours at the following address **insert physical address**. A non-refundable bid deposit of **R insert amount** payable (cash only) on collection of the bid documents.

## 8. SITE INSPECTION MEETING

Compulsory briefing session will be held in respect of this quotation.

### Construction Phase Flow Chart

The Contract agreement comes into effect on the date when the contractor receives one fully signed copy of the Form of Offer and Acceptance, a copy of Suppliers Advise which may be interpreted as Purchase Order or a copy of a fully signed Appointment Letter. These document are processed and sent via by the Supply Chain Management Department, therefore for contractual reasons the commencement date will be determined by the Chief Works Manager following approval of the Safety File or Safety plan document by Departmental Safety Official.

As a background to the above matter the following information is provided in order to give guidance to the Department of Public Works & Infrastructure personnel in dealing with contractual matters.

- i. The Contractor is given a letter ( Purchase Order, Form of Offer or Appointment letter) for tender in which an intent for a contract award is given provided that within seven (7) calendar days of date of communication, Depending on the terms of the Contract Agreement the following standard information is furnished:-
  - a) A Construction Safety, Health and Environmental Plan
  - b) Proof of having insurance cover.(NOTE: A further seven (7) calendar days extension may be granted resulting in a maximum of fourteen (14) calendar days to furnish all information. A letter must be issued to the Contractor granting the seven (7) days extension.
- ii. An Approved Construction Safety Plan will be given to the Contractor at Site handover.
- iii. The Commencement date of the contract will start on the site handover date.
- iv. After the site has been handed over, the contractor must establish himself on the site and actually commence work within five (5) calendar days. If this does not happen then the contractor is to be ordered in writing by the employer to commence both site establishment and work, failing which the contractor is in breach of the contract.

### **3 HANDING OVER OF SITE – ALSO TO BE READ WITH ITEM 1 ABOVE**

The date for the handing over of the site to the Contractor must be arranged by the Chief Works Manager, in consultation with all persons concerned. The date and time decided upon must be communicated, in writing, to all involved in the process and a record of this arrangement to be placed on the Project File.

The Chief Works Manager / principle Agent is to notify the Contractor of the date on which the site is to be handed over.

It is necessary to calculate the length of the contract construction period correctly. For example if the contract period is 4 weeks and the site is handed over on 1 July on a Monday, the contact period from construction commencement date to practical completion is 28 July (not 29 July).

The site handover shall commence with a site handover meeting. The site handover meeting must be chaired by the Chief Works Manager / Principle Agent, and the site handed over by the Chief Works Manager to the Contractor.

The following persons must be present:

- (i) Chief Works Manager (NDPWI)
- (ii) OHS representative (NDPWI)
- (iii) Client Department (Head of Facility, to be invited in writing)
- (iv) Contractor

- Ensure that a Site Handover Certificate is completed and distributed to all concerned at the earliest possible day after the site handover. Copies to be placed on Project file and emailed to Contractor.

The following items must be thoroughly discussed (as minimum) at the handing over of the site and form the site handover agenda:

- (i) Site meetings
- (ii) Site instructions
- (iii) Site records
- (iv) Contract programme
- (v) Weekend and holiday work
- (vi) Claims for delays
- (vii) Site establishment
- (viii) Security of the site
- (ix) Identification of site representative and key personnel
- (x) EPWP ( Expanded Public Works Programme), if applicable
- (xi) Safety (OHS Act)
- (xii) Planned site visits by Chief Works Manager

### 3.1 Site Establishment

Working space is to be defined and protected areas identified by both the Chief Works Manager / Control Works Manager and Head of Institution concerned. These matters must be finalised prior to completing the tender document. The type and location of fencing to the work area is to be decided and specified. If the contract is to be carried out in phases, cognisance must be taken of this factor when placing site huts and fencing work areas.

- (I) **Access to Site and Public Roads, Kerb Etc.**  
Hoardings, fencing requirements, access from public roads (which matters should have been finalised prior to completing the tender document) are to be agreed between the Contractors and Local Authority.
- (ii) **Name Board**  
The Chief Works Manager must issue a drawing showing the wording to be used. The sitting is to be agreed with the Chief Works Manager. The Contractor's boards are to be displayed in an orderly manner after approval by the Head: Public Works.
- (iii) **Plant**  
No noisy plant is to be located near existing buildings which are occupied.
- (v) **Municipal Services and Connections (used during construction)**  
The Contractor is to organise the following as soon as possible:-
  - a) A separate electrical connection. Alternatively the Contractor is to supply and install his own meter connected to the institution's supply and pay the institution for all current consumed on a monthly basis. Monthly readings are to be noted in the Site Minutes. Or supply of his own electrical generator and accessories required.
  - b) The contractor may ask the head: Public Works support his application for a telephone if he has difficulties. The Contractor must pay for the installation and all costs.
  - c) **Water for the Works.**

- **For earthworks contracts** the meter and connection is to be arranged and paid for by the Contractor in the name of the KwaZulu-Natal National Administration.
- **For building contracts** the Contractor is to arrange for his own connection and meter or forfeit ½% of contract to the institutions supply and pay the institution for all water consumed on a monthly basis. Monthly readings are to be noted in the Site Minutes.

The Contractor's decision is to be noted in the site meeting minutes.

**d) Toilets**

- The type of temporary toilets must be established and the toilets provided immediately. The local Authority's approval of the facilities must be obtained. Where it is practical, a temporary connection to a municipal sewer must be made.
- Contractor's may under no circumstances use facilities of an occupied site.

**(vi) Protection of Trees Etc.**

The Deputy Director is to indicate trees and other features which must be protected. No trees are to be removed without prior authority, nor are any trees which are to remain to be damaged in any way.

**(vii) Identification of Personnel**

Personnel of the contractor must wear identification clothing at all times.

#### **4 SITE MEETINGS AND STANDARD AGENDA ITEMS**

Where the complexity of the project warrants the holding of regular site meetings, these meetings are to be held at least once monthly.

The project site meetings are to be held at least once monthly.

It's is the duty of the Chief Works Manager to see that business proceedings and any decisions taken at site meetings are adequately recorded and that minutes of the meetings are produced within five (5) working days after meeting

The Chief Works Manager/Principle Agent as conveyor of the meetings, must be informed by the Contractor as to who of his staff requires to attend the meetings. The Chief Works Manager/Principle Agent will indicate approval or otherwise of these nominations

Minutes of site meetings must be taken and kept by Chief Works Manager/Principle Agent; and they must contain the following minimum information in addition to the business content of the meetings.

- (i) Relevant Project File number
- (ii) Name of the project, which must relate to the title on the Bills of Quantities document
- (iii) Number, time of day and date of meeting.

