1. INTRODUCTION

The Property Management Trading Entity (PMTE) has been established by the Department of Public Works and Infrastructure (DPWI) to manage the property portfolio of government. As part of its business systems the PMTE uses a number of business automated solutions and services to achieve its strategic objectives.

These critical automated solutions and ICT services store and transmit sensitive departmental data and as such, these solutions must be enabled to communicate on secure platforms to ensure data that is transmitted and transferred between client machines and systems servers and one application to another is secured.

It is for this reason that the department seeks to procure a solution that allows the encryption of data transmitted from the user's client machine to the application server.

The SSL (Secure Sockets Layer) is important to secure the communication between the server and the client machine to prevent data manipulation, eavesdropping and hacking. The SSL certificate encrypts the communication between the server and client and the SSL Wildcard certificate enables us to install the certificate on all the departmental web based systems and services.

Some of the above listed solutions also interface with external systems such as CSD, PERSAL and banking systems.

2. OBJECTIVE OF THIS PROJECT

The Department is looking to appoint a service provider that will be able to provide a *.pmte.org.za, SSL Wildcard certificate that will be valid for a period of 24 months.

3. SCOPE OF WORK

The scope of the quotations contract will be to provide a SSL Wildcard, *.pmte.org.za, certificate that will be valid for a period of 24 months.

4. PRICING

Costing must include price for the provision of a SSL Wildcard, *.pmte.org.za, certificate that will be valid for a period of 24 months.

The total pricing must take into consideration the following:

Product / Service	Quantity	Period	Cost
SSL Wildcard certificate (* .pmte.org.za)	1	24 months	
Total			
15% Vat			
Total incl. Vat			

5. GLOSSARY OF TERMS
