

1. MOTIVATION OF THIS ACQUISITION

Motivation: Procure an accredited service provider for face-face HT Switching and Authorisation Training for 6 officials for 3 days.

2. SPECIFICATION OF GOODS / SERVICE REQUIRED

This course provides skills and tools to ensure compliance to operate high voltage systems and engineering procedures.

This course provides skills in operating regulations for high voltage switching systems.

Understanding high voltage and safe guard electrical apparatus from damage.

How to safeguard the continuity of supply.

The ability to tell the difference between the various earths and when they are used.

A basic background to the Regulations and OHS Act in regards to operating high voltage system.

Responsibilities and duties of authorised persons for access and supervision of sub-stations.

Understand the safety procedures and management in HV operation and maintenance.

Understand the risks management in High Voltage.