- (iv) List of persons attending the meeting, their designation and the organisation which they represent (i.e. Contractor, Client, Projects Manager, etc.).
- (v) Apologies from persons who would normally attend the meetings but are not present.
- (vi) Confirmation (signed) or otherwise of the minutes of the previous meeting and any necessary amendments or comments.
- (vii) Matters arising from previous meetings which require finalisation.
- (viii) New matters.
- (ix) Items which arise for the first time and require recording.
- (x) A brief Progress report, including
  - a) % Time lapsed
  - b) % Money spent
  - c) % Overall completion
- (xi) Delays: These should be reflected separately in the minutes i.e.
  - a) Inclement Weather.
  - b) Material Supply problems
- (xii) Safety issues
- (xiii) The date and time for the holding of the next meeting.
- (xiv) The contract duration.
- (xv) Approved extensions to practical completion.
- (xvi) List of the distribution of the minutes (containing where applicable, the addresses of the recipients – this is to forestall a claim for non-receipt of minutes due to incorrect address) – duty of the Chief Works Manager/Control Works Manager.
  - a) 2 copies to Head of Department
  - b) Number of copies required by the Contractor with a maximum of 6
  - c) Any person authorised to receive copies of the minutes may request extra copies but must make private arrangements with the Chief Works Manager/Control Works Manager with regards to payment for the extra copies.

It is the duty of the Chief Works Manager/Control Works Manager to see that the business proceedings and any decisions taken at site meetings are adequately recorded and that minutes of the meetings are produced as soon as possible after the meeting.

#### **4.1 Site Instructions**

These must be recorded and officially confirmed by the Chief Works Manager/Control Works Manager. As soon as possible. An Instruction Book must be available at all times, and its use limited to defined people such as the Inspectorate Staff and Chief Works Manager.

#### **4.2 Site Records**

The Contractor is to maintain his own records on site for labour and plant, which must be available to the Chief Works Manager/Control Works Manager. Site instruction books are available from the Regional Office.

#### **4.3 Phased Completion**

Any special requirements by the Client Department are to be explained in the tender documents together with special conditions relating to retention and reduction of penalties where applicable. Details must be incorporated in the contract programme.

#### **4.4 Contract Programme**

The Contractor must prepare a realistic programme chart for the work which must be approved by the Chief Works Manager/Control Works Manager, and keep it up-to-date. The phasing of the contract (where specified in the tender document) must be indicated.

#### **4.5 Weekend and Holiday Work**

This may be undertaken on written request to the Chief Works Manager/Control Works Manager for approval and if acceptable to the Client Department.

- (i) All work undertaken must remain exposed for inspection
- (ii) No work shall be done unless proper arrangements for inspection have been made with the Chief Works Manager/Control Works Manager.

#### **4.6 Claims for Delay**

The contract period includes all statutory holidays and holidays recognised in the building industry. The Chief Works Manager will maintain his own records on weather conditions and also note any delays in the delivery of materials. The Chief Works Manager/Control Works Manager shall be responsible to capture this information with copies of records at each site meeting.

### **5 SITE INSTRUCTION BOOK AND VISITORS DIARY**

#### **5.1**

A site instruction book must be issued at the handing over of the site. Arrangements must be made where the Site Instruction Book will be kept on site should the contractor not require a Site Office to be provided by the Contractors.

The Site Instruction Book must not be removed from the site until "completion" of the contract has been taken. In the event of the Site Instruction book being mislaid. It must be replaced with the cost thereof being for the account of the Contractor.

Site instructions, commencing from the front of the book, must be recorded and officially confirmed by the Chief Works Manager as soon as possible. A site instruction book must be available on site at all times, and its use limited to specific persons such as the Inspectorate and Chief Works Managers.

The site instruction must contain

- (i) Contact numbers and addresses of Contractor, Chief Works Manager and Head of Department.
- (ii) The contract description and contract number. (this information must be reflected on the front cover page of the Site Instruction Book)

Instructions as to the use of the Site Instruction Book must be prepared and pasted on the back of the front cover with a role requesting visitors to sign at the back of the book.

All site, and other instructions, relating to the contract, whether verbal or telephonic, must be recorded in the Site Instruction Book and signed / countersigned by the Chief Works Manager

and the Contractor. Any site instruction with a financial implication must be counter signed for approval of funding available by the accounting officer.

No changes or alterations to the service, discussed during the course of site meetings, are to be implemented until a formal instruction has been recorded in the Site Instruction Book and where a site instruction necessitates it.

On the day that "completion" of any project is taken and the Completion Certificate is issued, the last site instruction is to be numbered, signed by the officer taking delivery of the project and issued to and signed by the Contractor and is to be worded as follows:

His site instruction, number.....indicates that "Practical Completion" of this project has been taken and this is the last site instruction that will be issued on this project."

## **5.2 Visitors Diary**

The Site Instruction Book will be used as the official records of visits to the site. The recording of visits to site will commence from the end of the Site Instruction Book and be carried towards the front of the book until a stage is reached where this information meets with the issued Site Instructions. When this occurs the book must be safely kept for conclusion with the contract document file and a new Site Instruction Book be taken into use.

Visitors to the site, e.g. Chief Works Manager, Client Department representative's members and other involved persons must, except when attending official site meetings, must be requested to complete the back section of the Site Instruction Book, known as the Visitors Diary, and provide:

- (i) Names,
- (ii) Contact number and addresses,
- (iii) Date and times of visits , and
- (iv) Comments.

A visitor may keep one page as a record of the comments made and, if so desired, forward a copy thereof to the Chief Works Manager for nothing. The copies are distributed as follows:

- (i) One to Chief Works Manager
- (ii) One to the Contractor
- (iii) One to remain in the book

## **6 SUPERVISION BY WORKS MANGER/ INSPECTOR, IF APPOINTED**

Due to the non-availability of works inspectors in the region the task to supervise works lies with the Chief Works manager/Chief Works Manager.

The main functions are: Quality Control

- (i) Foundation re-measurement
- (ii) Monthly / weekly reports
- (iii) Compilation of Daily Diary
- (iv) Control of Site Instruction Book 5.1
- (v) Assistance with the setting out of buildings, and in general to see that what is specified on the drawings is in fact built. Where possible, instructions to Contractor should be through the Works Manager

### **6.1 Contractor To provide A Site Representative**

The Contractor shall constantly keep upon the works a competent foreman/Contractor's Site Representative.

## 6.2 Supervision By Departmental Personnel

Supervision by Officers of the Department of Public Works may carry out inspections at any time. Any comment or amendments which they may consider necessary as a result of these inspections must be conveyed to the Chief Works Manager/Control Works Manager, through whom all instructions to the Contractor will normally be given.

In the event of any difference of opinion between a Regional Inspectorate concerning any particular finish, method of construction or detail, the matter must be referred by the Deputy Director to the accounting Head of Department for a decision.

## 6.3 Progress Reports

The Chief Works Manager must prepare the weekly / monthly reports.

## 7 EXTENSION OF PRACTICAL COMPLETION DATE

Approval of request received from contractors for the extension of the Practical Completion Dates of contracts are processed in terms of the relevant clause and stated time of the particular Agreement and SCM Delegation

The Contractor must submit within the specified time of the relevant Clause of the Agreement and any requests for extension to the Practical Completion Dates to the Chief Works Manager/Control Works Manager

The Chief Works Manager must submit any request made by the Contractor for extension of the Practical Completion Dates to the BEC

The Chief Works Manager/Control Works Manager must indicate whether he/she supports the application or not before submission for acceptance and final approval or not by either the delegated Deputy Official or the BEC

All extensions to Practical Completion Dates must be recorded in the minutes of Site Meetings

The extension to Practical Completion Date are to be calculated in working (not calendar) days

**NB** No extension to the Construction Period may be granted after the expiry of the Contract.

## 8 PENALTIES

### 8.1 Introduction

Both the Treasury and the approved that in the case of Building and Allied Industry contracts, the Department of public Works & Infrastructure has the authority to specify, in tender / contract documents which include the Department's adopted Agreement, the penalty for failure to render the service within the stipulated or extended contract period in a specific monetary amount per day **based on 0.04% of the contract sum of the project at the time of preparing the tender document**. The Scale of Penalties to apply for *estimating purpose only* is set out in the table below. The *actual penalty* amount is calculated on the following basis.

The Penalty for failing to complete the whole of the Works is:

- 0.04% of the contract sum excluding VAT round up to the nearest R10

If the Works is to be completed in portions, the following is also applicable:

- The penalty for failing to complete particular portions of the Works shall be 0.04% of the value of that Section round up to the nearest R 10

In the case of contracts resulting from the acceptance of quotation, the penalty is calculated as set out in the quotation documents.

### 8.2. Penalties For Late Completion

The scale of Penalties below for estimating purposes only has been calculated applying 0.04%

ESTIMAED COST R		PENALTY PER DAY R	ESTIMATED COST R		PENALTY PER DAY R
0	- 10 000,00	4	1 000 001,00	- 1 050 000,00	420

975 001,00	-	1 000 000,00	400	4 400 001,00	-	4 500 000,00	1800

### 8.3. Penalties – Imposition and Applications for Waiving of Penalties

Penalties must be strictly imposed when a contract has not been completed by the completion date or any approved extension thereof. The necessary deductions must be made in all payments processed after the due date or extended due date for completion of the Contract. Should a contractor appeal in writing against the imposition of penalties and motivate for the waiving of same, the appeal must be considered and receive a written response.

The Treasury Regulations issued in terms of the Public Finance Management Act, 1999 (Act No. 1 of 1999) and amendments thereof makes provision in Clause 11.4 to write-off debts owed to the State or to waive debts if the Accounting Officer (Head of Department) is satisfied that it would be to the advantage of the State to effect a settlement. All debts written off must be disclosed in the Annual Financial Statements of the Department of Public Works.

## 9. PROCEDURE FOR CONTRACT PAYMENTS

Valuations must be made each month, regardless of whether the contractor has requested a payment or not.

## 10. COMPLETION CERTIFICATE (“Practical Completion”)

This is the stage reached in the contract, as described in the particular Agreement, dealing with the Completion Certificate.

### 10.1. Pre-Inspection

When the Contractor has stated that, in his opinion, the Works are complete and ready for occupation, the Chief Works Manager, and the Client Department’s Planner or his authorised representative must carry out an inspection of the Works.

Where necessary, any outstanding work, defects or inadequacies, in terms of the Contract, are to be listed and such list handed to the Contractors for attention.

The list is for guidance only and is not to be deemed to be all-inclusive. It must also not be used by the Contractor to relieve him of his responsibilities in terms of the Contract.

### 10.2. Practical Completion

On completion of all unsatisfactory or incomplete works, a further inspection will be carried out by the Chief Works Manager and the Client Department’s Planner or representative and if the Works are acceptable, “Practical Completion” will be taken.

The Chief Works Manager, must arrange the preparation of a Key Schedule and obtain all keys from the Contractor, to which suitable identifying tags must be securely attached.

Arrangements are to be made for the keys of the section and completed work to be handed over and signed for on behalf of the Client Department concerned.

Arrangements are also to be made for the handing over of all operating and maintenance manuals as specified / required in the tender documents.

## 11. MANAGING DEFAULT BY CONTRACTOR IN TERMS OF THE PROJECT CONTRACT CONDITIONS

### 11.1. Introduction

At all times it is of utmost importance that the Chief Works Manager ensures that the project is implemented in accordance with the agreed project plan, applicable contract conditions and tender documents submitted, and that any deviations are addressed timeously.

This section relates to the contractor defaulting on any of its obligations in terms of the aforementioned. Default on the part of the contractor extends to not performing any obligation on the project and may include but not limited to:

- In the case of PA-10 Conditions of Contract - refusing to comply with contract instruction in terms of clause 5, and
- The circumstances set out in clause 12

**Please note:** - Addressing the defaulting of the contractor occurs prior to the request for cancellation of the contract and needs to be well documented, outlining the steps to remedy the non-compliance.

The clause 12 process map provided below helps diagrammatically show the steps to be followed when the contractor defaults. The written text provides activities and actions that should be followed and takes precedent over the process map.

### 11.2. Addressing Default by the Contractor

At the outset it must be noted that projects may only have a Departmental official appointed as a Chief Works Manager, thus any reference to him/her in this chapter will apply to the Chief Works Manager.

Whenever it becomes apparent to the Chief Works Manager that a Contractor is defaulting in the terms of the Project, the default must be addressed immediately as set out hereunder.

#### 11.2.1. The Chief Works Manager must:

- 11.2.1.1 Point out the default to the contractor and instruct the contractor on the remedial steps to be taken to comply with obligations and the time-frame by which such default must be remedied. The time-frame shall not be less than 10 working days from the date of the instruction to comply.

*Please note that whilst the time-frame will apply to all instances of non-compliance, it was important to set the minimum number of 10 days as indicated, so as to align with the PA-10 Conditions of contract, which make provision for*

- *The enforcement of strict compliance with the terms and conditions of the contract.*
- *The termination of this contract without prejudice to any other rights it may have;*
- *The suspension of any further payments to the service provider;*
- *The appointment of other service providers to complete the execution of the service, in which event the Service Provider shall be held liable for costs incurred in connection with and arising from the appointment of such a service provider as well as damages suffered.*

- 11.2.1.2 The instruction shall also be recorded and communicated in the Site Instruction Book. The instruction in the site instruction book must be agreed to and countersigned by the contractor.

- 11.2.1.3 It is important that the default is clearly stated and explained to the contractor, in addition, the remedial instructions(s) must be clear and have precise time-frame, as this will mark the first point that may be constantly referenced should the non-compliance not be timeously remedied.

11.2.1.4 If the default affects the agreed construction programme the instruction must include that the contractor furnish a revised construction programme and construction cash flow to the Chief works Manager that will be evaluated and, if approved by the Chief works manager, used to monitor the progress of the Project.

11.2.1.5 The default must also be recorded at the Site Meeting. The Site Meeting Agenda shall have a standing item for recording non-compliance and the status of these items.

11.2.2. The Contractor must:

11.2.2.1 Upon receiving the instruction from the Chief Works Manager, the contractor must remedy the default within the time-frames provided.

11.2.2.2 If the Contractor alleges that it has remedied its default, the Chief Works Manager shall inspect, approve and sign off that the default has been remedied to his satisfaction, it shall also be recorded at the Site Meeting that the default has been remedied and no further action will be taken against the Contractor.

11.2.2.1 If the Contractor has not remedied its default, the Chief Works Manager must record this at the Site Meeting and report the non-compliance with the instruction to the Departmental Control Works Manager.

11.2.3. The Departmental Chief Works Manager must then submit a report immediately to the Departmental Deputy Director, which report shall include:

- a. The nature of the default
- b. Photographs if applicable;
- c. The instruction given to the default, including the time given and the time lapsed;
- d. A record of the monitoring actions and any follow-up actions if applicable; and
- e. a draft warning letter for signature by the Deputy Director.

11.2.4. Upon receiving the report, the Deputy Director must action and sign off an official warning letter, which shall include the following:

- a. A brief history of the default and the Department's attempt to address same;
- b. A request that a revised work programme be forwarded to the Department indicating how lost time will be made up to meet the contract completion date. The plan or programme of remedial action must also include how the contractor shall make a concerted effort to remedy its default within then (10) working days.

**Please Note:**

**(1)** *That this does not mean that the default must be remedied in ten (10) working days; rather, a concerted effort (with physical means of verification) must be made to remedy the default within this 10-day period. At the end or during this 10-day period, the Department should be able to assess as to whether the effort made by the contractor, although not wholly remedying the default, ~~is~~ the concerted effort must be sufficient to convince the Department that the contractor will be able to remedy its default and complete the Project timeously.*

*(2) This step means that the project is at a high risk stage of being cancelled and the department is mitigating the high risk in accordance with the contractual conditions. Daily due diligent management oversight from the Department must be carried out and recorded and may be used as evidence should the cancellation notice be approved.*

- c. A condition that the Contractor is given f (5) working days, from the date of receipt of this letter, to furnish the aforementioned programme and plan to the Department.
- d. All implications in respect of penalties, taking into account clause....
- e. A paragraph clearly informing the contractor that any further failure to comply shall leave the Department with no alternative but to proceed with termination of the contract.

The letter must be forwarded to the Contractor at its appointed address and a copy must be retained by the Deputy Director, Control Works Manager and Chief Works Manager.

11.2.5. The Chief works Manager must during and at the end of the remedial time period, monitor whether the default is or is not being remedied in accordance with the Contractor's remedial plan and/or programme and report this to the Control Works Manager.

11.2.6. At the end of the 10 day period, the Control Works Manager immediately submit a report to the Deputy Director, which shall conclude that:

- a. The default has been remedied, or that the contractor has made a concerted effort to remedy the default and the contractor will be able to complete the project successfully in accordance with its revised programme; or
- b. The default has not been remedied or that the contractor has not made a concerted effort to remedy the default and the contractor shall not be able to complete the project successfully.
  - Where the PA-10 is the applicable contract and the contractors non-performance falls within the categorised listed under clause 33.1 to 34.5.3, the Chief Works Manager must issue a notice to the Department and to the contractor certifying that in terms of clause 33, it is his opinion that the Contractor falls within one of those categories (these must be specifically stated in his notice with applicable clauses cited), The notice must accompany the Chief Works Manager's report to the Deputy Director.
  - The report must address the issues in paragraph 11.2.3 above and also include the full financial situation of the project including penalties to be imposed on cancellation.

11.2.7. The Deputy Director must, on receipt of the report from the Control Works Manager, consult with the Chief Works Manager and shall then:

- a. Grant approval for the contract to continue against the remedial plan and the default remedied shall be recorded in the Site Instruction Book and at the Site Meeting; or

- b. Recommend that the contract be cancelled. The Chief Works Manager is to then start preparing the submission for cancellation as set out in chapter 14. During the interim period, whilst awaiting approval of the cancellation, the Deputy Director is to submit a notice to the contractor:
- Citing receipt of the clause 34 notice, if applicable;
  - Advising that the Department has noted that the contractor has failed to remedy its default to the satisfaction of the Department;
  - Advising that the Department is currently considering the future of the Project and that the contractor will be notified of Department's stance herein.

## **12. GUIDELINES FOR CANCELLATION – TERMINATION OF A CONTRACT BY EMPLOYER DUE TO DEFAULT BY A CONTRACTOR**

**This process will guide the process for cancellation by the Employer where the Contractor has defaulted. A flow chart below explains the process to cancel/terminate a Contract and is in sequence to the following tasks:**

### **12.1. Decision to Cancel Defaulting Contractor's Contract**

Once The Deputy Director has made a decision to cancel a contract due to default by the contractor in terms of Chapter 13; he/she must instruct the Chief Works Manager:

- 12.1.1. Firstly, prepare a submission to cancel the contract; and
- 12.1.2. Secondly, consider all procurement options and develop a plan to secure a replacement contractor clearly stating the options available and the process with estimated timelines that can be activated once the Head of Department approves all cancellation.
- 12.1.3. Thirdly, instruction to Legal Services in respect of the cancellation.

### **12.2. Cancellation Submission to Bid Committees for Recommendation**

The Deputy Director after review shall sign and submit the submission through to the Departmental Evaluation & Adjudication Committees for recommendation.

### **12.3. Assessment of Cancellation Submission by Bid Committees**

Once the Evaluation & Adjudication Committees have recommended cancellation, SCM secretariat shall forward the submission to the Head of Department for approval.

### **12.4. Submission to Head of Department**

- 12.4.1. If the HoD approves the cancellation, the SCM secretariat shall deliver the approved submission to the Deputy Director to effect the cancellation.
- 12.4.2. HoD notes/supports the plan to secure a replacement contractor.

### **12.5. Effect the Approved Cancellation Process**

The Chief Works Manger shall prepare the following:

- 12.5.1. First, prepare draft notice of cancellation and forward to Legal Services for vetting, together with a detailed instruction memo, signed off by the Deputy Director, attaching the various reports and the submission for cancellation approved by HoD – see draft Notice attached.

12.5.2. Second, prepare a draft application/motivation report to appoint a new contractor. There may be a few options to consider based on the project status and project circumstances; in the report include the appropriate procurement options that are available in the department and then based on an opinion, recommend the most appropriate procurement option to appoint a new contractor; and

12.5.3. Third, prepare and urgently proceed with

- I. The preparation of "Completion Document" (of the cancelled contractor) and
- II. Keep a record of the additional costs in having to arrange for the new contractor to complete the Works (Additional costs that may arise subsequent to the cancellation of the contractor due to the original Scope of works must be kept separate and not added for recovery from the defaulting Contractor).

**12.6. Legal Services Vetting of Notice**

Legal Service is to vet the notice and return to the Deputy Director.

**12.7. Sign Cancellation Notice**

The Deputy Director will be required to sign and forward same (cancellation letter) by registered mail to the contractor.

**12.8. Cancellation in Effect**

Cancellation will take effect within 14 calendar days (PA-10) of the date of the termination letter. This means that 14 days from the date of the termination letter, the contract will be regarded as being cancelled and the contractor will be required to vacate the site.

**12.9. Secure Site during Cancellation in Effect**

- 12.9.1. Prior to or at the end of the notice period, the contractor must hand over the keys to site to the Chief Works Manager, and must sign that the keys and the site have been handed over to the Department with the contractor's consent.
- 12.9.2. Within the period mentioned above, the contractor will still be responsible for the site, unless it has notified the Department that it has vacated the site prior to the end of the notice-period.
- 12.9.3. Once the Department has obtained possession of the site, the Chief Works Manager must ensure that the site is secured.

**12.10. The Contractor Dispute the Cancellation**

Where the contractor disputes the cancellation and/or refuses to hand over possession of the site to the Department, the Deputy Director must refer the matter to Legal Service who will advise on best course of action to pursue. **N.B. If the contractor has engaged attorneys to dispute the cancellation, do not directly contact or communicate with the contractor and negotiate any proposals – the matter is now a legal matter.** Please also note the contractor must not be locked out or removed off the site!

**12.11. Defaulting Contractor Cost Recovery Process**

The Chief Works Manager and or Control Works Manager must prepare a full status report, covering quality and quantity of work and payments made, with supporting photographs is to be completed at the time of cancellation (Copy to be given to the Contractor).

- 12.11.1. The Chief Works Manager to urgently proceed with the preparation of the completion documents and to keep record of additional costs in having to arrange for another contractor to

complete the Works. Additional costs that may arise subsequent to the cancellation of the Contract due to changes to the original Scope of Works must be kept separate and not added for recovery from the defaulting Contractor.

### **13. SECURE SITE IF ABANDONED BY THE CONTRACTOR OR CONTRACT TERMINATED**

If the contractor has abandoned the site or the contract has been terminated; then the Deputy Director instructs the Chief Works Manager (and/or the Control Works manager) to immediately secure the site.

#### **13.1. Secure the Site**

Given that each site condition is different, the following points are provided as a guideline and should be actioned as a minimum requirement.

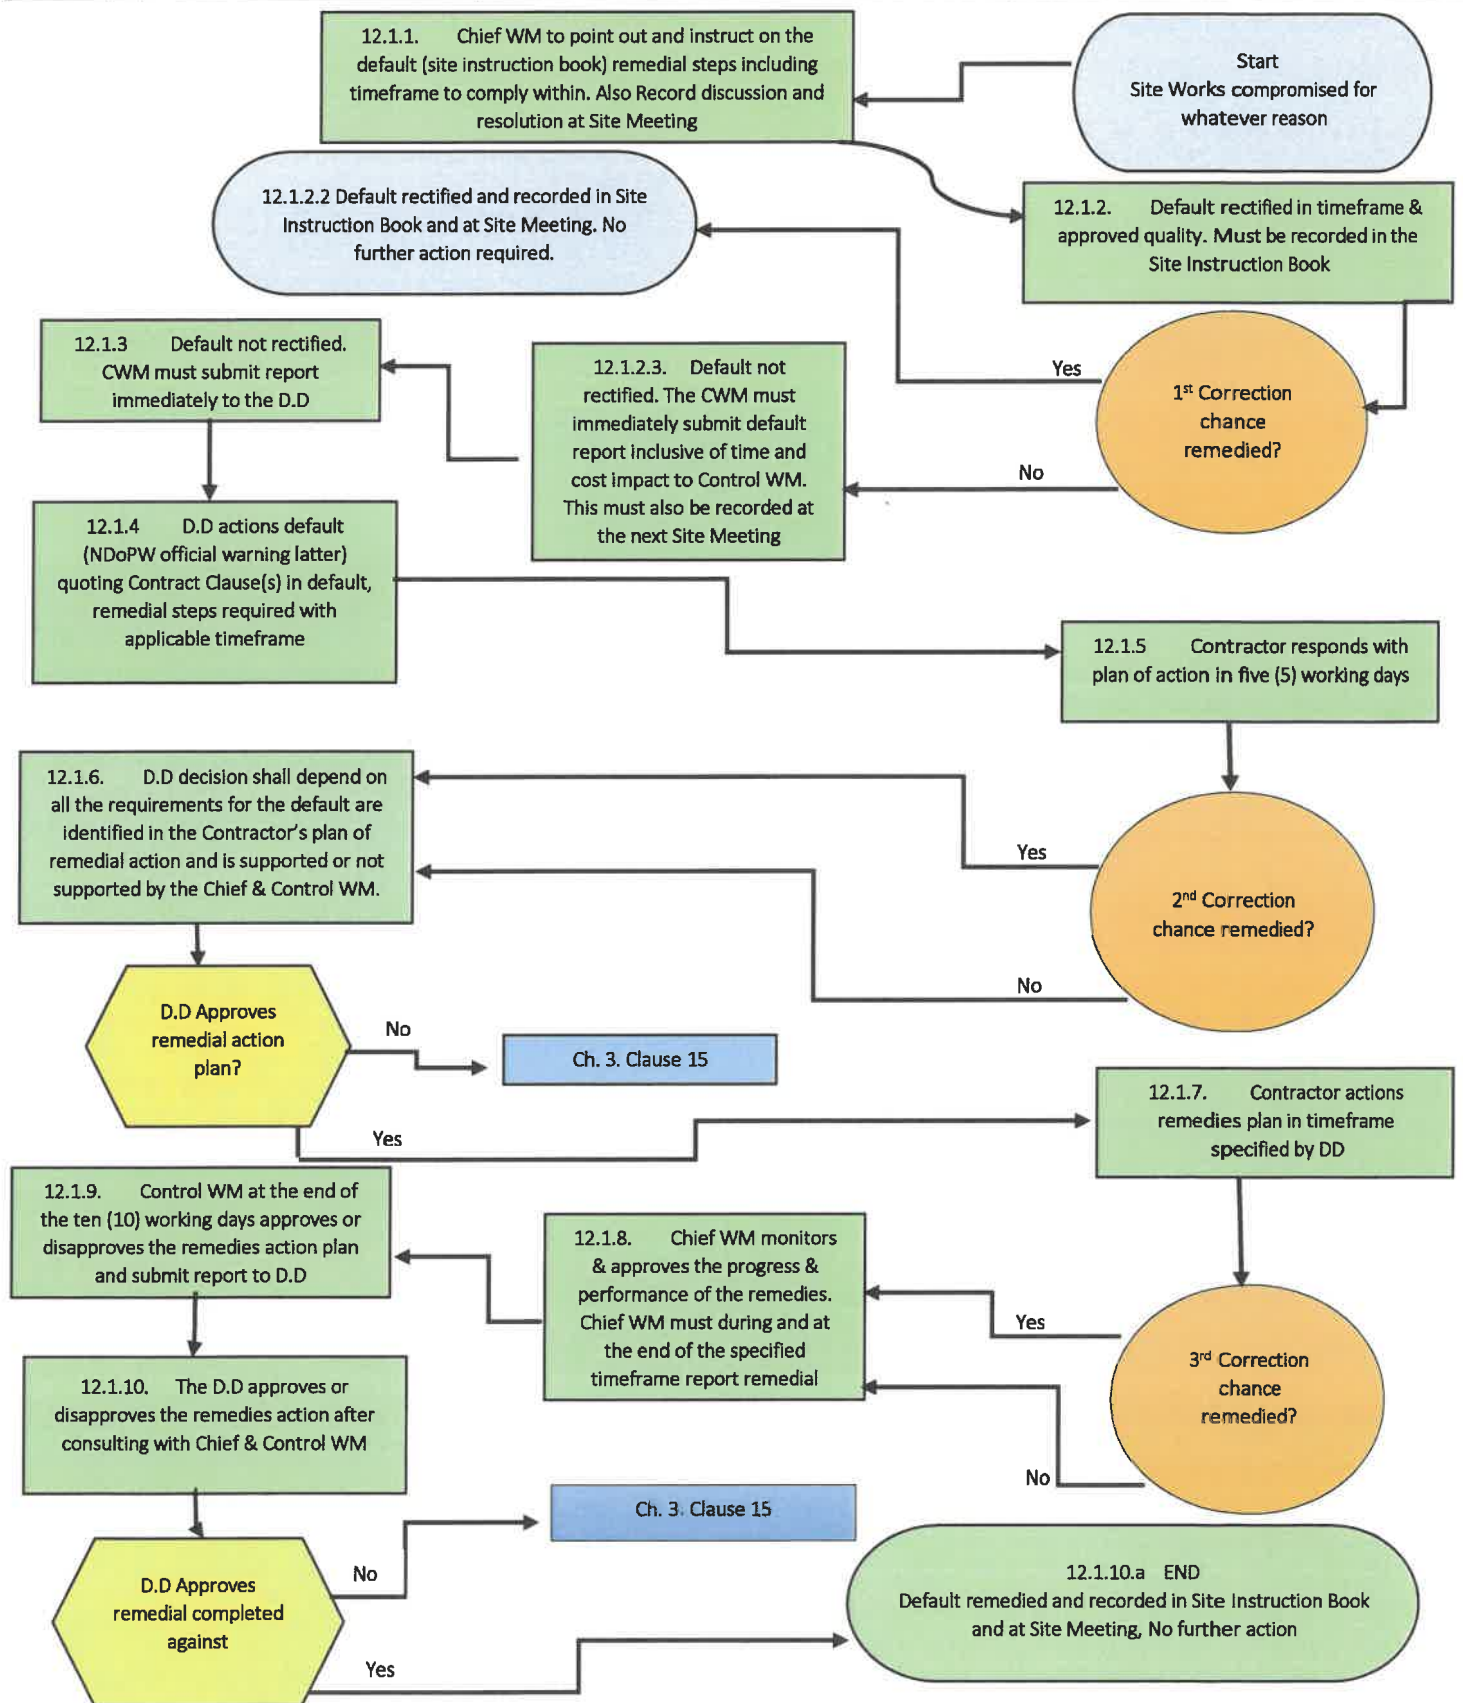

- All occupation safety measures on the site are assessed and addressed (the site should be secured such that there is no danger to life or property);
- Security to the site has been arranged if necessary with relevant approval from Deputy Director (and if required from the Client Department – depends on the project status / nature and security cost);
- Relevant notices are issued to the facility administration (i.e. in the event the project is part of an existing operational facility. The administrator is notified that the contractor has abandoned the site and of the measures to secure the site).

#### **13.2. Cost to Secure the Site**

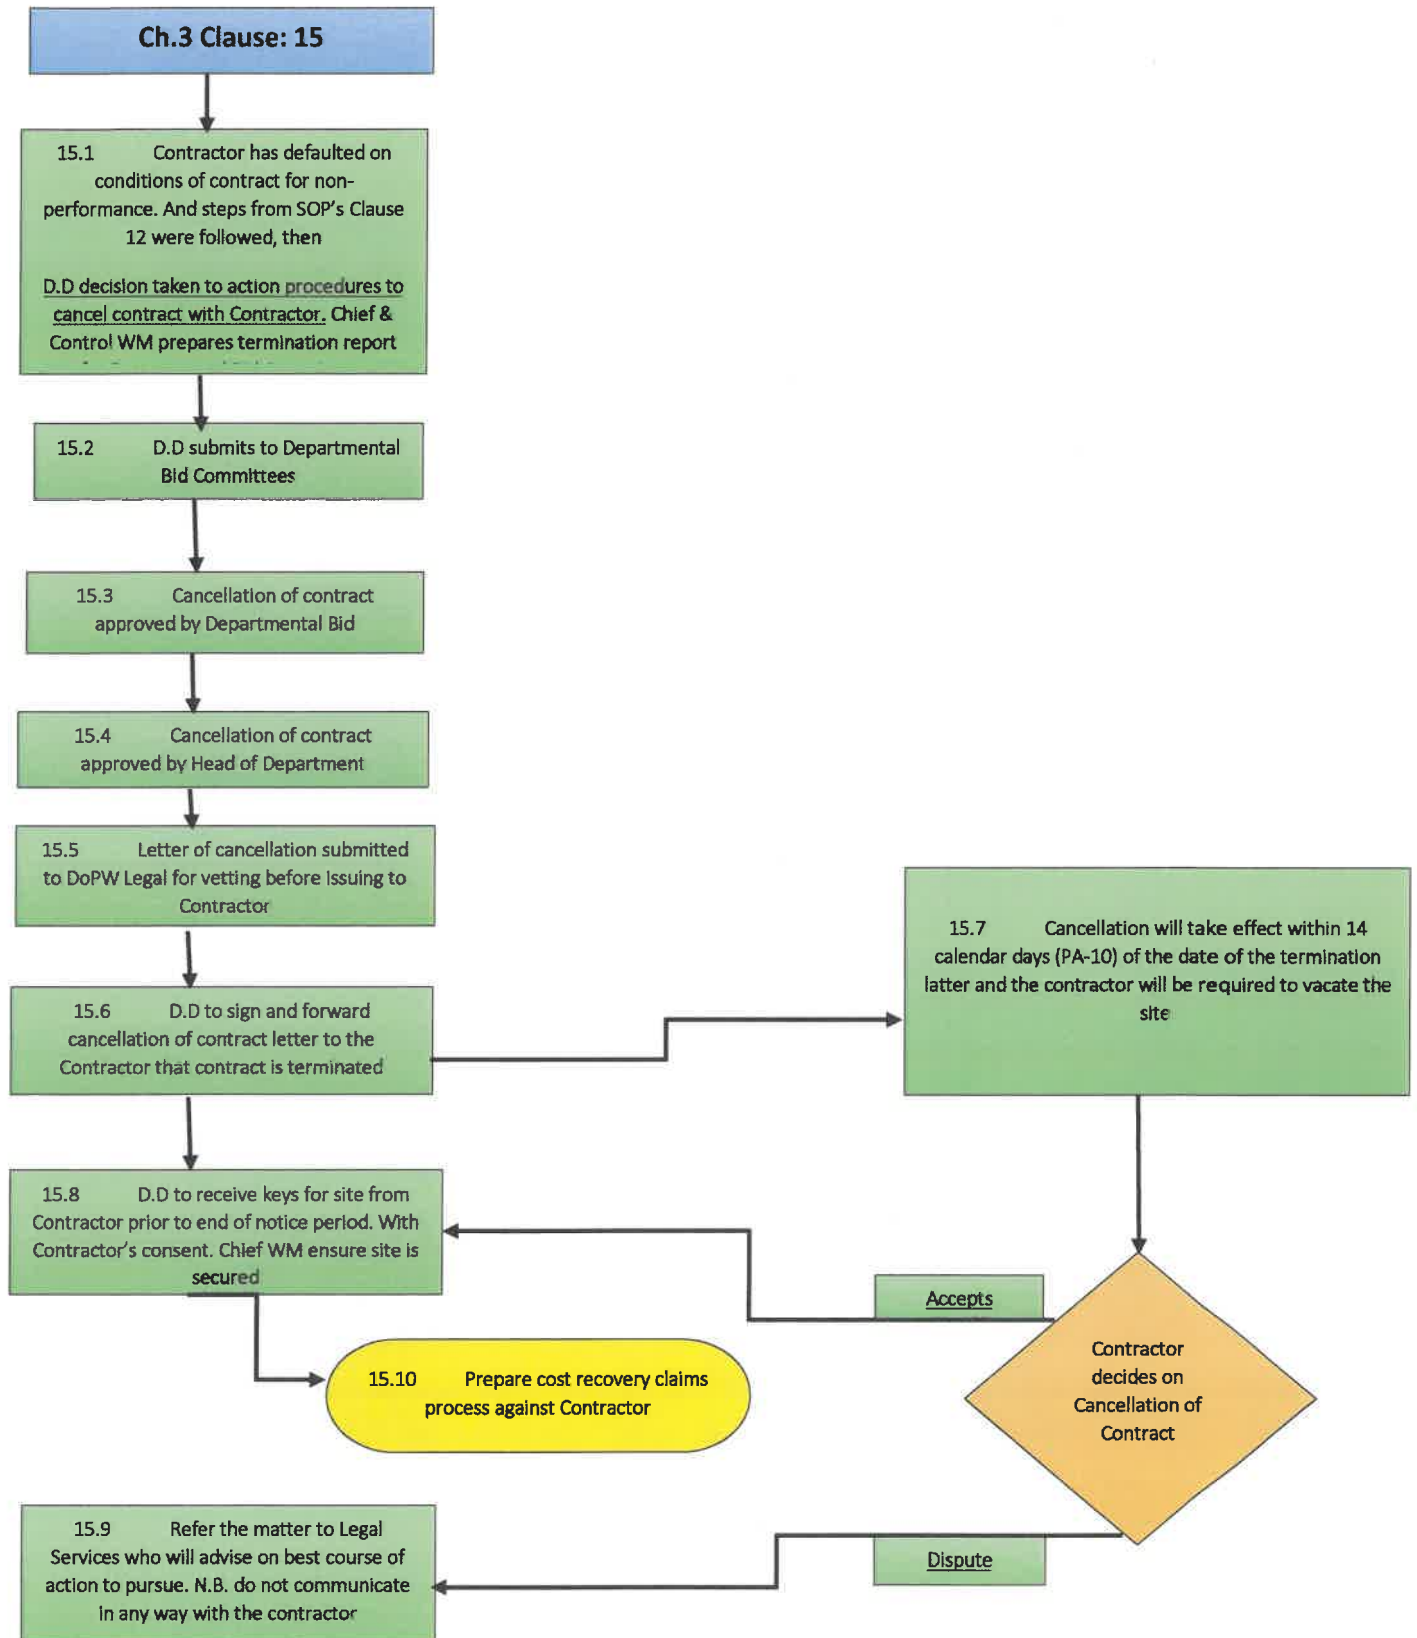

The contractor must be informed by the Chief Works Manager (and or the Control Works Manger) that the cost to secure the site will be recovered from the contractor in terms of the conditions of contract.

The cost to secure the site is initially paid by DoPW. The cost to secure the site shall be recovered from contractor when the project has reached "*Final Completion Certificate Stage*" (this task is conducted at the Final Account assessment and statement stage).

Standard Operating Procedure. Chart 2. Clause 14		
NDoPW: Control Works Manager : Deputy Director	NDoPW: Chief Works Manager	Contractor

Standard Operating Procedures Ch.3 Clause: 15		
NDoPW: Control Works Manager : Deputy Director	NDoPW: Chief Works Manager	Contractor

**END OF SPECIAL CONDITIONS OF CONTRACT**

It is to be noted that clauses in this specification are referenced from the PA-10 Condition of contract and should any clauses in this specification contrast with those of the PA-10, the clauses in the PA-10 will rule over these.

## 16. TECHNICAL SPECIFICATION

### 16.1. Introduction

This fire protection service specification is for maintenance, servicing of portable and fixed fire equipment (Hose-Reels & Hydrants at various facilities within the uThukela District of Kwa Zulu Natal valid until end of 2024/2025 financial year.

### 16.2. Purpose of this document

To outline the requirements for appointment of a service provider to conduct Servicing, Maintenance and Inspection of fire extinguishers, fire hose reel, fire hoses, fire hydrants and hoses, branches and nozzles at the below identified Facilities within the District only.

### 16.3. Facilities

Department of Justice	South African Police Service	Others
Bergville Colenso Escourt Ekuvukeni Ezakheni Ladysmith Weenen	Bergville ✓ Besters ✓ Cathkin Park Colenso ✓ Ekuvukeni ✓ Elandslaagte ✓ Estcourt ✓ Ezakheni ✓ Klipriver Ladysmith ✓ Loskop Ntabamhlophe ✓ Oliviershoek Upper Tugela ✓ Van Reenen ✓ Weenen ✓ Wembezi ✓ Winterton ✓	Ladysmith Rural Development

### 16.4. Scope of Work

The delivery of this tender will include the following requirements, but not necessarily limited to these:

- a) Servicing, Maintenance and Inspection of fire extinguishers; fire hose reels; fire hoses; branches and nozzles.

### 16.5. Reference Documents

The fire equipment is currently maintained and serviced by in accordance with the National Building Regulations; South African National Standards; National Fire Protection Association Standards and Fire Appliance Services requirements.

## 6. Definitions

The following definitions explain the scope details and specify the requirements expected from the prospective bidder when executing the tasks.

**Inspection:** Inspection is a planned or unplanned assessment to ascertain the operational status and availability of fire equipment. It is intended to give reasonable assurances that the extinguisher is fully charged and operable. This is done by seeing that it is in its designated place; that it has not been actuated or tempered with, and that there is no obvious or physical damages or condition to prevent operation.

**Fixed Fire Equipment:** Fire equipment mounted in a structure.

**Maintenance:** Maintenance is a thorough check of the extinguisher. It is intended to give maximum assurance that an extinguisher will operate effectively and safely. It includes a thorough examination and any repair or replacement. It will normally reveal the need for hydrostatic testing.

**New Equipment:** Should be applied in SANS 1475 and SANS 0105 as and when required.

**Recharging:** Recharging is the replacement of the extinguishing agent and includes the expellant for the relevant type of extinguisher.

### 16.7. CONTRACT SPECIFICATION

- a. Suppliers' premises and service vehicles to be SANS 1475 approved and to be in possession of the required SANS 1475 certificate.
- b. Supplier to have SANS accreditation for hydro static pressure testing of carbon dioxide fire extinguishers.
- c. Supplier's technicians to be in possession of the required SAQCC Certificates.
- d. All portable fire extinguishers and hose reels serviced in buildings shall comply with the requirements contained in SANS 1739; SANS 1901 or SANS 1151 and fire hose reels shall be maintained and serviced in accordance with SANS 0105.
- e. Such fire extinguishers shall be clearly marked by the South African Bureau of Standards to indicate that it has been evaluated by and is acceptable to the SABS.
- f. Any hose reel installed in a building shall comply with the requirements contained in SANS 543, any hose reel so installed shall be positioned to ensure that the end of the hose will reach any point in the area to be protected and shall comply with SANS 10105.
- g. Services intervals: Inspections; maintenance and or servicing shall be done at least once a year in accordance with NFPA 10 on that fire equipment protecting all buildings; or as when dictated by the inspections.
- h. Locations of all fire equipment shall be depicted by the appropriate symbolic signage in accordance with SANS 1186.
- i. Portable fire extinguishers shall comply with TT 37 and hose reels to TT 34 of SANS 10400

- j. No fire equipment shall be removed away from their location for service. A replacement needs to be provided should the need arise; thus, protecting the risk at all times.

#### **16.8. Maintenance Defects**

- a. The tender shall make good, with reference to the contractual agreement, to the satisfaction of National Department of Public Works & Infrastructure. Defective material and/or workmanship which are not in accordance with this specification, and which may appear within two working days, shall be replaced free of charge.
- b. The tender shall undertake work on the rectification of any defects that may arise during the contract period within 3 working days of the service provider being notified by the Facility Management unit in writing of such defects.

#### **16.9. Compliance with OHS Act**

For the purpose of the Occupational Health and Safety Act 1993, (Act No 85 of 1993) “as amended”, the tender is in every respect responsible for the compliance of provision of this Act.

#### **16.10. Warranty**

The items shall carry a warranty period of not less than 06 months (Tenderer to state the warranty period).

#### **16.11. Provision of Services**

The contractor is to supply to the Chief Works Manager original copies of documentation relating to maintenance, pressure testing and inspections undertaken and in addition all equipment removed from site will be covered by documentation. A fire equipment register is to be compiled. Documents shall also serve as a register of all equipment on site which is covered by the Agreement. The Contractor is to report to the Chief Works Manager when entering or leaving the premises. All equipment will be numbered e.g. location and equipment.

#### **16.12. Servicing and Pricing of Fire Extinguishers**

The following items must be checked and at all times adhere to when servicing the extinguishers at the facilities identified.

- a. Sifting of dry Chemical powder to all DCP units (no mixing of powder, only multi-purpose to be used)
- b. Plungers and springs must be checked.
- c. Interior inspection for rust
- d. Pressure testing where necessary

- e. Replace all defective parts
- f. Application of service seals
- g. Application of instruction labels (to be manufactures label)
- h. Recharging of Co2, Dry Chemical Powder and Foam
- i. Numbering of extinguishers according to fire register
- j. Collection and delivery (price per km) to be included in service price.
- k. Head valve over halls including O-rings
- l. Affixing of service labels
- m. Refurbishing – Painting of an Extinguisher if necessary

#### **16.13. Servicing of Fire Hose Reel**

The following items must be checked and at all times when servicing fire hose reels at the identified facilities.

- a. Check the static [municipal feed] and flow pressure
- b. Inspection off drum
- c. Application of anti-tamper seals
- d. Check shutoff nozzles
- e. Inspect hose reel guide
- f. Numbering of hose reels
- g. Numbering of fire hose reels according to register

#### **16.14. Specification for servicing of Fire Hydrants**

The following items must be checked and at all times adhered to when servicing fire hydrants at the identified facilities.

- a. Check condition of “washer” of all hydrants
- b. Report all pitted and rusted Hydrants
- c. All hydrant water pressure to be noted in fire register [Static and Flow Pressure]
- d. Paint and refurbish where necessary
- e. Replace hydrant hand wheel where necessary
- f. Numbering of the fire hydrants according to the fire register

#### **16.15. Specification for servicing of Lay flat Hoses**

The following items must be checked at all times adhered to when servicing lay flat hoses at the identified facilities.

- a. Check overall condition
- b. Unwind hose completely
- c. Check hose binding and coupling
- d. Replace hose washer where necessary
- e. Blank hose washer and couple to fire hydrant

- f. Open valve and check for leaks
- g. Release pressure and drain hose
- h. Rewind hose and place in box
- i. Attach service sticker on box
- j. Lay flat controls nozzle

#### **16.16. Servicing and Maintenance of Dry Powder Trolleys**

- a. Affixing of service label
- b. Affixing of instruction label
- c. Completion of service register

#### **16.17. Servicing of FM200 Systems**

- a. Test - Test complete full testing of the system, discharge test not required, including all ventilation integrations to prove operating in line with the design.
- b. Inspect - Inspect the enclosure of the space (walls, floors, ceilings) to understand if there are any changes to its integrity such as new holes or failed fire stopping, etc. – any issues should be rectified sealing all holes in line with the fire rating of the wall/floor, and room integrity conducted.
- c. Test- Blow through pipework to clear it of any dust and debris that has accumulated over time – in line with the manufacturer's instructions.
- d. Documentation - ensure all documentation is up to date and stored/filed correctly

#### **16.18. Service of Sprinkler Systems**

- a. The sprinkler system shall be periodically inspected by a qualified person at least once a year. The inspection report shall assess whether the system is in accordance with its standards, with regard not limited to maintenance, operation and adequacy for the risk. Where appropriate, a list of deviations shall be issued for action. The criticality of each action shall be identified.
- b. The qualified person is a designated individual, suitably trained, competent through knowledge with experience of all aspects of the rules for Automatic Sprinkler servicing in order to assess systems compliance to standard and be able to perform practical tests if required

#### **16.19. Replacement of Fire Equipment**

All fire fighting equipment that is beyond servicing [condemned] must be listed and this list forwarded to the Chief Works Manager. This fire fighting equipment must be handed to the client for storage. This equipment will be replaced under this same contract.

#### **16.20. Fire Register**

Contractor to supply 2 fire registers for each facility with all necessary information for example quantity, type, location and number, etc.

- b. Failure to complete all parts of the schedule of quantities and prices will render your quotation nonresponsive.

#### 16.22. Quality Control

Contractor shall make do allowance v of 10% in the tender amount for portable appliances only for costs occurring for recharging of extinguishers randomly selected to discharge for testing purposes. Any damage caused to items or building during the service will be repaired at the contractor expenses to the satisfactory of NDPWI. All service labelled must be readable after 12 months.

#### 16.23. Bill of Quantities
